November 4, 2017

Dear Mr. Stucky,

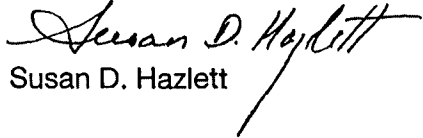

18-CONS-3195-CUIC

I am writing to let you know that I do feel hearings should be held on MidStates Energy Operating's application for injection authority at the Hadl and the Thrasher sites.

My degree in Biology/Conservation Ecology has always made me aware of how we may be killing and harming the earth and its living organisms but in this case I want to concentrate on a personal concern. I own a 157 acre farm with grazing cattle in DC Section 27 at 1700 Rd x. 458, just 2miles due west of the injection sites. I am concerned about ground water contamination and the potential for increased seismic activity due to these injections.

I am more than happy to speak at these hearings.

Sincerely,

Susan D. Hazlett
