RECEIVED

Dear Sirs:

I received your letter dated 5/28/14 regarding this well and also received a call from Mr. J. Hunt Hawkins about the same time. He and I discussed the fact that there was no information in Te-Pe's well files which pertained to this SWD, that has been a surprise to me since we have the well files on the Carter and Kramer. Some date back to original wells drilled in 1916 and still producing. That makes me suspicious that neither the previous owners of the Carter lease, Ace Operating and or Sampson Resources were ever notified of the SWD's existence.

I asked for and received a well diagram and also a current copy of their MIT. I also pulled a copy of the wells completion card when it was drilled. If you could also send me a copy of their order for our files it would be helpful. Thank you.

In closing, Te-Pe Oil & Gas has no objection at this time to the request of Hawkins Oil, LLC. concerning their Scully A-#3 well Docket # D-22,171 which was recently received by us.

Sincerely,

Terry P. Bandy
Owner/Operator
