FAXED to: (316) 337-6211

To Whom it May Concern:

This statement is in response to the Application for Injection Well (API # 15-035-20,867) from Operator Double "D" Oil Company, Inc., dated February 7, 2020. The application is for the lease name Moon B, well number Hwrd Moon #1, in field name Frog Hollow, Cowley County, Kansas.

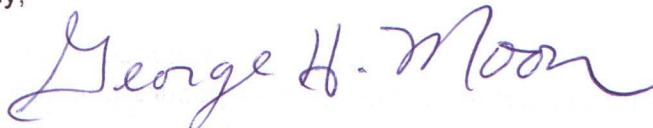

I am the owner of Moon B. I have owned this land since 1977, which was deeded to me when our mother passed away. The mineral rights of Moon B were left to me by my father, Howard Moon, in 1997.

I submit this letter after much thought and consultation with my family, who live there, and have submitted their own considerable concerns in their letter dated March 3, 2020. I am in complete agreement with, and supportive of, the concerns communicated by Allyson and Roger Moon (my brother) and Roger's son, Garth Moon.

The Moons have been on this land continuously since purchasing it in 1905. Garth is well established on the farm, with his children representing the fifth generation on this land. It is important to our family to protect our land and water from possible contamination and damage from oil activity. Therefore, I join in the letter of protest against the approval of this application.

Questions about this statement may be directed to me at (816) 630-5119, or at my address which appears above.

Respectfully,

Cc: Allyson and Roger Moon
Garth Moon
