OTHER BILLING PROVISIONS

- **A.** Energy Cost Adjustment: The Energy Cost Adjustment, Schedule ECA is applicable to all electric rate schedules.
- B. Ad Valorem Tax Surcharge: The Ad Valorem Tax Surcharge Schedule AVE is applicable to all electric rate schedules.
- C. Transmission Service Cost Adjustment: The Transmission Service Cost Adjustment, Schedule TSCA is applicable to all retail rate schedules.
- **D. Fixed Charge Pro-ration:** In the event Customers initiate or terminate service at times not coincident with regular billing periods, any applicable Customer Charge, Demand Charge or Horsepower Charge specified in the rate schedule under which the Customer takes service shall be pro-rated to the actual days of service.
- **E.** Line Extension Charges: Line extension charges shall be calculated according to the line extension policy contained in the Company's Rules and Regulations. Any line extension charge shall be in addition to charges specified in the applicable rate schedule and Master Tariff.
- **F. Billing Demand:** The demand level used to calculate bills (kW, kVA, or Horsepower) may differ from the actual monthly demand reading, and is set forth in the applicable rate schedule.
- G. Seasonal Billing Periods: When seasonal rates are specified, summer period rates shall apply to bills dated between July 1st and September 30th, inclusive. Winter period rates shall apply to bills dated between October 1st and June 30th, inclusive.
- H. Optional Rates and Riders: It shall be the Customer's responsibility to notify the Company of Customer's desire to take service under any rate or rider labeled as "optional" or which gives the Customer the right to elect service under that rate or rider.

RESIDENTIALS	SERVICE				

AVAILABLE

At locations on the Company's existing primary distribution system.

APPLICABLE

To a single-family residential dwelling unit supplied through one meter for domestic use and ordinary farm use when the farm use is supplied through the domestic use meter. Ordinary farm use is defined as normal farming activities and production for one's own use or sale and does not include production or processing for commercial purposes. This schedule is also applicable for separately metered buildings, incidental to the residential dwelling and not used for commercial purposes.

This schedule is not applicable for residential use where such use is for commercial, professional, or any other gainful enterprise other than ordinary farming; however, if the domestic and ordinary farm use can be separately metered, this schedule is applicable to the metered domestic and ordinary farm portion of energy use.

A residence in which four sleeping rooms or more are rented or are available for rent or lease, is considered nondomestic and the applicable General Service schedule will apply.

CHARACTER OF SERVICE

Alternating current, approximately 60 cycles, single-phase, at nominal voltages of 120 or 120/240 volts. Three-phase service may be supplied at the Company's option.

MONTHLY RATE

Charges equivalent to the sum of all components itemized in the currently effective Master Tariff, plus applicable adjustments specified therein.

RESIDENTIAL TOTAL ELECTRIC SERVICE

AVAILABLE

At locations on the Company's existing primary distribution system.

APPLICABLE

This rate schedule may be elected by any urban or farm and rural residential Customer, provided that electric service is the primary source of energy in the home and that Customer has in regular use an electric range, electric water heater and electric space heating. The use of alternate sources of energy, such as solar, wind, etc., that are considered by the Company to be from renewable sources, will not disqualify a Customer from receiving service under this rate schedule. The use of natural gas or propane gas for incidental or aesthetic purposes such as gas lights, outdoor cooking appliances, gas logs or gas fireplaces will not disqualify a Customer from receiving service under this rate schedule. All service is measured through a single watt-hour meter.

CHARACTER OF SERVICE

Alternating current, approximately 60 cycles, single-phase, at nominal voltages of 120 or 120/240 volts. Three-phase service may be supplied at the Company's option.

MONTHLY RATE

Charges equivalent to the sum of all components itemized in the currently effective Master Tariff, plus applicable adjustments specified therein.

- 1. Individual motor units can not exceed ten (10) horsepower, unless otherwise agreed upon prior to installation.
- 2. Service hereunder is subject to the Electric Terms and Conditions of the Company on file with The State Corporation Commission of Kansas.

NON-DOMESTIC ANNUAL SERVICE

AVAILABLE

At locations on the Company's existing primary distribution system.

APPLICABLE

At the Company's option, this schedule may be made available for intermittent or seasonal service, such as electric powered water pumps, fence chargers, stock tank heaters, welders, incidental lighting, machine sheds, storage facilities, signs, other non-domestic equipment, and non-domestic buildings. Service under this schedule will not be applicable where premises are regularly occupied as living quarters. Service under this schedule can not exceed 2000 kWh annually. Customers using more than 2000 kWh annually will be billed under the applicable General Service rate schedule.

CHARACTER OF SERVICE

Alternating current, approximately 60 cycles, single-phase, at nominal voltages of 120 or 120/240 volts.

ANNUAL BILLING PERIOD

The electric service rate set forth hereunder is based on a twelve-month service year. The energy use for the preceding twelve-month period and the annual Customer Charge will be billed to the Customer during the anniversary month of the account.

ANNUAL RATE

Charges equivalent to the sum of all components itemized in the currently effective Master Tariff, plus applicable adjustments specified therein.

NON-DOMESTIC ANNUAL SERVICE

SERVICE PROVISION

- 1. The Company will read meters once each year, at or near the close of the service year, and all energy consumed during such period from the last meter reading will be billed at the foregoing rate. Such billings will be adjusted to include the ECA factor applicable during the month of billing.
- 2. In the event a Customer discontinues service prior to the close of a service year, the prepaid Customer Charge will be refunded on a prorated basis.

CONTRACT PERIOD

Service will not be provided under this schedule for less than one (1) year, or such terms as may be specified in the Electric Service Agreement between the Customer and the Company.

- 1. Individual motor units cannot exceed ten (10) horsepower, unless otherwise agreed upon prior to installation.
- 2. Service hereunder is subject to the Electric Terms and Conditions of the Company on file with The State Corporation Commission of Kansas.

GENERAL SERVICE SMALL

AVAILABLE

At locations on the Company's existing primary distribution system.

APPLICABLE

To any Customer having a maximum demand during the billing months of July, August or September of less than thirty (30) kilowatts (kW), for all power and energy uses at any one location where service of a single character is taken through one meter at one point of delivery for which no specific schedule is provided. Customers having a maximum demand greater than 100 kW in non-summer months may not take service under this schedule.

CHARACTER OF SERVICE

Alternating current, approximately 60 cycles, single-phase, at nominal voltages of 120 or 120/240 volts. Three-phase service may be supplied at the Company's option.

MONTHLY RATE

Charges equivalent to the sum of all components itemized in the currently effective Master Tariff, plus applicable adjustments specified therein.

- 1. At the Company's discretion, loads of greater than thirty (30) kW in the billing months of July, August or September, such as ball field lighting, may be served under this schedule if the Company determines that the load to be served will not contribute to the Company's annual system peak kW responsibility. In such cases, a demand meter may not be installed.
- 2. Individual motor units cannot exceed ten (10) horsepower at locations with single phase service, unless otherwise agreed upon prior to installation.
- 3. Service hereunder is subject to the Electric Terms and Conditions of the Company on file with The State Corporation Commission of Kansas.

GENERAL SERVICE SMALL-DEMAND RATE (Optional Demand Metered Rate)

AVAILABLE

At locations on the Company's existing primary distribution system.

APPLICABLE

To any Customer having a maximum demand during the billing months of July, August or September of less than thirty (30) kilowatts (kW), for all power and energy uses at any one location where service of a single character is taken through one meter at one point of delivery for which no specific schedule is provided. Customers having a maximum demand in non-summer months of greater than 100 kW may not take service under this schedule.

This schedule is available to qualifying Customers who have signed an Electric Service Agreement having a minimum term of one (1) year.

CHARACTER OF SERVICE

Alternating current, approximately 60 cycles, single-phase, at nominal voltages of 120 or 120/240 volts. Three-phase service may be supplied at the Company's option.

MONTHLY RATE

Charges equivalent to the sum of all components itemized in the currently effective Master Tariff, plus applicable adjustments specified therein.

DETERMINATION OF KW BILLING DEMAND

The billing demand kW will be the highest average fifteen (15) minute kW demand measured during the period for which the bill is rendered, but not less than 5.0 kW.

Sheets Sheet

GENERAL SERVICE SMALL-TIME OF DAY (Optional Time of Day Rate)

LOAD SHEDDING

It is the sole responsibility of the Customer to shed loads, either manually or automatically, to reduce consumption during the on-peak periods. The Company will not be required to notify the Customer of the beginning or end of on-peak periods.

POWER FACTOR

If the average power factor for the month (determined by permanent measure, or by test under normal operating conditions) is less than ninety (90) percent lagging, the energy charge will be increased one (1) percent for each one (1) percent by which the average power factor is less than ninety (90) percent lagging.

- 1. At the Company's discretion, loads of greater than thirty (30) kW during the billing months of July, August and September, such as ball field lighting, may be served under this schedule if the Company determines that the load to be served will not contribute to the Company's annual system peak kW responsibility.
- 2. Individual motor units cannot exceed ten (10) horsepower at locations with single phase service, unless otherwise agreed upon prior to installation.
- 3. The Company, at it's sole discretion, may install time of day metering devices capable of sensing or receiving temperature data. If such devices are installed, the on-peak energy charge shall apply to only those kWh used during the on-peak period when the temperature threshold has been met or exceeded.
- 4. Service hereunder is subject to the Electric Terms and Conditions of the Company on file with The State Corporation Commission of Kansas.

GENERAL SERVICE MEDIUM

AVAILABLE

At locations on the Company's existing primary distribution system.

APPLICABLE

To any customer having a maximum demand during the billing months of July, August, or September of at least 30 kilowatts (kW) but not more than 200 kW for all power and energy uses at any one location where service of a single character is taken through one meter at one point of delivery for which no specific schedule is provided. The maximum demand under this schedule for non-summer billing months is 300 kw.

CHARACTER OF SERVICE

Alternating current, approximately 60 cycles, single-phase, at nominal voltages of 120, or 120/240 volts. Three-phase service may be supplied at the Company's option.

MONTHLY RATE

Charges equivalent to the sum of all components itemized in the currently effective Master Tariff, plus applicable adjustments specified therein.

Determination of kW Billing Demand

The billing demand kW will be the highest of A, B, or C below:

- A. The highest average fifteen (15) minute kW demand measured during the period for which the bill is rendered; or
- B. Eighty (80) percent of the highest average fifteen (15) minute kW demand measured during any of the periods for which bills are rendered in the previous billing months of July, August, or September; or
- C. Twenty-four (24) kW

GENERAL SERVICE MEDIUM

Alternate Rate

Customers taking service under this schedule may be metered with a kilovolt-amp (kVA) demand and energy meter in lieu of a standard kW demand and energy meter. KVA metering may be initiated by either the Customer or the Company, and once installed, will not be removed without the consent of both parties.

Determination of kVA Billing Demand

The billing demand kVA will be the highest of A, B, or C below:

- A. The highest average fifteen (15) minute kVA demand measured during the period for which the bill is rendered; or
- B. Eighty (80) percent of the highest average fifteen (15) minute kVA demand measured during any of the periods for which bills are rendered in the previous billing months of July, August, or September; or
- C. Twenty-six and seven tenths (26.7) kVA.

MINIMUM BILL (Standard or Alternate Rate)

The customer charge, plus the demand charge, plus all applicable adjustments, taxes, and surcharges.

- A. In the event that a Customer billed under this Schedule enters the winter billing period with no immediately preceding summer billing period actual demand readings of 30 kW (33.3 kVA) or more, that Customer may thereafter be billed under a General Service Small schedule until the subsequent summer period demand readings dictate use of this Schedule. However, no such rate reclassification may occur if the Customer is bound by a line extension contract to this Schedule.
- B. Service hereunder is subject to the Electric Terms and Conditions of the Company on file with State Corporation Commission of Kansas.

GENERAL SERVICE LARGE – TIME OF DAY (Optional Time of Day Rate)

AVAILABLE

At locations on the Company's existing primary distribution system for Customers that would otherwise be General Service Medium or General Service Large Customers.

APPLICABLE

To any Customer having a maximum demand during the calendar months of June, July or August of thirty (30) kilowatts (kW) or more, for all power and energy uses at one location where service of a single character is taken through one meter at one point of delivery for which no specific schedule is provided.

CHARACTER OF SERVICE

Alternating current, approximately 60 cycles, single phase, at nominal voltages of 120 volts or 120/240 volts. Three phase service may be supplied at the Company's option.

MONTHLY RATE

Charges equivalent to the sum of all components itemized in the currently effective Master Tariff, plus all applicable adjustments specified therein.

Determination of kW Billing Demand

The billing demand kW will be the highest of A, B, or C below:

- A. The highest average fifteen (15) minute kW demand measured during the period for which the bill is rendered; or
- B. Eighty (80) percent of the highest average fifteen (15) minute kW demand measured during any of the periods for which bills are rendered in the previous eleven (11) billing months; or
- C. Twenty-four (24) kW.

Sheets of

GENERAL SERVICE HEATING

(Optional Electric Space Heating Rate)

AVAILABLE

At locations on the Company's existing primary distribution system, for Customers that would otherwise be General Service Medium or General Service Large Customers.

APPLICABLE

To General Service Large (GSL) Customers utilizing at least ten (10) kilowatts (kW) or more of permanently installed, thermostatically controlled, electric space heating equipment, and where the connected space heating load is not less than thirty (30) percent of the total connected load. Customer's energy use pattern must, in Company's sole discretion, indicate actual use of electric space heating and a balance of summer and winter loads, or a predominant winter load. In the event a Customer's connected electric space heating load is separately metered, the service (kW and kWh) supplied through the heating service meter will be added to the general service meter and billed under this schedule as though all of the service was supplied through one (1) meter.

CHARACTER OF SERVICE

Alternating current, approximately 60 cycles, single-phase, at nominal voltages of 120 or 120/240 volts. Three-phase service may be supplied at the Company's option.

MONTHLY RATE

Charges equivalent to the sum of all components itemized in the currently effective Master Tariff, plus applicable adjustments specified therein.

Determination of Billing Demand

The billing demand will be the highest of A or B below:

- A. The highest average fifteen (15) minute kW demand measured during the period for which the bill is rendered; or
- B. Twenty-four (24) kW.

OIL FIELD SERVICE

MONTHLY RATE (continued)

Alternate Rate

Customers taking service under this schedule may be metered with a kilovolt-amp (kVA) demand and energy meter in lieu of a standard kilowatt (kW) demand and energy meter. KVA metering may be initiated by either the Customer or the Company, and once installed, will not be removed without the consent of both parties.

Determination of kVA Billing Demand

The billing demand kVA will be the highest of A, B, or C below:

- A. The highest average fifteen (15) minute kVA demand measured during the period for which the bill is rendered; or
- B. The highest average fifteen (15) minute kVA demand measured during any of the periods for which bills are rendered in the previous billing months of July, August, or September; or
- C. Eleven and one tenth (11.1) kVA.

Minimum (Standard or Alternate Rate)

The demand charge plus all applicable adjustments, taxes and surcharges.

OIL PRICE INDEXED ELECTRIC RATE RIDER

COST ESCALATOR

The product of multiplying monthly kilowatt-hours used by that month's oil production cost smoothing adjustment will yield the "Monthly Balance." The sum of all previous Monthly Balances yields the "Accumulated Balance." On the first day of Customer's monthly billing cycle, the Accumulated Balance, if any, will be subject to a cost escalation of 0.8% (approximately 10% per year). If Customer elects to dispose of the Accumulated Balance early, no penalty will be imposed and cost escalation for the last month's Accumulated Balance will be prorated for only that portion of the month prior to early disposition of the Accumulated Balance.

ACCUMULATED BALANCE DISPOSITION

In the event a Customer elects to discontinue service under the Rider for any reason at any location while owing the Company an Accumulated Balance, the Customer must dispose of the Accumulated Balance by choosing one of the following options:

- Request a transfer of the Accumulated Balance to another active Non-Residential account in the Customer's name, or
- b. Enter mutually agreeable terms to pay Accumulated Balance to Company, or
- c. If applicable, obtain a notarized affidavit from the new lease owner or operator ("New Customer") in which the New Customer acknowledges the existence of and agrees to pay the Accumulated Balance under terms acceptable to the Company, or
- d. Credit positive Monthly Balances against the Accumulated Balance until Accumulated Balance reaches zero.

OIL PRICE INDEXED ELECTRIC RATE RIDER

CONTRACT TERM

- 1. Any Customer electing service under the Rider must remain on the Rider for no less than 12 months. Participating Customers may discontinue service under the Rider at any time after 12 months, subject to disposition of the Accumulated Balance.
- 2. Unless the Accumulated Balance is otherwise disposed of as provided above, the Customer must remain on the Rider until the Accumulated Balance is offset completely by positive Monthly Balances. When the Accumulated Balance reaches zero, this Rider will no longer be effective until again elected by the Customer in a subsequent low oil price period.

OTHER TERMS AND CONDITIONS

- This Rider may not be used in conjunction with any discounted tariff.
- 2. Nothing in this Rider shall prevent Company from pursuing any legal means to collect past due amounts or Accumulated Balances not settled in accordance with this Rider.
- 3. Company may request KCC approval to modify or discontinue this Rider at any time. Any such request by the Company shall not void Customer's obligation to pay the Accumulated Balance.
- 4. Unless specifically modified herein, all other provisions of the applicable rate schedule and the Company's Electric Terms and Conditions will remain in effect and may be changed upon Company application and KCC approval.

IRRIGATION SERVICE – FROZEN

AVAILABLE

To Customers located adjacent to the Company's existing multi-phase lines for electric power and accompanying energy to be used for irrigation well pumping and other incidental uses. This schedule is available only at existing active locations where service was furnished on January 1, 1990. New connections, reconnections and line extensions are not available under this schedule. Locations meeting the January 1, 1990 eligibility threshold may alternately take service under Time of Day Irrigation Service, Schedule IG-TOD, on an annual basis and return to this schedule in later years.

APPLICABLE

To qualifying Customers for irrigation well pumping and other incidental uses.

CHARACTER OF SERVICE

Service hereunder will be multi-phase, approximately 60 cycles. At the Company's option, single-phase service may be provided when in the judgment of Company, providing such single-phase service will not diminish the quality of service to other Customers.

MONTHLY RATE

Charges equivalent to the sum of all components itemized in the currently effective Master Tariff, plus applicable adjustments specified therein.

MINIMUM MONTHLY CHARGE

The minimum monthly charge will be \$3.00 per connected kW, but not less than \$20.00 per month, plus any applicable customer charges.

IRRIGATION SERVICE - FROZEN

DETERMINATION OF kW BILLING DEMAND

The billing demand kW will be the highest of A, B or C below:

- A. The highest average fifteen (15) minute kW demand measured during the peiod for which the bill is rendered; or
- B. The highest average fifteen (15) minute kW demand measured during any of the periods for which bills are rendered in the previous billing months of July, August or September; or
- C. Seven (7) kW.

POWER FACTOR

If the average power factor for the month (determined by permanent measure, or by test under normal operating conditions) is less than ninety (90) percent lagging, the connected horsepower will be increased one (1) percent for each one (1) percent by which the average power factor is less than ninety (90) percent lagging.

SPECIAL CONDITIONS

- A. The Company will own and operate all electric facilities installed by the Company. The Company will furnish the meter complete with meter socket and service drop to a point to be agreed on between Customer and Company.
- B. The Customer's equipment must include entrance facilities, phase imbalance and loss of phase protection devices, overload protection devices, starter wiring and meter loop wiring, all to be built and installed in accordance with the National Electrical Safety Code.
- C. If the Customer has two (2) or more irrigation wells connected to one (1) transformer bank, the Customer, at his option, will pay for service as follows:
 - 1. The Customer may have a meter for each well, or
 - 2. The Customer may have one (1) meter to register the kilowatt-hours, and the horsepower charges will be based on the total connected horsepower.

INCIDENTAL IRRIGATION - ANNUAL SERVICE

AVAILABLE

At locations on the Company's existing primary distribution system.

APPLICABLE

To Customers for sprinkler drives, tail water pumps and any other use incidental to irrigation pumping where service of a single character is taken through one meter at one point of delivery. This schedule does not apply to irrigation pumping.

CHARACTER OF SERVICE

Alternating current, approximately 60 cycles, single-phase, at nominal voltages of 120 or 120/240 volts. Three-phase service may be supplied at the Company's option.

ANNUAL BILLING PERIOD

The electric service rate set forth hereunder is based on a twelve-month service year. The energy use for the preceding twelve-month period and the annual Customer Charge will be billed to the Customer during the anniversary month of the account.

ANNUAL RATE

Charges equivalent to the sum of all components itemized in the currently effective Master Tariff, plus applicable adjustments specified therein.

INCIDENTAL IRRIGATION - ANNUAL SERVICE

SERVICE PROVISION

- 1. The Company will read meters once each year, at or near the close of the service year, and all energy consumed during such period from the last meter reading will be billed at the foregoing rate. Such billings will be adjusted to include the ECA factor applicable during the month of billing.
- 2. In the event a Customer discontinues service prior to the close of a service year, the prepaid Customer Charge will be refunded on a prorated basis.

CONTRACT PERIOD

Service will not be provided under this schedule for less than one (1) year, or such terms as may be specified in the Electric Service Agreement between the Customer and the Company.

OTHER TERMS AND CONDITIONS

- 1. Individual motor units cannot exceed ten (10) horsepower at locations with single phase service, unless otherwise agreed upon prior to installation.
- 2. Service hereunder is subject to the Electric Terms and Conditions of the Company on file with The State Corporation Commission of Kansas.

No supplement or separate understanding shall modify the tariff as shown hereon.

ENERGY COST ADJUSTMENT

Sheet

APPLICABLE

The Energy Cost Adjustment Clause (ECA) is applicable to all of the Company's electric rate schedules.

COMPUTATION FORMULA

The rates for energy to which this adjustment is applicable will be increased or decreased by .001¢ per kilowatt-hour (kWh) for each .001¢ (or major fraction thereof) increase or decrease in the aggregate cost of energy per kWh as computed by the following formula:

$$C \times \frac{P}{S} - b = Adjustment$$

Where:

- C = The actual total cost of purchased power and energy, Account No. 555, and the fossil fuel burned in generation Account Nos. 501 and 547 expressed in ¢/kWh for the latest month for which data is available.
- b = Actual energy cost (purchased power and energy plus fuel burned in generation) in ¢/kWh established during the base period. For the M System, this is 5.0085¢/kWh, as established during the base period of July 1st 2006 through June 30th 2007.
 - For the W System, the base is $4.7432 \epsilon/k$ Wh as established during base period of July 1st 2006 through June 30th 2007.
- P = Actual purchased energy and net generation expressed in kWh for the most recent twelvemonth period ended December 31st.
- S = Actual sales in kWh for the most recent twelve-month period ended December 31st.¹

TRANSMISSION SERVICE CHARGE ADJUSTMENT RIDER

Applicable

The Transmission Service Charge Adjustment (TSCA) Rider is applicable to the Company's retail electric rate schedules and special contracts where specifically identified.

<u>Unbundled Transmission Rate – The Transmission Service Charge</u>

For unbundled retail service, the Company shall charge per unit transmission service charges based on the transmission revenue requirement established in Docket No. 08-MDWE--RTS ("This Docket"). The Annual Transmission Revenue Requirement (ATRR) as established is \$5,550,089 (see Annex 1).

The Retail portion of the Annual Transmission Revenue Requirement (RATRR) is calculated by reducing the ATRR for transmission system revenue received for non-native load use of the transmission system (all accounts under 456.20). In this Docket, the payments made for non-native use of the transmission system totaled \$2,031,735. The RATRR established in this Docket is \$3,518,354.

This RATRR is allocated to all retail customer classes with a per unit charge established for each customer class as follows:

- 1. A cents per kilowatt hour (kWh) charge determined by dividing the portion of the RATRR allocated to that customer class by the annual applicable kWh sales for that rate schedule;
- 2. A dollar per fixture per month charge (for lighting schedules) calculated by taking the allocated RATRR and dividing by the annual kWh sales attributable to the lighting class and then multiplying by the monthly kWh consumed by the fixture.

Per Unit Charges for Transmission Rates – The Base Transmission Service Charge

The rates established in this Docket include recovery of the RATRR (i.e. the base Transmission Service Charge). The charges in the following table shall be applied to a Customer's consumption as indicated. These are the Transmission Service Charges by rate class. The amount determined by the application of such unit charge shall become a part of the total bill for electric service furnished and will be itemized separately on the Customer's bill.

Annual Adjustment to the Transmission Service Charge

No later than the last business day of April, Company will file the calculation of its Annual Transmission Revenue Requirement calculation (Annex 1) with the Commission. The ATRR will be filed in accordance with the Formula Transmission Rate Template (Annex 2) attached. Based on changes to its RATRR, an adjustment to the per unit transmission service charge will be included on bills rendered on or after June 1 of each year.

THE	STATE	CORPORATION	COMMISSION	OF KANSAS

THE STATE CORPORATION COMMISSION OF KANSAS	Index No97
MIDWEST ENERGY, INC.	SCHEDULE TSCA
(Name of Issuing Utility) Company Wide	Replacing Schedule Initial Sheet 3
(Territory to which schedule is applicable)	which was filed
No supplement or separate understanding shall modify the tariff as shown hereon.	Sheet 3 of 4 Sheets

TRANSMISSION SERVICE CHARGE ADJUSTMENT RIDER

Calculation of the Adjustment to the Transmission Service Charge

As established in this Docket, the Company's initial RATRR is \$3,518,354. Dividing the RATRR by the retail sales in the year corresponding to the RATRR yields the average retail transmission cost. In this Docket, the average retail transmission cost is \$0.002950 per kWh. Each year, the Company will recalculate its average retail transmission cost by dividing the new annual RATRR calculated in accordance with the following procedure by the corresponding retail sales volumes. If the updated average retail transmission cost is less than \$0.002950 per kWh, retail customers will receive a reduction from the base year Transmission Service Charge on their monthly bill equal to the difference between \$0.002950 per kWh less the new average retail transmission cost. If the updated average retail transmission cost is more than \$0.002950 per kWh, retail customers will pay a higher Transmission Service Charge on their monthly bill equal to the updated average retail transmission cost minus \$0.002950 per kWh. The reduction or increase to the Transmission Service Charge shall continue on customers' bills until the average retail transmission cost is updated at the subsequent annual adjustment.

Calculation of the Updated Transmission Service Charge

The rates for energy to which this adjustment is applicable will be increased or decreased by \$0.000001 per kWh for each \$0.000001 (or major fraction thereof) increase or decrease in the average retail transmission cost. The Transmission Cost Adjustment to the TSCA is calculated as follows:

1. The Average Retail Transmission Cost is updated;

ARTC = (RATRR +/- the ACR)/Annual kWh Retail Sales

Where:

RATRR = Retail Annual Transmission Revenue Requirement

ACR = Annual Cost Remainder: difference between the Retail Annual Transmission Revenue Requirement established in the prior year, and the actual transmission cost recovery (from the Transmission Service Charge) during the prior year. An under recovery of the RATRR from the prior year will result in a positive value for the ACR and increase the revenue requirement for the next year, whereas a negative value means costs were over recovered and result in a decrease in revenue requirement for the next year.

TRANSMISSION SERVICE CHARGE ADJUSTMENT RIDER

2. The Transmission Service Charge Adjustment (TSCA) is calculated:

ARTC-b=TSCA

Where:

b = The base or average retail transmission service charge (\$0.002950 per

kWh) as established in this Docket.

TSCA = The Transmission Service Charge Adjustment – this is the adjustment to

made each year to the Transmission Service Charge for each Rate Class.

Timing

On bills rendered after June 1, the Transmission Service Charge appearing on unbundled bills will be updated to reflect the TSCA.

Reporting Requirements

When the filing to update the Annual Adjustment to the Transmission Service (last business day of April), the Company will submit to the Commission a report detailing by customer class the sales volumes, monthly Transmission Service Charge, and Transmission cost recovery by month for the prior calendar year.

Notes

- A Electric portion only
- B Exclude Construction Work in Progress and leases that are expensed as O&M (rather than amortized). New Transmission plant included in the SPP Regional Transmission Expansion Plan (RTEP) which is expected to be placed in service in the current calendar year weighted by number of months it is expected to be in-service. New Transmission plant expected to be placed in service in the current calendar year that is not included in RTEP must be separately detailed on Attachment 5. For the true-up, new transmission plant which was included in the SPP RTEP actually placed in service weighted by the number of months it was actually in service
- C Transmission Portion Only
- D All EPRI Annual Membership Dues.

- Goodmen Energy Service is included in CWIP and should be excluded. See Cost Support for amount that is excluded.

- On Payments made under Schedule 12 of the SPP OATT are excluded in Transmission O&M on line 53 since they are already assessed under Schedule 12
- Appropriate adjustments to the capital structure may be made to reflect state authorized issuances of securitized bonds. Any such adjustments must be supported in the Section 205 filing seeking application of this formula

ANNEX 2 TO SCHEDULE TSCA FORMULA RATE IMPLEMENTATION PROTOCOLS

Section 1 Annual Updates

- A. The Annual Transmission Revenue Requirements applicable under Appendix A shall be applicable to services on and after June 1 of a given calendar year through May 31 of the subsequent calendar year (the "Rate Year").
- B. On or before April 30 of each year, Midwest Energy shall recalculate its Annual Transmission Revenue Requirements, producing the "Annual Update" for the upcoming Rate Year, and post such Annual Update on SPP's Internet website via link to the Transmission Services page or a similar successor page.
- C. If the date for making the Annual Update posting/filing should fall on a weekend or a holiday recognized by the FERC, then the posting/filing shall be due on the next business day.
- D. The date on which the last of the events listed in Section 1.b or 1.c occurs shall be that year's "Publication Date."
- E. Upon written request for a particular year's Annual Update by any load serving entity whose customers are allocated costs of the Midwest Energy facilities, any state utility commission in which customers that are allocated costs of the Midwest Energy facilities are located, or any of the state utility commissioners or consumer advocates who represent customers that are allocated costs of the Midwest Energy facilities (collectively "Interested Parties"), Midwest Energy will promptly make available to such entity and/or a consultant designated by it, a "workable" Excel file containing that year's Annual Update data.

F. The Annual Update for the Rate Year:

- (i) shall, to the extent specified in the Formula Rate, be based upon Midwest Energy's FERC Form No. 1 data for the most recent calendar year, and to the extent specified in the Formula Rate, be based upon the books and records of Midwest Energy consistent with FERC accounting policies;
- (ii) shall, as and to the extent specified in the Formula Rate, provide supporting documentation for data not otherwise available in the FERC Form No. 1 that are used in the Formula Rate;¹
- (iii) shall provide notice of material changes in Midwest Energy's accounting policies and practices from those in effect for the calendar year upon which the immediately preceding

¹ It is the intent of the Formula Rate, including the supporting explanations and allocations described therein, that each input to the Formula Rate will be either taken directly from the FERC Form No. I or reconcilable to the FERC Form No. 1 by the application of clearly identified and supported information. Where the reconciliation is provided through a worksheet included in the filed Formula Rate template, the inputs to the worksheet must meet this transparency standard, and doing so will satisfy this transparency requirement for the amounts that are output from the worksheet and input to the main body of the Formula Rate.

Annual Update was based ("Material Accounting Changes")2;

- (iv) shall be subject to challenge and review only in accordance with the procedures set forth in this Annex and only as to the appropriateness of the application of the Formula Rate according to its terms and the procedures in this Annex (including terms and procedures related to challenges concerning Material Accounting Changes); and
- (v) shall not seek to modify the Formula Rate and shall not be subject to challenge by any party seeking to modify the Formula Rate (i.e., all such modifications to the Formula Rate including return on equity will require, as applicable, a Kansas Corporation Commission (KCC) filing).
- G. Formula Rate inputs (i) rate of return on common equity, (ii) depreciation rates, and (iii) "Post-Employment Benefits other than Pension" pursuant to Statement of Financial Accounting Standards No. 106, Employers" Accounting for Postretirement Benefits Other Than Pensions ("PBOP") charges shall be stated values to be used in the rate formula until changed pursuant to a KCC filing; provided, however, that notwithstanding the foregoing limitation, any changes in PBOP charges that do not exceed an impact on the formula output Net Zonal Revenue Requirement for Midwest Energy of 2.5% as compared to the immediately preceding Annual Update may be included in an Annual Update without such a filing.

Section 2 Annual Review Procedures

n sa de la

Each Annual Update shall be subject to the following review procedures ("Annual Review Procedures"):

- A. Interested Parties shall have up to one hundred fifty (150) days after the Publication Date (unless such period is extended with the written consent of Midwest Energy) to review the calculations ("Review Period") and to notify Midwest Energy in writing of any specific challenges, including challenges related to Material Accounting Changes, to the application of the Formula Rate ("Preliminary Challenge").
- B. Interested Parties shall have up to one hundred twenty (120) days after each annual Publication Date (unless such period is extended with the written consent of Midwest Energy) to serve reasonable information requests on Midwest Energy; provided, however, that the potentially Interested Parties shall make a good faith effort to submit consolidated sets of information requests that limit the number and overlap of questions to the maximum extent practicable. Such information requests shall be limited to what is necessary to determine if Midwest Energy has properly applied the Formula Rate and the procedures in this Annex, and be directed to ascertaining whether the Formula Rate is just and reasonable. In addition, such information requests shall not solicit information concerning costs or allocations where the costs or allocation method have been determined by the KCC or in the context of other Annual Updates, except that such information requests shall be permitted if they seek to determine if there has been a material change in circumstances.

² Such notice may incorporate by reference applicable disclosure statements filed with the Securities and Exchange Commission ("SEC").

- C. Midwest Energy shall make a good faith effort to respond to information requests pertaining to the Annual Update within fifteen (15) business days of receipt of such requests. Midwest Energy may give reasonable priority to responding to requests that satisfy the practicable coordination and consolidation provision of Section 2.B above.
- D. Preliminary or Formal Challenges related to Material Accounting Changes are not intended to serve as a means of pursuing other objections to the Formula Rate. Failure to make a Preliminary Challenge with respect to a Material Accounting Change in an Annual Update shall act as a bar with respect to that Annual Update but shall not bar a subsequent Preliminary Challenge related to a subsequent Annual Update to the extent such Material Accounting Change affects the subsequent Annual Update.
- E. Preliminary or Formal Challenges related to Material Accounting Changes shall be subject to the resolution procedures and limitations in Section 3, except that Section 3.c. shall not apply. In any proceeding initiated to address a Preliminary or Formal Challenge or sua sponte by the KCC, a party or parties (other than Midwest Energy) seeking to modify the Formula Rate in any respect shall bear the burden of proving that the Formula Rate is no longer just and reasonable without such modification and that the proposed modification is just, reasonable and consistent with the original intent of the Formula Rate and the procedures in this Annex; provided, however, that in any such proceeding, in determining whether the Formula Rate is no longer just and reasonable without modification to reflect a Material Accounting Change and whether the proposed modification is just and reasonable, no offsets unrelated to the applicable Material Accounting Changes may be considered.

Section 3 Resolution of Challenges

- A. If Midwest Energy and any interested party(ies) have not resolved any Preliminary Challenge to the Annual Update within twenty-one (21) days after the Review Period, an interested party shall have an additional twenty-one (21) days (unless such period is extended with the written consent of Midwest Energy to continue efforts to resolve the Preliminary Challenge) to make a Formal Challenge with the KCC, which shall be served on Midwest Energy by electronic service on the date of such filing. However, there shall be no need to make a Formal Challenge or to await conclusion of the time periods in Section 2 if the KCC already has initiated a proceeding to consider the Annual Update. A party's Formal Challenge may not raise any issue that was not the subject of that party's Preliminary Challenge during the applicable Review Period.
- B. Any response by Midwest Energy to a Formal Challenge must be submitted to the KCC within thirty (30) days of the date of the filing of the Formal Challenge, and shall be served on the filing party(ies) by electronic service on the date of such filing.
- C. Except as provided in Section 2.E, in any proceeding initiated by the KCC concerning the Annual Update or in response to a Formal Challenge, Midwest Energy shall bear the burden of proving that it has reasonably applied the terms of the Formula Rate, and the applicable procedures in these formula Rate Implementation Protocols, in that year's Annual Update.
- D. Subject to judicial review of KCC orders, each Annual Update shall become final and no longer subject to challenge pursuant to these Annual Review Protocols or by any other means by the KCC or any other entity on the later to occur of (i) passage of the twenty-one (21) day period (or extended period, if applicable) for making a Formal Challenge if no such challenge

has been made and the FERC has not initiated a proceeding to consider the Annual Update, or (ii) a final FERC order issued in response to a Formal Challenge or a proceeding initiated by the FERC to consider the Annual Update.

- E. Except as specifically provided herein, nothing herein shall be deemed to limit in any way the right of Midwest Energy to file unilaterally with the KCC changes to the Formula Rate or any of its inputs (including, but not limited to, rate of return and Transmission Incentive Mechanisms) or the right of any other party to request such changes before the KCC.
- F. Subject to Section 2.C above, it is recognized that resolution of Formal Challengers concerning Material Accounting Changes may necessitate adjustments to the Formula Rate input data for the applicable Annual Update or changes to the rate formula to achieve a just and reasonable end result consistent with the intent of the Formula Rate.

Section 4 Changes to Annual Informational Filings

Any changes to the data inputs, including but not limited to revisions to Midwest Energy's FERC Form No. 1, or as the result of any KCC proceeding to consider the Annual Update, or as a result of the procedures set forth herein, shall be incorporated into the Formula Rate and the charges produced by the Formula Rate (with interest determined in accordance with 18 C.F.R. § 38.19a) in the Annual Update for the next effective Rate Period. This reconciliation mechanism shall apply in lieu of mid-Rate Year adjustments and any refunds or surcharges, however, actual refunds or surcharges (with interest determined in accordance with 18 C.F.R. §38.19a) for the then current rate year shall be made in the event that the Formula Rate is replaced by a stated rate for Midwest Energy.

SERVICE TO SCHOOLS

AVAILABLE

Electric service is available under this schedule at points on the Company's existing distribution facilities.

APPLICABLE

To any tax supported public school or parochial school organized and operated by a generally recognized religious organization incorporated under specific laws of Kansas relating thereto, using electric service supplied at one point of delivery and where that service location is used predominately for educational purposes. Electric service to public and parochial schools may also be supplied under the Company's applicable General Service or Large Power Contract Service rate schedules subject to the terms thereof. This schedule is not applicable to breakdown, standby, or resale service.

CHARACTER OF SERVICE

Alternating current, 60 hertz, at the voltage and phase of the Company's established secondary distribution system most available to the service location.

NET MONTHLY BILL

Rate

\$ 20.00

7.6000¢ per kWh for the first 12,500 kWh*, plus 7.2600¢ per kWh for all additional kWh plus applicable adjustments and surcharges.

Add 100 kWh for each kilowatt (kW) of Billing Capacity over 50 kW for bills issued for July through September inclusive.

IRRIGATION SERVICE

AVAILABLE

At locations on the Company's existing primary distribution system.

APPLICABLE

To any Customer for irrigation well pumping and other incidental uses. Customers utilizing service for non-pumping irrigation use such as sprinkler drives, tail water pumps, or any other use incidental to irrigation pumping should use the W System General Service Schedule.

CHARACTER OF SERVICE.

Alternating current 60 hertz at the voltage and phase of the Company's established secondary distribution system most available to the service location.

NET MONTHLY BILL

\$7.00 per kW of billing capacity over 5 kW 7.7000¢ per kWh for the first 1,650 kWh 5.2000¢ per kWh for the remaining kWh Plus \$15.00 per month Customer Charge

MINIMUM MONTHLY BILL

A minimum monthly bill is applicable to the W System Irrigation Rate and is calculated as follows:

The Customer Charge, plus:

- A. A minimum contract capacity as specified in the Electric Service Agreement times the per kW capacity charge above (for contract capacity greater than five kW only).
- B. Any line extension charges (if applicable)
- C. Any other charges as provided for in the Electric Service Agreement.

BILLING CAPACITY

The Customer's average kilowatt load during the thirty-minute period of maximum use during the month.

POWER FACTOR

If the average power factor for the month (determined by permanent measure, or by test under normal operating conditions) is less than ninety (90) percent lagging, the Billing Capacity will be increased by multiplying by 0.90 and dividing by the power factor.

SPECIAL CONDITIONS

- A. The Company will own and operate all electric facilities installed by the Company. The Company will furnish the meter complete with meter socket and service drop to a point to be agreed on between Customer and Company.
- B. The Customer's equipment must include entrance facilities, phase imbalance and loss of phase protection, overload protection devices, and starter and meter loop wiring, all to be built and installed in accordance with the National Electrical Safety Code.

TERM OF CONTRACT

The Customer will execute the Company's standard form of contract (Electric Service Agreement) for one (1) year or more, designating therein the connected horsepower. The contract will be automatically renewed annually after the initial period until terminated by written notice from either party.

OTHER TERMS AND CONDITIONS

Service hereunder is subject to the Electric Terms and Conditons of the Company on file with The State Corporation Commission of Kansas.
