To whom it may concern:

Linin Energy employee Lauren Wehr has made extreme efforts to require me to sign legal papers to give the company power to control over my mineral rights.

I have been pressured to "just sign and return legal papers," to Ms. Wehr.

She wrote a letter dated September 11-2014 thanking me for participating in their new A.T.U. program. I haven't signed the legal papers.

She hacked the hard drive on my computer to retrieve the copy of the promotion program that had been presented to mineral royalties owners. I had deleted the program, because it didn't contain any new information and it had a copyright.

She and a Kathy Keith e-mailed me saying I think Ms. Wehr is trying to sell me something. This isn't true, nor did I not know the real reason for their agenda.

My concerns are for the low compensation to mineral owners listed in the application.

The fact that Linin Energy has a complete control of all drilling and leasehold interests in Kearny Co. This is written in the application.

Please consider what this means to the State of Kansas and to the royalty holders.

I hope this letter isn't late for your consideration.

Sincerely, Myrna Lee Green
