Re: Docket 15-CONS-150-CPEN

As per our conversation on the phone you are dropping the fines on the Schnitzler #5 since your office made a mistake on the total volume injected that is allowed.

On the Goodrich # 101 I made a clerical error on the U3C. Attached please find a revised U3C, along with a copy of the 5/30/2014 M.I.T. showing zero pressure on the system.

I request that the charges on the Goodrich #101 also be dismissed. This was a purely clerical error as evidenced by the M.I.T. There has been no harm or intent to harm the environment. Secondly, as evidenced by the Schnitzler #5 where we changed the injection rate allowed in 1985, we have a long history of compliance.

Thank You
