OF THE STATE OF KANSAS**

In the Matter of the Petition of Southwestern)
Bell Telephone Company, LLC d/b/a AT&T)
Kansas for an Order Confirming) Docket No. 25-SWBT-364-MIS
Relinquishment of Eligible)
Telecommunications Carrier Designation in)
Specified Areas.)

NOTICE OF FILING OF STAFF'S REPORT AND RECOMMENDATION (PUBLIC)

The Staff of the State Corporation Commission of the State of Kansas (Staff and Commission, respectively) hereby submits its Report and Recommendation (R&R), dated October 23, 2025, regarding the Application of Southwestern Bell Telephone Company, LLC d/b/a AT&T Kansas (AT&T).

On March 27, 2025, AT&T filed an application requesting an order granting relinquishment of its Eligible Telecommunications Carrier (ETC) designation of its local exchange service areas in the state of Kansas.

The recommendations of Commission Staff (Staff) are more fully outlined in the R&R. In summary, Staff recommends the Commission issue an order:

- (1) Granting AT&T's request for ETC relinquishment in census blocks in portions of "the relinquishment area" listed in Staff Exhibits 2B and 2C, which is attached to Staff's R&R.
- (2) Deny the request for ETC relinquishment in census blocks of the relinquishment area listed in Staff's Exhibit 3 given the Commission's prior orders on relinquishment in areas for which the FCC has not granted forbearance. However, Staff does provide the Commission with other factors it may wish to consider in determining whether this is a reasonable outcome given the changes in the industry.

- (3) Requiring the remaining ETCs to ensure that all customers served by AT&T will continue to be served in the wire centers/exchanges in which the Commission grants relinquishment.
- (4) Requiring AT&T to provide notice of this relinquishment to all competitive ETC's designated as such in AT&T's service area, and to file copies of such notice in the instant docket as a compliance filing.

WHEREFORE, Staff submits its Report and Recommendation for Commission review and consideration and for such other relief as the Commission deems just and reasonable.

Respectfully Submitted,

/s/ Ahsan Latif

DATE: October 24, 2025

SUBJECT: Docket No. 25-SWBT-364-MIS
In the Matter of the Petition of Southwestern Bell Telephone Company, LLC d/b/a AT&T Kansas for an Order Confirming Relinquishment of Eligible Telecommunications Carrier Designation in Specified Areas.

EXECUTIVE SUMMARY:

On March 27, 2025, Southwestern Bell Telephone Company, LLC d/b/a AT&T Kansas (AT&T) filed an Application with the Kansas Corporation Commission (Commission) requesting an order granting relinquishment of its Eligible Telecommunications Carrier (ETC) designation of its local exchange service areas in the state of Kansas.

Commission Staff (Staff) recommends the Commission issue an order:

- (1) Granting AT&T's request for ETC relinquishment in census blocks¹ in portions of "the relinquishment area" listed in Staff Exhibits 2B and 2C, which is attached to Staff's Report and Recommendation (R&R).²
- (2) Deny the request for ETC relinquishment in census blocks of the relinquishment area listed in Staff's Exhibit 3 given the Commission's prior orders on relinquishment in areas for which the FCC has not granted forbearance. However, Staff does provide the Commission

¹ Current US Census Bureau definition: A statistical area bounded by visible features, such as streets, roads, streams, and railroad tracks, and by nonvisible boundaries, such as selected property lines and city, township, school districts, and county boundaries. A block is the smallest unit of geography for which the Census Bureau tabulates decennial census data. <https://www.census.gov/glossary/?term=Census+block>, last visited July 29, 2025; A 15-digit code, geographically identified by its concatenated hierarchy code of 1) state (2-digits), 2) county (3-digits), 3) tract (6-digits) and 4) block (4-digits). Example: 00|000|000000|0000.

² The area for which AT&T is requesting relinquishment of its ETC designation is referred to as "the relinquishment area."

with other factors it may wish to consider in determining whether this is a reasonable outcome given the changes in the industry.

- (3) Requiring the remaining ETCs to ensure that all customers served by AT&T will continue to be served in the wire centers/exchanges in which the Commission grants relinquishment³.
- (4) Requiring AT&T to provide notice of this relinquishment to all competitive ETC's designated as such in AT&T's service area, and to file copies of such notice in the instant docket as a compliance filing.

BACKGROUND:

History of ETCs

A cornerstone of the law that established the Communications Act of 1934 and the Federal Communications Commission (FCC), is the principle that all Americans should have access to communications services known as "universal service." Since that time, universal service policies have helped make telecommunications services ubiquitous, even in rural, high-cost areas of the country.

Both the Federal and Kansas Telecommunications Acts of 1996 contain provisions to develop universal service funds to maintain and advance universal service, which led to the establishment of the Federal Universal Service Fund (FUSF) and the Kansas Universal Service Fund (KUSF), respectively. The FUSF provides support through four programs, including the high-cost program, which provides funding to carriers to ensure that residents in high-cost areas have access to reasonably comparable service at rates reasonably comparable to urban areas, and the Lifeline program, which assists low-income consumers by providing a discount on their monthly local telephone charges so that telephone service is more affordable. The KUSF also provides funding for four programs, including a high-cost program and a low-income program, also known as the Kansas Lifeline Service Program.

In order to receive support from the FUSF or KUSF, a carrier is required to be designated as an ETC. Congress delegated the authority to designate ETCs to state commissions in accordance with 47 U.S.C. § 214(e)(1). Pursuant to this statute,

A common carrier designated as an eligible telecommunications carrier under paragraph (2), (3), or (6) shall be eligible to receive universal service support in accordance with section 254 of this title and shall, throughout the service area for which the designation is received—

- (A) offer the services that are supported by Federal universal service support mechanisms under section 254(c) of this title, either using its own facilities or a combination of its own facilities and resale of another carrier's services (including the services offered by another eligible telecommunications carrier); and
- (B) advertise the availability of such services and the charges therefore using media of general distribution.

³ Lifeline-only ETCs have been designated as such to provide federal Lifeline service to eligible low-income consumers. Lifeline-only ETCs are required to ensure that all Lifeline-eligible customers in their designated service area continue to be served but are not required to ensure that non-Lifeline customers continue to be served.

The Commission derives its authority to designate ETCs pursuant to 47 U.S.C. § 214(e)(2) which states:

A State commission shall upon its own motion or upon request designate a common carrier that meets the requirements of paragraph (1) as an eligible telecommunications carrier for a service area designated by the State commission. Upon request and consistent with the public interest, convenience, and necessity, the State commission may, in the case of an area served by a rural telephone company, and shall, in the case of all other areas, designate more than one common carrier as an eligible telecommunications carrier for a service area designated by the State commission, so long as each additional requesting carrier meets the requirements of paragraph (1). Before designating an additional eligible telecommunications carrier for an area served by a rural telephone company, the State commission shall find that the designation is in the public interest.

Additionally, Kansas law adopts the federal standards contained in 47 U.S.C. § 214(e)(1). Specifically, K.S.A. 66-2008(b) states:

Pursuant to the federal act, distributions from the KUSF shall be made in a competitively neutral manner to qualified telecommunications public utilities, telecommunications carriers and wireless telecommunications providers, that are deemed eligible both under subsection (e)(1) of section 214 of the federal act and by the commission.

The Commission derives its authority to permit an eligible telecommunications carrier to relinquish its designation pursuant to 47 U.S.C. § 214(e)(4) which states:

A State commission...shall permit an eligible telecommunications carrier to relinquish its designation as such a carrier in any area served by more than one eligible telecommunications carrier. An eligible telecommunications carrier that seeks to relinquish its eligible telecommunications carrier designation for an area served by more than one eligible telecommunications carrier shall give advance notice to the State commission...of such relinquishment. **Prior to permitting a telecommunications carrier designated as an eligible telecommunications carrier to cease providing universal service in an area served by more than one eligible telecommunications carrier, the State commission...shall require the remaining eligible telecommunications carrier or carriers to ensure that all customers served by the relinquishing carrier will continue to be served, and shall require sufficient notice to permit the purchase or construction of adequate facilities by any remaining eligible telecommunications carrier.** The State commission...shall establish a time, not to exceed one year after the State commission...approves such relinquishment under this paragraph, within which such purchase or construction shall be completed. (Emphasis added).

In accordance with 47 U.S.C. § 214(e), the Commission designated all of the incumbent local exchange carriers (ILECs), including AT&T, as ETCs on December 5, 1997, in Docket No. 98-GIMT-241-GIT.

History of AT&T's Requests for Relinquishment

In Docket No. 17-SWBT-158-MIS (17-158 Docket), the Commission issued an order granting AT&T relinquishment of its ETC designation in all the requested census blocks except for 1,248 census blocks identified in the order.⁴ The order adopted Staff's recommendation that in those areas for which AT&T had not been granted forbearance, it was necessary for there to be an ETC with a full designation to provide both Lifeline services and services to customers not eligible for the Lifeline offering. Therefore, the Commission did not grant relinquishment of ETC designation for the 1,248 census blocks where the remaining competitive ETC's (CETC's) designation was limited by the Commission for only Lifeline service. The Commission's order required Staff to provide an updated number of these census blocks. AT&T disagreed with this finding but ultimately withdrew its request to relinquish its ETC designation in the census blocks where forbearance was not granted. On March 20, 2019, Staff filed its report providing the Commission with a recalculation of the number of census blocks where AT&T was required to retain its ETC designation. Staff identified 856 census blocks in which AT&T would be required to retain its ETC designation.⁵

On October 6, 2023, AT&T filed a request to relinquish its ETC designation in 14,600 census blocks in Docket No. 24-SWBT-318-MIS (24-318 Docket). The Company indicated that it would retain its ETC designation in 1,518 census blocks. Staff's analysis found that a CETC with a full designation (not limited to Lifeline) was available to provide service in all of the 14,600 census blocks. On December 24, 2024, the Commission issued its order granting AT&T ETC relinquishment in 14,600 requested census blocks.

Changes to the Federal High-Cost Programs

In 2011, the FCC recognized the communications landscape had evolved and made various changes to overhaul its universal service system to target universal service support more appropriately and to modernize the federal fund by supporting broadband through the new Connect America Fund (CAF). Under the new system, CAF funding was targeted to those areas where federal support was needed to maintain and expand networks capable of delivering voice and broadband service, which resulted in ETCs no longer receiving FUSF in some areas for which they had previously received support.

In 2015, the FCC offered over \$1.675 billion in annual CAF model-based support to price cap carriers to fund the deployment of voice and broadband-capable services of at least 10 Megabits per second (Mbps) download and 1 Mbps upload in the eligible areas. AT&T accepted \$18.9 million in CAF support available to the company for Kansas. Therefore, by the end of 2020, AT&T was required to deploy voice and broadband-capable services to at least 95 percent of the 35,375 eligible locations, which was awarded by census block.

AT&T indicates that it has not received any federal high-cost universal service support since the CAF II funding ended on December 31, 2021.⁶ AT&T seeks to relinquish its ETC designation in

⁴ See, Docket No. 17- SWBT-158-MIS, Order on AT&T's Request to Relinquish its Eligible Telecommunications Carrier (ETC) Designation, March 14, 2019 (17-158 Order).

⁵ Note: The 17-158 Docket Exhibit 1 actually lists 862 census blocks; however, six of the census blocks are "duplicates" because they are located and listed in more than one exchange.

⁶ See Application, ¶ 6, p. 3.

the relinquishment areas at this time because the CAF II program has ended and all funding pursuant to the program has been distributed.

Instant Proceeding

AT&T seeks to relinquish its ETC designation in the census blocks identified in Exhibit A to its Application. This information is also attached to Staff's R&R as Staff Exhibit 1 for convenience of reviewing the detail.⁷ Note that within AT&T's Application and its Exhibit A, the company states the number of census blocks to be relinquished is 1,289. Of this number, 229 of the census blocks are located and listed in more than one exchange. Exhibit A lists up to 3 different wire centers/exchanges that cross/overlap for the same census block. However, when considering all individual combinations, the count of census blocks matches the 1,518-census block number that AT&T chose to retain in and identified in Exhibit D of the order in Docket 24-318.⁸

In its Application, AT&T indicates that it will not discontinue legacy voice service.⁹ AT&T will continue to offer and provide legacy voice service in the affected census blocks and will continue to comply with applicable service obligations of federal and state law in its service territory, unless and until it separately obtains any necessary permission to stop providing retail legacy voice service.¹⁰

AT&T states it will provide ample notice to all of the current Lifeline customers of their option to select another ETC in order to continue receiving the Lifeline discount.¹¹ At least 60 days prior to the relinquishment effective date, AT&T states it will provide notice in a separate letter sent via U.S. Mail to each of its affected Lifeline customers explaining that:

1. AT&T will no longer offer the federal Lifeline discount; and,
2. If the customer does not choose another provider, AT&T will continue to provide service at AT&T's standard prices (including applicable surcharges, fees, and taxes) after the effective date of the relinquishment.

AT&T will also send each remaining affected Lifeline customers a second notice letter and a billing message at least 15 days prior to the effective date.¹² All notices will inform each affected customer that they can contact the remaining ETCs in the relinquishment area to discuss Lifeline benefits that may be offered by those ETCs and will inform affected customers how to contact the Universal Service Administrative Company (USAC) to obtain a list of other ETCs in the state and answer general questions about Lifeline.¹³ AT&T's Exhibit L provides a sample of the language that will be used in these letters.¹⁴

⁷ See Staff Exhibit 1, (AT&T's Exhibit A).

As of March 27, 2025, AT&T indicates that it has one Lifeline customer throughout the entire relinquishment area.¹⁵

ANALYSIS:

The standard for approval of a relinquishment is contained in 47 U.S.C. § 214(e)(4). In order to grant relinquishment, the Commission must make two determinations:

- (1) that there is at least one ETC in the relinquishment area; and,
- (2) that all customers served by AT&T can continue to be served.

The FCC provided further guidance on the relinquishment determination in a proceeding related to USTelecom. The FCC stated:

...the section 214(e)(4) relinquishment process allows for the states (or the [FCC], if applicable) to conduct an inquiry at a sufficiently granular level to ensure that the customers in that area ‘will continue to be served.’ The relinquishment process not only entails an evaluation of what service providers are present in an area at a given point in time, but of the practical ability of those providers to take on additional consumers as might be needed once the relinquishing carrier is no longer an ETC subject to associated obligations in that area. Indeed, section 214(e)(4) not only involves an inquiry regarding the capabilities of other service providers, but, to the extent needed, includes a grant of authority to obligate remaining ETCs to acquire adequate facilities within a defined time period.¹⁶ (Emphasis added).

The second portion of the determination, and the more granular analysis referred to by the FCC, is particularly important in light of factors affecting areas served by AT&T in Kansas. First, the FCC granted AT&T forbearance from the voice requirements of 47 U.S.C. §214(e)(1) in census blocks meeting the requirements for forbearance but not in other census blocks within Kansas. Second, the Commission has designated many carriers as ETCs only for the purpose of providing Lifeline services. The Commission determined in the 17-158 Docket that it must consider the ETCs by type to ensure that the ETC can provide the services supported by the FUSF.¹⁷ The Commission stated:

The Commission cannot ensure such services unless it evaluates the remaining ETCs by type because Lifeline-only ETCs, which are the only type of ETC in some of the relinquishment area census blocks, need not provide voice service to all reasonable requests for service like full ETCs must do. Further, the Commission has no authority to "ensure" that a Lifeline-only ETC provides such service.¹⁸

AT&T disagreed with the Commission’s analysis but rather than further litigate the issue, AT&T withdrew from its request those census blocks for which the FCC had not granted forbearance, and which were served solely by a Lifeline-only ETC. Staff’s recommendations are based on the Commission’s analysis and determination in the 17-158 Docket.

¹⁷ *17-158 Order*, ¶42, page 17.

¹⁸ *Id.*

In its analysis of AT&T's instant application, Staff first examined whether the subject census blocks were served by at least one other ETC; then, Staff analyzed whether the customers currently served by AT&T will continue to be adequately served by the remaining ETC or ETCs if AT&T's relinquishment were granted.

I. Whether Requested Relinquishment Census Blocks are Served by Another ETC

For the 1,298 (1,518 combinations) census blocks in the AT&T relinquishment area, the Commission first needs to determine whether there is at least one other ETC designated in that census block. AT&T has identified the other designated CETCs in each census block within the relinquishment area in Exhibit B to its Application (also attached to Staff's R&R as Staff Exhibit 4). While CETCs (and AT&T) were granted ETC authority at the exchange or wire center level, the relinquishment area is designated by census block. Exhibit A to AT&T's application provides a list of the relinquishment area census blocks and the associated wire center and exchange.

For ease of Staff's review of exhibits, on May 20, 2025, Staff sent a data request (Discovery Request 1) to AT&T asking for the exhibits in excel format. AT&T's response was received on May 21, 2025. Staff performed a 1:1 comparison between Exhibit A from AT&T's Application with the data from Exhibit D attached to the Commission's 24-318 Docket order. This comparison was performed to both validate the count of remaining census blocks and to validate the relinquishment area. The data set provided in the 24-318 Docket separately listed each wire center and its associated census block allowing for census blocks to appear more than once in the data. However, Exhibit A to the application collectively paired each census block to the wire center and exchange it resides while including the wire centers/exchanges that overlap. Therefore, Staff reviewed each data set and concatenated each individual wire center to its corresponding census block to create a unique identification number. Using this technique, Staff was able to achieve a 100% match between the data in the 24-318 Docket order's Exhibit D and Exhibit A to the application. That is, the total count of 1,518 retained census blocks from 24-318 Docket order's Exhibit D corresponds to the count of 1,289 census blocks for which AT&T is requesting relinquishment in the current application. This analysis is provided as Staff Exhibit 5 to this R&R.¹⁹

Staff then proceeded to double-check AT&T's remaining data and exhibits to determine if another ETC serves each census block and verify whether the ETC was a full ETC or a Lifeline-only ETC. This included a comparison of Exhibit B to AT&T's application which provides a summary of CETCs within census blocks and Exhibit A which contains a list of relinquishment area census blocks. AT&T's Exhibit B associated each CETC to a census block. However, the list of CETCs in Exhibit B included providers with petitions for ETC designations that were pending before the Commission. It is important to note and reflect the current status of CETCs in Staff's analysis given the time that has passed since the filing of the Application. Referring to AT&T's Exhibit B and Staff Exhibits 2A and 3A, the changes which have occurred are the following: Companies Nos. 1, 7, 10, and 14 had expansions or designations approved; Company No. 8 has not been active since January 1, 2025, according to the FCC;²⁰ and, Company No. 16 had its relinquishment approved. AT&T is the last full ETC remaining in the majority of census blocks requested for

¹⁹ See Staff Exhibit 5, Match Comparison.

²⁰ FCC Form 499 Filer Database, Q Link Wireless, LLC, <https://apps.fcc.gov/cgb/form499/499a.cfm>.

relinquishment, but not the only ETC left. Staff reflected these changes in Staff's Exhibits 2 and 3 discussed further in the R&R. Staff found at least one CETC (full or Lifeline-only) in all census blocks for which AT&T is requesting relinquishment.

II. Whether Customers in the Relinquished Census Blocks will Continue to be Adequately Served by Remaining ETCs

Forbearance Census Blocks

In its *December 2014 Connect America Fund Order*, the FCC found that it was in the public interest to forbear, pursuant to 47 U.S.C. § 160(a), from enforcing the federal requirement that price cap carriers offer voice telephony service, under certain circumstances, pursuant to 47 U.S.C. § 214(e)(1)(A) when the price cap carrier does not receive high-cost support. The FCC's analysis of forbearance considered three types of geographic areas:

- (1) census blocks that are determined to be low-cost;
- (2) all census blocks served by an unsubsidized competitor, as defined in the FCC's rules, offering voice and broadband at speeds of 10/1 Megabits per second (Mbps) to all eligible locations; and,
- (3) census blocks where a subsidized competitor – i.e., another ETC – is receiving federal high-cost support to deploy modern networks capable of providing voice and broadband to fixed locations.

However, the FCC stated that price cap carriers remained obligated in the census blocks for which forbearance was granted to:

- (1) maintain existing voice service unless and until they receive authority under 47 U.S.C. §214(a) to discontinue that service; and,
- (2) offer Lifeline service to qualifying low-income households throughout their service territory.²¹

Thus, for the census blocks where AT&T has been granted forbearance, Staff needs to determine whether there is at least one other ETC that would be able to provide federal Lifeline service to low-income consumers.

Both full and Lifeline-only ETCs are required to offer Lifeline service to all eligible low-income consumers in their designated service areas. The ETCs must provide all services required by 47 C.F.R. § 54.101(a) and this Commission's orders. These ETCs must also advertise the availability of their services throughout the area for which designation was granted. This means the Commission needs to determine whether there is at least one CETC, either full or Lifeline-only, to serve current Lifeline customers in the forbearance census blocks.

Staff confirmed that forbearance has been granted for 58 census blocks included in AT&T's Application. For these census blocks, Staff contends the statutory requirement has been met to allow AT&T to relinquish its ETC designation because there is currently one or more full or Lifeline-only ETC in the requested relinquishment area. This ensures that all of AT&T's current Lifeline customers can continue to be served the services specified in 47 C.F.R. § 54.101(a). That

²¹ *In the Matter of Connect America Fund*, WC Docket No 10-90, 14-58, 14-192, Report and Order, Released December 18, 2014, at paragraph 51.

is, each of the impacted customers has the option of continuing to participate in the Lifeline program as every census block in this portion of the relinquishment area has at least one or more designated CETC providing the Lifeline discount. The list of remaining CETCs that provide the Lifeline discount is listed Exhibit B to AT&T's Application.²² Therefore, Staff recommends approval of AT&T's request to relinquish its ETC designation in the census blocks for which forbearance has been granted. These census blocks are listed in Staff Exhibit 2B. If the Application is granted, AT&T would no longer be required to provide federal Lifeline service in the relinquishment areas.

AT&T states that it will continue to provide services to its customers, including low-income customers.²³ Upon a Commission order approving ETC relinquishment in these areas, the only change for AT&T's Lifeline customers will be that the current federally supported Lifeline discount of \$5.25 will no longer be available from AT&T Kansas.²⁴ In order to receive a Lifeline discount, a customer would need to switch to another provider listed in Exhibit B to AT&T's Application. To assist with a smooth transition and to avoid customer confusion, AT&T will stop enrolling customers in the relinquishment area five days after the Commission issues an order approving the relinquishment.²⁵ This will ensure a newly enrolled Lifeline customer with AT&T will not need to change to another Lifeline provider shortly after enrolling.²⁶

Although Staff contends the statutory requirement for ETC relinquishment has been met for the requested relinquishment in these 58 census blocks, some concerns still exist about whether the remaining ETCs will be able to ensure that all remaining customers will continue to be served. Some of the full CETCs built their facilities in the more densely populated portions of each exchange and utilize resale of AT&T's retail voice services to serve the remaining customers. AT&T currently remains obligated to offer its retail services for resale at wholesale rates for pursuant to 47 U.S.C. §251(c), K.S.A. 66-2003(b), and K.S.A. 66-2005(z)(2)(A). As long as this obligation continues and AT&T retains its responsibility to maintain its voice services and to resell its services, it appears that the only occasion in which a full ETC could be required to build out new facilities to a customer would be to meet a "reasonable request for service" for a customer which AT&T does not currently have facilities (i.e., new construction) in place.

Additionally, the level of service provided by a CETC may differ from that of AT&T. For instance, the same level of reliability in terms of battery life is not provided when there is a power outage depending upon whether service is provided over copper or broadband facilities. Traditional copper facilities historically enabled the provision of voice service without reliance on customer-side power sources. Landline service maintains backup generation capable of sustaining dial tone for 24-72 hours. Whereas broadband depends on whether a customer has installed a separate backup battery system for continuity of service during power outages. As the telecommunications landscape continues to transition and copper retirement has accelerated, the FCC has not revised its backup power standards since adopting the requirements in the 2015 Ensuring Continuity of 911 Communications Order (FCC 15-98). The existing FCC rules continue to require providers of facilities-based fixed voice service offered over broadband networks to make available at least 8

²⁶ *Id.*

hours of standby backup power, with a 24-hour option available at additional cost, and to provide appropriate disclosures to consumers.²⁷ These requirements remain in effect as of 2025.

Non-forbearance Census Blocks

AT&T's Application includes a request to relinquish its ETC status in 1,231 census blocks for which the FCC has not granted forbearance. That is, AT&T remains obligated to provide voice telephony service to customers in non-forbearance census blocks. Therefore, to meet the second prong of the analysis (whether customers will continue to be served) Staff must find that there is one or more full CETC in these non-forbearance census blocks that will be able to continue to serve customers in these areas. It is not sufficient to find that there is solely a Lifeline-only CETC in the area because a Lifeline-only ETC is only obligated to serve customers meeting the income eligibility requirements for Lifeline service.

Reviewing the data provided by AT&T, Staff found that 7 of the non-forbearance census blocks have a full CETC designated to provide both voice telephony and Lifeline services. These census blocks may also have one or more Lifeline-only CETCs serving the area but it is only necessary to find that a full CETC is serving the area to ensure that customers can continue to receive service. For these census blocks, listed in Staff Exhibit 2C, Staff contends that the requirements for ETC relinquishment have been met subject to the same concern mentioned in the previous section of this R&R. The concerns listed above regarding continuing service apply to these census blocks as well.

Additionally, Staff found that there is not a full CETC designated in 1,224 of the non-forbearance census blocks. Each of the 1,224 census blocks have at least one Lifeline-only CETC serving the area; but as discussed above, a Lifeline-only ETC is not obligated to provide services to customers who do not meet the income eligibility requirements for Lifeline service. Thus, applying the analysis and determination in 17-158, Staff cannot support AT&T's request for relinquishment of its ETC designation in these areas which are listed in Staff Exhibit 3B.

III. Other Considerations

While AT&T does not meet the statutory requirements for ETC relinquishment in 1,224 of the requested census blocks, the Commission may wish to weigh the following information in determining whether to grant relinquishment.

AT&T states that if its Application for ETC relinquishment is granted, it will not cease providing legacy voice service unless and until it separately obtains any necessary permission to stop providing such service.²⁸ To discontinue its provision of legacy voice service, AT&T would have to file a petition with the FCC under 47 U.S.C. § 214(a).²⁹ Such petition would be deemed automatically granted on the sixtieth day after its filing with the FCC unless the FCC notifies the applicant (AT&T) that such grant will not be automatically effective.

²⁷ See Ensuring Continuity of 911 Communications, Report and Order, FCC 15-98, 30 FCC Rcd 8677 (2015), codified at 47 C.F.R. §§ 12.5 and 12.7. No subsequent FCC order has amended these provisions as of 2025.

²⁸ *Id.*, ¶ 32, pp. 15-16.

²⁹ 47 C.F.R. § 54.201(d)(3).

Out of the 1,289 census blocks for which AT&T requested relinquishment, 65 or 5.04% of those have no serviceable locations and are not eligible for Broadband Equity, Access, and Deployment (BEAD)³⁰ Program as displayed in AT&T's Exhibit F. Those 65 census blocks cover over a mixture of farmland, forests, rivers, highways, streets, ponds, parks and relatively small areas. There are [REDACTED] customers in these locations. Staff found that 64 of the 65 of the census blocks with no serviceable locations are in areas for which the FCC has not granted forbearance. Each of the 65 census blocks currently has at least one or more Lifeline-only ETC. Staff's Exhibit 6 lists those census blocks that have no serviceable locations and [REDACTED] customers. At this time there are [REDACTED] customers for whom continued service should be ensured. If the Commission may find it persuasive to approve relinquishment in non-forbearance areas where there are no serviceable locations and [REDACTED] customers, then the Commission could approve relinquishment of an additional 64 census blocks identified in Staff Exhibit 7.

In those census blocks within the relinquishment area with serviceable locations³¹, there are 232 total residential customers. Of those, [REDACTED] customers or [REDACTED] are in the serviceable census blocks for which the FCC has not granted forbearance. [REDACTED] customers or [REDACTED] of the total customers are within census blocks under forbearance. The majority of customers are in the census blocks for which the FCC has not granted forbearance. However, there are census blocks with serviceable locations but currently have [REDACTED] customers. Staff's Exhibit 6 also lists those census blocks with serviceable locations but [REDACTED] current customers. If the Commission finds it persuasive to approve relinquishment in non-forbearance areas where there are serviceable locations but [REDACTED] customers, then the Commission could approve relinquishment of an additional 1,062 census blocks identified in Staff Exhibit 6.

47 U.S.C. § 214(e)(3), authorizes a state commission to require a carrier to provide service in an unserved area when necessary. 47 U.S.C. § 214(e)(3) states:

If no common carrier will provide the services that are supported by Federal universal service support mechanisms under section 254(c) of this title to an unserved community or any portion thereof that requests such service, the Commission, with respect to interstate services or an area served by a common carrier to which paragraph (6) applies, or a State commission, with respect to intrastate services, shall determine which common carrier or carriers are best able to provide such service to the requesting unserved community or portion thereof and shall order such carrier or carriers to provide such service for that unserved community or portion thereof. Any carrier or carriers ordered to provide such service under this paragraph shall meet the requirements of paragraph (1) and shall be designated as an eligible telecommunications carrier for that community or portion thereof.

The Commission has historically viewed this authority as an extraordinary measure and in its history, has not invoked it to compel a carrier to assume ETC obligations in areas relinquished by another provider. Practical considerations such as the readiness of another carrier to provide service, the availability of infrastructure, and the absence of designated funding mechanisms

³⁰ Signed into law in 2021. It is a federal grant program funded by the Infrastructure Investment and Jobs Act (IIJA), that aims to expand access to high-speed internet in unserved and underserved areas.

³¹ The number of serviceable locations is at least one or more.

reduce the feasibility of ordering another ETC to step in. As a result, reliance on § 214(e)(3) as a fallback in relinquishment cases is unlikely to provide assurance of future service.

Finally, despite ongoing technological migration and evolving provider practices, FCC guidance regarding ETC relinquishment under 47 U.S.C. § 214(e)(4) has not materially changed even with the time that has passed since AT&T's previous relinquishment dockets. Recently there has been a push for regulatory change at the federal level that could potentially serve as guidance for state commissions during this time of technological change. For example, on July 3, 2025, the FCC sought comment on specific discontinuance of service regulations to determine whether any existing rules have become fully obsolete in this era of modern communications.³² Of the numerous items that the FCC seeks comments on, Staff would like to highlight the following:

We seek general comment on any other potential revisions to our section 214 discontinuance regulations that might help facilitate the transition to next-generation networks and advanced communications services. We also seek comment on any other Federal, state, or local requirements that inhibit or impede the transition to next-generation networks and services. For example, are there any state or local requirements that would conflict with the Commission's goals of accelerating this transition by, for example, compelling carriers to continue providing legacy voice service or preventing carriers from discontinuing such service? If so, how can the Commission address such obstacles?³³

We seek comment on whether, in instances where a replacement service already exists throughout the affected service area, we should conclude that it necessarily follows that section 214(a) discontinuance processes are not required to ensure just and reasonable and nondiscriminatory terms of service. In such instances, any customers of the legacy voice services being discontinued are free to transition to the replacement service offered by their existing carrier or a third-party provider. Given the state of competition in the marketplace, would a discontinuance involving any of these scenarios provide incentives for new carriers to serve customers following the discontinuance? *Are there areas where, despite the broad scope of wireless and satellite service offerings, no alternative services exist, and if so, should the section 214 discontinuance process remain unchanged for those areas?*³⁴ (Emphasis Added).

On whether to forbear applying section 214 discontinuance requirements with respect to the discontinuance of legacy voice service in certain instances. "Were we to grant forbearance relief in any of the scenarios described above, should we condition that forbearance in any respect? For example, in instances where the discontinuing carrier has deployed a replacement service throughout the affected area for a specified period of time and for which the carrier has a certain number of existing subscribers or penetration rate in the affected area, for what length of time should the replacement service have to be in place for forbearance to apply? How

³² See, Public Notice, WC Docket Nos. 25-208 "Accelerating Network Modernization" and 25-209 "Reducing Barriers to Network Improvements and Service Changes", July 3, 2025, DA-25-577, 40 FCC Rcd 4382 (5).

³³ *Id.*, ¶ 125.

³⁴ *Id.*, ¶ 40.

many existing subscribers or what penetration rate should the replacement service be required to have in the affected area? Should any forbearance be conditioned on ensuring that there are no disruptions to critical infrastructure industry or government agency operations?”³⁵

The Commission is not only authorized but obligated to interpret and apply the ETC framework in a manner that reflects the public interest considerations, prevailing market conditions, and the practical ability of remaining ETCs to serve all customers in relinquished areas.

RECOMMENDATION:

Staff contends AT&T has met the requirements for relinquishment as identified in 47 U.S.C. § 214(e)(4) for those census blocks identified in Staff Exhibits 2B and 2C. For these census blocks Staff recommends the Commission find (1) that the census blocks in question are indeed served by at least one other ETC; and (2) that all customers currently served by AT&T will continue to be served. For those census blocks identified in Staff Exhibit 3B, Staff contends that AT&T has not met the requirements identified 47 U.S.C. § 214(e)(4). While there is a Lifeline-only CETC able to provide Lifeline service in the census blocks listed in Staff Exhibit 3B, the Commission cannot ensure that a customer that doesn't meet the eligibility requirements for Lifeline service will continue to be served. However, AT&T has provided other information that may be relevant to the Commission's determination. If the Commission finds it persuasive to approve relinquishment in areas where there are no serviceable locations and in areas with serviceable locations but [REDACTED] customers, then the Commission could approve relinquishment of AT&T's ETC designation in the census blocks listed in Staff Exhibit 7 and Staff Exhibit 6, respectively.

Staff recommends the Commission issue an order requiring the following:

1. Granting AT&T's request for ETC relinquishment in census blocks listed in Staff Exhibits 2B and 2C.
2. Denying AT&T's request for ETC relinquishment in census blocks listed in Staff Exhibit 3B.
3. Requiring the remaining ETCs to ensure that all customers served by AT&T will continue to be served in the wire centers/exchanges in which the Commission grants relinquishment; and
4. Requiring AT&T to provide notice of this relinquishment to all CETC's designated as such in AT&T's service area, and to file copies of such notice in the instant docket as a compliance filing.

Sources: KCC ETC applications and orders, Census TIGER/Line data, FCC Broadband Data Collection data as of June 2024, CostQuest Commercial Fabric License data as of June 2024, BEAD locations from Kansas Office of Broadband Development.

Notes:

(*) Some of the non-ETC facilities-based providers are affiliated with ETCs (e.g., Verizon and TracFone, T-Mobile and Assurance Wireless, United Wireless Communications, and Rainbow

Excludes satellite and AT&T DSL.

An alternative provider is listed only if it services at least 99.9% of FCC serviceable locations in that census block.

A provider is only listed once if it offers service using multiple different technologies to a given census block.

When there are no serviceable locations, the number of non-ETC facilities-based alternative providers is listed as "N/A".

2020 population estimates are assigned to 2010 census blocks in proportion to area overlaps between 2010 and 2020 census blocks reported in the 2010-2020 census block relationship file from the Census Bureau.

*** N/A in the Match Comparison column would denote a location where the wire center and census block from both data sets differed.**

Total Wire Centers (rows or lines) Relinquished is 1518

Total Census Blocks That Share/Overlap Wire Centers is 229

215 Census Blocks Share/Overlap Two Distinct Wire Centers

14 Census Blocks Share/Overlap Three Distinct Wire Centers

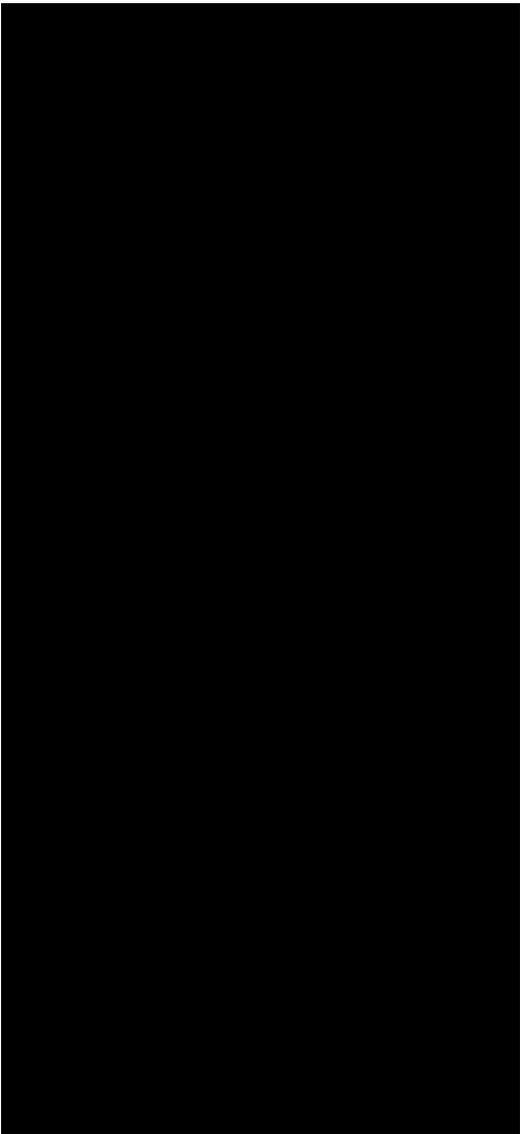

Total Raw CBs Relinquished (Excluding CBs in more than 1 location) is 1,289
