RE: Rice Tanner #8 Penalty Assessment
15-CONS-063-CPEN

Mr. Myers,

Crown Energy respectfully requests a hearing on the above referenced penalty assessment. There was no record of the change of the well head pressure from 150 PSI to Gravity reflected in any of Crown Energy's well files. For years the U3C has been submitted indicating maximum injection pressure of 50 PSI of which the KCC has accepted each and every year, until this year. We are enclosing the corrected U3C for the reporting year of 2013. Crown asks that the penalty be waived due to the misunderstanding on the original salt water disposal application.

Sincerely,

Dallas Flowers
