Ref: Salt water disposal well. Robbins property, Section 23, Township 12 south, Range 20 east, Leavenworth County, Kansas.

As of Saturday, August 23, 2014 we are in receipt of notification of the intent to dig a salt water injection well at the property adjacent to our north property line.

Since our sole water supply is a wonderful well that furnishes our home, business office and lawn sprinkler systems we are adamantly opposed to this injection well. We also have a conservation lake that has been here since the late 1960's that runs the risk of being contaminated. The upper end of this lake is within 800 ft. Of this proposed well. The clearing that has taken place in this area already leaves us open to unwanted erosion and silt buildup.

Sincerely,

Jerry and Jane May
