Re: Morehouse #3, SE NE NE, Sec. 4-21-3W, McPherson Co., KS  
API No. 15-113-04672-0000

Dear Mr. Greenfield,

The Temporary Abandonment Application that you filed on the Morehouse #3 was denied on May 23, 2011. The deadline of June 22, 2011 to bring the well into compliance has passed, and the well is currently in violation of K.A.R. 82-3-111. The Morehouse #3 has been inactive over 10 years and no longer qualifies for TA status.

At this time Dynasty Drilling, LLC must plug the well, return it to service, or file for an exception to the 10 year limitation in K.A.R. 82-3-111 to demonstrate why it is necessary to TA the Morehouse #3 for more than 10 years. The final deadline to bring the well into compliance is January 23, 2012. If the well is not brought into compliance by this date, the matter will be turned over to our legal staff with a recommendation the well be plugged. If you have any questions you can reach me at the number shown above.

Sincerely,

Jeff Klock  
District 2 Supervisor

MOREHOUSE 3  
4-21S-3W, SWSENE  
MCPHERSON County, Kansas

Dear Operator:

Your application for Temporary Abandonment (TA) of the well listed above is denied for the following reason(s):

**DENIED DOWN, OVER 10 YEARS**

In accordance with K.A.R. 82-3-111, this well must be plugged or returned to service by JUNE 27, 2011.

You may file an application for an exception to the 10-year limitation in K.A.R. 82-3-111 to demonstrate why it is necessary to TA the above well for more than ten (10) years. Your application for an exception is due by JUNE 22, 2011. All applications must be sent to the Kansas Corporation Commission Conservation Division at 130 South Market, Room 2078, Wichita, Kansas 67202.

You may contact me at the number below if you have any questions.

Very truly yours,

SHANE JONES

Dear Operator:

Your temporary abandonment (TA) application for the well listed above has been approved. In accordance with K.A.R. 82-3-111 the TA status of this well will expire on MAY 22, 2009.

- If you return this well to service or plug it, please notify the District Office.
- If you sell this well you are required to file a Transfer of Operator form, T-1.
- If the well will remain temporarily abandoned, you must submit a new TA application, CP-111, before the expiration date.

You may contact me at the number below if you have any questions.

Very truly yours,

Michael Wilson

Dear Recipient:

Please find enclosed a copy of an *Application for an Exception to the 10 Year Limitation of K.A.R. 82-3-111*, on the above referenced well, as filed with the Kansas Corporation Commission (KCC) by Dynasty Drilling, LLC.

The applicant is required to deliver one (1) copy of this application to each operator of producing leasehold's and each unleased mineral rights owner within one-half mile of the applicant well radius. Thusly, a copy of this application has been provided to you.

If you feel this application has been incorrectly provided to you or should be forwarded to additional parties due to ownership changes, or if you have any questions concerning this application, please contact my office at (918) 440-6512 or call (918) 287-8945. You may also contact the Kansas Corporation Commission directly with any additional questions at (316) 337-6200.

Sincerely,

Subject: Krehbiel #7  
Section 4-21S-3W  
McPherson County, Kansas

From/Location: Deborah Bennett

To/Location: Jerry Pollock

I recommend that AOGC place the Krehbiel #7 back on pump. The subject well was TA'd in September 1974. Economic analysis (attached) indicates that this project has a present worth profit of 14 M\$, discounted at 15%, AFIT, and also has a 100% Investor's Rate of Return; based on recoverable reserves of 9.2 MBO and a 35% chance factor. The initial oil price would be 39.00\$/STB, as this lease receives stripper oil prices and the payout of the project is .87 years, AFIT.

Reserves were calculated from decline curve analysis, using an initial rate of 9 BOPD and a decline rate of 26% per year. The decline rates of wells in this area range from 10-20%; however, due to the probability of a high water cut, I increased this decline rate. The initial investment is 18.9 M\$; 2.4 M\$ of rig time and 16.5 M\$ to charge the lease with the test pumping unit to be transferred in (also to be credited as salvage at the end of the well life, approx. 7.5 years).

The great majority of wells in Section 4 were drilled in the 1930's. There were thirty-four (34) wells drilled, of which three (3) were dry holes. These wells were completed open hole in the Misener, Viola, Wilcox and Arbuckle formations; and, some, later perforated in the Miss. Chat. To date, there are only eight (8) wells producing of the original thirty-four (34). The attached plat indicates ARCO acreage in the area; the McCurdy lease, Section 33-20S-3W, the Moorehouse and Krehbiel leases, Section 4-21S-3W; all of which are part of the Voshell Salt Water Disposal System.

June 10, 1980  
Page 2

There are three (3) wells on the Krehbiel lease; #3, plugged and abandoned 5-79; #4, a gas well used to supply fuel for the Krehbiel, Moorehouse, McCurdy and Stucky (Section 28-20S-3W) leases; and #7, which was TA'd 9-74. The Viola still looks promising in offsets to the Krehbiel #7. The Moorehouse #4, 660' north of the subject well, is currently producing 9 BOPD, with a 95% water cut. Subsea depths of the Viola tops are within 3 feet in the two wells. In 1955, Brunson and Spines completed the Krehbiel 1-B, approximately 2000' south of ARCO's Krehbiel #7, and the Viola top being about 70' updip to our well. Production had declined in the Krehbiel 1-B to about 16 BOPD, but increased to 40-45 BOPD during the last year for no known reason (i.e., no rework had been done on the well).

Due to increased oil prices and the low cost involved for this venture, I believe the Krehbiel #7 should be placed back on pump, in spite of the low chance factor. Attached are a workover prognosis, economics and plat.

## INTER-OFFICE COMMUNICATION

Location Wichita, Kansas

September 13, 19 63

To Mr. Harold Weinland  
Great Bend, Kansas

Reply Attention:

Re: Your Memo of 8-28-63 --  
Shallow Gas Producing Formations -  
Voshell Pool

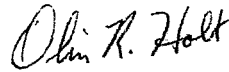

Dear Sir:

The logs in the area of the Voshell Pool have been examined for possible producing horizons other than Mississippian "Chat" and Arbuckle. The only zone found which offers any possibility is in the Lansing-Kansas City Formation at a depth of 2,502-10 feet on the Sinclair-Prairie No. 3 D. J. Stucky, NE NE SE section 28-20S-3W, McPherson County, Kansas. The same zone is also found on two other sets of logs in the area Hinkle No. 1 Goering, SW NW NW section 28-20S-3W, where the zone is found from 2,522-2,544 feet with 20 feet of porosity and the Brunson No. 1 Stucky, SW NW SE section 33-20S-3W, which shows porosity in the same zone from 2,560-2,580 feet with 8 feet of good porosity. A sample description of the Sinclair-Prairie No. 3 D. J. Stucky describes the formation as having good oolitic porosity with no stain. This zone is a borderline case and may make water, however, it should be tested before final abandonment of the leases.

Very truly yours,

H. A. Merrill

Mid-Continent District

AREA: Mid-Continent District

AFE No.: \_\_\_\_\_

LOC: Great Bend, Kansas

DATE: October 21, 1951

CASE, WELL NO. & FIELD: A.E. Morehouse Well No. 3 - Voshell

LOCATION: SE NE NE Section 4-21S-3W, McPherson County, Kansas

OBJECT: Plug back and recomplete in Mississippi Chat as gas well.

WELL

HISTORY: Completed May 19, 1930. Wilcox open hole 3340'-96', 15-1/2" csg. 70# @ 135' w/125 sacks, 8-1/4" 32# @ 2985' w/550 sacks, 6-5/8" 24# @ 3340' w/ 12 sacks. T.D. 3396'. January 1947 deepened to 3426' in Arbuckle. Top Arbuckle 3420'. Now producing 2 barrels oil and 190 barrels water per day.

PROCEDURE:

Move in casing pulling machine and pull rods, pump and tubing.  
Cut 6-5/8" casing at 3250' depth and retrieve from well. Stack separately from tubing and rods.  
Run tubing open ended to depth of 3130 feet and spot 35 sacks cement plug from 3130' to 3040 feet. WOCS  
Clean out well bore to top of hard cement.  
Spot 10 foot Hydromite plug (300 lbs.) with dump bailer on top of hard cement plug. Estimated top of plug should be at 3030'.  
Run tubing and packer set at 2970 feet and acidize Mississippi Chat from 2985'-3030' in open hole with 1000 gallons HCl.  
Swab back load and spurt acid water and test well.  
Retrieve packer and rerun tubing, rods and pump.  
Test well for gas productivity.

APPROVALS:

*H.R. file* 

**Date:** October 21, 1971  
**To:** Mr. W. J. Rogers  
**From:** H. A. Weinland  
**Subject:** Recomplete A. E. Morehouse (3B-771B)  
Well No. 3 from Arbuckle and Wilcox  
Zones to Mississippi Chat Zone  
SE NE NE Sec. 4-T21S-R3W  
Voshell Field  
McPherson County, Kansas

I concur with Mr. J. J. Clark's proposal to recomplete A. E. Morehouse Well No. 3 in Mississippi Chat as a gas well. This well has depleted oil reserves in the Wilcox and Arbuckle formations. Present rate of production is 2 BOPD and 190 BWPD.

The casing record is shown on attached schematic sketch and indicates that 8-1/4" casing was set at 2985 feet and cemented with 550 sacks. The long string casing 6-5/8" O.D. was set at 3340 feet and cemented with only 12 sacks cement. Estimated top cement behind 6-5/8" casing is at 3254 feet.

It is recommended that 6-5/8" casing be pulled from well with an estimated recovery of approximately 3250 feet. A cement plug and Hydromite plug will be placed in open hole from 3130'-3030'. This plug will shut off Arbuckle and Wilcox formations and prevent extraneous water entry from below the Mississippi Chat. Detail recompletion prognosis is attached to this letter.

Total estimated cost is \$5600 with payout in 3.7 years and 13.6% rate of return.
