KCC Docket No.:12-CONS-171-CPEN

Bryan #4 SWD, Section 13:SW¼NE¼NE¼, Township 5 South - Range 31 West, Rawlins County, Kansas

Robuck Petroleum, LLC, has been engaged in on going work on the above named well, attempting to fix a casing leak beginning on March 29, 2012, April 10, 2012 and again on April 20, 2012, with Pro-Stim Chemical, LLC, using there sealant named: FR-5300 and RECHECK (see attached invoices) with the presents of Darrel Dipman of the KCC Office District 4, on April 10 and April 20th. The time in-between treatments was from the recommendation from Pro-Stim letting the sealant having time to set.

Their sealant was effective in reducing the leak but enough to hold 300 psi. The annulus in the well is now capable hold 200 psi and fresh water to surface, over 200 psi you can pump into the leak at the rate of a quarter a barrel a minute. After evaluating the results of the sealant, the only conclusion and option left is to squeeze the leak with concrete.

I have a pulling unit on the well as of May 2, 2012 at 3:30 pm, they moved a tubing work string and started pulling and laying down the DL tubing today. We will run a bridge plug and packer tomorrow hunting for the leak (780'-800') after making sure where the leak is, will set the bridge plug, spot sand, move packer above the leak, set packer, being ready to squeeze concrete on Monday the 7th.

After squeezing the well, will let the concrete set for two day, pull packer, run back in with drill bit, circulate and drill outl. After drilling out, run back in with tubing and catcher, circulate sand off bridge plug, catch, retrieve and pull bridge plug. Run back in with packer and DL tubing, set packer and MIT. If all works smoothly and according to plan, I hope to MIT on Friday 11th. I will keep in close contact with Case Morris and Darrel Dipman, with the progress on the squeeze job.

I am asking the KCC after seeing the work I have attempted in fixing the leak, and the on going work to fix the casing leak. To reconsider and rescind the monetary penalty order on this well.

I appreciate your time and consideration on this matter. If you should have any questions what so ever, please call me at 308-345-7200

Very truly yours,
ROBUCK PETROLEUM, LLC

Brett D. Robuck
