B5. Total Certified Federal USF Receipts	\$ 2,182			\$ 2,182
C. DO EXPENDITURES EXCEED FUSF RECEIPTS? <i>(negative number means FUSF exceeds Expenditures)</i>	Yes			Yes
	\$ 111,430			\$ 111,430

Notes:

- 1) Exclude the cost of transport between switches (dial-tone and/or tandem).
- 2) Allocation Codes (describe how the costs are allocated): *[the following are examples only, not a complete list.]*
 - a. Based on number of switched MOUs from USF supported cell sites.
 - b. Based on actual expenditures at USF cell sites. An allocation of USF area to total served area is applied at each cell site. (i.e. 200,000 investment at Cell Site A, which serves 80% USF supported area, results in 160,000 of USF dollars.)
 - c. Based on percent of USF served areas to all areas.

Addendum A

Form 481 – Line 330

Required Steps for Determining/Correcting Unable to Service

1. The technician will climb onto the potential customer's roof and determine if there is Line of Site (visibility) to the communications facility where the Access Point is located.
2. Using a service module and reflector, the technician will determine if there is a signal to noise ratio strong enough to deliver service.
3. If there is not Line of Site or the signal is not strong enough from the roof top level, the technician will attempt to gain Line of Site using a tripod and extension pole.
4. Should that fail, the technician is required to contact their supervisor, take photographs in the direction of the Access Point in order to document that there is an obstruction preventing Line of Site, send the pictures to their supervisor for review and then note the reason service could not be delivered.
5. Engineering makes a note of the line of site issue and plans future access point additions accordingly.
