Re: Request of Hearing, 1-CONS-3095-CPEN

To whom it may concern,

We would like to request a hearing to request relief. We believe we are due a relief because the T-1s to transfer the remaining wells on our Well Inventory List to the new operator were submitted in a timely fashion by our office. The T-1s were somehow misplaced or lost by the Kansas Corporation Commission or possibly by the United States Postal Service. We have now submitted a new set of the T-1s which were received today by the KCC.

Please note that we submitted many T-1s during this process. Jessica Garcia worked closely with Olivia Raigosa to get this completed properly. She even notified Ms. Raigosa of the upcoming renewal of the license and Ms. Raigosa assured Jessica that there would not be a concern.

We would like to request a relief because this was not a delay or negligence on our behalf. We are doing everything we can to get this completed in a timely manner and will continue to work with the Commission to get this completed in its entirety.

Thank you for your consideration. Please contact Jessica Garcia for any questions or further steps in this process.

Sincerely,

Brian Lingard, Manager
