RE: Hearing Request for Docket Number 15-CONS-282-CPEN

Dear Director:

This memo is to serve as Trimble & Maclaskey Oil, LLC's written request for a hearing regarding penalty order- Docket Number 15-CONS-282-CPEN. We are seeking relief due to the fact that one of the wells that were found to be in non-compliance was simply reported incorrectly on the U3C Form. Permit number E21052.1 is allowed to inject 29,200 total barrels of fluid. The U3C Form that was filed reported that 34,720 barrels were injected due to a typing error in the last three months. However, the correct reporting should have been 29,200 for the year.

As for the other three permits—numbered D23883.0, E00519.3, and D16378.0—that were found to be over-injecting, we were unaware of the correct maximum authorized injection rate. These leases were purchased many years ago with limited lease files. Trimble & Maclaskey Oil, LLC was under the impression that we were injecting within our allowable limits. Since we are now aware of the correct rates, we will be filing amendments to those injection permits in order to be in compliance with the law.

Additionally, we have sent a Request for Records under the Kansas Open Records Act to gain access of all our other wells most recent injection permits. We are actively working to ensure that all of Trimble & Maclaskey Oil, LLC's wells are being used properly.

Respectfully,

Randall L. Trimble, managing member
