SUBJECT: Please deny permit for Cross Bar Energy injection well in Greenwood County

From: Cathlyn Unruh, 8799 Lakeshore Drive, Ozawkie, KS 66070

Dear Rene Stucky,

I live in Ozawkie, KS and am a lover of our great state of Kansas. My favorite part of the state is the Flint Hills where one can still feel and see the vistas that have supported rich life and sustained the hopes of Kansans and travelers alike for generations. The majesty of the Flint Hills is something that I believe deserves to be preserved and left as a testament to future generations of our appreciation for the beauty of our place on the planet. As I crossed through the region twice this month, I continue to be in awe of the gift and legacy they are for Kansas to preserve.

I am writing to protest and request a hearing in the matter of the Application for an Injection Well and Application to Amend Injection Permit by Cross Bar Energy for the Vagle VW-6 and VW-8 wells in SW/4 of Section 14, Township 23-South, Range 10 East, Greenwood County.

The permit number is E-27315. I was unable to find the title and docket number on KCC's website, or in the public notice published May 24, or on the application.

Injecting toxic wastewater into the Bartlesville formation is dangerous and may pollute the natural resources of the state of Kansas.

In addition, the US Geological Survey states that injection wells are the cause of the recent earthquakes in Kansas. Those earthquakes continue to cause uncompensated damages to private and municipal property, and they are moving northward in the state, with several this month epi-centered near the Nebraska border.

Please consider erring on the side of caution and protect the land and water of the Flint Hills for grazing and tourism by denying the permit to Cross Bar Energy.

I have cc'd Cross Bar Energy on this letter, and have cc'd you on my email to them.

Respectfully,  
Cathlyn Unruh
