RE: 20-CONS-3039-CPEN, Operator #5446, Paulsen #8B – request for hearing
Dear friends:

We respectfully request a hearing on the above referenced docket. We cannot MIT or plug this well because the packer is stuck in the hole and we cannot hook on to it and or pull it out. We previously attempted to plug the well. KCC staff was onsite and witnessed the downhole issue we encountered. KCC staff would not allow us to plug the well without removing the equipment. The primary working interest owner of the lease has filed for Bankruptcy, and there are not currently resources available to undertake such a capital cost. The lease will be liquidated soon. It is my hope that a responsible party will successfully bid on the well and assume responsibility. In the meantime, this well does not appear to be a threat to fresh water.

Thanks for your consideration in this matter.

Very truly yours,

Charlene A. Giles

On behalf of operator
