BEFORE THE STATE CORPORATION COMMISSION OF THE STATE OF KANSAS

In the matter of Robinette Oil Company "Application for injection well"

K.A.R. 82-3-401

PERMIT #: NEW API #: 15-103-21177-00-01

22-CONS-3116-CUIC

Complainant: Michael C Harper, owner, MSP OIL, LLC

Defendant: Ed Willis, Robinette Oil Co, lease holder of Demaranville Well 9-3.

TITLE OF THE PLEADING

Michael C Harper, owner, MSP Oil, LLC object to the request for Ed Willis of Robinette Oil Co., to transfer one of his wells to an injection well.

1. Based on the distance of intended well to be transferred to Injection (Well #:Demaranville 9-3)
Legal location: NW/4 SEC 3 TWP 9S RANGE 20E.
2. Demaranville well # 9-3 is approximately 600' from Harper wells with a top injection level of 1480' and a total depth of 1530' and they are asking for an injection of 100 bbl. per day at 900 psig.
 - a. Harper well total depth of 1512' with a Perf of 1442'-1450'
 - b. Another well is total depth in 1498' with a Perf of 1396'-1422'
 - c. Another is total depth of 1515' with a Perf of 1462-1468'
 - d. And two more wells at approximately 1500' depth.
3. Willis Injection well (on the same plain as Harper MSP Oil, LLC wells) most likely would increase the back pressure of the Harper (MSP OIL, LLC) wells causing the Harper wells to have elevation in oil level. Harper (MSP OIL, LLC) wells are at a 100 to 150 ft below ground level depth and increasing the pressure could push the oil out of the top and on to the ground, causing an oil spill. This would be a violation of EPA laws.

Prayerfully, I Michael C Harper, MSP Oil, LLC request this injection well proposal be evaluated by a professional for a conclusion as to any adverse effects of this intended injection well to MSP OIL, LLC wells.

Michael C Harper
