To whom it may concern,

The application for a disposal well on the Mini-Farm property, located in E2NW4, Section 23, Township 12-South Range 20, East Leavenworth County, KS.

Seems to be counterproductive by pumping salt water back into the ground right next to the Wells where you are trying to get oil. This small amount of poor quality of oil does not Seem worth the chance of contamination of fresh water witch we cannot Live without.

Seems too Risky to me to use this method.

Kent Nunemaker

A handwritten signature in black ink, appearing to read "Kent E. Nunemaker", written in a cursive style.
