RE: Docket # 17-CONS-3504-CEXC. Application for Exception to Pit Closure Time Limitations

On February 28th, 2017 we filled an Application for Exception to Pit Closure Time Limitations of K.A.R. 82-3-602(a)(2) for the Oolite Energy Corporation Meyers #1-2 located in the Southwest Quarter of Section 2, Township 34, Range 29 West, Meade County Kansas.

Since that application date the pit in question has dried up enough and we were able to back-fill the pit and restore the location to previous condition prior to drilling operations. Such work was completed on March 18th, 2017.

At this time we ask that our Application for Exception to Pit Closure Time Limitations of K.A.R. 82-3-602 (a) (2), Docket No. 17-CONS-3504-CEXC be withdrawn because the pit in question has been properly back-filled and location restored.
