January 28th, 2015

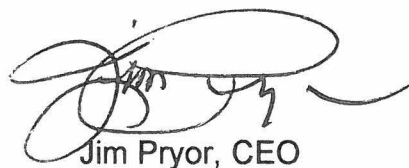

Dear Mr. Snider,

I received your Letter dated January 12, 2015 which was sent regular mail service giving me 10 days to request a hearing regarding authority for the subject injection well. I received the letter on January 25th 2015, three days past the 10 day limit to request a hearing. Your January 12, 2015 letter stated that a copy of the Conservation Division regulations regarding application, hearings, and protestants was enclosed, however no such documents were enclosed.

After discussing this matter with you by telephone on January 28th, 2015, when I requested a hearing, I ask that you consider this letter written confirmation of my desire for a hearing. I would also like to request any pertinent Completion information for the wells that offset my lease as formally described to you. Although I believe the facts stated in my written protest are sufficient justification to deny the authority to dispose of saltwater in the subject well only 335' of my lease line, I can complete a better presentation of the facts with access to the well records and logs currently held confidential.

I will wait for the information you send regarding the hearing, and any well data available to me.

Respectfully Submitted,

Jim Pryor, CEO
