Re: Cheyenne Bottoms

To Whom It May Concern,

I have recently heard of the plan to drill for oil near Cheyenne Bottoms. This is one of my favorite places in Kansas. I am from Western Kansas and visit the safe haven for birds regularly. Drilling will have environmental impacts beyond the landscape, this is important to the conservation and migration of a variety of species. I am in strong opposition to this plan and advocate to not destroy one of Kansas' greatest treasures. Please consider the potentially definite loss over the temporary revenue benefits.

Sincerely,  
Adam S.
