RE: Application for Injection Authority
Docket D-32,464
Quail Oil & Gas, LC
Sly #2-6 SWD
Sec 6-T17S-R6E
Morris County, Kansas

Dear Mr. Thompson:

This letter acknowledges receipt of your protest/objection to the above-referenced application.

Please advise me within ten (10) days of receiving this letter if you feel a hearing should be scheduled in this matter. If a hearing is scheduled, you will be expected to participate in the hearing either in person or through legal counsel. Should you decide that you will not participate in a hearing, none will be scheduled and the application will be handled administratively and your protest will be noted. The U.S. Environmental Protection Agency (EPA) requires a hearing be held where significant interest is demonstrated. Failure to participate in the hearing process after filing a protest or objection indicates a lack of significant interest and no useful purpose would be served by holding a hearing if you, as opposing party, are not there to present testimony or cross-examine applicant's witnesses. If you are going to appear, you will receive a Notice of Hearing and should carefully comply with that Notice, including the requirement of pre-filed testimony. Any person requiring special accommodations under The Americans With Disabilities Act needs to give notice to the Commission at least ten (10) days prior to the scheduled hearing date. If you have questions regarding the hearing process, please contact John McCannon (316-337-6200) of our legal staff.

Commission staff has the duty to represent the public in general in recommending approval or denial of applications for injection or disposal well authority. One of the Commission's primary concerns is the protection of our groundwater and environment. If no hearing is held on this application, your objection will be taken into consideration by our staff in making a recommendation on this application. All of our staff geologists and technicians have qualified as expert witnesses and are sensitive to the concerns expressed by you and the citizens of our State.

Enclosed is a copy of the Conservation Division regulations regarding applications, hearings, and protestants. If you have any other questions, please do not hesitate to contact me.

Very truly yours,

Rene Stucky

Wichita, KS 67202-1513

Dear Renee Stucky:

I am a resident of Chase county, which is downstream of a proposed wastewater injection site at the head of Diamond Creek in Morris county. I am writing to express my concern about an application from Quail Oil & Gas, LC for a permit to inject wastewater into the Arbuckle formation in Morris County, KS.

Most induced earthquakes in the United States are a result of the deep disposal of fluids (wastewater) related to oil and gas production. It is possible for the toxins in these fluids to leech into ground water and drinking water sources. Seismicity can be induced at distances of 10 km or more away from the injection point and at significantly greater depths than injection. The site of the proposed injection well is within that proximity to several fresh water springs.

All companies that wish to inject wastewater into the ground should be required to carry liability insurance that covers damages to property from induced earthquakes. I have earthquake insurance on my property, but it carries a large deductible. This year we had an earthquake that shook the house that originated in Oklahoma.

I am sure Quail Oil & Gas, LC is not prepared to make reparations to any damages they may cause, but just file bankruptcy and start a new company leaving people in the community to deal with our recovery on our own.

Please consider denying the permit to Quail Oil & Gas, LC to inject wastewater into the earth.

Sincerely,

Thomas G. Thompson
