OF THE STATE OF KANSAS**

In the Matter of the Application of Evergy)
Kansas Central, Inc. and Evergy Kansas) Docket No. 25-EKCE-294-RTS
South, Inc. for Approval to Make Certain)
Changes in their Charges for Electric Service.)

NOTICE OF FILING OF PUBLIC COMMENTS

The Office of General Counsel for the State Corporation Commission of the State of Kansas (Commission) files the attached complete report summarizing the public comments received by the Office of Public Affairs and Consumer Protection (PACP). This filing is for informational purposes only, and no Commission action is required at this time.

WHEREFORE, the General Counsel submits this filing for Commission review and consideration and for such other relief as the Commission deems just and equitable.

Respectfully Submitted,

/s/Brian G. Fedotin

MEMORANDUM

To: Celeste Chaney-Tucker
Executive Director

From: Linda Berry, Director
Public Affairs and Consumer Protection

Date: July 16, 2025

Re: Public Comments – Complete Report
Docket 25-EKCE-294-RTS

Attached is the report summarizing all comments received by the Office of Public Affairs and Consumer Protection (PACP) in Docket No. 25-EKCE-294-RTS, In the Matter of the Application of Evergy Kansas Central, Inc. and Evergy Kansas South, Inc. for Approval to Make Certain Changes in their Charges for Electric Service.

There were 1331 comments received by letter, phone, email, and online via the KCC website through July 14, 2025. Copies of the summary and comments received are attached and designated as “Attachment A.”

I request the Office of the General Counsel file the comment memo and supporting materials into the docket.

Cc: Brian Fedotin

Narrative

02-10-2025 I am writing to you today in regards to the notification of an upcoming rate increase request by Evergy. I understand that everything is more expensive, for them as well, but I must implore you to deny this rate increase. They have consistently raised their rates, citing weather events and overhead costs, which while generally understandable, has resulted in customer bills rising to unaffordable levels. Our bill is getting to be unsustainable, and it's concerning because we do try to do our best to conserve our usage and be responsible about our ability to pay it. This is largely concerning because we are better off than many others, and if we're worried, I know thousands of others are panicking. While I know some increases are unavoidable, I would please ask that they be persuaded to consider internal cuts and efficiency analysis before just making the general public figure it out. We don't have any other options for electricity. It's Evergy, or nothing. Please, do not allow this increase. Sincerely, Andrew Sprinkle

Narrative

02-10-2025 Everygy Rate Increase Request Hearing I understand the request from Everygy for a rate increase to cover the cost of improving the power grid, but a \$13.05 increase per month couldn't come at a worse time for most people, especially lower income and elderly residents. We are a captive audience and the KCC is the only voice and control we have on increases like this. If you must approve an increase, at least spread it out over a longer period of time. Thank you for your consideration. Terry Wiens

Docket Number 25-EKCE-294-RTS

Consumer Opinion O
of Petitions Signatures

Narrative

03-05-2025 Hello. As a concerned citizen, I'm worried about another rate increase that Evergy is wanting. It appears their 2024 profits were greater than 2023. I suggest they use THEIR money for any projects they may want to do. Or perhaps, lower their shareholders gains. Most businesses have a budget and normally set aside money for any expansion or expense increases in the future. Likewise, ordinary citizens have to live within their income limits & plan for projects, either planned or unforeseen. We don't have outside customers we can ask for an income increase. Being a senior citizen who lives on a limited budget, my expenses have gone up several percentage points while my income has not kept up with the pace of these expenses. Hence, I have to make decisions every day on what I can do without. In summary, I would not be for this 2025 Evergy rate increase. Thank you for your consideration.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-17-2025 Merged comments In 2023, Evergy raised rates on the central region while the metro region got a decrease (I didn't agree 2 years ago that metro region got a decrease). So again, Evergy wants the central region to absorb another rate increase, why? Also, I don't understand why industrial customers pay 1/2 of what residential customers pay. Evergy continues to have increased yearly income; I recommend they use THEIR income vs OUR income for any projects, etc.

Narrative

04-03-2025 My name is Nancy Brown, I live in Wichita, and I'm extremely concerned about this project. We're spending billions of dollars, and we know that it's going to cost more than the 2 billion that we're being told. It's going to raise our rates exponentially, and it's to address a need that may never actually exist. As I understand it, these are being built to provide infrastructure for potential data centers that we don't have. We don't have any promises of data centers; we don't even have any prospects. And that just seems like an incredible waste when there are so many other things that need funding in all facets of our life here in state. So please, please, please do not approve this project. Thank you.

Narrative

04-05-2025 I run an engineering firm related to building design - I totally understand the need for making sure that infrastructure is upgraded and the importance of a reliable energy grid. That being said.....it is MY responsibility as a business owner (and homeowner) to allocate funds that I have received to improve MY infrastructure with MY money. It is asinine to me to think that this company's lack of planning and foresight can just be overlooked and they can make their customers pay for their resulting problems. IT'S CALLED PREVENTATIVE MAINTENANCE AND EVERYONE (except apparently Evergy) HAS TO DO IT IF THEY WANT TO SURVIVE. Lack of planning on your part does not constitute an emergency on mine

Narrative

04-06-2025 With current outlook of the nation, increasing the cost of energy is not in the interest of the current public users. When energy prices should be decreasing to increase is not acceptable. We all understand the price will never go down and the profits of Evergy is only going to increase. Evergy needs to manage their profits and spending as any profitable business is doing. Maybe they should look at their own business and where excess may be cut.

Narrative

04-07-2025 The Kansas Sky solar facility? Really? Dave Walsh is the former President and CEO of Mitsubishi Power Systems Americas. Says the mathematics do not work. He says that it costs four times as much to build a solar plant than a natural gas plant, while power output is only 25 percent of that of a natural gas plant. This is because on average, a solar plant only produces energy six hours a day. Please spare us this. Horror!

Consumer Opinion **O**
of Petitions Signatures

Narrative

04-07-2025 Rather than construct gas-powered plants (in the when we build it they will use it mentality), develop energy conservation programs to lower consumption. Over three decades ago, the KCC heard from energy conservation professionals based in Colorado. Imagine the impact if those Commissioners had followed the advice. Fast forward to 2025 and energy-saving appliances, HVAC, insulation, etc are even better. While there are tax incentives for homeowners, the monopoly could reimburse say 10% of those purchases. Envision the consumption reduced by multifamily housing and apartment buildings built prior to 1980 were more energy efficient. Before approving the start of the construction of gas-powered plants (which eventually come online and increase rates), hold Evergy accountable for proving they aided residential energy efficiency measures equivalent to half the construction costs.

Consumer Opinion O
of Petitions Signatures

Narrative

04-07-2025 Having lived in Topeka for 43 years, I have received electricity from Evergy or its predecessors throughout that time.. As an 80-year-old dependent on Social Security and modest lifelong savings, I do not favor an increase in utility rates. I recognize the need to maintain infrastructure and increase generation capacity given the public's increasing demand and adverse effects of a changing climate. The increase in utility rates would be better used, in part, to decrease the demand through weatherization programs and subsidizing the cost of residential solar and backup battery or fossil fueled systems. Respectfully.

Consumer Opinion **O**
of Petitions Signatures

Narrative

04-16-2025 I do not believe a rate increase is necessary. Evergy is requesting to raise rates for Kansans under the pretext of improving infrastructure to better serve customers. Allowing these rate increases to occur while Kansans are struggling, especially when companies like Evergy are posting hundreds of millions in profits, is unjust. It effectively burdens those who are barely making ends meet. How is it that a company that people are so dependent on can so easily continue to increase rates while we, the people, have little choice in the matter? It is simply unjust to continue to increase costs for Kansans just so it doesn't negatively affect Evergy's bottom line. This indicates that the company prioritizes its shareholders over its customers.

Narrative

04-17-2025 As a retired customer on a fixed income, I oppose Evergy's rate increase of 13+%. During a time when everyone is paying more due to recently imposed tariffs, how can a utility company consider adding an unrealistic rate increase for any of their customers? Please consider fixed incomes as you customers before voting to allow such a big rate increase. Thank you.

Narrative

04-19-2025 Everygy's rate increase request will give them a higher ROE than is necessary for a utility that has a monopoly. They have guaranteed customers and cash flow, and the trade-off for that is they don't also get guaranteed double digit profits. Asking for a margin exceeding 10% on a product people must have at all times to live is just greedy. Additionally, the rate structure they propose is unfair to residential customers. It asks them to bear 110% of the allowable increase, while every other category is proposed to bear less than 100%, some as low as 88%! I can afford another \$13 per month, but some residential customers can't. Please make Everygy start over and come back with a more reasonable rate case. Inflation should hurt profits sometimes too, not just ratepayers.

Narrative

04-23-2025 In a time of increasing economic uncertainty and rising costs, it's unconscionable for a utilities company to request such a significant rate increase. Their CEO made over \$2 million last year and CFO made over \$1 million. The company itself reported over \$80 million in earnings in 2024. Maybe they could take a tiny part of those profits to cover the costs of doing business.

O

of Petitions Signatures

Narrative

04-23-2025 Kansas Corporation Commission, please deny the request of Evergy Kansas Central 25-EKCE-294-RTS that will increase cost 8.62% or \$13.05 a month. As you know Evergy Inc paid \$873.5 million to common stockholders alone in 2024. Increasing the cost of electricity that Kansans like myself depend on to live is unambiguously unjust and unreasonable given the amount of profit generated by Evergy Inc. This is exactly where your commission to regulate corporations unjustly increasing consumer cost in order to fulfill their function of maximizing profit and market share is crucial. Please do so. Sincerely, Merrill Sake, Evergy customer in Lawrence KS

Consumer Opinion **O**
of Petitions Signatures

Narrative

04-28-2025 Everyone is struggling, except executives and very high-income earners. The KCC should not approve any rate increase unless Every executives and corporate officers are remaining at their same rate of pay. KCC should also not approve any rate increase that is tied to a stock buy-back plan. Thank you for your time and attention.

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

04-28-2025 Everygy should continue its investment in renewable energy and be pressed to make money there instead of increasing prices on customers. If they are squeezed a bit towards innovation, we shouldn't have to go through these changes as eventually we can move towards energy sources that doesn't require a large fuel charge.

Docket Opinion

Company ID EKCE
Docket Number 25-EKCE-294-RTS

Consumer Opinion O
of Petitions Signatures

Narrative

04-28-2025 Every earned 142million more in 2024 than it did in 2023, a 19% jump. In addition, the expected increase in profit share shows an expectation of an even larger jump in growth in 2025. Before footing a billion dollar project that will disproportionately hurt impoverished people who are already struggling in an unstable and highly inflationary economy, I would like to know things like where is that extra profit going? How much are the executives being paid? Every has a monopoly on the Kansas market. I am going to need some justification as to how these changes will decrease expected expenditure long term for the residents, as it would in the case of investments into solar and wind.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

04-28-2025 This proposed increase is simply unaffordable for many Kansans. An additional \$156.60 is not insignificant. It directly impacts household budgets, forcing difficult choices for families, seniors on fixed incomes, and low-to-moderate income residents already struggling to make ends meet. Essential electricity should not become a luxury item. Customers deserve reliable service for fair rates. Before approving another increase, we need assurance that current service levels justify the existing rates, let alone a significant hike. I question whether Evergy is operating as efficiently as possible and whether shareholders are bearing a fair share of the costs versus ratepayers. A blanket statement citing \$1 billion in infrastructure investment is too vague. We, the customers footing the bill, deserve a detailed breakdown of these investments. Were these projects managed prudently and cost-effectively? Are they truly necessary for reliability and safety, or do they include discretionary spending? Similarly, adjustments for cost of capital and increased operating expenses require rigorous scrutiny. Has Evergy exhausted all internal cost-saving measures and operational efficiencies before passing these costs onto consumers?

Consumer Opinion **O**
of Petitions Signatures

Narrative

04-28-2025 David Campbell got paid 7.1 million dollars in 2023. Maybe you should reevaluate the pay of your staff instead of forcing the consumer to bear the brunt of your requests (that won't even pan out for us! They never do!) It's incredible how every gets away with 'infrastructure investments' that somehow never pan out, but their CEO gets a payraise. Stop raising our rates for your own [REDACTED] greed.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

04-28-2025 Everyy should not be allowed to raise rates. The company has posted annual gross profits in excess of \$3 Billion for the last 6 years. The executive compensation for at least 7 of their senior execs exceeds \$1.5M annually and their CEO received over \$7M in total compensation during FY24. This is an extremely profitable company with an effective monopoly over the citizens of Kansas. Squeezing hard earned dollars from the citizenry and shoveling it upwards to some of the wealthiest people is both unnecessary and unethical. No rate increases today, no rate increases tomorrow.

Consumer Opinion **O**
of Petitions Signatures

Narrative

04-28-2025 I am sympathetic to the need for capital investments. Especially those which ought to strengthen the service reliable for consumers. However, the current economic climate has me reluctant to support this request as is. Suppose Everygy's executive compensation is frozen for a 2-3 year term? Or perhaps they are made to take a haircut in conjunction with the proposed rate increase? Either of those would make this request more palatable to me as an end user.

Consumer Opinion
O

of Petitions Signatures

Narrative

04-28-2025 Everygy has already recently raised rates. Based on the summary provided, I don't think they have given adequate reasoning behind the increase. I did not read about any cost cutting measures attempted before asking to pass the cost onto consumers, again. Everygy has essentially a monopoly on providing this utility in my area and I think their rates should be closely monitored and limited by the government. Thank you.

Narrative

04-28-2025 How about before passing along price increases to already struggling customers, who have no other option but to pay, you make your c-suite executives take a pay cut. Be honest about what you're doing, price gouging your customers because you know they have no other options, and nobody is going to stop you. Take a good long look in the mirror and decide if this is the kind of company you want to be, and we the people will remember your actions and act accordingly

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

04-28-2025 Every customers don't have a choice in the utility company selected to provide our power. We should at least have a say in how our money is being utilized. I am not opposed to investments in infrastructure, but increasing rates for cost of capital is concerning. Investors should not be capitalizing on economic uncertainty by increasing rates for customers whose only other option than paying an increased rate is to be without electricity. It is a basic human right to be warm and safe, and increasing rates pushes Every's customers further towards losing this right.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

04-29-2025 This will effectively double my bill in months where I am not running the air conditioning. It will also disproportionately effect lower income homes, like mine. This then increases the risk that bills cannot be paid and the threats that electricity will be shut off. Your profits are high enough, maybe cut the c-suite salaries instead of hiking rates up.

of Petitions Signatures

Narrative

04-29-2025 I understand with the rising cost of things and wanting to provide safe, reliable electricity to your customers. What I want to ensure is you are not raising rates to make record profits for your shareholders. Yes, your duty is to your shareholders and making a profit, but I strongly encourage you to not make a profit off the backs of your customers who often work 3 jobs just to make ends meet. Those people who sit in the shareholder seats are not the working class. Your shareholders can survive on ANY profit made on their behalf, they do not need RECORD BREAKING profits, they will survive and so will you. Thank you

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

04-29-2025 How many more rate hikes are we going to keep giving them? Seems like every year or two it's another rate hike? When are we going to get a rate hike in our wages to keep up with their rate hikes? How is it they need these continuous rate hikes, yet report record earnings? How about they start making some pay cuts to those at the top of the company making millions while some customers struggle to keep the lights on with the rate hikes every year or two.

Consumer Opinion **O**
of Petitions Signatures

Narrative

04-29-2025 Please don't raise rates. It's already hard enough to afford as is. It's said that in business, you have to spend money to make money. Your company posts record breaking profits on the regular. You have basically monopolized the state, even though it's illegal to have a monopoly. There is no other company to get electricity from in Kansas. Please stop asking for welfare and pay for your own business equipment that you also get immense tax breaks and write offs for. Have some pride. No more corporate welfare!

Consumer Opinion **O**
of Petitions Signatures

Narrative

04-30-2025 This is clearly a move to appease shareholders and rake in profit from a vulnerable and captive market. If Everygy wants to build new plants they have more than enough money to fund that construction themselves at a temporary and negligible cost that they can pay until those plants come online and begin bringing in even more profit. To pass this onto the customer is asking to have your cake and eat it too. For this reason I am opposed to any price hikes. Thank you for your time.

Consumer Opinion **O**
of Petitions Signatures

Narrative

04-30-2025 Our tax dollars are already going to federal subsidies and grants given to Evergy for improving infrastructure. Evergy is already making millions of dollars in profits. There is absolutely no reason why the customers should be charged more for Evergy to do the job we are sufficiently paying them to do. The customers are not here to line the pockets of greedy corporate executives. Electricity is a basic necessity not a luxury or a commodity. People are already drowning in bills and stress, don't add to it. Create a solution, don't worsen the problem.

Narrative

05-01-2025 As a loyal customer, I cannot in good faith support this rate hike. Most Kansans are being taxed out of their homes & need rates/taxes/mill levies to be lowered. If this infrastructure could promise reduced rates in the future, I would be much more supportive. Everygy's request not including costs for the Panasonic plant or two gas plants implies that rates will continue to rise moving forward. Someone has to draw the line to hold Everygy accountable.

Consumer Opinion O
of Petitions Signatures

Narrative

05-01-2025 Instead of passing the cost of infrastructure to the consumer, why don't the executives take a pay cut? They're not entitled to year after year record breaking profits only to complain about needing even more, while they're individually responsible for more usage than the average person. Every year there's a new rate hike. This has got to stop.

Narrative

05-02-2025 The company waste so much money, they need to learn how to run their business efficiently. I am a builder/ developer deal with them on regular basis, u talk about a company that doesn't know what the head and tail are doing, because the amount of money they make covers all the mistakes. Just take a look ant all the people at the top and the payroll amount that goes out which is ridiculous. Time u say no to any increase, make them accountable for all the wasteful spending. Please think of all the customers that are struggling to pay their bills, billions that enevogy makes. Time to stop corporate taking advantage of us people.

Docket Opinion

Company ID EKCE
Docket Number 25-EKCE-294-RTS

Consumer Opinion O
of Petitions Signatures

Narrative

05-06-2025 In 2021 my electric bills averaged 11.7 cents per Kwh. In 2024 my electric bills averaged 13.9 cents per Kwh. That's an increase of 18.8% in just three years. Not only has that been a significant increase that impacts our family's budget, but the increases have regularly outpaced inflation. We have even opted for a new rate plan and adjusted a significant portion of our usage to off-peak times in an effort to cut costs, but continue to see larger and larger monthly bills in spite of these efforts. The inflation rate for 2024 was 2.9% and is sitting below 3.0% so far in 2025, but now Evergy is requesting a huge 8.62% rate increase that's roughly triple the inflation rate. I understand companies have to increase their prices to offset the increased costs they face, but Evergy is going way beyond and asking too much. The nature of utilities makes it impossible for Evergy's prices to be controlled by a competitive market, since they are the only electric company available at my location. That's why the KCC exists ... to provide a level of protection for consumers like me ... and this is a prime opportunity for the KCC to step in and protect the consumer by telling Evergy No to its request for an oversized rate increase. Thank you for taking the time to read and consider my comments.

EKCE	25-EKCE-294-RTS	O	

Narrative

05-08-2025 A rate increase is highly unacceptable! We are entering uncertain times with tariffs and economic instability. Evergy had a profit of 873.5 million dollars in 2024 and 731.3 million in 2023. Those 2 years alone could pay for their 1 billion dollar investment and have plenty left over. So why do they need a rate increase of 196.4 million and how long does this rate increase last? forever? They are making plenty of money. A rate increase is unjustified to line the pockets of Evergy executives and this Kansas Corporation Commission should be ashamed to even entertain the idea of a rate increase on Kansas families.

Narrative

05-12-2025 To the Commissioners, I am opposed to the rate increase request by Evergy. I am an Evergy client not by choice, but because as a renter, they are who I am told to patron. Now, I'll admit, they are not as bad as other utility providers I've had to deal with (Black Hills is truly lacking in almost every department). T being said, as a renter, I feel the pinch of decisions that are outside of my control. One of which is the way my home is heated/cooled. My partner and I do all that we can to limit our electricity usage--from running appliances during non-peak hours to line drying clothing to limiting the time we have on our A/C unit and fans, but it seems to have marginal effect on our uninsulated home. We have only been in our house from Aug 2024 to present, but, while I love it dearly, I am fearful of what an 8.62% increase could do. Our bill in October of last year (not the hottest month of 2024) was over \$150. I'm not sure in how many more ways my household could reduce our electricity use to compensate for a rate increase without making our home unlivable during the warmer months. I hope the commissioners take this viewpoint into account while considering this request.

Narrative

05-13-2025 To whom it may concern: As I am sure you are aware, in most areas of Kansas, Evergy has a monopoly. This email is in response to the insert to the bill I received from my current Evergy bill requesting a 8.62% rate increase. This is a time of economic uncertainty. But also a time that Evergy shareholders are doing very well- dividends and share prices are up and have gone up yearly. This almost 10% increase across the board seems like a burden to the consumer and a boom for the shareholder. Thank you for your time to read this email. Respectfully, Annette Duncan Olsburg, KS

Narrative

05-14-2025 Regarding their request for an 8.62% increase, I would encourage the KCC to look into this because their past history does not show credence. I would not say they're lying in their need, but my opinion of their past history is that they are looking for money I don't think they deserve.

Narrative

05-17-2025 Thank you for all you do for us, but as a widow on a fixed income unable to work as well as for all those who are in the same situation or worse, please, please, please limit / stop raising our rates. Those rate increases mean next to nothing to those with well-paying jobs, but it is very concerning to those of us who have to watch every dollar spent in order to survive. Similar to how other entities like school districts cope/manage/adjust when voters turn down their requests for rate increases, I am sure with your level of intelligence you can figure ways to do better without raising our rates so often and so much. From our viewpoint, no matter how you say it, YOU and your employees are getting much richer and WE are getting poorer. You are not fooling us. Sincerely and respectfully submitted with the hopes you will really listen to this feedback.

Narrative

05-19-2025 I am against this increase that everyy wants. It's an end around to get money they did not get the first time. To expect us people in the state of the economy and what it is costing everything else. We can not afford a \$13.69 increase in bills. These people when they bought out our local utility said they would bring costs down. It is not fair for the topeka area to carry any of their fair share of the increase.

Kansas Corporation Commission
Office of Public Affairs and Consumer Protection
1500 SW Arrowhead Road
Topeka, KA 66604-4027

RE: In the Matter of the Application of Evergy Kansas Central, Inc. and Evergy Kansas South, Inc. for Approval to Make Certain Changes in their Charges for Electric Service Pursuant to K.S.A. 66-117

Docket Number: 25-EKCE-294-RTS

Americans for Prosperity Kansas (hereinafter "AFP-Kansas") submits these comments for consideration in the above-captioned rate proceeding.

AFP-Kansas is concerned that if this Kansas Corporation Commission ("KCC") approves the items requested in the Joint Application (hereinafter "Application") of Evergy Kansas Central, Inc., and Evergy Kansas South, Inc. (hereinafter collectively referred to as "Evergy") without modification, particularly in view of additional proceedings before this Commission concerning Evergy Kansas Central, Evergy Kansas South, and Evergy Kansas Metro, Inc.,¹ a staggering rate increase will be passed on to Evergy's customers.

Evergy's Application

Evergy is asking this Commission to approve in *this* proceeding:

¹ Additional dockets include:

Docket No. 25-EKME-315-TAR: In the Matter of the Application of Evergy Kansas Metro, Inc., Evergy Kansas South, Inc., and Evergy Kansas Central, Inc. for Approval of Large Load Power Service Rate Plan and Associated tariffs.

Docket No. 25-EKCE-207-PRE: In the Matter of the Petition of Evergy Kansas Central, Inc., Evergy Kansas South, Inc., and Evergy Metro, Inc. for Determination of the Ratemaking Principles and Treatment that Will Apply to the Recovery in Rates of the Cost to be Incurred for Certain Electric Generation Facilities under K.S.A. 66-1239.

- \$196.4 million net increase revenue requirement after property tax surcharge costs are netted out (representing an actual base rate change of \$192 Million)²
- 13.59% base rate increase with the following allocations to the various rate classes:
 - 14.96% increase to:
 - ❖ Residential
 - ❖ Churches
 - ❖ Schools
 - ❖ Electric Vehicles/Clean Charge Network (except for Business Electric Vehicle)
 - 13.05% increase to:
 - ❖ Large Power (ILP) and
 - ❖ Special Contracts;
 - 12.64% increase to
 - ❖ Small General Service
 - 11.96% increase to
 - ❖ the Large General Service
 - ❖ Medium General Service
 - ❖ Large Tire Manufacturer
 - ❖ Interruptible Contract
 - ❖ Lighting Classes.³
- 10.50% return on equity

In a *separate* proceeding before this Commission for which an Order is due July 7, 2025, Evergy Kansas Central, Evergy Kansas South, and Evergy Kansas Metro are seeking a determination as to how their expected requests for cost recovery from ratepayers will be treated on account of those companies' costs to be incurred incurred in constructing and acquiring:

50% of the Viola Facility – natural gas facility
 50% of the McNew Facility – natural gas facility
 100% of the Kansas Sky Facility – photovoltaic solar facility⁴

² The Application notes that this amount is after costs included in the property tax surcharge are netted out.²

³ *Id.*

⁴ Docket No. 25-EKCE-207-PRE: In the Matter of the Petition of Evergy Kansas Central, Inc., Evergy Kansas South, Inc., and Evergy Metro, Inc. for Determination of the Ratemaking Principles and Treatment that Will Apply to the Recovery in Rates of the Cost to be Incurred for Certain Electric Generation Facilities under K.S.A. 66-1239.

And in yet *another* docket, Evergy Kansas Metro, Inc., Evergy Kansas South, Inc., and Evergy Kansas Central, Inc. have requested approval of various costs related to their proposed “Path to Power”⁵ for Large Load customers.

Matters for Commission Consideration

I. Evergy’s Annual Update Integrated Resource Plan (IRP) Filing

This Commission should take a close look at delaying the retirement of the Companies’ current coal generating units, and whether it may be prudent for certain facilities to continue operation past their planned retirement dates as reflected in the 2024 Triennial IRP filing.

In fact, the 2025 Annual Update Integrated Resource Plan (IRP) filing⁶ on May 1, 2025 by Evergy Kansas Central, Inc., Evergy Kansas South, Inc., and Evergy Kansas Metro, Inc. discusses the Companies’ changes to their Preferred Portfolio for the 2025 Annual Update.

“This year’s 2025 Annual Update shows increasing needs for Evergy Kansas Central driven by higher large customer load growth expectations.

As part of a long-term strategy and planning assumption for the Jeffrey Energy Center site, Evergy Kansas Central is planning to fully convert Jeffrey 2 to natural gas operation in 2030 rather than retiring the resource, as was planned in the 2014 IRP. Evergy feels it’s important to have a pragmatic long-term plan that balances customer risks and trade-offs of retirement. While the retirement planning assumptions in Evergy’s IRP will remain flexible, delaying the Jeffrey 2 retirement and fully converting to natural gas operations will help Evergy to balance the on-going operational risk, while preserving capacity to meet increased customer demand and reliability requirements of the Southwest Power Pool. ...

Additionally, Evergy Kansas Central expects to postpone the Lawrence 4 retirement from 2028 to 2032 and operate the resource on natural gas from 2029-2032.”⁷

⁵ Docket No. 25-EKME-315-TAR: In the Matter of the Application of Evergy Kansas Metro, Inc., Evergy Kansas South, Inc., and Evergy Kansas Central, Inc. for Approval of Large Load Power Service Rate Plan and Associated Tariffs.

⁶ Docket No. 24-EKCE-387-CPL – In the Matter of the Triennial Compliance Docket for the Integrated Resource Plan of Evergy Kansas Central, Inc. & Evergy Kansas Metro, Inc. Pursuant to the Commission’s Order in Docket No. 19-KCPE-096-CPL.

⁷ *Id.*, pp. 3-4.

AFP-Kansas agrees that Evergy's retirement planning assumptions should remain flexible irrespective of whether the facilities continue to burn coal or whether a conversion to natural gas occurs.

Depending on what final regulatory actions are taken at the federal level at Environmental Protection Agency, particularly in light of the current Administration's energy policies, a closer look at extending the life of certain facilities may be warranted.

Consideration of Evergy's Requests in the "Determination Docket"⁸ and the Impacts to Evergy Kansas Central and Evergy Kansas South Ratepayers in This Docket

In the "Determination Docket,"⁹ Direct Testimony of Lucy Metz, filed behalf of Intervenor Citizens' Utility Ratepayer Board (CURB)¹⁰ notes:

"Evergy Kansas Central did not robustly analyze and test the market for alternatives to Viola and McNew – including batteries added at sites with existing interconnection rights and additional gas conversions of coal units – and therefore has not demonstrated that the CCGTs are the lowest cost way to meet its capacity and energy needs."¹¹

And further:

"Evergy is not alone in facing rising costs for new gas plants. Utilities across the country are facing increasing costs and lead times for CCGT and CT units. This is driven by inflation, the rapid rise in demand from large load customers, and competing demand for labor and plant components. Even in the context of widespread cost increases, Viola and McNew have particularly high capital costs."¹²

And when discussing the preferred portfolio of Evergy Kansas Central, Ms. Metz' testimony states:

"Evergy Kansas Central has not updated its preferred portfolio based on its new modeling results, and it states that it is continuing to pursue the resource acquisition plan from the 2024 IRP. It is unclear what the current lowest cost and lowest risk portfolio is for Evergy Kansas Central, especially since transparency into the update modeling for this docket was limited. Unlike in an IRP,

⁸ Docket No. 25-EKCE-207-PRE: In the Matter of the Petition of Evergy Kansas Central, Inc., Evergy Kansas South, Inc., and Evergy Metro, Inc. for Determination of the Ratemaking Principles and Treatment that Will Apply to the Recovery in Rates of the Cost to be Incurred for Certain Electric Generation Facilities under K.S.A. 66-1239.

⁹ *Id.*

¹⁰ *Id.*, Direct Testimony of Lucy Metz on Behalf of Citizens' Utility Ratepayer Board (CURB), Public Version, filed March 14, 2025.

¹¹ *Id.*, p. 9., Emphasis Added.

¹² *Id.*, p. 18, Emphasis Added.

there was no opportunity for stakeholder engagement during the modeling process, and Evergy has not published its updated modeling results publicly.

Since Evergy only re-optimized one portfolio, **there is no way to determine if the updated modeling results are the best option for ratepayers** compared to alternative portfolios of resource additions. Given the cost increases in CCGTs and since the 2024 IRP, **it is concerning that Evergy Kansas Central continues blindly pursuing the 2024 IRP preferred plan. With changing market conditions, this is no longer in ratepayers' best interests.**¹³

Admittedly, Ms. Metz' testimony in the "Determination Docket" was filed March 14, 2025, prior to the Evergy entities' May 1, 2025 filing of the 2025 Annual Update Integrated Resource Plan (IRP) filing in that separate docket previously identified.¹⁴

Notwithstanding the timing of those various filings, this Commission nonetheless is apprised of the 2025 Annual Update Integrated Resource Plan (IRP) filing and the concerns raised in the "Determination Docket" as to whether the Companies' 2024 IRP proposal is in ratepayers' best interests.

Given the 2025 Annual Update Integrated Resource Plan (IRP) filing, AFP-Kansas recommends extending the planned retirement dates of the identified coal units and recommends that the Companies' retirement planning assumptions should remain flexible.

Consideration of Evergy's Requests in the "Tariff Docket"¹⁵ and the Impacts to Evergy Kansas Central and Evergy Kansas South Ratepayers in This Docket

Returning to the Direct Testimony of Ms. Metz in the "Determination Docket," she states:

"LARGE LOAD ADDITIONS ARE ONE OF THE FACTORS DRIVING EVERGY'S REQUEST FOR PREDETERMINATION OF THE VIOLA AND McNEW PLANTS, AND EVERGY SHOULD PUT STRUCTURES IN PLACE TO PROTECT ITS CURRENT RATEPAYERS"¹⁶

¹³ *Id.*, pp. 22-23, Emphasis Added.

¹⁴ Docket No. 24-EKCE-387-CPL – In the Matter of the Triennial Compliance Docket for the Integrated Resource Plan of Evergy Kansas Central, Inc. & Evergy Kansas Metro, Inc. Pursuant to the Commission's Order in Docket No. 19-KCPE-096-CPL.

¹⁵ Docket No. 25-EKME-315-TAR: In the Matter of the Application of Evergy Kansas Metro, Inc., Evergy Kansas South, Inc., and Evergy Kansas Central, Inc. for Approval of Large Load Power Service Rate Plan and Associated tariffs.

¹⁶ Docket No. 25-EKCE-207-PRE: Direct Testimony of Lucy Metz on Behalf of Citizens' Utility Ratepayer Board (CURB), Public Version, March 14, 2025, p. 38, emphasis theirs.

Her Testimony further states that “(l)oad growth from large load customers, and in particular data centers, poses several risks to all other ratepayers – both in scenarios where the load materializes, as well as in scenarios where it does not.”¹⁷

“First, there is the risk of Evergy building out large amounts of resources for prospective customer load that may not materialize fully or at all. If Evergy builds new generation resources for load that does not materialize then all ratepayers are left paying for unneeded assets.

Second, even if the load does materialize, large generation and transmission build-out can increase system costs for all ratepayers under current tariff structures. This can result from increases in energy and capacity market prices, additional transmission and gas infrastructure investments, and general cost-shifting if rates and tariffs are not set up correctly to have data center customers cover their full incremental cost of service.”¹⁸

In response to a question concerning Evergy’s current process for deciding which large load customers should be included in its load forecast, Ms. Metz’ Testimony states:

“Evergy does not have a well-defined process for deciding which large load customers to include in its resource planning load forecast. ...Evergy states that ‘only projects that have committed to locating in Evergy’s service area’ are included in the load forecast that it uses in its IRP. However, Evergy does not appear to have a clear set of criteria for determining whether a customer has made this commitment.”¹⁹

And concerning how a tariff structure can protect Evergy’s ratepayers from the risks posed by large load additions, Ms. Metz’ Testimony states:

“Evergy can establish tariffs designed for large load additions that protect existing ratepayers from, at a minimum, incurring any incremental cost resulting from the new large load customers. The Commission cannot protect existing ratepayers and design fair and effective tariffs if Evergy does not first understand the incremental costs and risks of serving new large load customers.

...If a data center customer is not willing to receive service under a tariff that shifts some of the cost and risk to the data center customer, rather than placing it all on existing ratepayers, then Evergy should not be building generation and transmission to meet

¹⁷ *Id.*, p. 41.

¹⁸ *Id.*, pp. 41-42, emphasis added.

¹⁹ *Id.*, p. 42.

that customer's demand. Well-designed tariffs protect existing ratepayers from high system costs and incent the data center customers to be more flexible."²⁰

II. Shareholders Should Bear Additional Costs

The Direct Testimony of Ann E. Bulkley filed in this rate proceeding,²¹ states:

"It is a fundamental tenet of finance that the greater the amount of financial risk borne by common shareholders, the greater the return required by shareholders in order to be compensated for the added financial risk imparted by the greater use of senior debt financing. In other words, assuming all else equal, the greater the debt ratio, the greater the risk to equity investors, and thus the greater the return required by equity investors. This is because the claim of equity holders on the cash flows of the Company is secondary to debt holders, meaning the greater the debt service requirement, the less cash flow is available for common equity holders."²²

Tenets of finance and economics notwithstanding, to the extent that ratepayers have no choice in who their electric service provider will be, the fact that those ratepayers bear a significant "financial risk" in Evergy's decisions should not be lost in this discussion.

Evergy's ratepayers deserve a fair shake without "being hosed" in the process.

Evergy shareholders should have more "skin in the game."

Recommendations of AFP-Kansas

While AFP-Kansas recognizes that the matters before the Commission in this proceeding are only those items raised in this current docket, 25-EKCE-294-RTS, AFP-Kansas likewise is aware that additional impacts to Evergy Kansas Central and Evergy Kansas South ratepayers are the subject of two (2) additional dockets: the "Tariff Docket" Docket No. 25-EKME-315-TAR; and the "Determination Docket:" Docket No. 25-EKCE-207-PRE. And, updates in the 2025 Annual Update Integrated Resource Plan (IRP) filing in Docket No. 24-EKCE-387-CPL address the updated considerations of the Companies that should not be forgotten in this current proceeding.

²⁰ *Id.*, p. 43.

²¹ Direct Testimony of Ann E. Bulkley On Behalf of Evergy Kansas Central, Inc. and Evergy Kansas South, Inc., Current rate proceeding: Docket No. 25-EKCE-294-RTS, p. 52, filed January 31, 2025.

²² *Id.*, pp. 52-53.

The number of Intervenor in this case should signal to this Commission that there is concern across Evergy's service territory about the current proposal.²³

- AFP-Kansas recommends that this Commission deny the full recovery of \$196.4 million net increase revenue requirement after property tax surcharge costs are netted out (representing an actual base rate change of \$192 Million) requested by Evergy in this proceeding.
- AFP-Kansas recommends that this Commission deny the full 10.50% return on equity requested by Evergy in this proceeding.
- AFP-Kansas recommends that this Commission give due consideration to the impacts to Evergy Kansas Central and Evergy Kansas South ratepayers as a result of its decision in the "Determination Docket," Docket No. 25-EKCE-207-PRE.
- AFP-Kansas recommends that this Commission give due consideration to the impacts to Evergy Kansas Central and Evergy Kansas South ratepayers as a result of its decision in the "Tariff Docket," Docket No. 25-EKME-315-TAR.
- AFP-Kansas recommends that this Commission give due consideration to delaying the retirement of the Evergy entities' currently operating coal generating units, irrespective of whether the facilities continue to burn coal or whether a conversion to natural gas occurs.
- AFP-Kansas recommends that Evergy's retirement planning assumptions with respect to its generating fleet should remain flexible.
- AFP-Kansas recommends that this Commission give due consideration to requiring Evergy shareholders to have "more skin in the game" with respect to their financial requirements in this proceeding.

²³ Those entities that have been granted Intervention in the current proceeding include: Citizens' Utility Ratepayer Board ("CURB"), HF Sinclair; CVR Refining CVL, LLC; Unified School District # 259 Sedgwick County, Kansas; The Kroger Co.; the United States Department of Defense on behalf of the consumer interests of itself and all other Federal Executive Agencies ("DOD/FEA"); Kansas Gas Service, a Division of One Gas, Inc. and Black Hills/Kansas Gas Utility /Company, LLC, d/b/a Black Hills Energy; Cargill, Incorporated ("Cargill"); Occidental Chemical Corporation ("Occidental"); Lawrence Paper Company ("LPC"); Olathe Unified School district USD 233 ("USD 233"); Kansas Agribusiness Retailers Association ("KARA"); Kansas Grain and Feed Association ("KGFA"); Renew Kansas Biofuels Association ("RKBA"); The Goodyear Tire & Rubber Company ("Goodyear"); Spirit AeroSystems, Inc. ("Spirit"); Associated Purchasing Services ("APS"); Unified School District No. 232, Johnson County, Kansas ("USD 232"); CCPS Transportation, LLC ("CCPS"); Walmart Inc. ("Walmart").

AFP-Kansas appreciates the opportunity to submit comments on this matter.

Respectfully Submitted,

Narrative

05-21-2025 Everygy just had an increase in December of 2023 that led to a net annual increase of 74 million. I think they need to learn to manage their finances better like everyone else. Everything has gone up tremendously since 2020. Enough is Enough, people can't afford all these increases in expenses.

Narrative

05-28-2025 Every year, Evergy has received some kind of rate increase. After the last one, they reported record earnings for shareholders. It sucks watching businesses get tax credits and then we have to pay for the electricity to be set up for them. With tariffs and stagnant wages, our community can't afford this. Speaking of wages, I looked up all of Evergy executives compensation package- perhaps, they should look at cuts there rather than customers already struggling to increase their profits. None of the numerous executives make less than a million in compensation. NOPE. For once, PLEASE deny 100% of this rate increase. I already paid over 250.00 for an apartment in electricity in January. I can't afford this.

Narrative

05-31-2025 In 2024, Evergy requested a rate increase which was denied, then went on to report record profits anyways. Now Evergy is requesting a rate increase again, yet their earnings reports show they are on track for yet another year of record profits. They obviously don't need rate increases. If anything, they should share their fortune with the people of Kansas through a rate decrease.

Consumer Opinion O
of Petitions Signatures

Narrative

05-31-2025 Dear Kansas Corporation Commission, I am writing to strongly oppose Evergy's proposed 8.62% rate hike for Kansas Central customers. As someone living on a limited income, I find this request outrageous. A \$13 monthly increase may not sound like much to Evergy executives, but for people like me, every dollar matters. We're already dealing with higher grocery prices, medical costs, and housing expenses. Now Evergy wants to squeeze even more out of customers—many of whom are struggling to get by. Evergy claims the increase is to cover nearly \$1 billion in infrastructure investment, but we, the customers, never had a say in those decisions. Why should we be forced to foot the bill for projects we didn't ask for and that may not directly benefit us? Where's the accountability? The KCC is supposed to protect consumers, not rubber-stamp corporate greed. Please do your job and reject this rate increase.

O

of Petitions Signatures

Narrative

05-31-2025 With regard to Evergy's Application to increase customer rates 8.62%, I here register my opposition and suggest that KCC approve much LESS of an increase. I note that their Application does not any longer include the 2 gas-fired plants Evergy plans to build. However, I see no mention of the planned 1700-acre Douglas County solar farm. Thus I assume it is still in play. I base my opposition to the solar farm on several very relevant facts. First, the early projected cost of the solar farm project will, given the extant tariff environment, escalate, leaving ratepayers vulnerable to further rate increases greatly exceeding early estimates. Second, I expect the Trump administration will be nixing the corporate subsidies of past administrations for such things, and Evergy seems determined to foist ALL costs onto ratepayers. Third, usurping productive farmland, so close to Lawrence Airport's main runway approach from the north, seems to me a VERY poor tradeoff for any alleged environmental benefits. A recent thorough study of the agricultural issue has been published at <https://www.sciencedirect.com/science/article/abs/pii/S2214629622002353> (I can provide the pdf if you cannot access). Quite frankly, when one investigates the cumulative environmental COSTS of mineral extraction and production of solar panels, along with their known life expectancy, and the need for accompanying immense battery storage capacity (the Sun doesn't shine 24/7, nor when there's dense cloud cover), the allure of solar decreases greatly. Thus, I ask KCC to deny Evergy's 8.62% request. Thank you for strongly considering this.

Docket Number 25-EKCE-294-RTS

Consumer Opinion O
of Petitions Signatures

Narrative

05-31-2025 I'm living on a fixed income and can barely afford my current electric bill as-is during the hottest and coldest times of the year when I need to have my heater or AC on. Increasing the rates by ~\$13/month would result in me paying ~\$150 more a year, and given that my rent will already increase by \$45/month starting this August, that's a noticeable increase to my living expenses. My income is unlikely to change over the next several years, so it does not feel reasonable for my expenses to increase if I'm not intentionally added more expenses to my lifestyle. Also, these rate increases don't even appear to directly benefit me the customer as they're mainly for improving the company's earnings and (probably) making its shareholders happy, which I do not care about in the slightest. If these rate increases were for investing in switching to solar, wind, or nuclear energy, I'd feel more favourable towards them. But as things are, I am strongly opposed to these proposed rate increases as I'd be paying for something that I benefit very little from.

Narrative

05-31-2025 I understand that the cost of everything has risen, and that includes Everygy's expenses as a business. However, as a consumer, an average increase of \$13.05 a month adds up to a rather large increase in a family budget when considering the recent rise in the cost of food, home goods, and other utilities. For families who already run tight budgets and try to save energy at every opportunity, this increase is likely to negatively impact them.

Narrative

05-31-2025 This is the most expensive electric bill we have ever experienced and the least reliable service, it should NOT be raised. We have not been able to afford to heat or cool our home for the last three years. We have a fridge and a stove and use lights periodically. The bill mysteriously raises in the winter to \$400 a month when we have nothing new running- no heat!! Something is wrong!! We heated a 5200 sq ft home in Kansas City area for \$100 a month for 20 years. We came here to rural Kansas and can't pay electric for a 1200 sq ft home. Our daughter live in our previous home in Wichita and again we paid less that \$100 a month with another electric company but when Evergy took over it automatically almost tripled. Again something is wrong. Every week there is on average 3-5 hours of outage - at least once a month it goes out for two days, long enough to ruin our food. Who is regulating these companies. We get paid less due to economy, yet the big companies take what we little we have away! VOTE NO PLEASE!!! We don't have another dollar to spare. The minimum bill for not even using any electricity is way too high!! 0 usage is over \$80 a month, ridiculous!!!!

Docket Number
25-EKCE-294-RTS

Consumer Opinion
O

of Petitions Signatures

Narrative

05-31-2025 To the Kansas Corporation Commission, I am writing to strongly oppose Evergy's proposed rate increase for Kansas Central customers. I live in Olathe, and every year during the spring and summer, I experience repeated power outages — sometimes multiple times a season. These outages are frustrating, disruptive, and even dangerous. I depend on a CPAP machine every night due to a medical condition. When the power goes out unexpectedly, it affects my breathing, sleep, and overall health. I cannot afford to pay more for a service that is becoming less reliable when my health literally depends on it. If Evergy is requesting more money, the public deserves a guarantee of better, more reliable service — not vague promises. Asking customers to pay more without committing to preventing future outages is unreasonable and unfair. If this rate hike is approved, Evergy should be required to guarantee that outages will be drastically reduced — and if the power does go out, customers should be compensated for the inconvenience and harm. It is not right for us to pay more and continue suffering through preventable service interruptions. Please do not approve this increase unless Evergy is held accountable — both by promising better reliability and by committing to pay customers back in some form when outages occur, especially those with critical medical needs like mine. Sincerely, Brian M. Olathe, KS

Narrative

05-31-2025 I'm on Level Pay with them, and here's a copy of what I was billed for the payment coming up in June. Customer Charge ☐ 14.25 Energy use 53.75 Fuel used in power generation 11.60 Property tax surcharge -0.33 Transmission 15.47 Energy efficiency 0.16 Total current charges ☐ 94.90 Average cost per day ☐ 3.27 tax Total charges Average Payment Plan ☐ 94.90 0.79 ☐ 95.69 ☐ 130.00 They are already overcharging for electricity through other charges, and fees. I'm not behind on my bill, and I don't owe them anything on back bills, so why is my bill basically \$35 more per month than what I'm using? I'm also on a fixed income, and I can't afford to be paying more for utilities.

Narrative

05-31-2025 Our prices are high enough. I feel like we are paying for new things for Every that they should be paying for themselves. They make huge profits. Why should we PAY for their new buildings and improvements to make them even more money? I also feel my comments don't really matter in this state. Every is a top tax payer, so they pretty much will get whatever they want.

Narrative

05-31-2025 I wouldn't be against all these upgrades and rate hikes if they actually kept the power on. Last time we lost power I had no electric for 4 days. I'm on oxygen and cpap therapies and I have to do breathing treatments. I have no place to go. When it's 9000 degrees outside that becomes a deadly situation for me. I tried requesting a medical form and that was denied because I'm not homebound. An almost 10% increase in costs is going to make it difficult for me to get by. Each month I watch my funds to live on dwindle away between the rent and utilities and bills. I have to make choices as to what I can part with or live without in order to afford to get by. It's getting ridiculous! If everyone keeps price gouging us there's going to be a part of each community that's going to end up homeless.

Consumer Opinion **O**
of Petitions Signatures

Narrative

05-31-2025 A rate increase of \$13.05 per month on average is a bad idea. The additional taxes on that yearly amount adds up to \$172.26 on average. Seems like Evergy just added a fake month to the calendar to pay for. I will not tell you where I work, but my experience with Evergy employees isn't great. They are slow, waste lots of time and worse than waiting at the DMV. Why not see first if efficiency might solve the money problem? The monopoly Evergy has one of frustration. Try the Dept of Evergy Efficiency first. Keeping the house at 66°F winter and 78°-80°F during summer and keeping the heat and AC off until absolutely needed is nuts. Solar is NOT the answer. Swapping an energy bill for a costly, ugly, and undependable solar panels on cloudy days and long winter nights is no help. Evergy and Kansas will again screw the citizen. Kansas is becoming unaffordable like California as States like Tennessee prosper.

Narrative

05-31-2025 I am just starting to wonder how many more years in a row that they plan on raising the rates for their customers. When they had their last purchase of a leading company in this area. They said that prices would lower or stay the same. Now almost every year they submit to have the rates raised. This application doesn't include the proposal for the natural gas plants or the battery plant. They were even asking for an increase for the solar farm that they wish to build in Douglas County. When is enough an enough. As well why are they only wishing to raise the rate in some areas and not threw the entire customer base? Are the new rates only benefiting the raised area or will it benefit the area of non-raised rates? I would like to know what their profit margins are and how much they are spending on upkeep and maintenance since they are claiming that is the reason for the rate increase. I cannot in good faith support anymore of the rate increases from Evergy. I would also like to know what the benefits are to the rate increase and how it benefits the customers.

Narrative

06-01-2025 I have installed all LED lights, energy star appliances, keep thermostat set for conservation both Winter and Summer, yet my electric bill never goes down. I believe Evergy is being ran by extreme Liberals who are more interested in solar farms in Osage county Ks., even though the vast majority of residents do not want it. Evergy sponsors everything through their Evergy plaza and for what, to make the top officers feel good? They are the only electric company I can use, so why all the advertising and sponsoring? It feels like David Wittig is back running the company in the ground when it was Westar. Maybe Evergy needs a good, honest audit to see where their money is going. Thank you.

Narrative

06-01-2025 I am opposed to rate increases for all residential customers. An 8+% increases is a large burden that will create undue hardship for those already struggling to make ends meet. I would like to Evergy to publish the assumptions used to make the \$13 increase assumption as that is significantly low for my household which may only be true for winter months when I am on gas heating. I do not support raising rates to support unannounced industrial projects that require significant power demands. Force the mega projects to pay for their own electrical expansion needs. The data centers have the money. The chip manufacturers have the money. The residents of Kansas do not support a communistic approach to shared pain to aid some multibillion dollar company using energy rates as a negotiation tool for site selection.

Narrative

06-01-2025 The proposed rate increase may appear minor in the context of rising prices but it has dire negative consequence for many residents. First, Evergy has prospered as documented in stock holder and media reports. As an older resident I have not. Basic costs (housing, health/auto/home insurance, utilities, taxes, groceries and other living costs) are at least four times higher than my Social Security COLA for 2025. Next year projections are even more bleak. Opportunities for employment are not an option. I have reduced use of energy to the point it is a health risk in winter and summer. For these and other reasons I don't support the proposed Evergy increase. Thank you for allowing me to comment.

Narrative

06-01-2025 Please keep KGS from ripping off the public. They are too big to care & get away with unfair business practices. One example is that they charge money to pay via phone or their website even though the process is all AI. If I want to pay by phone the convenience fee is \$1.95. Online also costs. If KGS had competition, I doubt this would be their practice. Also, my current bill totals \$41.17 but the cost of gas is only \$7.26. The service charge is \$21.75 and a delivery charge of \$3.44. Help stop this rip off off the consumer. Do not approve the rate increase. Thanks, Jim Potter, Hutchinson, KS

Narrative

06-01-2025 This rate increase would cost the affected 735,000 customers over 9 million dollars. Yet evergy has the money to pay just 4 of its executive officers over 13 million dollars last year. And according to ksnt reporting and marketbeat.com, evergy has increased it's shareholder dividends every year for the past 20 years. They do not need, and are not using these rate increases to improve and maintain infrastructure and service. They are using these rate increases to increase executives pay and shareholder dividends. All while the general public struggles with the high price of EVERYTHING, and just after evergy laid off employees in January!! This rate increase would further burden the state and public with additional taxpayer funded requests for energy assistance. This rate increase is nothing more then passing on the executives extravagant pay and increasing shareholder dividends, to the public. Stop the corporate welfare!

Narrative

06-01-2025 We are opposed to the increase. Virtually ten percent increase is a big increase for folks and businesses barely making it. Ten percent for our company of two restaurants is \$400 or more a month, or approx \$5000 a year. Make cost saving decisions so you do not have to always pass your operating costs on to the customer. This is what all other businesses and people do to cope with rising costs. We can not just ask for more money. Our opinion is NO to a rate increase. Thanks for considering our opinion.

O

of Petitions Signatures

Narrative

06-01-2025 To Whom It May Concern, I am writing to express my firm opposition to Evergy Electric Company's proposed rate increase. Electricity is not a luxury—it's an essential service, and Evergy holds a monopoly over this necessity in many areas. Because customers cannot shop around for alternative electric providers, raising rates is not only unfair but exploitative. Evergy is already a profitable company. Rather than pushing additional costs onto your customers—many of whom are already facing rising expenses in every area of life—you should be reevaluating your own budget, reducing executive compensation, or adjusting your profit margins. It is not the public's responsibility to cover mismanagement or to maintain excessive corporate profits. The proposed rate hike sends the message that Evergy prioritizes shareholders over the wellbeing of the communities it serves. That is unacceptable. I urge you to reject this increase and hold Evergy accountable to the people who rely on their service—not just their bottom line.

Narrative

06-01-2025 Hello, Thanks for considering the opinions of the bill payers. This increase is about 10%. This means an additional \$5K annually for our company of two restaurants. When costs rise, we look for cost saving measures. Trim excesses and overages. Reduce waste and labor costs. We CANNOT JUST ASK FOR MORE MONEY. We think you should consider the bill paying public. The individual households and businesses are struggling to make ends meet. This request needs to be examined very thoroughly with current trends of energy supply and regulation being much more favorable. Thanks for accepting our opinions.

Narrative

06-01-2025 We have been struggling to make ends meet for a while now. The rates always increases because of infrastructure which is just an excuse to raise rates and not care about people struggling already. We've been back and forth between the Average Payment Plan and to just paying the regular monthly usage bill and it seems no matter how low of usage we have, the monthly bill doesn't decrease. We can't afford for the rates to increase any more. Honestly we haven't seen any results of any other rate increase excuse that has happened in the past. We are only seeing the higher-ups lining their pockets a little more rather than caring about the people who have to pay these ridiculous Everygy bills while trying to live everyday lives.

Narrative

06-01-2025 The proposed increase in Evergy rates is excessive and poorly timed. The proposed infrastructure is vague and offers no explanation as to why it is actually needed. Plus it includes a thinly veiled warning that rates will increase greatly when the Panasonic Electric Vehicle battery plant and other natural gas plants will come on line. Why is the consumer paying for these increases when private industry will be the beneficiary. The nearly 9% increase represents yet another hit to those of us struggling to live on a fixed income. This is extortion at its most blatant when you can increase your revenue and protect your investors at the expense of every-day citizens who spent their life working in public education only to see our KPERS frozen in time as Evergy ignores the added cost to every consumer. Please be reasonable. Some increase--maybe. An increase of nearly 10%--unacceptable.

Narrative

06-01-2025 I understand that costs are increasing and that maintaining a strong power system is important. However, I believe that the rate increase is too high. everygy has made significant profits over the past year. A portion of these profits can go towards paying for the rate of inflation and improving the power grid. Furthermore, I believe that any rate increases should be evenly distributed across the service area.

06-01-2025 Please do not raise the electric again. It is already to high for people who are on social security disability. A lot of us can not afford to pay for it not and with more cost from this, it would be extremely hard for people like me to be able to pay my bill month to month. I am against this extra monthly cost. Please consider not agreeing to this.

Narrative

06-01-2025 I am writing to oppose this 2025 rate increase proposal. In 2024 Evergy requested and received a 196 million dollar rate increase in which I was neutral due to its infrastructure reinvestment. And now in 2025 they are asking for another? 196.4 million? No. In 2023, Evergy reported annual earnings of \$731,000,000. (source: <https://investors.evergy.com/news-releases/news-release-details/evergy-announces-2023-results-declares-quarterly-dividend-and>) In 2024, Evergy reported net income of \$873,000,000 (source: https://finance.yahoo.com/news/evergy-full-2024-earnings-eps-120613689.html?guccounter=1&guce_referrer=aHR0cHM6Ly93d3cuZ29vZ2x1LmNvbS8&guce_referrer_sig=AQAAAKncvB4LnZQ3GdPCejJyFHR3KXwSwp_0_pqzXzDLwou4dxJX35VG4YHFmflyyOpq-z4zkE93RPohOcyn7k02Hu-efQ9A19FBqsisebMu9lgo3dbw2dDmNB11NTwqe0HkuoqBlz-SLupgQcdp_xpEsFv5SVSH5eC01V_Bp_jiIUxL) Evergy does not have a money problem. Evergy has a failure to reinvest its profits into sustaining their infrastructure due to dividends to their shareholders problem. Time and time again the hypocrisy of a publicly traded company being a government sanctioned monopoly to state residents is financial frustration. Clearly, there is opportunity for Evergy to reinvest their own profits back into their own infrastructure. Please OPPOSE this rate increase. You know they'll just ask again in 2026. And 2027. And...

Narrative

06-01-2025 Please do not allow the Every rate hike. Kansans have had substantial rate increase across the board ie utilities, taxes, insurance, not to mention the obvious gas, groceries etc. We are continuously encouraged to lower our bills led, new windows, better insulation, etc but the bill just keeps going up. We cannot afford it. Every can find ways to cut expense if necessary, they do not need to raise rates to accomplish what they want to get done. Like all big companies there are plenty of unnecessary expenses made do to a lack of being good stewards with our money, it has got to stop. Please do not allow it. Thank you for your consideration. James Metcalf

Narrative

06-02-2025 No. Increasing our costs is unacceptable right now. Everythging around me is rising in costs and I can't afford it. You need to quit expecting us to foot the bill for promises you made. Energy should be cheaper today, not more expensive. This feels like it also involves the rest of us subsidizing Panasonic. You can't get blood from a rock, but you can make us all distrust you even more than we do today.

Narrative

06-02-2025 Dear Commission Staff: This email is regarding Everygy's request to increase our bills by an average of \$13.00 a month. My husband, who is 70, and I (age 67) are retired. We can't work another job due to both having physical disabilities and health issues. I say that because everything is going up in costs, but our income is not, nor do we have the ability to supplement it. The basics we need are the ability to pay property taxes, food, medical expenses, gasoline, and energy bills. That is to stay in our homes and to have the basics, as I noted. This increase is particularly outrageous for seniors. The impact on seniors is often overlooked these days, and it should not be. Other states offer discount programs specifically for senior citizens, providing a reduction in rates for gas, water, electricity, and waste services. Often, the reduction is 20% of the bill. If this price increase is approved, they should offer senior citizens aged 65 or older a 20-30% discount. Kansas is one of the few states that does not provide significant support for seniors. Why is no one figuring out how to reduce the costs? It is always a handout to charge more. We cannot continue like this for any age group. Sincerely, Bob and Cathy Stoneking Truth, Compassion, Forbearance gives hope in this troubled world.

Narrative

06-02-2025 Regarding the request to increase return on equity from 9.4 to 10.5%. This increase would exceed many of the California utility companies in a less regulated and business-friendly environment. I am not opposed to this goal, but it should be driven internally (e.g., Continuous Improvement, Leverage Technology, etc.), rather than being imposed on already overburdened customers. I would be interested to see how Evergy is ranked against comparable utility companies.

Narrative

06-02-2025 I have never felt it's right that they've been able to just increase their prices when they want or at the wheel of the commission. I feel like they have misappropriated the funds if they don't have the money to have maintained or change the structure as needed. If they want to increase their rates to any new clients coming online, that would make sense but I do not feel a try that they get to keep increasing existing customers as they have. I would speculate my bills are double or more what they used to be when I first bought my farm 23 years ago yet my prices have come nowhere near an increase of double and yet provide 8 to 10 times the productivity and equipment that we used to still not reaching an increase of double over the last 23 years.

Narrative

06-02-2025 I am writing to express my strong opposition to Evergy's proposed \$196.4 million rate increase for Evergy Kansas Central customers. An 8.62% hike—averaging \$13.05 more per month—comes at a time when many Kansans are already facing rising costs for basic necessities, and it places an undue financial burden on households and small businesses across the region. While Evergy cites nearly \$1 billion in infrastructure investments and increased operating costs, the company has not adequately justified why customers should shoulder this expense—especially when Evergy continues to report profits and pay executive compensation that far exceeds the average Kansan's income. Furthermore, the proposed increase excludes costs for massive upcoming projects, such as the Panasonic EV battery plant and two new natural gas plants. This raises serious concerns about future rate hikes that customers will inevitably face. Although the application includes a credit program for income-eligible customers, this does not negate the broader financial impact on middle-income families who do not qualify for assistance yet still feel the strain of rising energy bills. I urge the Commission to prioritize the interests of everyday Kansans over corporate expansion and reject this excessive rate increase. Evergy must find more equitable ways to manage its capital improvements and control costs without overburdening the very customers it is supposed to serve.

Narrative

06-02-2025 One or two Google searches show the revenue, net income, key executive compensation, and money paid out to investors in Evergy for 2024. It seems obvious to me that putting investment costs onto the customers for a service necessary for modern survival (electricity) isn't necessary or ethical. Raises for the average person don't even match practical inflation of goods, housing costs, debt, child care, or medical bills. Evergy is not struggling and can afford to find \$196.4 million out of their \$5.84 billion total revenue or \$597 million paid out to investors who don't have to worry about unnecessary price increases like these.

Narrative

06-02-2025 I am opposed to any rate change from every. I strongly believe Everygy is making plenty net income to maintain a safe, dependable and profitable way to get electric service to our homes. they need to cut wasteful spending and manage there money. however you, our KCC has allowed them to increase their level of spending without any increase denial. Everygy has figured out how to ask for twice as much as they need in hopes that you will authorize 1/2 to 3/4 of the increase they asked for and it always works. Stop falling for the w need to increase prices to maintain. Look into their wasteful spending please! IF the KCC continues to allow wasteful spending by this large company it will be hard for middle class and below to continue to pay for these increases you continually allow.

Docket Number 25-EKCE-294-RTS

Consumer Opinion O
of Petitions Signatures

Narrative

06-02-2025 To the Kansas Corporation Commission, I am writing to express my strong opposition to Evergy's proposed rate increase currently under consideration. As a customer, I am concerned about the impact this increase will have on working families, seniors, and others already facing rising costs for basic necessities. Evergy has previously raised rates, and it is unclear how this new proposal will directly benefit customers through improved service, infrastructure, or renewable energy investment. Before approving any increase, I believe the Commission must require greater transparency and justification from Evergy. Kansans deserve clear evidence that rate hikes are not being used to pad profits or cover executive compensation, but are truly necessary and in the public interest. I urge the KCC to stand with consumers and reject this proposed increase unless Evergy can clearly demonstrate that it is essential, fair, and will result in measurable benefits for ratepayers—not just shareholders. Thank you for your time and consideration. Sincerely, Sheldon Pegram

Narrative

06-02-2025 Not sure why it's important for a company that post profits each year needs to raise the rates for each of it's customers. If you need funds for infrastructure maybe cut into the bonuses of the leadership. A company that is posting profits each year shouldn't need to ask for more money if they are investing that profit back in to the company like they should be instead of lining the pockets of leadership and lobbying politicians.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-02-2025 I am writing to express my strong opposition to Evergy's proposed \$196.4 million rate increase in Kansas. In 2024, Evergy reported adjusted earnings of \$878 million, reflecting a robust financial position. Despite this, the company seeks to raise rates, which would disproportionately impact residential customers already facing economic challenges. Evergy's plans to invest \$16.2 billion by 2029, financed through debt, equity offerings, and rate increases, aim to meet rising electricity demand. While infrastructure development is essential, it should not come at the expense of consumers, especially when the company is already experiencing significant profits. I urge the Kansas Corporation Commission to consider the financial strain this rate increase would place on consumers and to explore alternative funding mechanisms that do not involve burdening ratepayers.

Narrative

06-02-2025 I am against this rate increase. It is too high. It is over the cost of living and as a customer on a fixed income, it is too much to ask when you weigh it against everything else such as property taxes coming at us. Everygy took in 873.5 MILLION dollars profit last year. Maybe if they weren't so damn greedy.... This represents a 19.44% increase compared to 2023. Use some of their profits to aid in their business for a change. Please say NO!!!

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-02-2025 I'm an educator. I don't make a lot of money, and the costs of my monthly energy bill are already difficult for me to manage. A nearly nine percent increase on the cost of this bill is going to be an imposition that I and many others shouldn't have to account for. I find it frustrating that Evergy, a company that reported adjusted earnings of \$877.9 million per share and has a monopoly on the local energy market thinks that it's fair to pass their costs of operation onto their consumers. I don't think that they have any business raising rates to its struggling consumers because of this. Their profit margins are doing well enough without trying to recoup these costs from average people with no say in the process.

O

of Petitions Signatures

Narrative

06-02-2025 With prices of durable goods and food having gone up within the last few years, it is growing harder and harder to keep your head above water, and now Every is wanting to again rais rates, on top of charging fees for everything from transmission fees to Fuel Fees which increase the price the consumer pays, fees that are not included into the fee schedule and artificially seems that as consumers we pay a lower rate, when in fact we have had multiple rate hikes in the past 5 years. I oppose this increase, if Every wants to invest in new technologies and power plants, they should do what any other business does, utilize their profits and reinvest in their company.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-02-2025 Everygy continues to publish record profits to their shareholders while trying to cover what are standard operating cost from its customers. We the customers do not have a say in who we use as an electric provider. Therefor Everygy operating as a for profit entity with its investors interests at its forefront only hurts their customers. They own the lines, equipment, and energy used when providing services to their customers. Why should we the customer experience the burden of paying for standard maintenance and operational upgrades? That's why we the customer pay the rates we do now so they can support their operation. KCC needs to stop Everygy from operating and listening to their investors and listen to their customers. I would much rather see my electric bill lower than seeing Evergys name on the plaza in downtown Topeka. Maybe they should have invested those millions into their business rather than trying to squeeze everything they can out of their customers. It is pure greed they are going after another rate hike.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-02-2025 It is disheartening that Evergy requires a rate increase while operating a monopoly in our area. You provide a public service at an exorbitant cost and now wish to increase that cost on Kansas families by on average \$156.60 a year to help support your business decision. I fear this increase will cause more Kansans financial strain especially as we experience more severe high and low temperatures that cause high bills nearly year round. Consumers do not have another option for their household energy needs and I feel this price increase will directly impact those of us who are most vulnerable to the already increasing prices.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-02-2025 Everygy has not clearly communicated with customers how the rate increase benefits them. All projects to increase power output are stated to not be covered by this rate increase. Additionally, they state that rising costs mean they need to raise rates. However, the fuel surcharge on my bill has been increasing with inflation over the past 3 years. If the fuel surcharge is keeping up with inflation, they do not need to raise rates for rising costs.

Narrative

06-02-2025 I am highly opposed unless they build that plant right here in Geary County. I am already working two different careers daily and live where the highest sales tax in Kansas is not to mention property tax. This economy is already forcing many to not be able to repair their homes or make them more energy efficient. You are forcing people to the streets. Sounds to me like those higher up the food chain need to invest in the future of America. They need to give up their extra homes, yachts and fancy stuff and get back to helping others. Please don't make my family go hungry too.

Narrative

06-02-2025 Every one to three years, Every keeps coming to your commission requesting hikes in services and there has been no change to services provided to us, as customers. The KCC always hands them with other major companies on a gold platter what they want and the KCC does not give two cents what they want. Kansas wonders why people are moving and going to other states for affordability, lower cost of living, etc. Start reflecting on the values of KS for the people slogan because otherwise the slogan LIE. It should say for the major companies as KCC and KS always sticks it to the residents.

Docket Number
25-EKCE-294-RTS

Consumer Opinion
O

of Petitions Signatures

Narrative

06-02-2025 This rate hike is unwarranted, poorly timed, and indicative of deeper accountability issues: -Unjustified Burden on Customers: Many Kansans are already dealing with inflation, rising housing costs, and higher bills across the board. Now is not the time to increase utility rates — a basic necessity — by nearly 9%. -Tone-Deaf Spending from a Monopoly: Evergy operates as a monopoly with guaranteed customer revenue. Yet it chose to invest in one of the most expensive marketing deals in the region — a high-profile sponsorship with the Kansas City Royals at Kauffman Stadium(see giant left field sign). Why is a monopoly spending customer dollars on stadium advertising rather than lowering rates or improving service? -Lack of Transparency on Return on Investment: Evergy claims the increase is to cover nearly \$1 billion in infrastructure and rising costs. But where is the proof that these investments benefit customers or improve reliability? -Exclusion of Major Projects Raises Questions: Evergy says the request doesn't include the Panasonic battery plant or the two new natural gas facilities. If those projects aren't included now, what new rate hikes are waiting just around the corner? -Accountability First: Before asking families to pay more, Evergy should be required to demonstrate responsible financial management, customer-focused investments, and a clear return on value for every dollar spent. We urge the Kansas Corporation Commission to reject this rate increase and demand better from a monopoly utility that serves Kansas families and businesses.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-02-2025 I strongly oppose rate increases at a time when more Kansans than ever are placed in a situation where living paycheck to paycheck and living in the red is a problem. If this passes, it will place more individuals than ever who are right on the cusp of needing support from the state into a category where basic utilities become a burden in maintaining a household, especially for those who are in the renting/leasing category, a population that continues to increase with each passing year. I became a part of that population this year after a consistent 20 years of homeownership. It is not an easy economic time to be in for residents, and these costs should be evaluated elsewhere within the company of Everygy, or elsewhere that funding may be found.

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-02-2025 In 2023 Evergy made \$5.5 Billion in revenue while operating budget trailed at 816 million. In 2024 Evergy made \$5.847 Billion in revenue while operating budget trailed at 2.6 billion 2023 GAAP earnings = \$731.3 million and 2024 GAAP earnings = \$873.5 million For a median household with a \$100 utility bill this increase is over 13% for working families. Evergy has already collected almost \$12 million through government subsidies (taxes and credits) from it's consumers. They already have billions available for any infrastructure improvements and maintenance cost associated. Also Evergy has invested heavily and wisely in Wind Farms that generate roughly 50% of our electrical needs with the payback happening in 5-7 yrs, meaning there fuel cost are significantly decreased, generating more profit, but not benefitting its customers in a compensatory manner. This rate increase should be denied, with prejudice.

Narrative

06-02-2025 I think this requested increase is pure greed and is only possible because they have a monopoly. The rates have already been increased recently, which has lead to record profits for Evergy. Evergy needs to cut back or figure out another way to continue to make record profits. I truly hope the KCC does its duty in preventing this type of squeeze to the common man.

Narrative

06-02-2025 8.62% may not sound like much, and if a person has a good income and/or serious savings and investments, it probably isn't. However, when a couple in their 70s and 80s tries to live on a fixed income without hundreds of thousands or millions of dollars in savings and investments, and especially considering the current uncertainties caused by what remains of our government, this increase, plus likely another from somewhere else, and another, and another, and pretty soon we won't have anything left for food and housing. Please be certain of the valid need for this increase, and then, if it has to be, please consider incremental increases rather than the full just-under-9% increase all at once. Thank you.

Narrative

06-02-2025 First, the people that actually do the work for Evergy are fantastic and if an increase was going to them or to needed upgrades, I would be for it within reason, which is not a billion dollars. I or my husband have not received a substantial raise increase in years. My husband's place of business is closing as are a lot of businesses in Emporia. Prices are up for everyone and the last thing we need is an increase in another of our bills. I decided to do a little research on how much the executives make a year. I could live for the rest of my life in comfort on just one of the top salaries. They are actually still paying salaries to those that have quit or retired. They are also handing out money in donations like the Evergy Center in Topeka. That is all well and good for them. That money came from the customers and we do not get to deduct it from our taxes as a donation. Maybe they should forgo raises for the foreseeable future and put that money into their business like smaller businesses have to do. They hit the commission up every flipping year for money. I think the commission should do their due diligence and ask for an itemized spreadsheet of money coming in and going out and where it is actually being spent. My vote is a big NO.

Narrative

06-02-2025 Rate increases are a constant it seems every year utilities want more to cover there so called shortcomings. Every continues to post substantial earnings statements which proves they are a solid company, but a solid company should be to plan there capital outlays to match there needs and taper off there wants and keep them within reason. \$13.00 raise in a utility may not sound like much if you are still working but if you are retired or disabled it is just one more thing you will have to do with out because you have to cover more costs. With the inflated costs we have to pay now on almost everything thing we purchase seems the utility could take a better look at this and realize we can do better here. It's sad that we don't have some competition in the area for power resources there is to much of a monopoly here. Please be mindful of who you are hurting with this request Thanks

Narrative

06-02-2025 We need to quit funding wind and solar options they are a gross waste of our money , we do not need any rate increases while we are paying for wind and solar out a stop to all of that now, if you want to invest in something let's try nuclear options which would supply plenty of power, we also don't need to sell our power to other states, we are being taxed to death at the local levels on property taxes and this will only make them want more!!! No rate increases!!

Narrative

06-02-2025 My husband and I are expecting our first child this winter. Our property taxes have increased astronomically over the last year, gas is expensive, grocery prices are increasing, insurance is increasing, everything is so expensive right now and why? I understand some aspects, but I do not feel it's necessary to put more money in Every's pockets when we as a community are struggling so much already.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-02-2025 A \$13 a month increase is huge for retired people, unemployed people and low income families. I would like to see a lower increase of about half of that. How much profit was made in the last 5 years and where did that go? These plans for improved infrastructure did not happen overnight and there should have already been a rate increase to account for this. This rate hike is way too high in my opinion and Everygy should cut costs somewhere else to help offset the cost and lower the burden on the public. I have purchased energy effecient appliances to help reduce electric costs but then these rate hikes wipe out any savings that a person might see. We all have budgets and \$13 a month increase does not work for my budget unless I live a life with no entertainment, no air conditioning, no appliance use. Living off the grid sounds pretty good right now.

Narrative

06-02-2025 I received the notice from Evergy today and feel moved to comment again on my opposition to the new plant being proposed in Hutchinson. We already have a plant here. Just upgrade it and forget about building another one south of Hutchinson. And my bill with increase \$13.05 a month!! I am on a fixed income and with the way this country is going, I can't afford this expense. Evergy will be making more money than they already are! You can't tell me new jobs (which will probably be those not living in Reno County) will make this a win for Reno County. It's not right and I oppose it vigorously.

Narrative

06-02-2025 KCPL and now Evergy have repeatedly asked for rate increases to Update their facilities and have YET to do so. We pay more and they take the money for themselves. With people going to solar we should be decreasing the cost. I am a 100% Disabled Veteran on a fixed income and I will NOT have enough increase in my income to keep up with food costs let alone utilities. Everyone is price gouging and pocketing the money. Evergy needs to do the right thing and lower costs.

Narrative

06-02-2025 I feel that the rate increases are getting ridiculous, you are a multi billion dollar company and we shouldn't have to cover your cost to run your company and infrastructure it should come out of your pocket and your profits. We pay our utility bill monthly to get your service so any infrastructure repairs should be up to the company making billions of dollars in profit's over the years. Any other business or company covers their own cost for upgrades or repairs why should it be up to the customer to pay for these things for a billion dollar company, use your own profit and stop putting it on your customers knowing we can't go get service from another company because you have a monopoly and are the only company we can choose to get service from. We the customers pay you enough!

Narrative

06-02-2025 I can understand the capital outlay which Evergy has invested in their business to be able to provide power to meet Panasonic's needs. But every kilowatt hour used by Panasonic, Evergy will reap their outlay back. Why should the other customers be held responsible for their expenses unless we will benefit financially from them. Evergy will not only receive their initial investment back but they will continue receiving it back everyday until eternity comes. It may not be paid back in the first year, but your investment in your business will be paid back in full with plenty of profit.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-02-2025 With the already rising utility rates, and the nearly \$23 increase Evergy has already requested and implemented after the winter and summer storms of 2023, why should Kansans be footing the bill further for infrastructure improvements while Evergy is making record profits. We cannot keep footing the bill for Evergy's expansion and operating costs. Kansans are barely scraping by as is in some instances, and an average increase of \$13 on top of the nearly \$23 increase in some areas is the matter of putting food on the table for a family or paying the light bill.

Narrative

06-02-2025 Everygy keeps raising their rates. They have shown a profit this past year and should not be allowed to raise their rates again. The requested \$13 monthly raise for the average customer is excessive. People on a fixed income cannot tolerate such raises. Our cost of living has risen substantially over the past few years and has far outpaced our social security retirement. Electricity is a necessary expense and should be held at a reasonable level. Trying to cut back our use of electricity can endanger older people's health. We all have to temper our wants with our resources and I think that Everygy should do the same. We depend on KCC to keep Everygy's wants in check. Please keep the consumer in mind and deny Everygy's rampant spending.

Consumer Opinion O
of Petitions Signatures

Narrative

06-02-2025 Prices have been eeking up significantly over the last several years without public comment, now there's going to be another significant monthly increase. \$13/month increase is \$156 a year. Doesn't seem like much, right? But Black Hills is proposing an increase as well. Another \$150 per year. This is in addition to rising food prices and trickle-down tariffs. And yet wages are not increasing. So for families starting out, we're talking about increases of hundreds of dollars this year alone. In just the last year, my own EVERGY bill has gone up almost \$30/month. So another \$13 on top of that. This isn't sustainable and will contribute to more family impoverishment in the long term. Single parents are unduly burdened by all these increases. EVERGY must invest more significantly in solar and renewable resources that can be shared community-wide.

Narrative

06-02-2025 My concern is the amount of the increase and whether it is justified in that is the money requested needed, is it going to the appropriate places or to administrative costs and if so by what % of the total. They are asking for a lot and from what they say the average person will pay extra (>\$13.00) which for me is a +/- 20% increase monthly. As a retiree I need to watch what I spend and although this may seem trivial to those wanting and deciding on this increase this is the numbers that retirees have to deal with. I also have issues with wind/solar power plans if involved seeing that in the long run do not decrease the carbon footprint we are leaving. I would like to hear more for nuclear plants as with modern plans they are much safer and don't take up as much resources as the wind/solar does.

Narrative

06-02-2025 Absolutely against this! It is difficult enough to pay for the electricity in my home now. Being a single mother, on a very limited income but I make to much for state assistance. An 8% increase is Absolutely asinine! And there is no reason for the increase. Everyy is just being greedy at this point! I and many, MANY others do not support this increase and fervently hope it does not get passed. Too many people are not making ends meet as it is, and this is just corporate greed. Unwanted, unneeded and completely unnecessary. Please do not pass this!

Narrative

06-02-2025 I am submitting this comment to OPPOSE the rate increase proposed by Evergy/Black Hills Energy. While I am a supporter of investing in infrastructure and clean energy solutions, plans for a natural gas plant (already known to be increasing green house effect emissions) is not where I want to see my money being put to use. We are entering a recession thanks to the blind fanaticism of the current administration, and Evergy/Black Hills Energy's response to squeeze customers who have no other choice in the market even further. I think that a rate increase should only be allowed after Share Holder and C-Suite compensation packages have already been slashed to the bone.

Narrative

06-02-2025 These continued rate hikes that are thrown on the back of Evergy customers is becoming ever more egregious. Just disgusting that you can't appropriate the funds from your OWN company but instead milk the customer even more. These practices are disgusting and you further put people into poverty with these asinine decisions. Just going through the sec filings <https://investors.evergy.com/evergy-inc-sec-filings> shows questionable practices in equity distribution. Just more UNNEEDED, EXCESSIVE charges.

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-02-2025 I strongly oppose Evergy's proposed rate increase. Electricity is a basic necessity, and the current rates are already outrageously high. This will only burden and further strain families and individuals who are already struggling to make ends meet. Evergy's late fees are excessive and punish customers who may simply be trying to stay afloat. These charges are already hard to manage, and raising the base rates on top of that is not just unreasonable and it's unethical. Customers have no alternative provider for electricity in many areas, meaning we are left with no choice but to pay whatever Evergy demands. This proposed rate hike places all the financial burden on customers while Evergy continues to profit, with no accountability for the hardship it causes in the communities it serves. Please reject this rate increase and prioritize the well being of the people who rely on this essential service every day.

Narrative

06-02-2025 Thank you for the opportunity to comment on this matter. My family and I are from the communist state, known as California. We moved to Johnson County Kansas in 2019 and left that state and ALL of their regulations to live a better life, which we have been able to do in the great state of Kansas. When I see the proposed rate increases, it reminds me of California, as they have done this in the past, and from my family's testimonies, they continue to do so. The energy rate hikes essentially priced the middle class out of the market, making it an unviable option to run your air conditioning when you arrived back home from a long day's work, as they called these hours, peak hours. If we cut back as they asked us to, they raised the rates, because we didn't use enough for their companies to make their quarterly profit. When we used them during peak hours, they doubled the rates. I don't know if you have ever seen a \$400 electric bill, but I have, more than once. One rate hike leads to many more, and please don't assume this won't happen, as I am a person who experienced this in my birth state. Rolling blackouts will be next, which I will tell you is a scam. I am an electrician, and I know what this means. Our grid can't sustain the draw we currently have, but we can't tell you that because it will cause chaos. This happened the summer of 15 when the power was only out for about 6 hours in San Diego County, and grocery stores were picked clean, and the doors had to be locked. There is no such thing as saving electricity. You can't put electricity in a jar on the shelf for a later day. Electricity is free, but we are charged for the harnessing and distribution of it, which I understand. My concern here is the trend. Please do not fall victim to the natural monopoly of electrical companies that will ask for another and another, and one last request. Please do not let this state become another California. Thank you

Narrative

06-02-2025 It occurs to me that a stepped approach to increasing the rates would be more convenient and allow the fund raising to take place closer to the time the infrastructure upgrades take place. Considering that if you are making 196.4 million dollars worth of upgrades I would guess that these upgrades would be over the next several years. Additionally including your customers as stakeholders in the upgrades paying out a dividend to their electric bill would show more of an investment in your long term customers that they would appreciate. Additionally please breakdown the increased operating costs mainly regarding the Executive salaries that make up those increases. They should not be more than 2% of the overall operating cost increases to make this legitimate.

Narrative

06-02-2025 I'm very opposed to any utility rate increases, I work hard to keep my usage down, using fans instead of air conditioning, when possible, LED bulbs throughout, energy efficient appliances, ect. I know the linemen earn their money, and are greatly appreciated, as I have friends and relatives that work for Every in that capacity. But I'm nearing retirement and will be on a very fixed income, and the cost of utilities is a very big concern to me. I would think with all the cost savings implemented in recent years, i.e. wind generation, LED's, efficiency appliances, that cost would be going down, if anything. Thank you for your time, Robert Hobbs

Narrative

06-02-2025 We know the laws of supply and demand cause an increase in rates. I know when new plants in Kansas, for example the new Panasonic Electric Vehicle battery plant or the two natural gas plants that Evergy plans to build need more energy. The increase of costs need to be passed on to the companies that are going to need the energy, not to the residents of homes. The public utilities commission needs to keep in mind responsibility in keeping reasonable rates. There are many customers that are on fixed incomes and the those increases could make life more challenging. Let's be responsible and make sure we think about the consequences that can effect the financial stability with many customers.

Narrative

06-02-2025 To the Kansas Corporation Commission, I strongly oppose Evergy Kansas Central's (EKC) proposed 8.62% rate increase, totaling \$196.4 million. This significant hike, translating to an average monthly increase of \$13.05 for customers by September 2025, is well above the national average inflation rate and places an undue burden on Kansas households and businesses. Utility affordability is critical for our communities' well-being. While Evergy cites nearly \$1 billion in infrastructure investments and increased operating expenses, the Commission must scrutinize these claims. Costs must be necessary, prudently incurred, and directly benefit ratepayers, not just boost company profits. Evergy's substantial and growing profitability should negate the need for this rate hike. The company reported \$873.5 million in 2024 GAAP earnings and has increased dividends for 22 consecutive years, demonstrating significant financial strength. With a market capitalization over \$15 billion, Evergy possesses ample capacity to self-fund essential investments and manage expenses through internal resources. The Commission should compel Evergy to utilize its robust financial standing and existing profits for these endeavors, rather than burdening consumers with disproportionate rate increases. Furthermore, Evergy's request excludes costs for the Panasonic Electric Vehicle battery plant and two planned natural gas plants. This omission raises serious concerns about potential further rate increases in the near future, suggesting a strategy to incrementally shift significant future expenditures to consumers without full transparency. I urge the Kansas Corporation Commission to prioritize the financial well-being of Kansas citizens. This rate increase is excessive and unjustifiable. I respectfully request that the Commission reject Evergy's proposed 8.62% rate hike and instead protect consumers from exorbitant utility costs. Sincerely, John Pentlin, Jr Edwardsville, KS

Narrative

06-02-2025 I am opposed to this significant of a rate increase. I understand that infrastructure always needs updating, but I can attest that Wyandotte county has seen enough increases on utilities, property taxes, etc. I see a majority of these funds go to increasing infrastructure for warehouses and big businesses. I assume the additional energy demand and need for some of that infrastructure is due me to this and this is why I am strongly opposed to taxing and pricing us out of our homes.

06-02-2025 Many residents like myself are on Social Security as their only income and make just enough to not qualify for low income assistance programs you offer yet can barely make ends meet. With everything going up you need to find ways to fund your projects with federal and state assistance. Your increase in rates is way too much and will mean sacraficing paying for medications and medical care copays.

Narrative

06-02-2025 A drastic increase of 8.62% will hurt residents of Kansas. Especially those on fixed incomes or those who might not qualify for income assistance. Not to mention hurting business growth in the state. Everygy has a monopoly on this area of Kansas so consumers have no choices and can't switch to a different provider. Everygy also has the benefit of selling a necessity that residents are buying more of every year. Most companies would love to have this monopoly with increasing demand. However a lot of local companies are cutting their expenses and looking for efficiencies just to stay profitable this year. Maybe Everygy could, trim some fat like other companies in Kansas? Thank you for your time.

Narrative

06-02-2025 We have little to no say who supplies electric power to our properties. This has created a natural monopoly. This is not like a cell phone or streaming service where we can switch providers once it becomes too costly. They continue to ask for rate hikes, meanwhile its customer base sees no change in their income. We are forced to bare the burden of increased rates, or lose service entirely. They know this full well. They serve almost 3/4 of a million people and can't make ends meet? Maybe a DOGE team should take a look at their financial records.

Narrative

06-02-2025 Seems like always looking for hikes. To those of us on fixed income are lucky to get 3% increases and the Medicare insurance premiums go up over 5% more so we are already behind the inflation. Groceries are still high. Making it harder and having to make adjustments for things we need. Maybe the electric company should find better ways to decrease fees. Thought with all the wind and solar energy going on it should have decreased our costs

06-02-2025 Having a Cold Weather Rule that the regular rate payers have to pay for is bad enough. Now to have a Hot Weather Rule that the regular rate payers has to pay for is utterly ridiculous!!! I sweated in summer until I could afford to pay for air conditioning and nobody paid for my sweat. There is no need for air conditioning for ANYONE!!!! An electric fan and water cooled cloths are all that is needed!!! Wasteful operations of existing generating assets do not deserve a rate increase!!!

Narrative

06-02-2025 Every continues to make record breaking profits and operates a business unlike any other company as they get to foot the investment of their profit making on the backs of consumers rather than from their profits. I am not aware of a time when the Kansas Corporation Commission ever denied Every their rate increase but I am hoping that for once, they actually protect the customers in the state of Kansas. The tragic problem here is that Every has never reduced rates back to the original level after recouping their investment dollars and the consumers keep getting robbed in perpetuity. I beg that you give Kansans some relief from this price gouging and deny the request.

Narrative

06-02-2025 To the Kansas Corporation Commission, I am writing to express my strong opposition to Evergy's proposed \$196 million rate increase for its Kansas Central service area. At a time when the cost of living is already straining household budgets, this 10%+ rate hike would significantly burden working families, retirees, and small businesses—many of whom are already struggling to keep up with inflation and stagnant wages. An average monthly increase of over \$13 may sound modest on paper, but for people on tight budgets, it's a meaningful hardship. And for households using more energy—like those with children or individuals who rely on medical equipment—it will hit even harder. While I understand Evergy's need to maintain and improve infrastructure, this burden should not fall squarely on the backs of consumers, especially when many question whether Evergy has done enough to cut internal costs or pursue affordable energy alternatives. Furthermore, Evergy's rate increase does not appear to be tied directly to emergency infrastructure failure or urgent reliability issues—it seems to be driven by long-term investments that should be phased in more equitably or offset through other funding mechanisms. I urge the Commission to reject or significantly reduce this rate request. Please prioritize the financial well-being of Kansas ratepayers and demand greater transparency and accountability from Evergy before approving any increase.

Narrative

06-02-2025 I am really tired of Evergy constantly asking to raise their rates. They've been reporting record dividends for their shareholders and their executives receive crazy high salaries. How about re-investing some of that money before asking for more from the public? We're all still suffering from increased inflation (including disgustingly high property taxes) without increased wages, and Energy wants to raise rates again. I say no!

Narrative

06-03-2025 Reference:Docket No. 25-EKCE-294-RTS May we all qualify for LEAP with this increase? How many people receive discounted rates? Can you provide names? Why are elderly able to receive discounts? I know some do but, at this rate my father's pension (God rest his soul) will not be able to provide for my momma. I see it all the time in end of life care. People making the hard choice between food or bills. If their pension is not increasing why should the CEOs get a raise? I'd like a list of the top 20 earners from Everygy. I didn't say employees I mean those getting paid for nuclear power. Infrastructure is so funny, I've lived in this house since I was 13 years old and the overloaded transformer blows at least twice a year. The water company digs up yards and leaves a open hole so it will bust again and the home owner has to fill it in. Don't say to pay for Infrastructure, tell the truth. We want more. You should be ashamed of giving away free money than punishing those who work, are legally here, and the retired. It will never effect you at the top. Us bottom feeders will have to choose between food or warmth this winter. How about you stay in a house that you can't afford to heat. The worst part is the house is paid off, my mother has dementia and with me being end of life care there is no way I would ever put her in a nursing home. A throw people away home is more like it! I can no longer work full time and take care of her so we survive on scraps and you want more. I'm sorry we have NO more to give. We will not go without food as you give money away year after year to those who live off the system. Publish everyone's names make it public record, allow the rest of us to give or let them get jobs. I can not and will not keep failing behind! How about lower homeowners taxes or make it zero for elderly. Give them a break not the able-bodied but non working and don't give a penny to non citizens!

Narrative

06-03-2025 You are the reason people are moving out of Kansas! Kansas use to be the third lowest state to live in and now people are leaving due to all these price increases and low economic opportunities! After 11 years of living here if this price increase goes through I am leaving myself. This is just another price increase to make everyy richer and we're tired of it. We are higher on taxes and prices per kilowatt than Indiana, Missouri, Oklahoma, Texas, Nebraska, Iowa and you claim it's because of infrastructure? No it's greed! I have almost gone completely off grid and you're still charging me 142.00 per month! For 1 person! In Indiana the same amount of electricity usage is only 80 dollars per month and they have less population. You are the driving force behind people leaving the state and I am sad to say that if this goes through more people including myself will be leaving or going completely off grid not just solar usage but completely off grid then where will this money come from? No where. You'll finally have to pay for your own stuff!

Narrative

06-03-2025 It creates a large financial burden for those of us on fixed incomes. It seems there are rate increase every year or two little by little really eats into disposable income. I have upgraded my air conditioner to the latest model with no assistance from the state or Evergy. Now a rate increase to take more money away. If Evergy would be more receptive to home solar, that can backflow into the grid it would help costs a lot. But the stupid programs they offer do not benefit the home owner that has to foot the upfront costs. Evergy policies preclude someone from adding solar to be energy independent since the savings can only be applied to the homeowners electric bill.

Narrative

06-03-2025 KCC I am writing regarding Evergy's request to raise electrically rates. I am asking that this request be denied, due to the poor economic conditions of our country. Families are struggling to make everything work, especially housing needs. Housing needs, including utilities are the highest expenses families are paying for based upon federal inflation figures. I know of several families that have to rely on the LEIP program every year to assist them with their electric needs. Many of these families have payment plans set up. If they have one hiccup and cannot fulfill the payment plan billing invoice, they will be without electricity, unless someone else pays their bills. If this is allowed to go through, many families will have to make some very hard decisions, as what to cut back on and go without to maintain housing. Electricity is a needed product for families. If this is allowed to go through the homeless population is going to grow. Homelessness has become a big issue even in Kansas. Evergy was awarded an increase in rates in the fall. With the crazy cold winter we had this past winter, people are struggling to stay ahead on utilities already. Are you willing to create a bigger issue for Kansas families? Who will assist Kansas families, if they cannot afford electricity? How will they be able to provide for their basic housing needs without electricity? Who will make up for the short fall in their budget? Please stand up for Kansas families and deny this request. Thank you Connie Evergy consumer

Narrative

06-03-2025 I believe Every continually wants to raise their rates. Which i understand the wanting or the thought process but in times of already expensive utility rates. Now is not the time, infrastructure should be done continually, not all at once. \$13.05 may not seen like much to the powers at be, but to people trying to keep ALL utilities on it adds up. We are trying to afford everyone wanting raise their costs, we have to be given a break at some point. Sincerely, Tammy Burkhart Hutchinson

Narrative

06-03-2025 These rate hikes will hurt seniors living on a fixed income. We are struggling to pay for food and meds. This increase is 4 x greater than our cost of living increase we got on our SS payments. We added led lights, repaired windows, and got energy efficient appliances but our cost still keep raising when they told us our cost will lower. How much profit did this company make over the years? I had a surcharge for my electricity due to a cold weather snap that happened before I moved to KS. They need to make less profit before they take more money from seniors.

Narrative

06-03-2025 I am worried that a rate increase for Kansas customers of 13.05 would be a breaking point for many Kansans. A majority of Kansans are on tight budgets as it is. This significant increase could mean they will have to make decisions between eating and paying their energy bill or buying their medication. While I am in favor of improvements, but this increase is too much at one time. It would be better spread over several years.

Narrative

06-03-2025 we seriously can't afford the proposed 9% increase. Our electric bills are consistently \$500 a month during the winter when our house is kept cold at 65 degrees. Out last 2 mo have been better but that's bc mild temp and a broken AC with no HVAC running. Tax thr new battery plant that needs the infrastructure, not the citizens of De Soto. We also have a house in Leavenworth Kansas, where we pay a monthly fee just to have access to electricity without even hardly any. So many fees.,

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-03-2025 Everygy has gotten a rate increase, already. Their rates were excessive as was and now worse. The utility has become bloated. Their flamboyant spending and waste resemble that of the rich. Their crews, albeit on call 24 hours, spend most of their time sitting doing nothing productive between emergencies.

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-03-2025 I am strongly opposed to a raise in rates. Evergy has record profits, has built large and expensive facilities, pays high wages and does not need to increase rates. We, as customers are hit with record inflation everywhere we turn and we cannot afford to continue paying more for basic needs when there is no need to increase rates, just to make the owners and employees rich. Please consider those seniors and individuals on fixed incomes who cannot afford this increase and deny their request.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-03-2025 \$13.05 additional per month is too high! That is almost 1/3 of what my bill is now! I take great pains to conserve energy in my usage, but that doesn't matter with the rate increase, as I seem to be paying for all users in all the counties you list, instead of just my community, with no businesses. What will be the increase when you DO add in the gas and EV plants? Please reconsider the amount of this increase. Keep in mind what you already know, the increase will be in the future with these plants. I am a retiree, and this, along with everything else, is becoming too much when my monthly income is limited to my Social Security payment. Thank you.

Narrative

06-03-2025 We own a home and a business in our community. We have 5 children and the cost of Evergy for our family of 5 is over \$450 a month! The cost of everything is already SO high! We do not support this increase. Fun fact last year ever GS reporting that they made over 870 million and that their earnings per share of their stock was higher than what they paid out in 2023. if they're making so much money why do they need to raise rates?

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-03-2025 I vehemently oppose this price hike. Evergy recorded almost \$900 million in adjusted earning last year, during a year full of inflation and tight budgets for the rest of us. They claim to need this nearly 10% price hike as an adjustment for overall cost of capital and increased operating expenses. However, there is no evidence that they need to charge customers more because their earnings clearly haven't suffered. Evergy knows they have a monopoly and will continue to constantly raise prices because the general public is held hostage without other options. Any increase is unwarranted, but seeking an 8.62% when people are still struggling with inflation is morally abhorrent. Evergy's current service doesn't merit the cost, let alone any increase. In Topeka, my power goes down almost monthly. Sometimes it is storm related, but other times it'll just randomly go out for hours. I used to have KCPL (pre-Evergy buyout) before moving to Topeka and getting an outage even once a year was a rare occurrence there.

Narrative

06-03-2025 I strongly oppose Evergy's decision to raise prices. At a time when many families are already struggling with inflation and higher living costs, increasing utility bills only adds more financial pressure. Evergy has reported strong profits and executive compensation remains high—this rate hike seems more about boosting shareholder returns than serving the public. Essential services like electricity should be reliable and affordable, not treated as a profit-maximizing venture. Regulators must put people before profits and deny this rate increase.

Narrative

06-03-2025 I do not feel if Evergy can claim a multi-million dollar profit from last year that they deserve to have a rate increase. We have citizens who are having to choose between electricity, medication, housing and food. Evergy corporation does not need this increase and it would not benefit it's consumers at all, in fact, it would place many consumers in more financial hardship then they currently are. Please do not allow this increase to happen. Evergy is just being greedy.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-03-2025 Rates have been steady going up for no reason. We used to get bills that were \$400-\$650. Thankfully we got on a level payment plan, but that's still over \$250/month. That almost as much as some people's car payment. We don't have a choice to switch companies either. Evergy is a monopoly in the region. We have a lack of choice and are constantly burdened by high prices and rate hikes. This increase should be taken from you high yearly profits, not the working class that already struggle to make ends meet.

Docket Opinion

Company ID EKCE
Docket Number 25-EKCE-294-RTS

Consumer Opinion O
of Petitions Signatures

Narrative

06-03-2025 Opposing Evergy Kansas Central Rate Increase (Docket number: 25-EKCE-294-RTS) To the Commissioners: My public comment strongly opposes Evergy Kansas Central's proposed \$196.4 million rate increase (8.62%). 1. Unjust Burden on Kansans During Economic Uncertainty Currently, Kansans are struggling with inflation, rising housing and grocery costs, and stagnant wages. The need for energy is a basic necessity, not a luxury. Even with an income-eligible credit program, many households are simply unable to absorb another financial hit. Retirees, small businesses, and working-class families will be disproportionately affected by the proposed increase. 2. Unclear Benefits from Past Infrastructure Investments Nearly \$1 billion was spent on infrastructure by Evergy. In terms of reliability, efficiency, or grid resilience, customers have seen no measurable improvement. 3. More Increases Likely Panasonic's EV battery plant and two planned natural gas plants are strategically excluded. Additional rate increases are likely in the near future. 4. Profit Margins vs. Consumer Responsibility Evergy remains profitable and provides substantial returns to shareholders. Ratepayers shouldn't fund capital investments while corporate profits remain untouched. Evergy should reduce internal expenses and reevaluate profit distribution before passing costs on to the public. 5. Lack of Investment in Renewable Energy The company's plans include building new fossil fuel plants instead of reducing long-term operational costs through renewables. 6. Negative Impact on Kansas Communities Rate increases reduce discretionary income for households and increase overhead costs for small businesses, especially in rural areas. Energy costs may also discourage new businesses from choosing Kansas. In conclusion, I urge the Commission to reject Evergy's proposed rate increase. Thank you for your service and for considering the interests of all Kansans. Sincerely, John Tran Emporia, KS

Consumer Opinion
O

of Petitions Signatures

Narrative

06-03-2025 In 2024, Evergy recorded about \$878 million in adjusted earnings. That was up from about \$816 million in 2023. Stockholders were paid \$597 million in cash dividends in 2024. With respect to financial results in 2024, I'm happy to report that we had a solid year, said Evergy CEO David Campbell. Surely, you can use some of those profits to improve infrastructure and update equipment instead of expecting your customers to shield that cost. You are making a profit off of us. The expectation is that you will use those profits to offset the cost of operating your business...that's how PROFIT works.

EKCE	25-EKCE-294-RTS	O	

Narrative

06-03-2025 Rate increases for utilities serves as a public reminder of the monopolistic nature inevitable life expenses as a participating member of society. If there state allows this it also a reminder that the government is only for the people at times of reelection and for big business during all other times. Everygy is a Fortune 500 company recording its highest net income in 2024. Greed is killing the middle class and younger generations ability to live comfortable lives.

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-03-2025 I understand infrastructure needs to be upgraded. This should be in the plan that is created by the Board, CEO and C-Suites each year to hold back dollars in reserves (for future outlays of infrastructure). If needed they don't increase dividend for stock holders as much that year and hold back the dollars for future expenses. If this rate increase happens and Evergy completes the upgrades, how is this money used in the future? How much of an increase in dividend to shareholders will happen after this increase? 1. If there is a rate increase, then why don't the Board members, CEO and other C-Suits take a decrease in pay or forgo their bonus for one year to show they are doing their best. 2. Based on what I see, Wind and Solar are not helping to hold cost down.

Narrative

06-03-2025 I am opposed to this rate increase request. Evergy claims this is not for the proposed power plants but what are they going to spend 2 billion dollars on in infrastructure? Possibly power lines to the new plants and related expenses. Electric rates are out of control and Evergy must learn to not stick there hand out every time they have an expense. Shareholders should be the ones to pay for Evergys growth and mismanagement not ratepayers. With the current billing plan it is next to impossible to figure what plan is most economical for the rate payer.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-03-2025 Everygy practically has a Monopoly on electricity in the state of Kansas, citizens do not have a choice in the matter. Therefore, it is not fair for Everygy to declare price increases when they're somehow making incredible profits? The greed shown by the company and it's shareholders is despicable. Hardworking people should not be made a profit off of for something as basic as a utility service, something that everybody HAS to have.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-03-2025 I oppose the current proposed rate hike of 8.62%, which is well above the 2.5% increase the seniors received in 2025. Energy needs to be affordable, and this large increase would place an undue burden on at least 40% of the KS population living paycheck to paycheck. With prices increasing on everyday essentials, some Kansans will have to choose between heating/cooling their homes or buying food. Why not reduce your dividend payout to your stockholders (more than 4%) to offset some of the rate increase you seek, to recognize that these times are challenging for all of your customers? Hopefully, we'll be able to come out of this on the other side, but with so much uncertainty, I urge you to reduce the amount of your rate increase.

Narrative

06-03-2025 Please vote NO on this rate increase This is the second rate hike in 2 years that Evergy has requested. In September 2023, they were granted a \$74 million hike, and now, 12 months later, they want to stick it to us again to the tune of \$196.4 million? Evergy is a monopoly with deep pockets, but it still comes after its customers with its hands out on what appears to be an annual basis. Instead of gouging its customers, perhaps Evergy could cut its advertising budget and/or reduce dividends to its shareholders. Please vote NO on this rate increase

Consumer Opinion
O

of Petitions Signatures

Narrative

06-03-2025 Everygy is once again seeking a rate increase, I believe the 6th in the past 5 years. Consolidation with kepl was sold as a way to lower rates for all customers, however Kansas rate payers have had large increases while Missouri rate payers have had decreases. Every time we make changes to lower our bills through energy efficiency, rates go up to make up for any decrease in usage. Some of the fees passed to rate payers are simply to pad the bottom line, and provide investors a guaranteed 10% return, while increasing rates for all. Transmission fees, maintenance fees, service fees continue to go up for lower service - not to mention areas like desoto that cannot provide the required service for Panasonic's lithium battery plant, so rate payers are on the hook for more generation capacity while Panasonic gets more or less a free ride. Rate payers should not be on the hook for shutting down generation plants, efficiency plans, and higher salaries for c suite executives. We should not have increases (I believe everygy has recently said they had a record year but want to raise rates again) for any reason other than to cover the cost of energy production- which if seems they are covering several times over. Kansas residents are being fleeced for power - part of what we pay for is going to other states not being used in Kansas. It's time to stop rubber stamping all requests from everygy and provide relief to Kansas rate payers.

Docket Number 25-EKCE-294-RTS

Consumer Opinion O
of Petitions Signatures

Narrative

06-03-2025 This is a significant increase of the rate and it will put additional burden on many families who are trying to make ends meet when the price of essentials (grocery, gas) keeps going up. Has Evergy considered alternative ways to reduce cost? For example, does Evergy offer discounts to their employee households? How much do they offer? Can they reduce this? Being such a large employer, those discounts can add up. Also, as a publicly traded company, is Evergy trying to increase the profits/dividends for shareholders by raising rates from the customers? If the company plans is investing in new infrastructure, the profits is expected to keep flat if not decreasing. A significant raise in rate pushes existing customers away to consider alternative power providers.

Consumer Opinion O
of Petitions Signatures

Narrative

06-03-2025 I am not currently a customer of Evergy but this rate increase request is so wildly irresponsible and disrespectful that it will still affect the daily life of people who are not Evergy customers. When electricity rates are raised, the prices of pretty much everything else will go up because everyone and everything uses electricity. Although inflation overall is slowing, this rate increase request is just kicking hardworking Kansas citizens while they're down. Evergy is not struggling financially. It's actually just the opposite because they were able to recently pay their shareholders a huge chunk of money. If their excuse for this is that it is costing more to continue generating electricity, then common sense would tell you that when Evergy's costs go down, electricity rates would go down. That's simply not the case. Even if Evergy claims they've lowered rates, people's bills only go up because of all the extra line items. To approve yet another rate increase for Evergy would be an absolute slap in the face to every Kansan. Thank you for your time.

Narrative

06-03-2025 Many years ago Evergy (westar at the time) did a major price increase to help provide "tree trimming" equipment so that they could better serve the communities. They have not at all followed through with that promise. Every easement they are in is full of brush and trees that they promised to remove if the price increase was approved. They instead tell home owners the trees are their problem. If you call them about a tree that is on or near their lines they say it's not their issue. Why did we May billions of dollars if it's not your issue. Secondly, this increase will be nearly 115 BILLION dollars more per year but they are only investing 1billion back into their system. Where is the other 114 billion going? Last year they forced us to join a payment plan to "help us". That didn't help us that helped them. My household votes no!

Narrative

06-03-2025 I am opposed to the 8.62% increase scheduled for September 2025. Inflation according to the Bureau of Labor and Statistics has averaged 2.8% for most commodities and 3.7% for energy from April 2024-April 2025. I believe the increase needs to be more inline with the inflation percentages presented. The 8.62% increase is more than double the percentage of inflation. I am also a commercial real estate and business owner. This increase is bad for commercial growth when mixed with the already rising prices of property taxes in the Kansas City area.

Narrative

06-03-2025 I do not support the need for a rate increase. I am retired and on a fixed income, my electricity use varies depending upon air conditioning use for my medical condition and an average increase of \$13/month would amount to a 25-30% increase. This seems to be an excessive amount. The upgrades they want to do are not needed and should just rely on coal. Natural gas plants are great until the price to produce power from this source jumps too high then they abandon the plant just as they have done before with these plants. Expand the coal plants and keep rates at a level where we can stand it. Or do what Texas does and allow us to purchase our power from multiple providers. If you are drawing a salary you can adjust. If you don't have a salary anymore then we can't. Thank you for considering my comments Scott Beguelin

06-03-2025 Again?? Really! I have previously voice my opinion with no results. Does the KCC represent the corporations or the customers? They keep asking for more money. They keep paying their shareholders. The CEO's and other administration officers keep collecting their huge salaries. We keep paying. They should have been investing in the company all along instead of paying themselves and their shareholders. Some people can barely afford to pay their utilities bills now. Low income, retirees, people who have lost their jobs, etc....will just have have to suck it up! When will the KCC finally put their foot down? I hope it is now!

Narrative

06-03-2025 They just raised our rates a few years ago by a large percentage while the kc metro was either decreased or only raise alittle. An additional \$13 dollars a month is absurd when you look at their profits year over year. In a time where everything is more expensive for families, this would be catastrophic for low income or families living paycheck to paycheck.

Narrative

06-03-2025 Every 6 months you ask for a rate hike, and you always get it. It has to stop. Retired people don't get raises to keep up with all the rate hikes. Instead of rate hikes take some of the ceo's salary and you will have enough for your hike. Keep asking for rate hikes, you should give the 735000 customers each 500 share of your stock. You need to diverse yourself from Kansas and go back to Missouri.

Docket Number
25-EKCE-294-RTS

Consumer Opinion
O

of Petitions Signatures

Narrative

06-03-2025 Kansas Corporation Commission, I strongly oppose Evergy Kansas Central's (EKC) proposed 8.62% rate increase, totaling \$196.4 million. This hike, translating to an average monthly increase of \$13.05 for customers by September 2025, is well above the national average inflation rate and places an undue burden on Kansas households and businesses. Utility affordability is critical for our communities' well-being. While Evergy cites nearly \$1 billion in infrastructure investments and increased operating expenses, the Commission must scrutinize these claims. Costs must be necessary, prudently incurred, and directly benefit ratepayers, not just boost company profits. Evergy's substantial and growing profitability should negate the need for this rate hike. The company reported \$873.5 million in 2024 GAAP earnings and has increased dividends for 22 consecutive years, demonstrating significant financial strength. With a market capitalization over \$15 billion, Evergy possesses ample capacity to self-fund essential investments and manage expenses through internal resources. The Commission should compel Evergy to utilize its robust financial standing and existing profits for these endeavors, rather than burdening consumers with disproportionate rate increases.

Narrative

06-03-2025 My first statement disappeared just before I completed it. I hope this one will be more successful. Every is requesting a significant rate request at a time when electricity is being touted as the most environmentally friendly source of energy. And the enormous future rate increases that are not included in this request are harbingers of additional financial burdens facing Kansans. These are not environmentally sustainable messages, and do not support use of electric energy. A responsible response to this request would be an analysis of the company's profitability and use of its resources, specifically looking at executive compensation, and also employee salaries in comparison with the income of the Kansans covered by this increase. It may be that we cannot afford this option. I live in De Soto, Kansas. It is not clear to me if this is a city covered by rate increase or not. Thank you.

Narrative

06-03-2025 They have already raised rates recently, are reporting record profits, and as an employee of the company I see a lot of waste. I do not feel they have a need to increase rates. Also, as a customer of 4 rivers electric, they will also increase rates if approved, and I already pay them a minimum of \$45 per meter plus usage, and I have 3 meters. Enough of my money and my neighbors money goes to evergy and 4 rivers coop. Thank you for considering input from the public.

Narrative

06-03-2025 They profited millions. Price of everything is up..pay check increases cannot keep up with the increases. Why increase electric when they have had such huge profits?!?! When does it end.. every spring, fall they request increases. Why... and they bill your charges based off the highest time of day is the highest used. So if midday they rate the full use for the bill. Not for what was used. It is like an apr rate by the minute not by actual usage. And they profited AND they want more. We have the one electric company we have no choice.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-03-2025 The scheduled rate increase of 8.62% (if approved in September 2025), would definitely impose a strict response as far as a monthly budget for utilities on a fixed income retiree. In the last year out local utilities increased by 10%, our natural gas increased by 8%, our communication services increased by 1%. There is only so much that can be tolerated on a monthly basis before it becomes necessary to reduce other outputs like food and insurance. There is a blanket justification at times by Everygy to justify infrastructure costs -but that becomes a little old when everyone uses this justification. Please be attentive to this opposition for this rate increase. Thank you. Erin McGrogan

Narrative

06-04-2025 Over 482,000 Retired and approximately 1/3 of the Kansas Population are listed as having a disability. All of these people are on fixed incomes and cannot afford a rate increase. This increase should not be allowed. The utility and insurance companies should not be given a guaranteed income and should have to be competitive in a free market.

Narrative

06-04-2025 Families are already struggling to make ends meet paycheck to paycheck. A raise in prices could be devastating for some families especially right before the winter months. Please consider not raising prices for consumers and instead lowering corporate wages and cutting costs elsewhere.

Narrative

06-04-2025 I am opposed to this increase. I am a senior citizen, over 65. I am on a fixed income. It seems that our citizens are being hit with increases at all levels. May it be with food, health needs to taxes at all levels of the government. Insurance in our country drains our citizens pockets. I am a very positive person and like to see changes. I would like to know how my services will change or help my home site by adding \$13.05 to my bill each month. I hope and pray that no one freezes to death or jobs are lost to this rate increase. Thank you for your help and time on this grave matter. Take care. Have a great day!!

Narrative

06-04-2025 I looked online and found this.5 areas of concern with Evergy's current business practices that should make anyone, including Kansas legislators, question if the utility monopoly model is still an appropriate method or if it is becoming a method of forcing the public to pay for failing systems that are making executives and investors rich; while leaving the tab with those struggling just to pursue life, liberty, and happiness. Perhaps it is time for another approach to be explored. This is part 3 of a 5-part Series to address the major concerns in the following categories that are affecting customer rates and the future of our monopolistic public utility. Hefty Dividend Payments to Shareholders ESG & "Renewable" Programs Executive Salaries Campaign Contributions KCC and CURB Now, this small excerpt should be enough for you to deny Evergys request. If the company can afford to pay upper management so much why do they need more from low income and fixed income people? This needs to stop and it starts with you, the KCC. As our public officials it is in your best interest to deny this request as approval would be an affront and insult to the people of Kansas. We, the people of Kansas have the vote, whether it is here or at the ballot box in the next election. A positive vote on this request will cause me to vote for a candidate(s) that will make major changes in the KCC. If Evergy wants more money, let them raise the large corporate energy rate or increase the price of all the energy they export from this state. Do your civic duty and deny this money grabbing request.

Narrative

06-04-2025 Claims by Evergy that they have only increased by 7% since 2017 are difficult for me as a rate payer to believe. It seems like Evergy applies for a rate increase as soon as the last one is approved. We need reliable electricity, but a \$13/month increase will hurt a lot of people and I question the need for that much.

of Petitions Signatures

Narrative

06-04-2025 It makes no sense that utilities are run by profits and investors, but here we are. Two years ago a rate increase was approved and ended in this: The rate increase contributed to a \$286 million increase in Evergy's utility gross margin in 2024 compared to 2023. It would seem Evergy is doing just fine and instead of making their investors happy with money in their pockets, they should be concerned about their customers. No one should end up in this situation: Confidential Check welfare on a female that is threatening Signal 4. She was on the phone with Evergy because she can't pay her electric bill. Unless someone has been taught money management from a young age, it is very hard to pick up the pieces and sort it out as they get older. It would seem Evergy is in that exact predicament. I could do a lot with \$284 million and I think they should be able to as well. If they need a class on money management, I have some suggestions on where they can find one.

Consumer Opinion O
of Petitions Signatures

Narrative

06-04-2025 Dear Everygy, It seems that the rates keep going up and up and I fear it will force customers that are used to keeping up with their payments, no longer being able to keep up. Why is there no incentive for people who do pay on time? I feel like people who keep up with all that they have to always get punished for the lack of payment of others. I don't know if that's part of the reason for the increase, but I know it is for a lot of other things. Also, I would like to know why there's advertisements on TV for Everygy as well as sporting events. Utilities are a monopoly for certain areas, therefore there is no need for advertisement. That would save a bit of money. Are you doing everything in your power to save money in other areas? I do know with the cost of everything going up constantly, it costs more for everyone, but as families have to cut certain things, I just wonder if businesses are as well. I would greatly appreciate some considerable thought into this before jumping into it is all I'm asking. If it needs to happen, I really have no control over it, but I just thought I would share my concerns. Thank you for the ability to comment. -Kim Steinert

06-04-2025 I understand that rate increases are necessary in today's inflationary world. However, this increase is excessive. How many of your customers have received a cost of living increase in the past years or anything approaching your proposed increase of 8.62%? How many customers of yours are on fixed incomes i.e. Social Security and need that \$13 a month. You need to consider a smaller increase that is more in line with the economy of today. Perhaps David Campbell should consider taking a cut in his seven million dollar compensation package to help differ the rise in costs that are affecting Every. Yeah right!

Narrative

06-04-2025 Strongly opposed. Evergy infrastructure should be a cost evergy should pay for; in a free market the customer decides on a company that services their needs. This sounds like a plan for Evergy to become a bigger and stronger monopoly, while having others pay for it. Once this plan benefits Evergy; making their business stronger and more efficient, they may sell out. Do the people who paid for their upgrade get a cut of the profits too? Monopoly moves in my humble opinion.

Narrative

06-04-2025 I am again writing to let you know that I strongly opposed this, or any other rate increase, by Evergy. Evergy was allowed, for whatever reason, to make \$873.5 million in profit last year. Which was up over \$140 million from the prior year. It is absolute insanity to think they should be allowed to raise our rates in any capacity. They are no longer working for the people they serve, but solely for their shareholders. Not only should Evergy NOT be allowed to raise rates, the the legislature needs to kill this monopoly that has been allowed to occur and open up the markets to allow other energy companies to compete. Especially now that Trump has unleashed the nuclear sector.

Docket Opinion

Company ID EKCE
Docket Number 25-EKCE-294-RTS

Consumer Opinion O
of Petitions Signatures

Narrative

06-04-2025 Every raised rates in 2023 to support infrastructure improvements and they are now requesting the same 2 years later. Why? The company reports Net Income of almost \$800MM/ year and paid out around \$600MM in dividends. They also increase their dividend each year. The rate increase is just another way to pad their profits and pass it along to their shareholders. Costs continue to increase for their customers but we don't see a benefit. When does it stop? When does the average person get a break and stop padding the pockets of these companies? Every has plenty of money to handle infrastructure improvements and they increased rates not too long ago for the same thing. This should not be approved.

Docket Opinion

Company ID EKCE
Docket Number 25-EKCE-294-RTS

Consumer Opinion O
of Petitions Signatures

Narrative

06-04-2025 Every just got a rate hike recently. The explicit need for yet another rate hike seems unclear, listed primarily as "\$1 Billion (with a B) investment infrastructure" and "Evergy has also proposed the Evergy Stay Connected Pilot program that would offer monthly credits and help income-eligible Kansas residents remain current on their account." (from the email sent out by Evergy). 1. Investment infrastructure tells us nothing about what Evergy "needs" this \$1 Billion (with a B) for. This is a "trust me" request. I'm not that trusting. 2. Most utilities have a program to help "income-eligible" people pay their bills. Who is "income-eligible" would be left to the decision of Evergy's administrators in this proposal. Normally, other paying customers can voluntarily contribute to such an effort. Evergy is instead asking that they be allowed to bill all of us across the board for Evergy's charitable efforts. That is unfair. The amount that we would all be mandated to pay is unclear, apparently left to the whims of Evergy administrators. Furthermore, Evergy could then turn around and claim tax deductions based on charitable contributions, effectively double dipping at everyone's expense. 3. There is nothing clear cut in this proposed rate hike and therefore, no reason to grant yet another rate hike.

Narrative

06-04-2025 This is disturbing to read. The electric company is basically a monopoly that is GREATLY PROFITING from it's customers that really have no where else to turn for electric services. PLEASE DO NOT APPROVE THIS INCREASE!! Our rates are high enough as it is, and they have a CEO that makes over \$7 million a year. The repeated rate increases need to stop, the regular working people cannot afford all of these increases. Thank you for your time. Shelley Bolze

Narrative

06-04-2025 Two thoughts: First, while the estimated cost increase doesn't seem like much to the company, for those of us on limited incomes it adds up with all other costs increasing. Second, energy companies should be doing everything in their power (pun intended) to move us away from fossil fuels and quickly to alternative energy sources. Third, is Evergy a for profit industry? If so, before they ask the public for a rate increase perhaps they could look at their administrative compensations and other ways to make their organization more efficient. Thank you.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-04-2025 We strongly oppose the proposed utility increase as it places an undue financial burden on families and businesses already struggling to manage rising costs in other areas. At a time when affordability is a major concern for many, this increase risks exacerbating economic hardships without a clear justification of its necessity or transparency in how the additional funds will be allocated. We urge decision-makers to prioritize the well-being of the community by exploring alternative solutions that ensure fair and equitable access to essential services without compromising household stability

Consumer Opinion O
of Petitions Signatures

Narrative

06-04-2025 I live on a fixed income. So I work with what I have. Are there things I'd like to improve? Yes. But without the financial means, I don't. It is my belief that Evergy needs to do the same. They, however, ARE a for profit corporation. And profit HAS been gathered. Invest some of those profits. No one I know has had an increase of income to the tune of 8.62% in the past year(s). Evergy's requests have out paced customers income increases for some time now. And it's time to stop automatically, like clockwork, every single year, asking for more & more. It's like we, the customers pay for every single dream, idea that Evergy can come up with. I always wonder just exactly WHAT have they done with all the approved for increases because it's never enough. But for customers, it's been enough for some time now. I absolutely oppose this request. While it has been stated this request does not include costs related to PEV battery plant or the 2 natural gas plants Evergy has announced it plans to build, they will ask for SOMETHING down the road. I think it's ridiculous that customers pay more & more so Evergy can create ways to make more & more. Please say no. Please pull back on the reins & let Evergy learn how to operate, invest wiser without putting their hands deeper into the pockets of the customers. Customers that have no other choice.

Narrative

06-04-2025 This is an unacceptable rate increase. I'm 76, retired, and worked all my life and never received anywhere near an 8.54% increase in my salary and now on social security. I thought all these solar panels and windmills were supposed to REDUCE rates. I've not ever been on LEAP but may have to apply if this increase is approved and think I should get another chance to do so since I missed the deadline this spring.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-04-2025 As Evergy quickly monopolizes the very electricity we rely on to survive - I believe they have already taken enough. Evergy has been the ONLY option for my electricity through the four apartments I have had in my short life. I have seen the rates continue to go up while the service has not changed and nothing has become more efficient. Evergy knows that as soon as this is approved there is nothing we, as customers, can do about it - so they just keep making more and more money off of us - many of whom are already struggling. If we had any other option, this might be a fair request, but we have no choice in who we select to provide our energy and I think that should mean we have a say. Please vote in opposition to the rate increase proposed by Evergy and focus on your constituents instead.

Narrative

06-04-2025 My comment will be short and to the point the top 5 folks at evergy make just a hair over \$16 million in salary. There are folks that will be affected by this. Yes, I understand. \$13.05 is not big to someone who makes a million dollars a year. But for some folks that \$13 could mean not making rent. Not putting gas in their car. Not putting food on the table. I understand electricity is important and I understand that updates need to be made to infrastructure but it is not fair when five people make more money than your entire service area. Thank you.

Narrative

06-04-2025 As much as I would like to support the increase, I can't absorb an additional \$156.60 a year. It isn't just this year, they will ask again next year and the year after. Your continued approvals will make it impossible for me to stay in my home. I ask that you be mindful of the increases in almost every area of life that we face. I don't live rich. I love my bungalow on Taylor St. As I near retirement age I will have less income. but you will continue to increase my rates. That is not your problem to bear. Do you have the funds to improve the infrastructure now but are choosing not to spend it on that? I see your employees out there working in severe cold/hot weather and wish I could offer more support for them. My career has involved working with the disabled. They have far less than I, I consider myself blessed. Many received LEAP benefits, but that still leaves a chunk of change they need to cough up to pay their bills. I kindly ask that you not grant the approval.

06-04-2025 Everygy Incorporated post net income of 56.5 million(M) in 2021, 10.6M in 2022, 61.1M in 2023, & 81.3M in 2024, with the Everygy Kansas Central(EKC) posting the following net income as follows: 39.3M in 2021, 39.1M in 2022, 384.5M in 2023, & 565.0M in 2024. The EKC 745,000 customers uncontrollably contribute to the record net income for 2023 and 2024 for Everygy Inc. This also allowed for excessive executive salaries at the expense of the 745,000 customers. The proposed 196.4M increase will grow the potential profits for 2025 and beyond. An average monthly increase of \$13.05 will be much higher for the working families that are just getting by. It's not equitable when you don't have a choice for your electric provider. I strongly suggest you vote no on this proposal and will be greatly disappointed if not. Please look at the last four years of everygy's net income in the central region. In the last four years they have posted record profits particularly in everygy central. there should not be a rate increase at all considering the kind of profit they're making.

Narrative

06-05-2025 Everygy just significantly raised their rates this last year? I am totally opposed to this proposal. Raising the average amount by \$13 per month? This is outrageous! How can you even consider doing this? Do you not care about your Kansas at all? Please deny this request and let them know that we are sick and tired of their constant greed. They took over westar which was my area power company. Since they have done so my bills have doubled! I truly wish you would have never agreed to let them take over westar. The quality of power has decreased, the amount of outages has increased. Please deny this proposal!

Narrative

06-05-2025 Everygy had \$878 million in adjusted earnings in 2024 yet they want to raise rates again. If they wish to invest in infrastructure, it should come out of shareholder earnings and considered a cost of investing rather than attempting to maintain their shareholder earnings and passing the costs to consumers. Raising rates on consumers does more harm to those affected.

Narrative

06-05-2025 I am opposed to this increase. The rates for all utilities have been climbing but income to cover these expenses has not increased at the rate the hikes are asking. My pay raise was 3% for the year. The rate increase is almost double my raise, and that is just for electric. I, Mindy, work for the LIEAP program and see the thousands of dollars people owe on past due bills. How are they expected to pay for continued increase? They can't. So an increase still won't get the money Evergy is requesting. You can't squeeze blood from a turnip. We do all we can to cut our expenses for utilities within our home. This increase is beyond our control and tacks on additional costs that we struggle to pay. I consider ourselves middle class. We can pay our bills, but we don't have much saved for emergencies because of increased cost of living. We make too much to qualify for assistance. Approving the increase adds more strain to an already tense situation. We need electricity and have no other vendors to choose from, therefore it feels like a monopoly. Our consumer hands are tied and the vendors know it. Please deny the request. Thank you for your time.

Narrative

06-05-2025 I try not to keep up with all the requests the Utility companies ask for but this time I have to voice my opinion. I remember one of the Utility companies asking the KCC for an increase to off set the money spent in one of our bad winters. If I remember correctly they got the increase. Yet once they recouped they didn't consider reimbursing it's customers any money. I understand the folks that work for the Utility companies also pay on the increases but as a fixed income person which there are hundreds of us it is very hard sometimes to decide weather to go without food, meds or any other necessities to pay not just Everygy but all the other Utilties that keep raising prices. Please don't give Everygy this increase
Thank You

Consumer Opinion
O

of Petitions Signatures

Narrative

06-05-2025 Every Central Kansas Inc. (EKC) has submitted a request to the Kansas Corporation Commission requesting a rate increase of 8.62%. The notice states this will result in an increased of \$13.05 for residential customers. The proposal is for this increase to rates is for \$1 billion investment in infrastructure, and adjustments to cost of capital and operating expenses. Every Inc, parent company of EKC has sufficient income and capital to pay for the proposed amount of this rate increase without passing the cost onto customers. Net income from EKC Inc, as reported by Every to the SEC was \$873.5 million in 2024. Every Inc. aid \$596.7 million in stock dividends to stockholders for fiscal year 2024. Every Inc. paid \$153.60 million in dividends to stockholders in Quarter 1 of 2025. This is \$750.30 million in dividends paid out for 2024 and first quarter 2025. These payments constitute nearly ¾ of the increase amount that Every Inc has requested. By Every's own admission in their Annual Report to Security Holders on March 27, 2025, they are expecting to increase these dividend payouts by 4% due to expected growth. Because of these high dividend payouts to private investors, it makes more sense for Every to finance their infrastructure upgrades rather than passing on yet another cost increase to their customers. Every, by their filings and admissions to investors, states their strong financial position. This requested rate increase is frivolous and unnecessary, and should be denied in the public interest.

Narrative

06-05-2025 Given the coverage area, Topeka, Lawrence, Olathe, Leavenworth, Atchison, Manhattan, Salina, Hutchinson, Emporia, Parsons, Wichita, Arkansas City, Eldorado, Newton, Fort Scott, Pittsburgh and Independence, among other towns and rural areas, excluding Lenexa, Overland Park, and other communities near the Kansas City metro area, this rate request arrives to you, Dead On Arrival. It is not right, that certain areas of Everygy, should shoulder the load and other areas walk away scott free. If Everygy wants this, then everyone beneath Everygy's umbrella should have to shoulder the load. Supposedly, this is for infrastructure that serves all and the costs associated with it. If it's anything like the last one, from what I have read, it basically went for naming rights on stadiums and other structures. And that is wrong on way to many levels. Like I said, if all were bearing the burden, then I wouldn't be saying anything, but the way it's structured right now, leaving Kansas City Metro out, that is Dead On Arrival. Respectfully, Samuel Pridey 706 N 4th St Salina, Ks 67401 785 376 7089 Sam.pridey@gmail.com

Narrative

06-05-2025 You are always asking for more and more and more. When will it ever stop? When will it ever be enough? You dotted our beautiful state with ugly windmills and not a single one of us saw our bills go down. You've completely lost touch with the real world and what it's like to live like us. You just don't get it. All you see are dollar signs and a fat wallet and it's nauseating. You should be ashamed of yourselves. Don't you have enough already? Why isn't it ever enough for you people? Take and take and take and take and never ever give a dime of it back. And Why don't we have options? You're robbing us knowing damn well we don't have any other choice. You know better and you keep doing it anyway. You have a lot of nerve treating all of us like this. You couldn't live one week in our shoes. You couldn't do it. I guarantee that that's how far gone you are and how out of touch you really are. You'd crumble before the first day was over with. Please stop strangling us with your rate increases. Enough is enough. It should be illegal what you're doing to us. Please stop it already! This is crazy!! This is [REDACTED] and you know it too. The indifference that oozes out of your pores tells me we still don't stand a chance. Even if hundreds of thousands of us came together opposing your request, we're still going to lose. You e probably already paid off the right people and we're left with nothing. Nothing changes. Nothing ever changes. I despise corporate greed. Sickening.

Reference Docket No. 25-EKCE-294-RTS

How can an organization request an 8.62% increase in fairness to its customers? Seems to me that poor financial oversight by Leaders in the company have brought this problem to bear. Maybe the Leaders should take a pay cut to eliminate the need for this cost increase. How about we look at the profits or payments to the Leaders of this company and before asking the public for support- prove they are doing everything in their power to eliminate the need for a rate increase. Then after all this analysis and a rate increase is still needed- keep it at the annual cost of living increase of today- 2.4%.

Profit before Customers is a bad business practice!!

Docket No. 25-EKCE-294-RTS

My name is Paul Post. I am a retired attorney residing in Topeka, Kansas, and have lived here since 1978. I have also been an Evergy shareholder for at least 30 years. I own over 1000 shares of Evergy stock. I also have a rooftop solar array at my home, and sell excess energy back to Evergy. Of interest is that fact that Evergy pays wholesale for the electricity it purchases from me, and in turn sells it at retail, thus realizing a profit my efforts. I installed the solar array in 2014 at my own expense, with no participation by Evergy, other than its agreement to purchase my excess power.

Even though I am a shareholder, I oppose the requested rate increase. First, Evergy just had an increase about a year and a half ago. The CEO reported to shareholders that he was not happy with the settlement resulting in that increase, and pledged to try again. This is now what Evergy is doing. Why are they doing this? So that they can build two expensive gas fired generating plants. The KCC and the public should understand that these are not "peaking" plants that can be cycled off and on as energy use requirements dictate, but rather, these two plants will provide base load power to the grid. What is interesting is that in 2022, Evergy's long range power plan provided for the exclusive additions of wind and solar, with no plans for additional fossil fuel plants. That plan also provided for the retirement of the Lawrence Energy Center coal fired plant, along with two other coal fired stations, the LaCygnes plant and the Hawthorn plant in Kansas City. Then, in 2023, Evergy scaled back its planned renewable energy portfolio, with natural gas plants replacing renewable energy. Now, the 2024 plan proposes to almost double the amount of natural gas generation, with no mention of closing aging obsolete coal plants.

Evergy has apparently forgotten the effects of the 2021 severe winter storm, so-called "Winter Storm Uri," when gas prices rose from \$2.54 MMBtu to \$622 MMBtu in just over two weeks. Gas generating plants in several states failed, accounting for almost 60 percent of the outages. The result was many thousands of people without power for several weeks, and a number of deaths attributable to the outage. Added to that is the fact that Kansans are now having to pay back the utility companies to the tune of \$622 million over the next 10 years.

Natural gas is a fossil fuel, and is obtained by the environmentally questionable process of "fracking." Millions of gallons of fresh water are consumed in the process, likely to never be recovered. Other electric utilities have reported that the cost of new gas plants has steadily increased in just the last three years. Evergy makes money by building expensive and unnecessary gas plants, and then asking the KCC to require us to pay for them, plus guaranteeing a profit to Evergy and its shareholders. As an Evergy shareholder, I am alarmed that the company has essentially abandoned its 2022 energy plan in favor of an obsolete, unsafe, and environmentally unsound technology. Of course, maintaining baseload is a vitally important requirement for Evergy, its customers, and its investors. However, Evergy has failed to explore other viable options to maintain its baseload generation without relying on fossil fuel. "Firming the wind" is what is required, in the form of the construction of solar power stations, installing battery storage facilities, building compressed air storage (where air is compressed in large underground containers using wind and solar generation during the day, using the compressed air to power generators at night), installing geothermal energy generation, using biomass generation,

implementing demand side management, and using smart grid technologies. Evergy has apparently considered none of these, instead utilizing 19th century fossil fuel technologies to solve 21st century problems.

The Kansas Corporation Commission should not reward Evergy with yet another rate increase, when the company has apparently abandoned its plan for eventual fossil fuel phaseout and reliance on renewable energy sources. The rate payers and Evergy investors need to be protected.

Thank you.

Re: AARP Kansas Comments on Evergy Kansas Central Rate Case
Docket No. 25-EKCE-294-RTS

By: Glenda DuBoise, AARP State Director, gduboise@aarp.com or 785-806-7517

We are Glenda DuBoise, State Director for AARP in Topeka and Michael Brosch who lives in Leawood and is a volunteer for AARP. AARP is a nonprofit, nonpartisan membership organization that advocates for fair and affordable utility rates and reliable service. On behalf of AARP, we thank you for this opportunity to express our concerns about Evergy's proposed rate increase that would make electricity— an essential utility service — less affordable for many older adults. AARP Kansas has more than 278,000 members many of whom are EKC customers. These member households, and Kansans over 50, would be adversely impacted by yet another significant rate increase in their utility bills.

The persistent and dramatic escalation in utility rates that we are seeing in Kansas and across the entire nation poses a special concern for households with residents over age 50. Consumers over 50 tend devote a higher percentage of their total spending towards energy costs than other age groups. All consumers must be able to rely on the availability of safe, affordable, and high-quality utility services. Affordable utilities are crucial to health and personal welfare. Accordingly, we are concerned about the EKC rate case request overall and have the following more specific concerns:

- AARP urges the Commission to carefully scrutinize Evergy's electric rate increase because the Company appears to be overly aggressive in its attempt to raise rates this time around. The Company's recently reported 2024 earnings in its EKC operations are very strong, making any request for a large rate increase atop these results highly suspect. Mr. Brosch has prepared an Attachment to these comments summarizing several important issues that are not adequately addressed in the Company's filing and that should be carefully examined by the KCC.
- The Company's proposed rate increase seeks to increase net Base Revenues by \$192 million annually, with a 15 percent increase applied to the residential customer class.¹ This proposed rate increase is far above any reasonable estimate of normal annual cost inflation since the Company's last rate case. Evergy implemented its last Kansas rate case increase only 16 months ago, making any double-digit percentage rate increase proposal at this time unreasonable on its face.² Evergy's requested rate change suggests inadequate cost control efforts by utility management that should not be rewarded with higher returns for shareholders.
- Electric utilities experience changes between rate cases that are both favorable and unfavorable, with growth in customer counts and new revenues, deployment of new technologies and continuous recovery of old plant costs through depreciation; all helping to offset inflationary pressures on expenses and new investment costs. It is essential that regulators recognize not only the utility's increasing costs, but also fully recognize the growth in

¹ Evergy Kansas Central Application at pages 2 and 9.

² Evergy's existing EKC tariffs bear an effective date of December 21, 2023.

electric revenue from new customers and from other favorable changes in setting new rates. A balanced approach to regulation is essential.

- Evergy is requesting a significant increase in what consumers must pay towards the Company's annual corporate profits, by asking that its currently authorized annual return on common equity be increased significantly, from 9.4% that was recently approved by the Commission in settlement of the 2023 rate case upward to 10.5%. This is 13 percent increase in shareholder profits is unrelated to Company performance, would be extremely costly to ratepayers and should not be approved. Evergy's proposed increase in its equity return percentage is further amplified and made even more costly by the Company's proposal to base rates upon an extremely equity "thick" ratio of approximately 52 percent.³ These return proposals are excessive and should be rejected by the Commission. There is no justification for increasing the Company's equity return and income for shareholders at ratepayers' expense, given the extremely supportive regulatory structure and policies made available by the Kansas Legislature and by the Commission here that dramatically reduce risks to the Company's shareholders.
- Evergy has commenced serving the new Panasonic plant in Desoto that is now operational and taking power under contractual arrangements with Evergy. In its rate case filing the Company ignores the Panasonic revenues, but seeks to update its rate base test year for known and measurable changes in cost levels projected through March 31, 2025.⁴ This updating should not be allowed by the Commission without a full accounting for the new revenues (net of incremental costs) arising from serving Panasonic's growing demand.
- We ask that you treat residential consumers fairly with regard to class allocations and rate design. In the company's rate proposal, residential consumers would pay no more than 110 percent of the proposed overall rate increase, based upon class cost allocation results.⁵ This is a reasonable limitation at any overall revenue change ultimately approved in this docket, given the many

³ Id; at pages 4-6.

⁴ Direct Testimony of Ronald Klote at page 7.

⁵ Direct Testimony of Marisol Miller at pages 17-18.

subjective and potentially controversial judgements required within electric utility cost of service allocation studies. AARP supports this Evergy policy recommendation.

- Many of the other accounting proposals in this rate case appear one-sided, treating the utility and its shareholders more favorably than consumers are treated, as more fully explained in the Attachment.

Thank you again for the opportunity to express our concerns regarding these Evergy ratemaking proposals. Mr. Brosch would be pleased to answer any questions arising from these AARP comments.

Respectfully Submitted,

Michael Brosch

Ratemaking Issues For Commission Consideration

1. 2024 was the first full year of Evergy operations after implementing the rate increase approved by the Commission and implemented in December of 2023. Evergy Kansas Central, Inc. reported 2024 Net Income Attributable to Evergy Kansas Central operations of \$552.7 million.⁶ Average Total Equity capital for Evergy Kansas Central 2024 was \$5,088 million.⁷ Using these reported values, the Company's most recent annual return on equity at current rates, before any additional rate increase in the pending Docket was 10.9 percent. This result implies that the Company's newly asserted need for rate relief is driven largely by aggressive, forward-looking ratemaking adjustments, rather than actual earnings deficiencies being experienced by Evergy.
2. Evergy's requested 10.5% Return On Equity ("ROE") is excessive, far exceeding the 9.4% ROE accepted by Evergy in settlement of the last round of rate cases (Application, page 5). If any change to Evergy's currently authorized ROE is considered, it should be downward from 9.4% in recognition of:
 - The extremely supportive regulatory framework and policies of the Commission that shield shareholders from cost recovery risks for most of the Company's costs.⁸
 - The Commission's policy of inclusion of forecasted post-test-year costs for true-up on a selective basis.
 - Legislative advantages achieved by Evergy in 2024, including the ability to achieve predetermination approvals for new generation and construction cost surcharges, along with Plant in Service Accounting deferrals, expediting cost recovery and shifting construction costs and risks from shareholders to ratepayers.
 - Legislative advantages achieved in 2025 via HB2107 that limits Evergy's wildfire liability risks and requires Commission consideration of ratemaking for wildfire costs.⁹

⁶ Evergy 2024 SEC Form 10-K, page 79.

⁷ Id., page 81. Average of \$4,891.9 million and \$5,284.9 million.

⁸ These include Evergy's Retail Energy Cost Adjustment (RECA), the Energy Efficiency Rider (EER), the Transmission Delivery Charge (TDC), the Property Tax Surcharge (PTS), the newly proposed Construction Work in Progress (CWIP) Rider and a series of Commission-approved cost tracking mechanisms for pensions, other post employment benefits, critical infrastructure, cybersecurity expenses.

⁹ Application at 5.

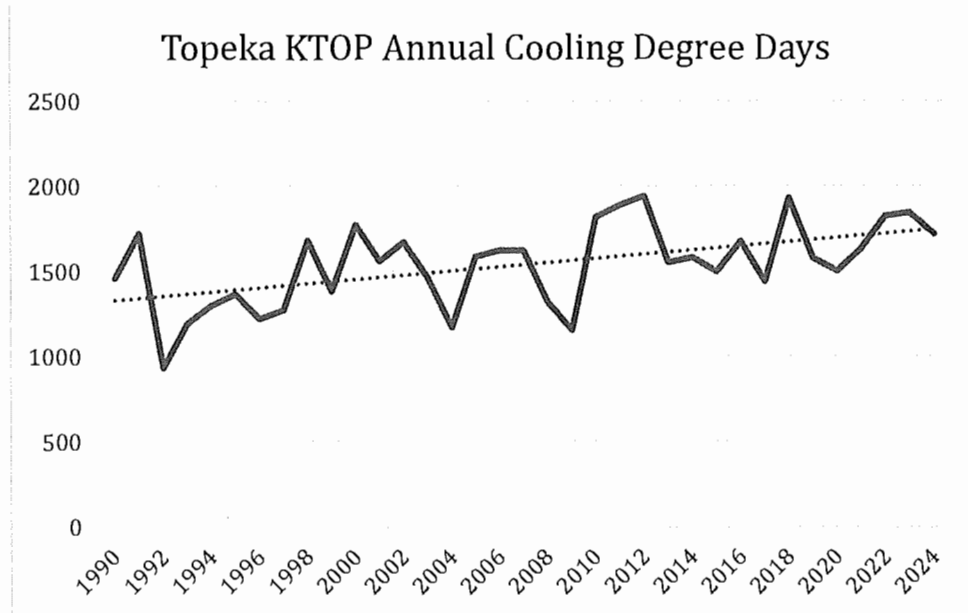

3. Evergy has strategically overstated its EKC stand-alone capital structure at 51.97% equity by placing significant debt financing at the parent company, where the Company suggests it should be ignored by regulators.¹⁰ Debt capital is less than half as costly as Evergy's equity in the ratemaking process. As a result, overstating the ratemaking equity ratio is unreasonably costly to ratepayers. Investors and rating agencies evaluate Evergy's financing and financial results on a consolidated basis, with little regard for how management elects to assign capital among its subsidiaries or rate jurisdictions. Management has complete discretion over when, how and where to issue debt financing and can easily structure the capitalization of EKC to be equity thick by reducing debt issuances within EKC.¹¹ This equity-thickening proposal for ratemaking is contrary to KCC policy and should be rejected as unreasonable.
4. Evergy's filing understates MWH sales and test year revenues by failing to capture and include the net revenue contribution from annualized Panasonic plant operations. Panasonic has commenced operations and is rapidly hiring and expanding production, well within the test year updating proposed by Evergy through March 31, 2025. Revenue contributions from Panasonic, net of incremental direct expenses, should not be ignored in this rate case. AARP recommends a Commission-ordered accounting directive requiring Evergy to either implement a special contract revenue crediting process on customer bills and/or regulatory liability accounting from new net revenues from Panasonic to the extent not captured in test year adjustments. This omission must be addressed so these significant new sources of revenue are not quietly retained for the sole benefit of Evergy shareholders between rate cases at the same time ratepayers bear the burden of CWIP surcharges and other being costs incurred to serve new loads.
5. In Evergy's Earnings Call Transcript from the Company's February 27, 2025 earnings call with financial analysts reference was made to the Company's "...advanced stages of negotiation with two large customers...one evaluating our Kansas service territory" and the transcript also referenced a filed request for approval of "large load power service tariffs that would apply to prospective data center customers" with large load growth representing "a transformative time for our company, reflecting and further advancing the vitality of Kansas

¹⁰ Application pages 4-5

¹¹ See [Form 8-K for Evergy INC filed 03/13/2025](#)

and Missouri.”¹² As with the Panasonic demand growth issue above, it is essential that margin revenue growth from other large new customers achieved by Evergy between rate case test years be subject to some form of tracking and crediting to customers.

6. Electric utility sales volumes and revenues in the Midwest are heavily impacted by the severity of summer weather air-conditioning demands. Rate cases therefore require normalization of test year sales volumes so that new rates are based upon “normal” weather. Evergy’s filing understates adjusted MWH sales and test year revenues by unreasonably quantifying what might be considered “normal” heating and cooling degree day within its weather adjustments. Evergy proposes using obsolete 30-year average weather data dating back to 1991, that does not account for warming trends in Kansas weather.¹³ The following cooling degree day data downloaded for Topeka clearly shows the variability of annual degree days, but the long term trend in such data supports using either a trend-line or shorter averaging period to determine what is “normal” weather in 2025:

AARP recommends revising the definition of normal weather in a manner that assigns more weight to more recent weather data, so as to not ignore the obvious trends toward warming across the Country and in Kansas.

¹² Refinitiv Edited Transcript; Q4 Evergy Inc Earnings Call, pages 4-5 available at:

¹³ According to Evergy witness Bass at page 6, “Normal CDD and HDD are derived.... based on a 30-year average (1991- 2020) of normal degree-days...”.

7. Evergy also proposes a new Stay Connected program explained by witness Winslow, with costs of \$1.6 million included in an adjustment to test year expenses.¹⁴ AARP supports programs supportive of customers experiencing difficulties in payment of their electric bills. However, there should be a corresponding downward adjustment to Evergy's test year bad debt expenses since these program benefits to consumers should directly reduce the level of future uncollectible accounts experienced by Evergy.

AARP may offer additional comments at the Public Hearings, based upon updated evidence on file in this Docket at that time.

¹⁴ Klote testimony, page 12.

06-06-2025 I am retired. I am 76 years old. I am on a set income. You are wanting to raise our Everygy bill around \$13 a month. That is totally ridiculous! Why such a rate increase? I understand with inflation but no \$13 a month. We as seniors are having enough trouble keeping up with rising costs. Maybe you need to review your own expenses to see where you can cut costs instead of having the public make up for your waste. Utility prices are on the rise and eventually we won't be able to afford to pay those ridiculous prices anymore. Then if we can't pay then you shut off our electricity. That doesn't hurt you one bit but for the consumer that puts us between a rock and a hard place. Please consider other options. Thank you. Robert Modrell

Narrative

06-06-2025 I am very opposed to a rate increase. Every raises rates every year. The is not acceptable. Just this week there have been 2 signal 4 aka suicide threats on the Facebook scanner pages due to not being able to pay their electric bill. Middle and lower class people are hurting. Organizations like yours are removing middle class. Your CEO makes millions! You made more money last year than you have in many years and shareholders got huge returns. Raising rates is now pure greed while lower and middle class suffer. I feel bad for folks who are so stressed they feel their only way out is a signal 4. Think about that. Stop making people choose between eating and paying you. Stop making people work themselves to death so your shareholders and CEO continue to make millions. Just stop and think about the people paying your salaries. Stop the greed!

Docket Opinion

Company ID EKCE
Docket Number 25-EKCE-294-RTS

Consumer Opinion O
of Petitions Signatures

Narrative

06-06-2025 I am writing in firm opposition to Evergy's proposed \$196.4 million (8.62%) rate increase for Evergy Kansas Central customers. This request would raise the average residential bill by \$13.05 per month beginning in September 2025—a burden that many Kansans simply cannot afford. What's particularly concerning is that Evergy has reported strong financial performance in recent years. According to Evergy's 2024 first-quarter earnings report, the company generated \$200 million in net income, up from \$171 million in the same period the previous year—a nearly 17% increase. Additionally, Evergy continues to issue healthy dividends to shareholders, including a 6.2% dividend increase approved in late 2023. These figures raise serious questions about the need to pass additional costs onto consumers. Unlike in competitive markets, Kansans cannot switch providers if they are dissatisfied with service or pricing. Evergy holds a regulated monopoly, which brings with it a public duty to prioritize affordability and transparency over profit maximization. The proposed increase would disproportionately impact lower-income households, seniors on fixed incomes, and working families—especially those already facing rising costs for housing, food, and healthcare. Given Evergy's financial position and the lack of choice available to consumers, this rate increase feels unjustified and exploitative. I urge the Kansas Corporation Commission to reject this application and demand greater accountability from Evergy in demonstrating both need and equity before any future rate adjustments are considered.

Consumer Opinion O
of Petitions Signatures

Narrative

06-06-2025 This is a huge price increase that will negatively impact thousands of families across the state. We have also been dealing with higher prices from the most recent price change a few years ago. In a time when many families are already struggling to make ends meet, this large of an increase can make a huge impact. I understand that prices are rising for everyone, including for Evergy but an almost 9% increase in rates is too much. The average family will be paying \$156 more a year. Evergy can raise prices but a 5% or lower price hike would be much better and more beneficial to Kansans. Thank you for your time.

Narrative

06-06-2025 This increase should not be allowed. There are many of us residents that live paycheck to paycheck and can barely afford our bills as it is. And while everything keeps going up, our paychecks do not. Also, a lot of us rent from people that choose not to insulate our homes, so there for our bills are already so very high that its scary. So PLEASE take into consideration those of us that cannot afford this. Thank You

Consumer Opinion
O

of Petitions Signatures

Narrative

06-06-2025 My family and I own a small business and farm so we understand the rising costs of everything. We also understand in order for a business to be viable there at times will need to be rate increases. Our opposition to this current rate increase is the high percentage increase and its impact to local consumers, farms, and small businesses. Meanwhile Evergy, Inc showed a profit last year of \$877 million. If Evergy was struggling or there were significant investments needed to justify this increase I could maybe be more understanding. 8.62% is much larger than the current inflation rate so why such a high percentage increase? In addition, Evergy received subsidies and grants from both the state and federal government, which are our tax dollars. As mentioned earlier in 2024, your adjusted earnings were \$877 million. If you are making a profit, why increase rates? Especially as a customer and consumer who has no other choice but to use Evergy. With the current economic situation for most households being not the best, I strongly believe this is a bad look for a profitable company to be asking for rate increases. If the rate increase was closer to 2-3% I could be more understanding. I ask the Kansas Corporate Commission to strongly reconsider this request and ask for Evergy to submit a lower rate increase if needed to keep up with rising cost of capital.

Narrative

06-07-2025 Many families are still struggling to meet their everyday needs after several years of financial hardships. We are just beginning to recover and now is not the time to add more strain to their financial situation for unnecessary projects by Evergy. Just like the people they wish to get more money from, they should have to learn to prioritize where their current money goes. It's hard for me to support an increase on customers struggling to make ends meet, when Evergy's leadership collects such ridiculously high salaries (like Mr. Campbell's 7.26 million dollars). Please consider denying the rate increase at this time.

Narrative

06-07-2025 Dear Everygy, Does my opinion TRULY matter?!?! If so, please know that in Statistics when 1 person speaks up there are 5 more who believe the same but will not speak up due to whatever reason important to them, mostly fear. So I give you my opinion for 6 scared people: not only do we not WANT our energy bills to go up, but we simply CANNOT afford it!! The little man can no longer afford to pay for the extravagant lifestyles of the CEOS of big corporations. Most of us make an average of \$25,000 to \$50,000 a year, so not only are we paying our monthly bills to survive, but we are also buying your CEOs mansions and yachts. WE IMPORE YOU to take less money and give us hard-working people a break!!!! We can no longer sponsor you!! PLEASE DO NOT RAISE OUR RATES!!!! Instead, limit yourselves to a measley \$200,000 a year and instead pay for your infrastructure improvements with your exorbitant salaries. Again, statistically speaking, I speak on the behalf of 6 people!! Thank you for taking the time to read our opinion. Sincerely, M. Harn Topeka, KS

Narrative

06-07-2025 The US Job and earnings report came out and it was reported that the average hourly earnings rose 0.4% month over month in May and 3.9% year over year. I just came from a church assembly meeting where they voted to increase salaries at 2.9%. You are asking for an increase of 8.62%. Those numbers don't even make sense. I feel that is is arrogant and out of line for that kind of increase in this economy where everything is about to go up again and the Recession word comes up on the news. Be reasonable, and ask for a 2 or 3% increase. That matches what some of us received as increases in pay.

Narrative

06-07-2025 It was just a few years ago Everygy requested a rate hike, which was partially approved by the KCC and that increase made it more difficult to make ends meet then. Now, once again is asked to be approved. For those of us on a fixed income, who do not meet income limits for assistance, \$156.00 extra a year will be more than a burden. We reach the point of juggling what necessity to do without so electricity needs can be maintained. Please carefully consider granting this increase and the effects it will have on many of its customer's livelihoods.

of Petitions Signatures

Narrative

06-07-2025 To Whom It May Concern, I am writing to express my firm opposition to Evergy Electric Company's proposed rate increase. Electricity is not a luxury—it's an essential service, and Evergy holds a monopoly over this necessity in many areas. Because customers cannot shop around for alternative electric providers, raising rates is not only unfair but exploitative. Evergy is already a profitable company. Rather than pushing additional costs onto your customers—many of whom are already facing rising expenses in every area of life—you should be reevaluating your own budget, reducing executive compensation, or adjusting your profit margins. It is not the public's responsibility to cover mismanagement or to maintain excessive corporate profits. The proposed rate hike sends the message that Evergy prioritizes shareholders over the wellbeing of the communities it serves. That is unacceptable. I urge you to reject this increase and hold Evergy accountable to the people who rely on their service—not just their bottom line.

Narrative

06-08-2025 Everygy has requested several increases over the past years. Most started when the pandemic hit. We all tightened our belts and gave in to a small increase. Since then more increases have been given to Everygy. Enough is enough! I am now much older and retired so funds are limited. Lieap program helps out, but that is going to be gone as of this year from the lack of funds. I even have turned off everything in my home other than what I need. So I have no music/tv playing, a/c & heat only at night. I even turned my water heater down so the water is cooler. I'm still upset we here in Kansas had to pay for the Texas grid collapse that one winter years ago, oh, except the Kansas City area that is.

Narrative

06-08-2025 There are many senior people who are living on just SSI. Putting another large increase will hurt these people. They are going to have live without power because they cannot afford an increase in their budget. With everything going up including food and rent, how do you expect these seniors to live? They are going to have to take money out of the food budget just to have power. That is not right, they are going to be living on the streets because with everything going up and there SSI payment is not making up the difference by an increase in the SSI payment. So you see everything is going up except what money is coming in. All utilities are going up so seniors can't make it and this is suppose to be our glory days! How would you like to live on the streets because your SSI income is below poverty level while everything else is going up? Please don't increase your rates because a lot people cannot afford it especially the seniors who are just living on SSI.

Narrative

06-08-2025 I strongly oppose the proposed rate increase. At a time when wages have remained largely stagnant for years, families are already struggling under the weight of rising housing costs and skyrocketing grocery bills. Trumps tariffs are impacting almost every area of costs for every American. Approving a rate increase now would only deepen the financial burden on households that are already stretched thin. We need relief—not more costs.

Narrative

06-08-2025 As a retired couple living on my husbands disability it is so hard our to make ends meet and when every utility raises their rates every year it just makes it harder to get by. If you get a couple dollars more from social security it seems like each utility is raising their rates that amount so at the end of the month you are 4-5 times that amount shorter on funds. We can't afford more for a utility bill especially when they are making profits and the people they are serving are having to go without things like food, medical care, home repairs, ect. Please keep our rates down.

Narrative

06-08-2025 American are having a hard time making ends meet. My electric alone a month is over 160 a month .I spend more in Kansas on electric than I did in Texas. We are all struggling and the cost of living has gotten worse for Kansas families. We should not have to chose between feeding our children or paying higher electric bills. Wages are the same for the middle class and lower class families taxes increase each year and adding the increase won't help. The working class and the lower income families we are all struggling financially. Single parent and working parent of two income are stretch each dime we have. I think the electric increase is going to make it more a burden on the everyone who can barely get by as is. We need a break from all the increases.

Consumer Opinion
O

of Petitions Signatures

Narrative

06-09-2025 This company posted record profits last year. There is no need for them to have a rate increase. More importantly, many people are struggling financially and this increase, though small on an individual basis, burdens Kansans already dealing with inflation and continuing cost increases across the board. Everygy does not care about its customers, only in how much they can bring to the bottom line, or essentially how profitable they are...at the expense of a customer base that increasingly cannot afford much more. This move by Everygy is rooted in greed and corporate selfishness.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-09-2025 I respectfully oppose the proposed \$196.4 million (8.62%) rate increase requested by Evergy Kansas Central. While I understand the need for utilities to maintain infrastructure and manage operating costs, this substantial increase places an undue financial burden on residential customers, many of whom are already struggling with rising living expenses. As a former Evergy employee, I know from experience that there are internal costs and inefficiencies within the company that can and should be reduced before asking customers to pay more. It is critical that Evergy prioritize cutting unnecessary expenses and improving operational efficiency rather than passing excessive costs on to consumers. An average monthly increase of \$13.05 may seem modest in isolation, but for thousands of households, especially low- and fixed-income families, it represents a significant hardship. Additionally, the request does not even include costs related to the Panasonic Electric Vehicle battery plant or the planned natural gas plants, indicating that further increases may be coming. I urge the Kansas Corporation Commission to carefully scrutinize Evergy's application, prioritize affordability and customer impact, and deny or significantly reduce this rate increase to protect Kansas families from undue financial strain. Thank you for your consideration.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-09-2025 I vehemently oppose Evergy's proposed \$196.4 million rate hike, an average \$13.05 monthly increase for Kansans, set for September 2025. This isn't just a burden; it's an insult given Evergy's substantial profits. Their own reports show GAAP net income jumped from \$731.3 million in 2023 to \$873.5 million in 2024, a 19.44% increase. Simultaneously, Evergy has steadily increased shareholder dividends, with a \$0.6675 per share dividend declared in February 2025, following \$0.6425 throughout 2024. This aggressive pursuit of profit is particularly galling because Kansans have no choice of electric provider. As a regulated monopoly, Evergy faces no market competition to temper its demands. We are a captive customer base, forced to absorb these increases while Evergy's shareholders reap growing rewards. This proposal is a clear demonstration of prioritizing corporate gain over public well-being and must be rejected.

Narrative

06-09-2025 Every time Evergy wants an increase they use the excuse of rebuilding infrastructure. I for one am tired of picking up the tab for there mismanagement of the funds already received. My fixed income is not getting bigger and spreading it out is getting tough. i understand that they need to make a profit, but every time they want to acquire a new company the Dogwood Energy Center for instance. They ask for an increase! i for one am tired of them making us pay for there acquisition of another plant that the consumers have to pay for and no cost to evergy just future price increases to the consumer.

Narrative

06-09-2025 These energy rate increases are placing a great burden on families, especially in a time when our economy is suffering; tariffs are looming affecting our trade and businesses, and our dollar is falling causing widespread inflation in our country already. If you were telling me that you would use the rate increase to strengthen the electric grid from our enemies - I would be for the increase - but you don't have a clear explanation of why these rate increases are necessary and how the funds are going to be used. There should be greater accountability for utilities in ensuring fair and reasonable rates. Please don't raise the rates. Thank you.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-09-2025 DO NOT give Evergy the rate increase they're asking for. They had an earnings increase! Instead of giving it to pad their pockets and their investors they're bleeding their customers for more money. I'm 74 and on fixed income. I already keep my thermostat at 64 in the winter and 84 in the summer and wear clothes longer so I don't have to do much laundry. Evergy announced that it would be paying shareholders a dividend after it reported a \$2.3 million earnings increase. According to Evergy's Q1 2025 Earnings press release, the company had favorable earnings that it attributed to retail rates, transmission revenue, favorable weather and decreased transmission charges in Kansas. As a result, the company will be paying shareholders a \$0.667 dividend for every share they owned before the ex-dividend date. Those dividends will be paid to shareholders on June 20, 2025. AGAIN, DO NOT give Evergy the rate increase. Thank You.

Narrative

06-09-2025 I am a current customer of Evergy Kansas Central, and am opposed to their proposed rate increase. The amount of power consumed in the area far exceeds the generation amount, and Evergy is still actively courting data centers and other large energy users to locate within the area. Per Evergy's own annual reports, they expect demand to double within the next 3-5 years, largely from data centers and their insane energy demands, while adding only a handful of jobs, but making the area around them uninhabitable due to noise. Evergy needs to focus on Kansas, and Kansans, not data centers owned by out of state corporations. Please deny their request.

Narrative

06-09-2025 We're 86 years old and something needs to be done. Hopefully, the Commissioner's will consider the facts and how difficult it would be on elderly customers to raise these rates. Utilities is the only entity that allows for improvements they want to make at the expense of the customer, even though they have Investors. I oppose Every from wanting to raise the rates on customers. They need to come up with another way to invest their money and pay for these rate increases and for building their infrastructures. Electricity, gas and everything has gone crazy. They can work out things and leave out the elderly people who cannot afford another rate increase. I would ask the Commission to please consider that elderly people are struggling and can't afford the rate increases since we don't get pay increases.

Narrative

06-09-2025 The rates are already too high for residents and cost prohibited to do business. If the rates are already too high and if the rates increase any more, it is going to force businesses to go somewhere else. We see alot of wind turbines going up in Marion Co, KS, we should see a rate decrease and we haven't seen that. The cost of living is too high for our employees and for us, as well. The 8-9 percent increase can be the difference for people staying here to work vs not. Efficiency comes in the form of dollar bills and charging us extra dollar bills doesn't sound efficient to me.

Narrative

06-09-2025 My electric bill is already too high. Evergy has in the past wasted money on renewables and other inefficient nonsense that didn't benefit their customers in any way, shape, or form other than higher costs. So I don't trust giving them more of our money through rate increases...especially one so high...to build more infrastructure. Learn to operate your company better, pay your top end managers less money. Consider building a Nuclear power plant and I'll support that.

Narrative

06-09-2025 Hello, I am opposed to this rate increase. For myself and many others in your service area this is a 10% plus monthly increase, however my wages have not increased 10% in the last year to accomodate this. Making it harder and harder for people who don't qualify for low income assistance to pay their bill. And as your plant decreases in value, my property tax is also going to increase. Your shares have increased 4-6% in 2024 so millions of dollars, reinvesting these funds to have a smaller profit margin for stakeholders should be considered. I oppose this amount of increase to my monthly bill. Thank-you for your consideration of my opposition. Leslie

EKCE	25-EKCE-294-RTS	O	

Narrative

06-09-2025 Considering the fact that Evergy reported a total revenue of \$1.2 billion for Q4 in 2024, I strongly oppose a rate increase and also considering the fact that Evergy prioritizes profit over people, the fact that the average minimum wage in Kansas is \$7.25 which hasn't been raised since 2008, it is absurd to ask citizens to now pay more for electricity.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-09-2025 I'm writing as a Lawrence resident. Everygy's request to raise rates couldn't come at a worse time for consumers. Everygy's stock price has been on a consistent upward trajectory since October 2023. Despite major swings in the market, today's stock price is still higher than it was for much of 2018. This rate increase of nearly ten percent would only increase the profits of an already profitable company. Like many customers, I have no choice in which company I get my energy from. Everygy has no competition in this market, so consumers have no choice but to shoulder the burden of this company's greed. Perhaps Everygy should learn to budget better rather than squeezing customers for more profits. I urge the Commission to think of their constituents in this time of economic instability and deny this rate increase.

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-09-2025 Everygy posted nearly \$900 million in profit for 2024. They have also asked for a rate increase nearly every year for the last ten years. They even had the gall to ask for increased rates when they failed to provide customers electricity during the summer of 2023 and winter of 2021. These increases and profits come after several plants have been shut down, including the one in Tecumseh, which means the plants currently in operation should already be able to handle the increased output. Everygy claims they want the increase in order to pay for about \$200 million in improvements and, I assume, basic business needs. Is there a reason they can't use \$200 million of their \$900 million profit to pay for that stuff? Profit should be going back into the company and the employees, not divvied out to stockholders or used as bonuses to the people in charge. I understand the cost of producing electricity has gone up and that usage has gone up as population has increased and we're seeing record high and record low temperatures due to climate change. But Everygy should've already been planning for that. We've been talking about temperature and weather changes since the 1980s. Providing electricity is a public good. People need it to survive and Everygy should not have to come to the people of Kansas every other year with their hand out when they already have nearly \$900 million they could use.

Narrative

06-10-2025 The state of Kansas is made up of a large senior citizens on fixed income. We got \$30 more in Social Security that went to buying high price groceries and health care. This year there is a utility program but it may not be available to low income people next year. Every year they ask for money from people who have less and less in their pocketbooks. I oppose this increase.

Narrative

06-10-2025 Please do not keep increasing electricity rates. As a monopoly, there is a need to keep voracious increases for stockholder gain in check. The role of the KCC is to hold the line and keep electricity affordable and reliable without caving in to Evergy's ever increasing demands for enriching stockholders by impoverishing consumers.

O

of Petitions Signatures

Narrative

06-10-2025 Everygy posted net income of the Everygy Kansas Central region from 2021-2024 of 500.7, 420.4, 384.5, and 565.0 respectfully per Investor Supplement taken from Everygy.com. I strongly oppose any increase to rates for this region. It would of only taken a small reinvestment from the previous years income to take care of the infrastructure required instead of using the income to increase executive pay and shareholders dividends. This should not pass based on the Everygy Central Kansas financials.

Narrative

06-10-2025 It seems it was just a year or so ago that Every requested to increase their rates. I never heard if that was approved or rejected. As a senior citizen and on a fixed income I would again appose the requested increase. It seems that with all the different legs within the company they are obviously not losing money, nor should they however I believe the executives could certainly forgo some of their 7 and 8 digit income for the benefit of the company and the benefit for the people of the nation. We appreciate there service but at this time with the economy still struggling and especially with matters being changed, by the Administration, hopefully for the good of the people things will improve and people will once again be able to prosper as well as big business. Appreciatively, Mr. Francis

Narrative

06-10-2025 I just want to put my 2 cents worth. First. Every just had a approved increase in 2023. Second. They have made record profits for the shareholders over the last few years. Third. They spend a lot of money promoting conservation of electric usage. Fourth. They expect a certain amount of profit on their investments. The less electricity we use is less money they receive. So, it is a no win situation for us consumers. Use more ,pay more in usage cost. Use less, pay more in rate increase cost.

Narrative

06-10-2025 I am 69 years old, living solely on SS. I rent a 430 sq. ft. duplex. My energy bills are routinely over \$250 in January and February. My bill for May 2025 was \$130, using the AC for three days only. It sure feels like price gouging. The only people in support of this usurious rate hike are Evergy's corporate officers and Evergy shareholders. Respectfully, Tom

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-10-2025 What you are proposing is a cost increase to fix lines and equipment. Evergy made a \$923-million-dollar profit in the first quarter of 2025. Growth to date is up by 4.65% and Trailing in the last 12 months is \$4.03 billion. The cost of operations should come from the profits that Evergy made because the last cost increase was for the same thing. Why are we paying for Evergys cost of operations. Why on earth would you think it appropriate to charge us for the increase when you are clearly able to uphold the cost of operation. I would never vote for the cost of operation increase for Evergy. If Evergy was keeping up on improvements the cost would not be so high in one go. That is the company cost of operations. Not ours. Even when they asked for an increase, they still made billions in profits. Why is Evergy back for more money for us? These companies are greedy, and they are coming after us for another billion. What happened to the last increase we approved of in 2023 for the same thing. If we give this raise to them who's to say they won't ask us for another 2 years for another billion dollars. This will make it so Kansas families that are above the limits for assistance on bills can't get it. The people who struggle to pay what the bills are now. I make above the income level for assistance and with this increase I will have to make a choice what bills I won't pay just to Pay EVERGY. This is not right, and no one should make this choice. This is unjust and should not be given to Evergy. This is not right and Evergy should be ashamed of itself. NO increase for EVERGY! NOTHING! I would be at this meeting if I could but unfortunately, I have another meeting at the same time for community improvement.

Narrative

06-10-2025 I urge the Commission to reject this rate increase. Everygy just increased rates on customers two years ago and the Commission ignored it's own staff's recommendations that rate increases were unnecessary. In fact, the Commission's staff concluded rates could be decreased based on their study of the matter. Everygy is attempting to push rates up to satisfy it's hedge fund ownership's (Elliot Management) demands of a 10%+ return on their investment. This demand is outrageous and pure greed; utility customers that have no other option should not be assessed higher rates to line the pockets of an activist hedge fund.

Narrative

06-10-2025 I would be interested in knowing how much energy Evergy has saved from the use of LED light bulbs by their customers. I know each LED bulb saves between 75% to 90%. I would think that would amount to a significant amount. Also, this new proposed Evergy rate increase is just another dog and pony show. Evergy asks for way more than they know they are going to get. The KCC says they will reduce the amount knowing this is still more than they need. Investors will end up with a better rate. Meanwhile, customers will be hit with higher bills just when everything else is costing more.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-11-2025 Every seeks to increase rates by a massive 8.62% because it has failed to follow reasonable principles of electricity generation. It has allowed federal and state subsidies to make our grid more vulnerable by contracting with highly intermittent, weather dependent sources of electricity, specifically wind and solar. Since these sources make the grid extremely fragile, Every has realized that the only way to fix the disaster they helped cause is to raise rates to add additional generation that would not be needed if it were not for unreliable solar and wind. Every's rate increase is a symptom of their own lack of discipline and should not be granted.

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-11-2025 I'm against this hike. Seems we get this type of hike every year. \$13 is too much. Please consider the lower income people. Everything just keeps increasing the water, electric, gas. All prices are increasing above what they have ever been. Property taxes as well. Here is evergy again asking for more. They have quite a bit of money they can use for this increase. They seem to make record profits and pay their shareholders too much. We can use some of these to pay our rates down. We are pricing people out of their homes with these types of increases.

Narrative

06-11-2025 I just want to say that if the increased operating expenses are because of AI data centers, that Evergy should charge data centers more instead of using our electric bills to subsidize tech bros. The rate increase is much less than what it would be on the east coast where I used to live though.

Narrative

06-11-2025 The monthly charges for the rate hike seem steep for us as customers, and that is without including the anticipated requests for two new gas plants (at \$1.5 billion each). We really need to make investments in smarter, clean-energy options, both as being more respectful of our environment and our pocketbooks!

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-11-2025 I oppose the current request for a rate increase. I've lived here sine 2023 and this is the second time they've asked for an increase. The last time they said it woud increase the average bill by \$5 and it has increased my average bill from 51 to 63. I live in a small apartment and keep my thermostat set high in the summer and low in the winter. I can't imagine how much it has increased for others with a larger house. I live on a fixed income (SS) and I cannot afford another increase!! And I'm thinking of they say the average increase will be\$13, you can more than double that for a small place like mine. Historical that's been the case, of they say\$5 increase we got \$12 and your can't get a much smaller place than I have. I can't afford it and none of the people I know can afford an increase. That means cutting out food for a lot of us. 2 increases in less than 2 years is out of line!! Last one was Dec 2023. Thanks for your consideration.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-11-2025 I understand the need to keep infrastructure in good working condition. But, Evergy customers have to tighten their belts to keep their infrastructure up to date already. This amount of an increase is obscene. A good portion of their customers are living on a fixed income that cannot keep on top of their expenses with the meager cost of living increases. Perhaps it's time for Evergy to tighten their belts.

Narrative

06-11-2025 I have seen nothing but increases from Evergy. Kansans are getting hit with a double whammy from our congress through the Big Beautiful Bill since energy credits appear to end. WIBW reported that my bill will increase by \$400 just from the bill in congress alone. Adding an additional cost on top of this will be a tough pill to swallow. My rates already increased from that winter storm a while back. How much does Evergy expect Kansans to bear just to satisfy their shareholders? Evergy is the only option I have for power and I feel angry my bill has done nothing but increase!

Narrative

06-11-2025 a residential customer of Evergy, I strongly oppose the proposed 15% increase to electric rates. This rate hike would impose an unnecessary and disproportionate financial burden on households already facing rising costs in nearly every area of daily life. Reliable electricity is a basic necessity—not a luxury—and it should not be priced beyond reach. Many of us are doing everything we can to conserve energy and reduce consumption, yet we are continually asked to pay more without clear, measurable benefits in return. I urge the Commission to reject Evergy's proposal and to prioritize affordability, fairness, and transparency for Kansas consumers.

Narrative

06-11-2025 I wonder if management was a little short-sighted due to this being the second request in around 7 months to increase rates (the first being 25-EKCE-207-PRE). Will increased customer usage due to the new industrial customers, for instance, not cover the higher costs? Granted, until recently inflation has been high so I can understand that increased rates may be needed. It still hurts to see yet more cost-of-living increases. At least there is the opportunity to comment--I appreciate that. Whatever the ultimate path, I want Evergy to choose the most reliable long-term solution, not one for short-term gain.

Narrative

06-11-2025 I am opposed to the proposed increase to electric service through Evergy. Electricity is already an expensive bill and there are many in the Pittsburg community that can barely afford to pay their electric bills each month, some having to go without electricity during the hottest and coldest times of the year. This is not ok. Electricity is a necessity and should not be priced like it is a privilege.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-12-2025 I'm opposed to such a high increase. My yard light is almost \$17/month and I've been needing, not wanting, to disconnect it. A \$13/mo increase force me to disconnect the yard light. I live in the country and hate to do this as it would be pitch black but it would be one or the other. Our rural area has multiple leaning elec poles that need to be replaced before those poles bring other poles and lines down causing needless power outages. For example, there is a pole behind my house that has been marked for replacement for 18 months and has yet to be replaced. In December 2021 5 power poles were snapped in a wind storm and it took 3 days to replace 5 poles, leaving dozens and dozens of Evergy costumers cold, in December. There was not widespread damage at that time, just a very slow response. A \$13/mo increase is a third of my phone bill. Do I disconnect my phone to pay for their increase? I do not have home internet and do not live lavishly or spend friviously. Evergy says it's a minimal increase. But not to everybody. This is too much. I see no improvements that have been done that benefit me as a consumer. Evergy knew what they were getting when they purchased from Westar, who didn't alway have their hand out. Please, please do not approve 8% increase. Please consider a smaller increase such as 2-3%, which is significantly lower than the proposed 8%. When you get down to it, everyone is on a fixed income, not just sr citizens, as those in the working force don't just get to demand a raise or extra overtime to pay for all the extras that are piled on and demanded of the consumer. Again, please don't approve this rate increase. Thank you for your time, an Evergy Customer

Narrative

06-12-2025 Everygy just received a rate increase 2 years ago. Are customers to be subjected to more increases on a frequent basis, as they deem necessary? I live on a fixed income and with the rising costs of food, other utilities, gasoline prices and everything else, I don't need to see this large of an increase to my electric bill. I had to place my spouse into a care facility, less than 6 months ago and have additional costs to bear there. it seems utility companies get their request way to often. It's about time the consumer is heard and protected for a change. I urge the Commission to deny this unreasonable and untimely request to increase rates Take into consideration how this increase will impact those on fixed income. SAY NO!

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-12-2025 Why does this company make millions in profit and can't make the improvements with it? It's not fair to try and raise our rates what seems like every year! These hikes are a considerable price increase. Is this company ran so poorly that this is the only way they can do improvements is to straight pass on to customers? Why don't they attempt to split it up the increases over their whole coverage area? Why is it only Wichita they want to keep paying more? This is poor business practices.

Narrative

06-12-2025 We have updated our house with windows, new siding and all LED lights, our last electric bill was 149.00 with the windows open in nice weather of mid 70s. In summer our bills have been almost 375.00 a month to keep our house at 78 degrees. I understand rates go up but as a monopoly we can't shop around for a better rate. When will these rate hikes stop. I thought we would see a rate decrease over the years but it has yet to happen and now another rate increase.

Narrative

06-12-2025 I believe the rate increase requested by Evergy is inflated by about \$80 million. Their investors don't need that much to earn a decent return. So about \$112 million is a better fit for the proposal. I also don't see why those of us in the Central District always get asked to pay for this stuff. The KC Metro division should have to bear more of the costs than they now do.

Narrative

06-12-2025 Every continued excuses for rate increases, is absurd! Funding for money received from previous increases typically have high misappropriation of funds. Yes, infrastructure is needed, however instead of increasing costs to all the customers served by Every, perhaps they need to cut all the higher up wages, instead of constantly getting increased from misused rate increases. Where's all the previous increase rates been appropriated too? I'm willing to bet money the higher ups got large pay increases. Truthfully your rate increase is bs just sucking every penny from folks that can't afford the increase, much less other necessities to live. Customarily the company at one time provided community services free, by cutting trees near wires & all. That isn't even provided no longer either by the company. Do you not realize telling folks to pay for tree trimming is ridiculous. That isn't a cheap thing to do. I know several, including my own son who is visually impaired, other folks disabled just don't have resources to hire tree trimming services. My own son who is blind needed help. He had trees hitting wires. He called every & was told they won't clear those for him. He'd need to hire a person. Therefore folks unable to afford tree service, their trees take out wires etc. Then it cost Every more money to go around repairing & getting electric running again. Absorb your own cost for improvements, considering all the high costs already being paid by customers the company should have far exceeded financial needs for improvements. People paychecks don't get increased, yet you & others continue to gouge every cent possible from customers. My opinion is that Every takes more than it gives to people needing help. Cut the management, company president & More on their absurd paychecks.

Narrative

06-12-2025 Everygy has been hiking up rates for the past few years to residents in both MO and KS. It feels, as a taxpayer and homeowner in the Kansas City Central metro area, that I keep getting price hikes for essentials. We already took a price increase in 2023 with Everygy, resulting in a monthly increase of \$5 in this area. This is poor management and poor decisions on Everygy's part. Why do taxpayers have to pay THIS PRICE and not Executives? In fact, David Campbell, received a total compensation of \$7.258 million in 2024. Does the allocation of payment seem far? I oppose this rate increase and I hope to put money back in taxpayers pockets. Vote NO.

Narrative

06-12-2025 Enough is enough. This isn't about improved service to customers, nor is due to increased costs. They are making substantial profits and the reason for this increase is to further enrich their CEO and raise the profits of shareholders. We are stuck with Evergy as other options are not available and they are taking advantage of that monopoly to further enrich themselves on the backs of their customers. As usual, I expect the KCC will vote to approve an increase, even if slightly lower than requested. For once, please stand up for the customers and vote NO on this increase.

Narrative

06-12-2025 The amount of the raise Everygy is asking per month is unreasonably high. When people are living from paycheck to paycheck or are on fixed incomes and subsidies, it's hardly enough to survive. Cost of living keeps going up and life's survival is dropping. Please think of those who can't afford a \$13.05 out of their fixed income every month. I know ways can be worked out by the commission to find a balance for your customers and the Every service. Please think of the customers. I definitely oppose this high rate hike as it affects my budget allotment, also. Thank you for listening. Sincerely, Lin Sayatovic

Narrative

06-13-2025 \$13.05 a month increase is insane! Not all of us get pay increases every year. I don't! I don't want to work 10-12 hours a day just to pay for everything! I'm getting older and can't handle that as well. When is enough enough for wanting rate increases?! It certainly doesn't need to be every year! This big increase is going to make it that much harder for a lot of people to pay it. Try not giving pay increases to your own employees every year. Cut expenses yourselves instead of expecting customers to absorb it. Take away personal use of your company pick up trucks. I bet that would save a lot of money there!

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-13-2025 The rate increase of 8,62% is more than our social security increase of 2%. Senior citizens see increases in medical insurance, groceries and other essentials every year. Seniors living on a fixed income can not afford such an increase. When Evergy can afford to pay out 597 million in dividends they do not need an increase. I would like to see the CEO live on social security. With the federal government cutting many programs to help low income people what will people pay first. Will they eat, take care of their health, or pay their electrical bill? NO INCREASE

Narrative

06-13-2025 This time you only want 8.6% increase , last time it was what 6.4% or something like that ? And these increased rates never go back down after 'whatever' has been paid off. Yet, annually you boost to your stockholders (which the majority of your customers can not afford to be because we have to keep paying these ever raising fees) about how well you are doing , or you are bragging about how much of the money you took out of our wallets (your trapped by the monopoly you have over us customers) and donated it or spent it on high priced advertising how about for once you do the majority of your CUSTOMERS a favor and cut your spending 8.6% and leave us alone for a while .

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-13-2025 I am writing to express my strong opposition to Evergy's proposed \$196.4 million rate increase. Raising residential rates by over 8%—about \$13 per month—is an undue burden on Kansas families who are already navigating rising costs for food, rent, healthcare, and insurance. Since the 2018 merger, Evergy has reported nearly \$4 billion in adjusted earnings, including \$878 million in 2023 alone. Over that same time, residential customers have already seen their rates gradually increase. Now, the company wants those same customers to absorb the cost of \$1 billion in infrastructure upgrades—costs that Evergy can and should cover itself. Adding to the concern is the excessive executive compensation at Evergy. In 2023, CEO David Campbell earned \$7.26 million, with a base salary over \$1 million and the rest in bonuses and stock. Other top executives earned \$1.7 million to over \$3 million, and board members took home more than \$330,000 each, totaling over \$22 million in combined compensation when including stock awards. These figures raise serious concerns about Evergy's priorities. The company is requesting a 10.5% return on equity—well above regional benchmarks—while Kansans are asked to shoulder yet another rate increase. Instead of funding infrastructure from corporate profits or rebalancing executive compensation, Evergy is shifting the financial burden onto its customers. This is not fair, and it's not necessary. I urge the Kansas Corporation Commission to reject this rate increase and hold Evergy accountable for using its substantial profits to invest in its own operations—without pushing costs onto the very people who keep the company in business.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-14-2025 Everygy posted \$878 million in adjusted income for 2024, up \$62 million from the previous year. That's a 20% increase in revenue. I am all for a company increasing profits to benefit its shareholders, but not at the expense of its customer base by causing hardship for them. My wife and I have a decent monthly income, but Everygy with its yearly rate increases has given us no choice other than to enter their equalized payment program, simply because we can't afford the payments during especially hot or cold months. One other item to mention is that Everygy's rate increase request includes paying off the Persimmon Creek Wind Farm in Oklahoma, which Everygy purchased for \$250 million. I am anti- wind energy as it stands, but it's important to note that this particular wind farm will be providing power for Missouri in specific. It really has no significant benefit for Kansans and I don't feel that Kansas customers should pay for it.
Thank you for your time. Scott Hulse

Narrative

06-14-2025 I do oppose the rate increase. I've heard and researched the profits of Evergy. (In 2024, Evergy recorded about \$878 million in adjusted earnings. That was up from about \$816 million in 2023. Stockholders were paid \$597 million in cash dividends in 2024.) I know companies need or want profits from their business, which I understand. In todays dangerous economy and world, food price increases among other costs and increases is not the time to raise rates. It's time for consideration for the people and how their lives are going. Help people and don't raise the rates. Thank you

Narrative

06-14-2025 It seems this utility company is asking for some increase every year. Are they absorbing any of the cost for the work that they are planning or since they are a monopoly and know we don't have any options they can keep squeezing the customers. Are the company executives being compensated with stock dividends and bonuses that is driving these request so that can benefit from getting more from the customer. It seems each one of these projects that they are planning cost us more, when will we see the ROI for us with a lower or stable utility cost. 13% is a lot for me to absorb. I think this increase needs to be rejected and other options need to be looked at.

Narrative

06-14-2025 Hi- Evergy has continued to have enormous profits year over year, \$878million in 2024. And they want a rate increase. Why do they need to make that much profit? Why not re-invest that profit back into their company, people, infrastructure, equipment, etc? Evergy is effectively a government sanctioned monopoly, i can't just go buy electricy from john doe electric power, I have to purchase it from Evergy. So why do they need to make such a huge profit? And why aren't they investing in nuclear energy, the only truely green electric generation method? We don't need new natural gas power, we need nuclear! Our rates are high enough if they're making \$878 million in profit after paying all their bills. I own a tow service registered with the KCC as a public utility, and I don't get to have margins that huge. They shouldn't either. NO RATE INCREASE! RE-INVEST YOUR PROFITS!!!! DON'T BREAK THE WORKING MEN AND WOMEN'S BACKS WITH A RATE INCREASE!!!!

Narrative

06-14-2025 I feel like our rates keep getting increased more and more frequently while profits keep going up. Instead of us always footing the bill, they can take wage cuts to pay for it. Some of us struggle to pay the bill as it is. They just want to make that a little bit harder. Especially since the people with less income typically live in older houses which are not as efficient. So this price increase just exacerbates the problem.

Narrative

06-15-2025 According to an article in the Capital-Journal on May 21, 2025 Evergy had profits of \$878 million. The article also reported the income of 7 Evergy executives to be \$22 million. Evergy's rate increase of \$196 Million seems excessive and should be drastically reduced. Residential rate payers do not deserve to be hit with a 10% rate increase. Furthermore, please keep in mind that any increase applied to commercial customers will simply be passed on to their customers. Therefore, the entire rate increase is dumped on the residents of Kansas. Please do your diligence in protecting Kansans from unwarranted rate increases. Senior citizens living on a fixed income deserve your protection. Thank you for your consideration.

Narrative

06-15-2025 Please take into consideration those who are retired and on fixed incomes. Everything seems to be getting more expensive, and who knows what the impact of the tariffs will bring. KPERS/KPF have not increased retirement benefits in over 20 years, and private pensions probably face the same conditions or were terminated. Social Security has not increased enough to keep up with inflation, utility rate increases, fuel costs or property taxes. Please start taking the fixed income and elderly into consideration when these rate increases are requested and maybe start thinking about exemptions from increases for those in a particular income bracket, age brackets, fixed income situation, or a solution combining all three. Thank you for keeping watch over the public's best interests, and for reviewing these comments.

Narrative

06-15-2025 I believe this rate increase is excessive and will place a hardship on many Kansans, especially those on fixed incomes. I know of someone who has a relative that works for Evergy and this person gets very hefty bonuses as with many Evergy employees. In 2022, the President and CEO had a base salary of \$1,029,423 plus a cash bonus of \$1,487,063 for a total cash compensation of over \$2.5 million. The Executive Vice President and CFO had a salary of \$717,163, plus a cash bonus of \$828,713 for a total of \$1,545,876. And the list goes on and on. Even non-employees get bonuses. We don't know where their money goes; it's a monopoly and we keep getting asked to pay more and more. The more profit they make the happier the shareholders are and the bigger the bonuses are to execs. They claim costs are increasing for maintenance. If you budget properly you anticipate increases and if they increase higher than anticipated then maybe someone shouldn't get as big a bonus. I'm so against this increase as it's too much and no accountability to show where money is really going. I ask that you please deny this increase; however, as with other requests from Evergy and Kansas Gas, these pleas fall on deaf ears and they get what they want. Thank you.

Narrative

06-16-2025 We do not need to have anymore raises. Not when their CEO has that amount of income and I'm sure alot of it is based on the ability to make all things good profit wise. We do not need to have a rate increase when they have a profit of \$874 million. That's absolutely ridiculous. How many people with disabilities can't afford to pay their electricity bills because they can't receive the help they need. What individuals can keep paying the Head Hanchos dollars and here we are struggling to make ends meet.

June 11, 2025

To: Kansas Corporation Commission (Mr. French, Ms. Kuether, Mr. Keen)

Subject: Evergy rate hearing (Wichita)

Keeping the electrical grid up in the Evergy service area needs to be factored into this rate hearing. I believe that this has historically been overlooked and should be a metric measured and included in these public hearings.

As an elected official responsible, in part, for emergencies in Sedgwick County (2009-17) I had concerns about the challenges both natural and man-made, to the electrical grid. At that time I privately raised concerns with utility staff (Westar) about an extended grid down event. I was not alone in these concerns at that time, or now.(1) This problem is not new. This is an area where neither the government bodies (FERC) or the utilities have focused attention, and resources. Electrical grid failure must be prevented.

The KCC should look at establishing metrics that penalize and/or provide rewards for electrical service performance within the rate structure.

My concern is that an extended and widespread "blackout" grid failure could be catastrophic in Sedgwick County as well as the rest of the Evergy service area. This has the potential of covering our entire eastern grid area, or even the entire country. Whether this type of catastrophe would occur after the grid was down 3-7 days, or 2 weeks, or longer I cannot say, and would defer to experts but a "grid down," failure has the potential for catastrophic cascading consequences.(2)

Evergy financials are strong. This indicates this proposed rate hike should be delayed until performance metrics tied to service performance are included and expanded metrics are included in this rate setting process.

1) "Lights Out," Ted Koppel, 2013; "Grid down, Power Up," Newsmax broadcast 6-8-2025.

2) "One Second After," William Forstchen

Phone: (316) 744-2995 Email: joy.darrah@att.net

Comment: I oppose the rate increase:

① South Central Kansas paid for Wolf Creek nuclear facility, then Westar combined with KPL (who pay lower rates without contributing to Wolf Creek facility).

② Why does Evergy pay to advertise on TV when they have a monopoly on this service? Makes one question their use of their funding.

③ Please in the future have the contact email for making a public comment sent out with the Evergy bill.

④ Why are we paying for expansion of gas powered plants instead of renewable energy sources with climate change challenges.

*Denotes a required field. Only one submission per person will be recorded.

Please note: By submitting comments to the Commission, you are authorizing the Commission to make your comments and any included information publicly available.

Narrative

06-17-2025 The C.E.O. of Evergy Kansas Central nowadays is paid millions of dollars in yearly salary which is more than the salaries of the Governor of Kansas, the Chief Justice of the Kansas Supreme Court, the Kansas Speaker of the House and the Senate Majority Leader combined. The raise in prices is unwarranted as so many have testified, especially since their retreat from alternative sources of energy. There is nothing natural about natural gas. I could have written that the C.E.O salary is more than the President of the United States gets (true) but then this President gets tips like a free jet airliner and ignores the emoluments clause and rakes in crypto cash.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-17-2025 I am strongly opposed to this rate increase. A vast majority of people in the service area can not afford this increase. This is a very large increase and with the other utilities also increasing, there's not going to be enough left in a household to afford other necessities, such as medications, food, and health care. This has to end somewhere. Let people's wage increases, if they're lucky enough to get that, catch up with increased cost of living before unnecessarily increasing these rates. I don't feel Evergy will go broke by not increasing the rate at this time, but some people will go without other necessities in order to pay Evergy.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-17-2025 Everyg Inc. use such hikes to raise salaries and bonuses for C-Suite and board of directors. If they can guarantee that the rate hike will not be utilized for increasing their individual net worth at the cost of the consumer great. Additionally, 8% rate increase on top of the cost of consumer goods is absolutely absurd. If they want to increase their budget for infrastructure maybe they should consider reducing the executive compensation and board members pay by 8% as well.

Narrative

06-17-2025 I attended the June 16th meeting. My concern is EVERGY works hand in hand with the electric co-ops. I understand the Co-ops are non profit but that gives EVERGY a back door to increasing rates without KCC approval. 2023, prior to EVERGY request for \$14.00 FreeState raise their rates \$10.00 you add that to the \$4.62 increase EVERY was approved and they got their \$14.00 Co-ops can get away with things the for profit EVERGY can't. The same thing happened this year only the Co-op included a fee for residential peak time usage. These meeting are necessary but falls short if the Co-ops are given no boundaries. EVERGY dictates them because they have the monopoly.

Narrative

06-17-2025 To think that a monopoly can make a PROFIT of nearly 900 MILLION and request an increase is unconscionable! Evergy's profits increased by their 2023 rate increase! Another increase is beyond the pale. Stockholders were paid 597 MILLION in dividends in 2024! Additionally, Evergy wants to use the rate increase to build solar farms -- which will increase rates even more. I am in opposition to ANY rate increase for Evergy! DO NOT approve a rate increase for Evergy!

COMMISSION

JUL 01 2025

Kansas Corporation Commission

Docket NO. 25-EKCE-294-RTS

PUBLIC AFFAIRS
AND

CONSUMER PROTECTION

Here we go again. It seems as though every year Energy comes asking for a rate increase. They want to build this or that, repairs or replace whatever.

What they actually want is an increase in pay for the CEO, and higher dividends for the shareholders.

I'd like an increase in pay also, but I won't get it unless Congress decides to give it (highly doubtful this year).

I have to "tighten my belt" and make do with what I have. My clothes come from the "nearly new" shop, and my books from the used book store.

Maybe the CEO will have to forgo that newest vehicle, or a bigger boat. Won't hurt him a bit.

So they're asking for 8.62% increase. To that I say NO, Again NO! Tighten your belt, do with less.

Ask Congress for a subsidy. I've no doubt they are getting something now, ask for more.

Don't put it on the low income,

hard working class.

I would implore the Commission
to reject this latest bid to pass
on increases in costs to customers.

Make them "tighten their belts".

Thank you for your consideration.

Sincerely,

Laurie A. Hartke

Narrative

06-17-2025 I am a Senior Citizen that lives only on Social Security. This increase would very much be a hardship to me! I feel they know when they are going to need improvements in there facilities and that should be a budget item instead of expecting their customers to foot the bill. Plus, Evergy is not diligent to keep trees trimmed from power lines. When they trimmed trees in my area, the tree trimmers said they just need to trim tree ever two years. In older neighborhoods, tree trimming needs to be yearly. They do contract out some tree trimming. There again, they need to factor that in the budget. I think it was 2 weeks ago, my power was out 23 hours. Mainly because Evergy does not maintain tree from power lines. I believe that is a responsibility to their customers that they dont take serious. In North Riverside, Wichita Kansas, 67203, more power outages due to trees. Please do NOT ALLOW RATE HIKE UNTIL THEY CAN DELIVER SOLID EVERGY PERFORMANCE TO IT'S CONSTITUENTS!

Narrative

06-18-2025 This rate request seems very high and it may be somewhat questionable whether the purposed new plants to be built will meet future government standards. Everygy does a good job in trying to be environmentally responsible, but the investment should be looked at carefully. My thermostat is set at 78 degrees in summer and I can only imagine what the purposed increase will mean to those of us who are seniors and do not qualify for assistance. I understand ensuring that a company must do well for its stockholders, but given that Black Hills is also requesting a significant increase in addition to continued inflation, please research very carefully the need as to the amount granted.

Narrative

06-18-2025 I would be adamantly opposed to the increased rate. Evergy is a publicly traded company that continues to rake in record profits for it's shareholders. To say that these rate increases are needed to help build infrastructure is a blatant lie. Most small businesses have to use their profits to reinvest in their infrastructure. Evergy needs to use their own profits and not increase their rates. They have a monopoly on the electric service in the Topeka area and they leave residents no other choice. Stop paying shareholders and leave the rates alone.

Narrative

06-18-2025 2024 earnings calls from Evergy indicate rate hikes as its primary earnings driver. Every day Kansans should not be supplementing shareholders and increasing their dividends. Many fixed income Kansans are already suffering from inflation in every sector. Additionally, I'd be more willing to pay higher rates if the energy was coming from renewable, carbon neutral sources. It looks like Evergy plans to have two more natural gas plants built here. So as it stands, Evergy does not appear to be looking ahead to keeping our planet habitable. We should not be paying more just so they can make more money off of a dying planet.

Narrative

06-18-2025 This is just gaslighting the public. Show us your payroll and the incentive/bonus payout that you haven't been paying upper executives if you really want that raise. It can't be done because you take from the top and the repairs you should have been doing to update infrastructure should have already been built into the scheme of things. Don't tell us that we have to pay more so we can not have your crap break down when a gust of wind goes by. That's your job. End of story. Just another company wanting to line their pockets to make sure the yacht the CEO uses, stays fueled.

Narrative

06-18-2025 I'm curious why this monopoly does advertising and calls it Evergy Park. They should call it Rate Payers Park because that is where the money comes from, from the customers and rate payers. Rate increases should never be higher than 2.4 PPI. Rate increases should never be higher than the PPI. That should be put in place to protect those less fortunate and the elderly. Six months ago Evergy was bragging about saving money through wind and solar farms. We don't hear anything about that these days. Why not add solar panels to Wind Farms, so you can get the benefit of both energies. The KCC should prohibit CEO's from making millions of dollars. The KCC Commissioners should have one retiree living on social security, one single parent with one or two children and no Attorney's, Bankers or Real Estate developers on the Commission. Lets get a feel for the real people who are suffering in KS.

Narrative

06-18-2025 EVERGY Kansas Central (formerly known as Westar Energy) has a proposed rate hike of \$196 million for providing energy to customers both residential and commercial. The rate increase, specifically a proposed \$196 million increase, would affect about 735,000 customers in central and eastern Kansas, including cities like Topeka, Wichita, and Manhattan. This rate hike is estimated to raise the cost of electricity for residential consumers by just slightly less than \$14.00 per month. Although on the surface this doesn't seem too significant, let's dig deeper into the company. 1. EVERGY's executives are well paid 2. There are approximately 230 million shares of EVERGY stock outstanding which is held in the majority by the top 17 shareholders who own 51% of the business while the general public, including retail investors, only holds 11% of the stock. Who are the customers serviced by EVERGY who will be most affected by the rate hike: 1. Retired people, and others on a fixed income: it is estimated that over 17% of the population in Kansas is over 65 (approximately 520,00 individuals). 2. Per the latest information nearly 30% of children in Kansas live in a single parent household. 3. In 2023 approximately 11.2% of the population of Kansas live in poverty. Many of these individuals are on a fixed income or are children in a single parent home. An increase in the cost of energy is just another thing that is threatening those least able to pay. The elderly and families with young children are most vulnerable to these increases which are then combined with all of the current increases due to various political machinations, including tariffs. A minor increase of \$5 or less per household would be more reasonable, if were earmarked to improve infrastructure, not to add a few more dollars to the executive salaries or a few more into the pockets of the shareholders. (Retired Quality Engineer 16 years and Oil and Gas Professional 18 yrs.) Please see attached letter.

KANSAS CORPORATION COMMISSION

DOCKET No. 25-EKCE-294-RTS

TO WHOM IT MAY CONCERN

June 2025

**STATE
CORPORATION
COMMISSION
JUN 25 2025
PUBLIC AFFAIRS
AND
CONSUMER PROTECTION**

EVERGY Kansas Central (formerly known as Westar Energy) has a proposed rate hike of \$196 million for providing energy to customers both residential and commercial. The rate increase, specifically a proposed \$196 million increase, would affect about 735,000 customers in central and eastern Kansas, including cities like Topeka, Wichita, and Manhattan. This rate hike is estimated to raise the cost of electricity for residential consumers by just slightly less than \$14.00 per month. Although on the surface this doesn't seem too significant, let's dig deeper into the company.

- 1. EVERGY's executives are well paid:**
 - a. In 2023 the CEO made over 7 million dollars in 2023. This was a combination of salary, bonuses and stocks. Other top executives at EVERGY also made significant incomes as listed.**
 - b. Executive VP for Public Affairs: \$2.1 million**
 - c. Executive VP and CFO: \$3.7 million**
 - d. VP and Corporate Planning and Treasurer: \$1.2 million**
 - e. Some other top-level executives made well over \$5 million combined**
- 2. There are approximately 230 million shares of EVERGY stock outstanding which is held in the majority by the top 17 shareholders who own 51% of the business while the general public, including retail investors, only holds 11% of the stock.**

Who are the customers serviced by EVERGY who will be most affected by the rate hike:

- 1. Retired people, and others on a fixed income: it is estimated that over 17% of the population in Kansas is over 65 (approximately 520,00 individuals).**
- 2. Per the latest information nearly 30% of children in Kansas live in a single parent household.**
- 3. In 2023 approximately 11.2% of the population of Kansas live in poverty. Many of these individuals are on a fixed income or are children in a single parent home.**

An increase in the cost of energy is just another thing that is threatening those least able to pay. The elderly and families with young children are most vulnerable to these increases which are then combined with all of the current increases due to various political machinations, including tariffs. A minor increase of \$5 or less per household

would be more reasonable, if were earmarked to improve infrastructure, not to add a few more dollars to the executive salaries or a few more into the pockets of the shareholders.

As a retired Quality Engineer (in aircraft and defense – 16 years) and with 18 years' experience in oil and gas (in Kansas), I am familiar with some of the costs and requirements to stay compliance with industry practices, but I also found that the largest share of any increase often goes to the top executives and stockholders not to infrastructure or the lower-level employees.

I would suggest the Kansas Corporation Commission review carefully the proposed rate hike and verify what is best for the customers in EVERGY's Kansas Central region.

Sincerely,

Patricia E Heinsohn, Retired Quality Engineer

Manhattan, Kansas

Narrative

06-18-2025 Everygy is spending a lot of money on solar and wind energy. These ventures are costly and ineffective. Everygy needs to increase their preventative maintenance on clearing trees from aerial lines and putting more delivery lines underground. I also see that their executive compensation is over \$20,000,000.00 not including their medical, prescription, dental, vision, and hearing insurance coverage. Their retirement and Golden Parachute compensation is ridiculous. It would seem to most of their customers, including me, that they could cut a lot of costs and initiate better business plans before asking to increase rates. My wife and I are retired and have really had to start pinching pennies with all the price increases on medical, groceries, utilities, prescriptions, gasoline, insurance, etc. We say NO to a \$196.4 million rate increase until we see better business practices from this non-competitive utility.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-18-2025 As an long-time Evergy customer since they took over in Olathe KS for KCPL, I vehemently oppose Evergy's request to yet again price-gouge aka raise rates on Kansas customers. Their reasons for the price hike are weak as they are already built into the cost of doing business. Evergy's greed seemingly has no limits as they posted profits of nearly \$4 BILLION (that's with a B as in BILLION, and not just one billion but FOUR BILLION DOLLARS, \$4 BILLION) since 2018 including adjusted earnings in 2024 of \$878M and \$816M the year before. Evergy CEO David Campbell makes \$7.26M a year. If the KCC approves yet another unneeded price hike, one has to wonder how much their pockets are being lined as it would serve no benefit to the hard-working people of Kansas who the KCC is supposed to serve. Please tell Evergy NO on their requested increase.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-18-2025 I am opposed to the rate hike proposal by Evergy. This is greed. Per the Topeka Capital Journal, Evergy reported adjusted earnings of \$878 million for 2024. The CEO, David Campbell, had a total compensation of \$7,257,862 in 2024. This included a salary of \$1,056,000, a bonus of \$1,207,800, and stock awards worth \$4,929,101. To even propose a rate hike is an attack and an insult to customers, both residential and commercial. To have record profits and continue to raise rates due to improvements is the only way to justify and rationalize corporate greed. Energy prices are already unaffordable and for some unsustainable. For the average household these cost increases can and will impose increased financial difficulty for customers. Given the profits, a layperson can clearly see that this proposal is the result of monopolizing Kansas customers and to get rich off of the backs of hardworking Kansas customers. I oppose this rate increase. To offset efficiency costs then I suggest that Evergy modify the earnings and bonuses of the CEO. Therefore, I propose a change in the CEO salary and again I strongly oppose the rate increase.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-18-2025 Forgive me for using someone else's words, but it has been a long day and I am tired. Here are the salient points: -Evergy has made nearly \$4 billion in profits since 2018, including \$878 million in 2023 alone. -The CEO made more than \$7.2 million last year, and other executives earned between \$1.7 million and \$3 million. -They're requesting a 10.5% return on equity—more than what's typical for utilities—and passing those costs on to customers. - Evergy should be funding infrastructure improvements from its own profits instead of pushing the cost onto consumers.

Narrative

06-19-2025 I generally oppose this rate increase, but I respectfully ask the Commission to closely examine the specific parts of Evergy's request. I understand the company wants to modernize and improve its systems, and some of that may be justified. But from what I've seen, the details are vague at best. I read an example recently that made sense to me. If a teenager asks for \$500 to fix their car, any parent would want to know what the money is for. If it's new suspension to keep the car safe, that feels reasonable. But if it's for a new sound system, they might be told to save up and pay for that themselves. One is a need, the other is a want. That's how I feel about this increase. I'm willing to support the parts that are necessary to keep the system safe and reliable. But Evergy should not be passing along every cost to its customers, especially when many are already stretched thin. Please make sure we are only paying for what is truly essential.

Narrative

06-19-2025 I wish to express my opposition to these rate increases! I have been an investor in this utility company in the past, and I know that the hybrid of utility and private company is complicated. Nonetheless, I strongly object to my having to pay higher rates in order to satisfy shareholders' bottom line! Our federal government is going haywire and will likely put Kansans who live in houses under great stress as social programs are cut and the US goes into debt to service militaristic aims. The result of mixed-up policies will increase household burdens on the people least able to pay them, Raising utility rates will affect the poor much more than the wealthy. A \$13 monthly increase will matter to poor folks and people struggling to survive, while the same amount would be a minor blip for the rich. Unfortunately, the federal government has abandoned our best hope, to develop measures to reduce global warming. It's a sad time. I hope you will work toward as much alternative energy as possible, which will reduce costs eventually and also remove some of the causes of global warming (less fossil fuel extraction and use), In summary, I totally object to your obscene rate increase. Mrs. Terrence Kearns

Narrative

06-20-2025 2 questions: 1) Why is a monopoly utility set up as a for profit business with shareholders that only care about a return on their investments and a CEO that makes MILLIONS of dollars per year, and not what is best for the customers that have no other options for electricity? 2) Why does a monopoly utility pay for advertising to promote itself (evergy plaza, ads at Royal's games) when there is no competition for their business? These are items that increase evergy's expenditures and drive up our cost of electricity.

June 19, 2025 Dear
Commission Members: Evergy (because we may be moving into an area they cover) is my current concern. I, like many others, am retired. It seems like every time you turn around someone is wanting to pass their costs on to the consumer. Ten or fifteen dollars a month, month after month, one thing then another. It all adds up to unacceptable. Now Evergy wants to pass on their infrastructure costs by increasing their rates AGAIN! Evergy has previously been turned down for their rate increases? They just keep coming back, trying again and again to raise our costs. I hope you will turn them down again!! They just don't stop!! They keep coming back asking for more!! Really?! On top of all of this, as I understand it, if I want to generate my own electricity, say with solar panels, I have to pay the electric company to do so. Seriously?!

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-20-2025 Utility companies, and businesses in general, need to operate efficiently and costs should come from their profits causing benefit or loss to the shareholder, company/business rather than passing their costs of doing business on to the consumer. Shareholders shouldn't make money if the company/business they are holding shares in can't keep costs down. Again, that is THE COST OF DOING BUSINESS, which needs to be part of the business's bottom line. For the shareholder, they made the choice to invest with a particular company/business. Investing is the risk they are taking. More and more costs should not be allowed to just be passed on to the customer who has NO options, not even a different company to turn to for the service or goods. Between water, electricity, and gas, gasoline, insurance, and now even products we depend on, individuals are unreasonably expected to just pay, pay, pay!! ENOUGH!!!!!! It just isn't right!!!!!! PLEASE put a stop to this!!!!!! PLEASE "regulate" the rates you are responsible for. PLEASE explain to the public what they can do about this!! Thank you for listening and taking these thoughts into consideration. Respectfully, Jamie L Zirkel

Narrative

06-20-2025 I am writing to voice my concerns regarding Evergy's request for another rate hike. This article below, is from the Sentinel News paper. The last sentence is the article says it all. I might approve of the increase if I was getting higher stock prices, but I am not a stock holder. Instead, like most Kansans, I struggle to pay the electric bill in the summer. "Now, the company is requesting a 2.42% system-wide "Transmission Delivery Charge" increase from the KCC; a system-wide increase of 13.6%; and an additional 9.3% to cover the cost of building two new gas-fired power plants and a solar facility. The total? A 33.2% rate increase since 2022. The full weight of the plant construction increase would not hit until around 2029, but would start hitting bills a year after construction begins. According to James Zakoura, an attorney who represents both industrial and retail ratepayers before the Kansas Corporation Commission, the system-wide increase is being requested to generate higher returns for shareholders." Thank you for considering my comments. Rayna Leathers Lenexa, KS

Narrative

06-20-2025 I believe that shareholders need to make some profit in order to make Evergy competitive as an investable stock. However, with record profits, I think the shareholders should be the first to ask to shoulder the burden of rate increases. Then we will see if the increases are truly necessary. Also, there are many Evergy employees that are not necessary, with duplicitous jobs, as in the governments. They are also paid very high salaries compared to most other private sector jobs. If more power generation is required due to AI and cryptomining, then these innovations should pay for new generating capacity. PLEASE! No more increases in utility rates. Too many of us are on fixed incomes and are being eaten alive by inflation! It's not fair to charge more from those who are not causing increased demand.

Narrative

06-20-2025 After reading the filings by Evergy and listening to the public testimony of Mon. June 16, 2025, I believe Evergy, unfortunately, is pushing the limits of the Kansas Corporation Commission's ability to regulate them. Evergy has become a favored monopoly in this state. They demand multiple rate increases, without sufficient justification simply due to the creed of stock holders. Evergy has proved they are poor corporate neighbors. They continue to pollute our air without consequence. They continue to underfund alternative energy sources. They continue to reap huge profits and board salaries. They have presented integrated service plans, approved by the KCC and then changed the plan without notice. Evergy also has poor, weak support for energy conservation and charity support programs. The Evergy Stay Connected Program eligibility limits should be doubled. Rather than one person with 20,000. income, the program should serve one person with 40,000. in income. This state has a very real affordable housing problem. Affordable housing means affordable utilities. Utilities, in combination with rent, cost of housing, higher interest rates, high insurance rates lead to increased unstable housing for all but the wealthy. Not only should the income limitations double, the program should not be paid for by rate payers, but by stock holder profits. The KCC should seek legislative policy changes in order to rein in Evergy. These changes should focus on loosening the favored monopoly status in order to provide relief to rate payers. The KCC should immediately seek to overturn the recently passed legislation which allows for Evergy to be the sole provider of electricity in future data centers or large companies. These companies have the business model which would allow for a "bring your own energy" strategy which sells energy back to Evergy and reduces the burden on rate payers. Kansans will seek anti-monopoly policy changes.

Narrative

06-21-2025 Here it is again Evergy a monopoly needs more money to spend from customers who are on the edge already. Evergy did well in 2024 made more money and paid shareholders more money and are now asking customers to pay more money so Evergy can pay out more money to the shareholders. A circus that none of the customers can get off of. You always reward them for their requests...enough already! Is there any proof that more power is needed? Also the economy changes with every whim of the government and election changes. Have they stopped paying for DEI or just changed the name? There's some savings for them there. Government says they can't afford everything, utility companies say they need more money while the citizens have to dig deeper to pay the necessities. Where are we supposed to dig now! Also they sure take care of the East coast of Kansas while the central area is expected to shovel more to the east! I knew they would be a problem from the get go! SR

Narrative

06-21-2025 Everygy has consistently been making record profits. Perhaps it is time that they use some of the profit to make the suggested improvements. The majority of Kansans are struggling to make ends meet and this rate increase will serve no other purpose than putting more money into Everygy's pockets. I was extremely disgusted when the last rate increase was proposed and the KCC investigation recommended a maximum rate which was then ignored. KCC may not have given them the rate increase they wanted but they definitely gave them more than what their investigation said was justified and they made the agreement BEFORE the end of the public comment period which meant that they were not listening to the public who are the affected parties. This has to stop.

Narrative

06-21-2025 To the Kansas Corporation Commission, I am writing to express my unequivocal opposition to Everygy's latest rate increase request—a move that is as audacious as it is unjust. Let's not mince words: Everygy posted record profits of \$853.8 million last year, with over \$534 million paid out in dividends to shareholders. That's not just financial success—that's a windfall. And now, they have the gall to demand more from Kansas families already grappling with inflation and economic strain? Even more infuriating is the fact that Everygy is asking Kansans to foot the bill for green energy projects that aren't even staying in Kansas. We're being charged for infrastructure that benefits other states while our own communities shoulder the cost. This is not investment—it's exploitation. On a personal note, I own and operate a grain elevator—a business that consumes substantial energy in its daily operations. This rate hike would impose an unjust burden not only on our bottom line, but on the livelihood of the farmers we serve and the rural economy we support. Everygy's proposal threatens to undercut small agricultural businesses across the state at a time when we can least afford it. The Commission's role is to protect the public interest, not to rubber-stamp corporate greed. Kansans are not ATMs for investor-owned utilities. We demand transparency, accountability, and a firm rejection of this rate hike. Respectfully—but with deep frustration, Karin Murphy Murphy Agri 2270 Garner Road Lebo, Kansas 66856 Coffey County

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-22-2025 The cost of everything is going up faster than the ability to pay for things. We all know this. While it's important to have a safe and stable electric grid Everygy is asking the ratepayers to absorb all of the cost. Perhaps the shareholders should receive a lower dividend and absorb an appropriate share. Last but not least I'm on a fixed income (this happens if you live long enough) and a rate increase is difficult. Best regards, David

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-22-2025 Yall made \$874 million dollars last year but want to charge us for infrastructure investment. Nah, the whole point of investing is so you can make more money down the line and have more customers. If you want to do that everygy can do that on their own dime. Energy costs are already so high. I'm sick of greedy corporations who can't just be happy with their profits as is. Cmon \$34 billion made in profits over the last 5 years. I don't care if its only \$13 a month increase, I strongly oppose this proposal.

25-EKCE-294-RTS

Consumer Opinion
O

of Petitions Signatures

Narrative

06-22-2025

I vehemently dissent from the proposed rate increase by Evergy, a company that reported over \$750 million in earnings last year. This request for a nearly \$200 million, 8.62% rate hike, imposing an average \$13.05 monthly increase on residential customers starting in September 2025, is an unacceptable burden on Kansas families and businesses, especially given Evergy's substantial profitability. Evergy's justification for this increase hinges on a nearly \$1 billion investment in infrastructure and increased operating expenses. While infrastructure investment is crucial, it's difficult to reconcile the need for such a significant rate hike with the company's robust financial performance. A company that generates hundreds of millions in profit annually should be able to absorb a substantial portion of these infrastructure costs without immediately passing them onto consumers. This feels less like a necessary adjustment and more like an attempt to guarantee even higher profit margins at the expense of their captive customer base. Furthermore, it's concerning that this request excludes costs associated with the Panasonic Electric Vehicle battery plant and the two natural gas plants Evergy plans to build. This suggests that additional rate hikes could be on the horizon to cover these future projects, creating a never-ending cycle of increased costs for consumers. This piecemeal approach to rate adjustments lacks transparency and foresight, leaving customers in the dark about their long-term electricity expenses. While Evergy's proposed program offering monthly credits to income-eligible customers is a positive step, it doesn't mitigate the broader impact of this rate increase on the vast majority of Kansans. Such programs are often a small concession in the face of a much larger financial burden placed on the general population.

Consumer Opinion O
of Petitions Signatures

Narrative

06-22-2025 Can the infrastructure be elaborated on more? Evergy makes almost a billion dollars a year already, so is this on top of the money they already make and why? Is it just maintenance and upgrades? Or are we talking removing natural gas and coal from our pie graph of energy generation? If so are we talking more solar and big batteries or hot sand to store the power or nuclear power? This more just raises other questions about what you actually really need it for that would require Evergy to make a billion dollars a year in profit rather than 800 million. It'd be different if it was for a cause, like we are aiming to remove all coal and natural gas and replace them with nuclear by 2030 or due to power storage technology we are needing the funds to help dismantle our coal and natural gas foundries to replace them with power storage and solar panels on top of the storage to have all of our power be renewable. This just feels like I want to be able to say Evergy made 1billion a year before the recession.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-22-2025 Rates are already to high on the consumers. People are struggling with the raising costs as it is. This seems like a way for the power company to be able to get more money out of people without giving some type of service to go along with the higher rate. Didn't they recently over the last 5 years have an issue where the meters weren't being read right and rates got raised due to an error on your part? This is ridiculous.

Narrative

06-22-2025 Most people this would effect already struggle to pay their normal bill and have to be in the prorated bill program. if you raise the cost you are going to continue to push people out of this area in hopes to avoid becoming homeless all together. What's the point of raising prices if it lowers your overall profit? If you can't work within your current budget then maybe you should cut in other areas like the ceos salary, etc. if this happens I will seriously consider alternatives options for power, no matter the cost.

Narrative

06-22-2025 I believe that the infrastructure may need the update they are advising of. However, I feel the rates we pay have continued to go up through COVID and we never saw them go back down. We want to raise them again while most people are choosing what bills get paid and don't. We need Evergy to take this upgrade on themselves. We put money into these systems to be maintained and updated regularly already. Evergy CEO/Board members can stand to take some pay cuts to help the average Kansan out and still afford their homes. As a matter of fact Google states that the CEO took home over 7 million dollars last year in compensation. Any regular Kansan would be absolutely thriving (Paying off debts, no longer living paycheck to paycheck, have a nest egg, etc) if they had just 1.5% of what he made last year. This issue does not fall to the communities shoulders. If anything it sounds like Evergy has some re prioritizing to do to get the the goal they are aiming for.

Narrative

06-22-2025 Everygy made a profit of well over 800 million dollars last year (2024), and over 700 million dollars the two previous years (2023 and 2022). People are living paycheck to paycheck and struggling to make ends meet. An additional \$13.05 a month may not sound like a lot to Everygy, but I can assure you that it is a lot to majority of Kansas residents. Everygy does not need this increase in order to fund the improvements they are seeking. Greedy.

Consumer Opinion O
of Petitions Signatures

Narrative

06-22-2025 Absolutely not! Rates everywhere are increasing (gas, electric, food, housing, etc.), but wages have been stagnant for at least the last decade. We are being priced out of our homes by the very companies that are supposed to help us run those homes. They made almost \$878M in profits in 2024. PROFIT!! They don't need a rate increase!! They need their greedy ass shareholders and executives to take less of our money, and then invest that \$878M profit and the c-suite pay cuts into the overhead and infrastructure that they desperately need. Suck an egg, you greedy oligarchs!! You're the only ones that can afford them now.

EKCE **25-EKCE-294-RTS** **O**

Narrative

06-22-2025 The rates have increased exponentially over the past few years and have skyrocketed Evergy's profits to around \$878 million in 2024. When talking about 2024 financial profits, Evergy CEO David Campbell boasts about their financial accomplishments and even states they expect the company's earnings to grow between 4% and 6% through 2029. Utilities are one of the only true monopolies in the United States and the continual increasing of rates on the consumers is predatory and wrong. Consumers have no alternative options for electricity and that creates a false sense of superiority in these companies to continue to use people who have no other option than to foot the bill. There are elderly people who have to choose between electricity or medicine, single parents whose children have to go without proper fitting clothing because of astronomical bills, and there are veterans struggling to make ends meet. Evergy's profits are getting close to \$1 billion a year and should not need to place this financial responsibility onto its consumers in an already completely predatory market.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-22-2025 It is difficult to express how frustrating it is to see another proposed rate increase for Every rates, especially so quickly. Another request for higher rates to offset mysterious costs for vague notions such as "infrastructure" with no roadmap or specification for their intentions that would allow the public paying for it to see the results of the increase to their bill. This is not the first time that "infrastructure" was the reason for raising rates. It is left vague and the implication is that the goal would be to improve upon business practices and the efficiency of system operability and efficiency to lower resources and costs and increase output in a quantifiable way, however, we do not see evidence of this. Rather, we see rates stay high and additional requests for even further increases that we pay for the same product and, historically, less stability. When will it be enough?

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 Every made \$143 million more in 2024 (\$874 million) than in 2023 (\$731 million). With an increase of that extent, there is no reason to extend the cost to the consumers. A portion of yearly earnings should be properly invested by the company into infrastructure needs/ improvements/ upgrades. The cost of living is exponentially on the rise, an increase to any utility bill puts strain on already strained citizens with no option to do business with a competitor. An increase to consumer prices is especially insulting when public street lights have been ineffective or non functional for years. Rather than adding zeros to shareholders bank accounts, I urge Every and governing bodies to consider the manor in which year to year increases in Every's annual net income is being allocated.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 By having energy efficient products in homes, why are the bills increasing, instead of decreasing? It should not be the responsibility for consumers to continue to pay for the infrastructure, or the cost of capital, and increased operating expenses. The consumers are paying for electricity twice. Their monthly electricity bill, and a second time through taxes that finance massive subsidies for inefficient wind, and other energy producers. There are other ways to obtain money, and not expect the consumers to continue to pay for the rate increase. Securitization/Refinancing, Government Funding/Subsidies, Charging Third-Party Providers, etc. Next, they will be asking consumers to pay the costs related to the Panasonic electric vehicle battery plant, and the two natural gas plants in Kansas. In conclusion, consumers are fed up that they can't take their business elsewhere, because their utility is a monopoly, and there's no alternative provider. Utility companies have become profit-making machines, traded like any other company on the stock exchange, and beholden to shareholders and Wall Street executives, over actual customers. Opposed.

Narrative

06-23-2025 Everygy is being greedy and doesn't need to keep raising our rates like this. They don't need to take, what is essentially, a Cost of Living increase on the KS taxpayer to pay for their infrastructure. We are barely making ends meet as it is, and they want to increase it by over 8%? People aren't even getting yearly increases that high! This seems, to me, a clear case of mismanagement of funds over the last 6 years and not investing it they way they should have been to keep the grid up. We the people should not have to take the hit because of their mismanagement. I strongly oppose this amendment.

Consumer Opinion O
of Petitions Signatures

Narrative

06-23-2025 This is a financially unsustainable rate increase which only hurts everyday people who have no other option for accessing these utilities. People cannot afford even \$13 a month more. And yet, Evergy reports strong profit increases. Any regular person would be told to budget for their new investments such as a car or home, but Evergy wants to bleed us dry right now instead of making solutions that benefit customers in the long term. Their rates will never decrease and their profits already consistently increase year to year. Please do not allow this greed from Evergy.

Narrative

06-23-2025 As someone who has spent 7 of the past 10 years working in the natural gas industry pipeline side, I understand how important improvements are to lines and stations, whether it be mainline or to someones home. However, I do not believe we should have to pay more for the general maintnence and upkeep some of these lines need that have been neglected, or further installed, while CEO's continue to raise their salaries of millions. As a gas worker and a customer this would hurt our pockets financially with an already outrageously high gas bill, as weve been paying the winter premium fee during cold months already!

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 To Whom It May Concern, As a Kansas resident and customer of Evergy, I strongly oppose your proposal to raise energy rates under the justification of infrastructure improvements and rising energy costs. The fact that your company posted a \$874 million profit in 2024 and is still attempting to pass additional costs onto the public is outrageous and unethical. Essential utilities should never be used to extract maximum profits from a captive customer base; especially not during a time when working families are already facing the pressure of inflation, housing costs, and stagnant wages. Energy is not a luxury; it's a basic need, and your decision to prioritize shareholder returns over public affordability shows a complete disregard for your responsibility to the people who keep your company running, your customers. If your company truly values Kansas communities, you should invest your record profits back into your infrastructure, as any responsible business would. Instead, you are attempting to crowdfund from struggling households to protect your margins, all while keeping your executives and shareholders insulated from sacrifice. That's not leadership, that's exploitation. We demand that you deny this rate hike and instead hold yourselves accountable by using existing profits to improve your infrastructure; not forcing Kansans to pay more just so you don't have to. Respectfully, Madison Friesen

Narrative

06-23-2025 Everyy does not need to raise its rates yet again. The cost of electricity in my one bedroom apartment is already hundreds of dollars a month. I and many other residents of Kansas can't afford an increase right now as we are already struggling to make rent and afford food with everything happening in the economy. \$13 each month may not seem like a huge increase, but for those living paycheck to paycheck, it could be money going towards monthly groceries. Everyy can surely find another way to accrue 1 billion dollars with the millions they already make yearly.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 There is no reason to increase energy cost 8% or higher. There is no reason to increase energy 5% or higher. The energy demands and the global energy supply allow for 2% raise in energy cost, but even that, those of us who are informed on the energy sector know is something of a wool to pull over eyes. Take a look at the wages paid to top executives, there is some room to spread such vast masses of wealth. Take a look at alternative energy suppliers or networks- that is another wonderful to cut the excessive need for gouging your customer. Because I promise you, continue this trend and find that your clientele start to wither away slowly at first and then all at once. You are not the first energy company nor will you be the last.

Narrative

06-23-2025 I understand with the price of everything going up, why Everygy would want to raise the price of their rates. Unfortunately, 13 dollars a month per household is a lot of money especially when families are struggling to pay their bills as it is. I think they should have to give every household a detailed list as to where this increase would go to. That way we know where the increases would be going to. I don't know about anyone else, but I sure don't want to be charged more just to be filling the top dogs at Everygy's pockets.

Narrative

06-23-2025 The people of these areas are already stretched thin by raising rent, raising cost of living prices, and tariff increases of groceries. I'm so tired of raising prices on necessities we need when there are other options that don't involve the consumer footing the bill. This makes me so angry and upset. Especially since there isn't any other company we can go to for more fair rates in the area.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 Last year, Evergy's profit was over 800 million. The cost of living is increasing so much right now, I don't think the consumer can support this rate increase. What is Evergy doing to absorb some of that cost, because they can definitely afford to do so. I oppose this rate increase. We can't afford it.

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 As a concerned Kansas resident and Evergy Kansas Central customer, I oppose the proposed \$196.4 million rate increase that would raise residential bills by an average of \$13.05 per month. At a time when many families are already facing economic pressures due to inflation, rising housing costs, and stagnant wages, this increase places an undue burden on ratepayers. Evergy's application cites nearly \$1 billion in infrastructure investments and rising operational expenses, but customers have little transparency into whether these expenditures were prioritized with ratepayer interests in mind. While Evergy notes that this request excludes costs related to the new Panasonic EV battery plant and proposed natural gas facilities, it is likely that additional increases will be sought in the near future to cover those projects. This rate hike sets a troubling precedent for ongoing cost shifts to consumers. Furthermore, Evergy has pledged to meet sustainability goals and support affordable, reliable energy for Kansans. Raising rates without showing meaningful progress toward reducing dependence on fossil fuels or increasing energy equity undermines that promise. The Commission should require Evergy to provide greater justification, seek alternative funding strategies, and explore ways to reduce costs before placing this financial burden on everyday Kansans. I respectfully urge the Kansas Corporation Commission to reject or significantly reduce this proposed increase.

Narrative

06-23-2025 Is there a deficit? Or is this a means to increase net income to beyond or even to a value made before? I think something to note it that we all feel like our dollar isn't worth as much as it used to be. To raise the price is only going cement this as a permanent thing rather than something that will eventually balance out. To have another price increase when especially there just was one, is poor research and foresight on energy's behalf. As a utility, there shouldn't be this sense of greed

Narrative

06-23-2025 This would not help out your consumers in any way. There are so many people living paycheck to paycheck, and are struggling to pay their bills. Especially during the summer where we are experiencing hotter summers every single year, and AC costs are expensive to keep people with disabilities, pets, and children cool. To raise prices for an investment??? Insane. Keep your consumers #1 priority to ensure that their safety matters and that they don't end up homeless due to the raising costs.

Narrative

06-23-2025 I personally feel they make enough off how much is charged now. From 2023 to 2024 they made 143 million more than the previous year. In 2024 alone they brought in 874 million. This feels like a monopoly where they have no competition and no regulation on what they charge. Most Kansans are already struggling enough to make enough to survive. This would just add to the struggle.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 With your record profits and substantial shareholder dividend payments, you should be able to absorb the cost of this rate increase rather than burden your customers. We as customers should not bear the cost of increasing shareholder profits when you should be focusing on making the electricity more affordable to your customers. You recently have increased your rates and to ncrease them again would cause undue hardship on your customers. Please do not put profits over people.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 While the rate increase may appear marginal, many families are currently struggling to make ends meet and ensure the lights are kept on in their homes. Based on Evergy's profit margins in recent years, and the rate at which they have increased, it is unclear to me why the consumer should absorb additional costs. David Cambell, in an interview for the Capital Journal stated that he expects the company's earnings to continue to grow between 4% and 6% through 2029. I would respectfully request that Evergy consider reinvesting increased profits into the community and not pass along additional costs to the consumers during uncertain economic times.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 Everyday citizens should not be forced to struggle financially to afford basic necessities because this company decided it “cannot absorb the cost of continued maintenance”, which is a blatant lie. It is the greed of CEOs and corporations driving this price hike and people who are already struggling to put food on the table should not be the ones footing the bill. I would like to see the company take the hit instead since they are not suffering and continue to increase their profits by millions every quarter. Quit hiding behind the guise of “improving infrastructure” and call it what it really is: corporate greed.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 I would like to urge Evergy to reevaluate other sources of funding by moving other budgets around. With current political climate along with current inflation rates the dollar of the average household is not stretching as far as it used to. An increase in one of the most basic needs is almost a heinous crime. Please see the humanity in not increasing already overwhelmingly inflated prices.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 Everygy is already a substantial bill for Kansas residents every month, and with the cost of housing, food, gas, groceries, and appliances, an increase in the monthly fee would be detrimental to many. Based on what Everygy made in 2024 (874 million), a drastic increase is ultimately unnecessary and harmful. I oppose the increase in Everygy pricing for Kansas residents.

Narrative

06-23-2025 Our costs have gone up and up over the last few years, and we are not seeing any of the advantages Everygy claims. Everygy needs to find a way to pay for these new investments elsewhere, rather than continuing to pass the costs onto their customers without ever decreasing anything for the sake of efficiency. We see their enormous profits year over year. We see their CEO salaries. When we are struggling constantly, these incessant increases are not justifiable. Everygy has the means to pay on their own.

Consumer Opinion O
of Petitions Signatures

Narrative

06-23-2025 Their annual profits indicate they can eat some the cost of their operations. They made a \$143 million profit from 2023 to 2024. Now they need more? 18% raise on a monopoly in one year is insane. If they need to put a Billion dollar investment into the infrastructure they need to figure out how to do it over time and not all at once. Your people cannot and will not handle this increase on an already expensive utility especially when they have literally no other choice. Companies like Evergy are taking advantage of the consumer and enough is enough. We cannot afford to keep increasing the rates of basic needs to survive in the modern world when the companies are just lining their pocket books.

Consumer Opinion O
of Petitions Signatures

Narrative

06-23-2025 Every posted a net profit of \$873.5M in 2024. • CEO David Campbell earned \$7.26M in total compensation. • CFO Bryan Buckler, awarded a generous package after his promotion in late 2024: • \$660K salary • ~ \$2.685M in incentive and inducement RSUs • Multiple senior executives earned between \$1.26M–\$2.23M. This is why I oppose their request for an increase. I do not care about their shareholders. I only care about my family. You tell us to use energy efficient appliances and lights, but yet my bill increases more and more. I'm not saving anything by using these items. Please do not allow them to increase their price. They netted almost a billion dollars after their bills were paid.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 I strongly oppose Evergy's proposed rate increase of over 8%. It is unacceptable for a utility company that made \$874 million in profit last year—and pays its CEO \$7 million annually—to shift even more financial burden onto customers, many of whom are already struggling with rising costs. Rate hikes should not be the solution when executive compensation and corporate profits are this excessive. Evergy must prioritize affordability and fairness for the communities it serves.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 Everyg already raised rates at the end of 2023, and their Annual Net Income rose to \$874 million dollars for 2024 from \$731 million in 2023. We are in a vulnerable position which requires us to buy electricity from them for our daily needs, as they hold the monopoly on electricity in this area. Given this, I do not think it appropriate that they be allowed to raise their rates again in such a short time, as we already live paycheck to paycheck and the amount that electricity will go up is the amount that I will have to take out of our food budget.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 Raising prices in today's world where grocery and housing is already increasing just contributes to the wealth inequality and other social injustices. Raising rates would not benefit Kansas residents in the slightest and instead only benefit a corporation, something everyone should be against.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 I strongly oppose this increase: as a homeowner who has continued to have average to high energy bills, the increase would be detrimental to my family. The current increase in economic needs and prices do not correlate with a need to increase loyal customers' costs for infrastructure needs. Infrastructure needs that would take years to create, not resulting in an immediate need of such a drastic increase.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 In a time where everything is going up in cost - groceries, housing, education, etc., a lot of people cannot afford to have their basic utilities go up in cost as well. We had a record freezing winter just recently, and we're likely to have some record heat waves as well. Right now is not is not the right time to raise the rate for a service people cannot choose not to have. People need electricity; they cannot just cut that expense out of their budget. Everygy has been steadily increasing their profits over time. Maybe instead of making their customers pay more, maybe instead they can see a slight decrease in their profits. A necessary public service does not need to be making over 800 million in pure profit. I am extremely opposed to a rate increase.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 Everygy has made plenty of profit according to its SEC filings, with more than \$800 million alone in 2024. Everygy chose to enrich shareholders with dividends instead of reinvesting. It is concerning that we have a publicly traded company constantly wanting to raise rates every two years or so which has a complete monopoly in the region. The consumer is held hostage to these rate increases simply to continue to drive shareholder value and it needs to stop. No corporation which is publicly traded should be allowed a monopoly in this state or have the right to increase rates when their profitability is in the hundreds of millions of dollars.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 They just increased the rate a year or two ago. At a time where inflation is out of control and prices keep going up, it's appalling to say that we need to pay more for the same energy were consuming. If they want to invest in infrastructure, they should find that money out of the 874 million dollar profits they collected last year. Public utilities should not be making hundreds of millions of dollars in profit every single year.

Narrative

06-23-2025 I feel it is ridiculous, in times of great financial hardship, to continue to try to squeeze every last penny out of your customers who are already struggling to maintain their bills. This company continues to increase its profit by 100's of millions yet the customers do not reap any reward for paying more and more every year. Especially as temperatures rise every year, this proposal, frankly, is very shameful and I wholeheartedly oppose it.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 Raising rates during a recession is scum bag behavior. The home I rent with my children is old and our bills are already high trying to keep everyone comfortable. If the system really needs new infrastructure, take it out of your ceo and shareholders pockets. Use your own money to invest in your business. Corporate greed will be the death of this country.

Consumer Opinion O
of Petitions Signatures

Narrative

06-23-2025 As a senior citizen on a fixed income and with multiple health issues the thought of an increase to my monthly bill of \$13.05 is very difficult for me to comprehend. Although I am currently able to pay my monthly bill and am on level billing because of very challenging health issues I may find paying my monthly bills very difficult. Please consider the challenge your rate increase could create for many and especially seniors and others on fixed incomes. Especially now, in this horrible heat with heat index reading even higher, increased baseline monthly charges could put individuals in danger of how they cool their home. The same is true of winter weather and challenges of properly heating our homes. I, for one, rent an apartment and have no control over considering more efficient ac or heating. Please, take this into consideration and think of your aging family and friends. Thank you, Sandra Warnock

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 Do not raise our prices. A lot of us will up and object completely and entirely, and will refuse to pay our bill. You can shut off our energy all you want, but then you will get people that will protest you and your company in general. We can't afford the rates that we are at right now. I'm having to backpay every 2 to 3 months just for the usage that keeps going up right now. When I moved in my bill was barely 100 bucks three years later. My bill is over \$350. Every single month. We cannot afford this in my neighborhood. It is extremely disrespectful that you continue to take money from us that we cannot give you. On top of our mortgage, our property taxes, our water bill, our Gas bill, including our cars, our taxes and our insurance on everything else. Absolutely absurd to raise rates again. Sincerely a single mom in her 20s barely making it.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 Between your peak hours charges and the rate increases, this is killing your consumer base and you are taking advantage of the fact that you are the only game in town. It's unethical, immoral, and monopolistic. If you wanted to do an increase of charges on owners of commercial real estate than I would be fore that. Too many building owners and companies have offices that run high consumption operations 24 hours a day and because that puts a strain on your system, the average consumer who already has enough to deal with now has to make the decision to pay your ungodly prices or be physically miserable in a place that is only growing hotter every year. Find another solution or you are going to have to deal with more homelessness, crime, and extra maintenance on public structures as more and more people strip them for their copper as people can't pay their bills.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 To the Kansas Corporation Commission, I am writing to express my strong opposition to Evergy's proposed rate increase of 8.62%, which would result in an average monthly increase of \$13.05 for residential customers. I am a single person living in a small one-bedroom apartment, and I already pay a high utility bill for such a small space. In the middle of summer, I can't even keep my AC at a cool enough temperature to be comfortable because my Evergy bill will skyrocket. This proposed increase will make it even harder for me to afford my basic living expenses. The idea of my monthly bill going up even more is deeply concerning. As someone living alone in a modest space, my electricity usage is already quite low, yet my bills remain burdensome. This additional cost will place an unfair financial strain on my budget. I can imagine this will be even worse for larger households. I urge the Commission to reject Evergy's request. It's crucial that utility costs remain affordable for all Kansans, especially for those of us already struggling with high existing rates. Please consider the significant negative impact this increase will have on customers like myself. Thank you for your time and consideration of my comment.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 I vehemently oppose the proposed rate increase. Utilities are for the public good. They were established with accessibility for rural settings, like those in Kansas, in mind. Despite that, Evergy asks to make an even higher profit off of everyday Kansans who don't have the luxury of hundreds of millions of dollars in profits. Evergy should consider how it's reinvesting it's existing \$874 million per year profits to achieve these goals instead of asking Kansans who are already providing plenty of their hard-earned income to this endeavor. If it's looking for suggestions, I'm sure the thriving electric cooperatives in Kansas would be happy to provide advice. Kansans are juggling enough with rising costs of living, economic insecurity, and international instability. Don't make us pay for more corporate greed too.

Narrative

06-23-2025 Most people in this economy are barely scraping by month to month, at no fault of their own. By increasing by the 8% increase, this could result in whether or not someone could afford another necessity. For example what if a single mom of 3 girls in their teenage years cannot afford feminine hygiene products due to the increase in bills? I would not be able to live with myself if I made a decision to negatively impact families like that. On top of that, automobile gas is about to go up, tariffs have hiked groceries, there is a housing shortage of quality houses, and a job shortage. Morally, why would Everygy hike prices now when we are almost in an economic recession? People are struggling enough already. Don't be the straw in the camels back. Maybe if this increase would also increase a significant number of jobs, then more people would be on board.

Narrative

06-23-2025 Please do not increase our rates again. In 2024 alone Evergy reported an annual net income (profit) of \$874 million. My hope would be their company would mindfully and intentionally be investing their profits into their business to accomplish their goals, rather than relying on their consumers that have no alternative energy company options and many of whom cannot afford these continuously increasing rates.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 It is insane that a company with nearly 1 billion dollars in profits can request an increase in our costs. Individuals are not making \$800 million and energy costs should not be going up for normal people. Most of us struggle to pay for the current rate and cannot handle continued increasing costs. Do not allow this greed.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 Absolutely not. Evergy has cornered the market so consumers have no other options, then want to raise prices because no one can go anywhere else. Evergy can't consistently keep the lights on anyway, why on earth should I give more money for sub-par service? This is a blatantly anti-consumer cash grab. Take the money from your executives and make your infrastructure upgrades. Then, when you can run a full year without random power-outages, ask for more money from your customers for an improved service. I don't want to gamble my money that you'll come up with a better service, you should gamble yours so that you have some skin in the game. Opposed.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 I am writing to express my outrage and absolute opposition to Evergy's proposed \$196.4 million rate increase. This move reeks of corporate greed and tone-deafness, especially in an economic climate where working families are already stretched thin. It is appalling that a monopoly utility provider—essentially immune from competition—would attempt to extract even more money from its captive customers under the guise of “infrastructure investments” and “operating expenses.” Evergy is not a struggling business; it's a powerful utility making strategic decisions to pad investor returns at the direct expense of the very people who keep its lights on—literally and figuratively. This isn't about reliable service. It's about squeezing Kansans for every dime while claiming to act in our interest. We're not fooled. I urge the KCC to reject this exploitative rate hike and hold Evergy accountable for prioritizing profits over people.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 We moved into a home with Every service in the last 6 months. Thus far, for a similar summer and temperature, same amount of billing days on a cycle, comparable house, floor plan, age and size of hvac and similar windows, we have paid 30% more than to our previous services. And to make matters worse, our thermostate is set to 75 during the day and 72 overnight. Our prior home thermostate was never set over 71. The bills are already higher, I can't turn the thermostate up higher and still be comfortable in the house. We dont use lights during the day due to windows and every shade is drawn, we have large trees shading part of our home. We use ceiling fans and blackout curtains to reduce heat in the home. The prices are already plenty high. We oppose the increase.

Narrative

06-23-2025 I do not support a rate increase for Evergy customers. As a long time Evergy customer, we already incur a high enough bill each month. This is with taking measures to conserve energy and be mindful of our use. We should not have to be concerned about hikes in our bill when we have been so intentional about making attempts to save. This will make all of our efforts for nil. Please consider your customers over boosting your revenue.

Narrative

06-23-2025

I am opposed to the raising of all our bills now and in the future because everyone except the wealthy and corporations are struggling. \$13.05 might not sound like a lot when does it stop? Electric is our biggest bill because our house is total electric, no gas at all. There are several houses on our block that are totally electric and our bills run around \$400 already (which is highway robbery) in my opinion and runs even more in the summer months. I decided to voice my opinion here in the comments because that is what it is for however I feel that it will fall on deaf ears because Evergy has the money to persuade in their favor and we, well we are all just pee-on's.

Narrative

06-23-2025 I am opposed to this change. While 13 or 14 dollars may not seem like a lot to Evergy, Kansans are seeing an uptick in prices everywhere (groceries, housing, etc.) leading to significant financial stress. Based on public information, Every has reported a profit increase of nearly 3 million dollars from 2021-2024 and I don't think I've experienced any benefits from this so far so I'm struggling to understand why this is necessary.

Narrative

06-23-2025 Having to refrain from using swear words is literally making my eye twitch. Do you realize how much thirteen dollars a month means to the average American family here in the Midwest? How many people are already behind on bills? How much money is this company already making (monthly) off of late fees? Thirteen dollars for a new pair of pants for your child. Thirteen dollars is a gallon of milk and a box of cereal so your child can eat breakfast that week. Thirteen dollars on barely half a tank of gas to make it to work for the next few days. Thirteen dollars won't even buy you a can of baby formula, but if I have to hear even one story about how a single parent in this state has to choose between paying an extra thirteen dollars to keep the power on so keep their child comfortable AND ALIVE in the summer heat or paying thirteen dollars to make a dent in baby formula to keep their child ALIVE, I'm going to lose my mind. What is robbing this extra money from every day hard working Americans actually going to improve? Just about as much as me typing up this opposition; absolutely nothing. And I hope this isn't too "obscene" of me to say, but to whoever introduced this idea, I hope you have a horrible summer.

Docket Number 25-EKCE-294-RTS

Consumer Opinion O
of Petitions Signatures

Narrative

06-23-2025 Our rates through evergy, along with all other billing requirements for house hold necessities - are already through the roof. I think a request for increase is a predatory way to squeeze more out of an already dried customer base - and think evergy could do more with their current net income of \$874 million from 2024, in terms of power infrastructure and self investing to increase their profits. The customer base is not where they should should be looking for a profit increase, we are already squeezed and dried enough financially by them already including other household necessities. In addition, my comfort around their desire for increase is even lower than possibly most, after our recent storms left me without power for nearly 30 hours!!! Lack luster service response combined with a desire to increase rates, leaves me feeling used and abused. Shame.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 I am opposed to this increase. The reasoning seems to be vague and it is concerning that the increase does not already include funding for other proposed projects. Given your annual profits, I would like to see other avenues explored before implementing an 8.62% increase. As a single parent on a budget who generally lands just outside income requirements for assistance, that increase will pull from other already tight areas of my budget.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 To Whom It May Concern, I am writing as a concerned resident and customer of Evergy Kansas Central to express my strong opposition to the proposed \$196.4 million rate increase recently filed with the Kansas Corporation Commission. If approved, this 8.62% rate hike would place an additional and unnecessary burden on already strained households, with residential customers expected to see an average monthly increase of \$13.05. While I understand the importance of infrastructure investment and responsible long-term planning, the timing and scale of this request are troubling. Many Kansans are still recovering from economic hardships brought on by inflation and broader financial uncertainty. Adding significant utility costs to their monthly expenses risks deepening those struggles. Furthermore, the nearly \$1 billion in infrastructure spending cited in the application lacks sufficient transparency and justification from the customer's perspective. Without a clear, detailed explanation of how these upgrades will directly improve reliability or reduce long-term costs for end users, it is difficult to support such an aggressive increase. It is also notable that Evergy's request excludes expenses related to high-profile projects such as the Panasonic EV battery plant and proposed natural gas facilities—raising additional questions about future rate stability. As a utility provider, Evergy has a duty not only to maintain its systems but also to serve the public interest. That includes ensuring that essential services like electricity remain accessible and affordable. I urge the Commission to critically review this proposal and prioritize the economic well-being of Kansas residents.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 I am opposed to the increase in price, as Evergy has an annual profit margin that could easily have been going towards a fund to pay for this, rather than going into the pockets of the people in power at Evergy. I also do not find it fair that a company would be able to raise prices for customers that do not have a choice in who to get their power from, as that's a major reason why monopolies are so heavily regulated or outright banned.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 This is ridiculous! I lost my job a few years ago. I physically haven't been able to find a job I can do because of my physical condition. My spouse left my sons & I 5 years ago. And they have been forced to pay the mortgage, food, utilities, & my healthcare. They have no college or further education. I don't know how you can sleep at night when people are struggling with money because of the high prices of everything! Adding to our bills is not going to help the poor.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 I strongly oppose Evergy's proposed \$196.4 million rate increase for Evergy Kansas Central customers. Many households are already struggling with rising costs across the board—food, housing, and healthcare. An 8.62% rate hike, translating to over \$13 more per month, may seem minor to a corporation, but it's significant to working families, seniors on fixed incomes, and low-income residents. Evergy claims the increase is to cover nearly \$1 billion in infrastructure investments, yet many Kansans are not seeing a corresponding improvement in service or reliability. Before asking customers to pay more, Evergy should be fully transparent about cost management, executive compensation, and other internal efficiencies. Ratepayers should not be responsible for poor financial planning or unchecked capital spending. Please reject this rate increase and prioritize the affordability and wellbeing of Kansas consumers.

Narrative

06-23-2025 I am on a very limited income from having health issues that severely impact my day to day life. I have POTS and I am very susceptible to heat stroke. I live on the second floor and I have to keep my air conditioning on and mine works overtime due to heat rising into my apartment. As of now, I can only afford to eat one square meal a day, and if the cost of electricity goes up, I won't be able to afford gas to get to my job. And without getting to my job, I will be homeless. Please consider the low income families in this decision because I know if anything else goes up, myself and thousands of other families like mine will end up homeless. One missed bill is all it takes.

Narrative

06-23-2025 Oh perfect — an almost 9% electricity rate hike! Because obviously, what my life was missing was the thrill of playing “Will I Freeze or Starve?” every billing cycle. Love that for us. Maybe if I scream loud enough, I can power my house with pure, unfiltered existential fury. Why don’t you work on saving some of your earnings for a rainy day like the rest of us peasants are required to do, and download a budgeting app for those “big” projects.

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 I'm quite positive over the last three years alone you e made more than enough money. 2022: \$753 million, and pee \$731 million, 2024: \$874 million. That's quite the hike last year alone. What kind of projected hike are you seeking next year? This is absolutely absurd when you look at the average persons pay here in these small towns of Kansas that you supply power to. It seems like every year or two you seem to want more and more and more. 8.62% may not seem like a lot to you in your fancy office, but it does have a major effect on us year after year. I absolutely oppose this decision. I also find it funny that the public meeting held in Wichita was not advertised very loudly to your customers.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 The company of matter already makes up that amount of money in profit. How about you not increase costs for people who can barely afford paying for their bills already. I don't live in the area but raising costs their will raise out costs here. We are rural and most can not afford to pay an increase due to already low fixed incomes. This is absolutely the wrong thing to do.

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 I am writing to formally express my strong opposition to the proposed rate increase by Evergy. It is deeply concerning that Evergy is seeking to impose higher rates on customers at a time when the company has reported profits totaling \$878 million. Such a significant profit margin clearly demonstrates that the company is in a strong financial position and does not require additional revenue at the expense of hardworking ratepayers. Raising rates under these circumstances is not only unjustified, but also insensitive to the financial pressures many households and small businesses are already facing. Energy is a basic necessity, and utility companies have a responsibility to provide it affordably and equitably—not to prioritize shareholder profits over customer well-being. I respectfully urge you to reject this rate increase proposal and instead encourage you to pursue more responsible financial planning that does not involve passing unnecessary costs onto consumers.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 Kansans are already struggling with hiked up bills and taxes and tariffs, many families now also are losing benefits or are owing more for student loans and other debts, raising prices for necessities should be illegal especially since the only reason you plan to do so is for a new facility that has no proof of benefits. This seems like a low blow and quick cash grab for a greedy company. You put on a good face by giving out cheap Walmart fans to people yet turn around and up the cost for them to even plug those fans in.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 I am writing to formally oppose Evergy's proposed \$196.4 million (8.62%) rate increase for Kansas customers. According to Evergy, this increase is intended to cover nearly \$1 billion in infrastructure investments, cost of capital, and rising operating expenses. However, this burden should not be placed on residential customers, particularly during a time of economic uncertainty, inflation, and already high utility costs. An increase of \$13.05 per month per household may seem modest on paper, however for working families, seniors, and those on fixed incomes, this adds yet another financial strain. If Evergy is truly investing in "customer-serving" infrastructure, then they should find more equitable funding solutions. Including but not limited to: internal cost reductions, executive compensation adjustments, or corporate financing, instead of increasing the financial burden on those who have NO CHOICE but to keep their lights on. While Evergy's filing states that the request excludes costs from the upcoming Panasonic EV plant and proposed gas plants, it's difficult to separate these moves from a broader corporate expansion strategy one that appears to benefit shareholders far more than ratepayers. I urge the KCC to consider the long term impact this hike will have on your constituents, and to push Evergy to explore more responsible, fair, and people centered alternatives. Sincerely, Emily Thomas Bonner Springs

Narrative

06-23-2025 I strongly oppose Evergy's proposed rate increase of 8.62%. Over the past year, my monthly bills have already doubled, placing an enormous strain on my household budget. This additional increase is unreasonable and unjustifiable, especially when many families are struggling to manage rising costs across the board. Evergy must prioritize its customers and find alternative ways to manage its operations without imposing further financial burdens on the community.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-23-2025 Subject: Opposition to Evergy's Proposed \$196.4M Rate Increase – Docket 25-EKCE-294-RTS To the Kansas Corporation Commission: I am writing as a concerned Evergy Kansas Central customer to strongly oppose the proposed \$196.4 million (8.62%) rate increase. Raising residential rates by an average of \$13.05 per month may seem minor on paper, but for working families already burdened by inflation and rising costs of living, it is one more hit we simply cannot afford. Evergy reported over \$800 million in profit last year, and its CEO was paid \$7 million alone. That kind of profitability makes it extremely difficult for the public to accept that further rate increases are necessary—especially when Evergy continues to reward its executives while asking Kansans to pay more for the same service. While infrastructure investments are important, ratepayers should not be the only ones expected to shoulder nearly \$1 billion in capital costs—especially when none of this increase even includes the upcoming costs for the Panasonic EV battery plant or new natural gas projects. If this increase is approved, what comes next? I respectfully urge the Commission to reject this rate hike or significantly reduce it. Require Evergy to:

- Prioritize affordability for Kansas families
- Reassess executive compensation and profit margins before passing costs to customers
- Provide greater transparency and justification for these infrastructure investments

We are not asking for special treatment—we are asking for fairness and accountability.

Narrative

06-23-2025 The cost of electricity is already high, and proposed increase will greatly impact myself, and dello Everyg users. You all are putting people in a precarious position. As a 63 year old totally disabled veteran who lives solely on VA disability, a rate increase will severely affect my budget. Additionally, if the rate increase passes, I will have to decide whether to stay warm in the winter and cooler in the summer versus eating, and paying some bills. The rate increase might seem small to your corporation, but to the users, of which your employees are some, is not insignificant.

Narrative

06-24-2025 Most of us literally already live paycheck to paycheck currently. I work 60+ hours a week and cannot afford any increases, as I'm sure most Kansans feel. This is absolutely not the right time to be doing something like this.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 I am writing to formally express my strong opposition to the proposed rate increase by Evergy. It is deeply concerning that Evergy is seeking to impose higher rates on customers at a time when the company has reported profits totaling \$878 million. Such a significant profit margin clearly demonstrates that the company is in a strong financial position and does not require additional revenue at the expense of hardworking ratepayers. Raising rates under these circumstances is not only unjustified, but also insensitive to the financial pressures many households and small businesses are already facing. Energy is a basic necessity, and utility companies have a responsibility to provide it affordably and equitably—not to prioritize shareholder profits over customer well-being. I respectfully urge you to reject this rate increase proposal and instead encourage you to pursue more responsible financial planning that does not involve passing unnecessary costs onto consumers.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 I strongly oppose Evergy's proposed \$196.4 million rate increase for Evergy Kansas Central customers. At a time when many Kansans are already struggling with inflation, housing instability, and rising costs for basic needs, asking residential customers to shoulder an additional \$13.05 per month is unreasonable and unjust. Evergy's justification for the increase includes nearly \$1 billion in infrastructure investment and higher operating costs, but working-class families are not responsible for corporate financial strategies or shareholder profits. Ratepayers should not be expected to absorb these costs without clear, transparent proof of long-term customer benefit, increased energy reliability, or sustainable practices. Furthermore, while the inclusion of a credit program for income-eligible customers is a positive step, it is not nearly enough to offset the disproportionate burden this hike would place on low- and middle-income households. Many Kansans who do not technically qualify for assistance will still be significantly impacted by this increase. Evergy has already made record profits in recent years. The public deserves affordable, reliable energy, not higher bills and vague promises. I urge the Kansas Corporation Commission to reject this request and instead require Evergy to find more equitable, efficient, and accountable ways to manage its operations without passing the burden onto consumers. Sincerely, Jess McCoy Haysville, KS

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 I'm writing as a concerned Evergy customer and a member of the community to strongly oppose the proposed rate increase. At a time when so many families and small businesses are already stretched thin by the rising cost of living, it's troubling to see Evergy seeking to increase rates, especially after reporting profits of \$878 million. That level of profit clearly indicates financial strength. It's hard to understand how a company performing so well financially could justify asking everyday people to pay more. For households like mine, electricity isn't a luxury, but a necessity. These rate hikes don't just show up on a bill. They affect whether some of us have to make trade offs between utilities, groceries, and other essentials. It feels deeply unfair that our basic needs are being leveraged for higher shareholder returns. I urge you to reject this proposal. Please stand with ratepayers and push Evergy to explore more equitable and responsible ways to manage its finances that don't involve shifting more of the burden onto customers who are already doing their best to make ends meet. Sincerely, Amanda Travis Lawrence, KS Evergy Customer

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 Most Kansas residents are already drowning in bills enough as is, especially considering jobs are barely paying enough for all bills, including groceries, household items, car payments/ insurance. While you think \$13 more a month isn't a big deal, it most definitely is. Especially in areas that have solar panels, we would be expecting our bills to decrease not increase. My generation is to the age of having their own homes and just starting to live on their own and provide for themselves, let's not make it any harder, landlords & mortgage payments already take enough, bills shouldn't be 1/3 or 1/2 of rent/ mortgage. People shouldn't have to work more than one job to provide everything for their household.

Narrative

06-24-2025 The apartment I live in I can not control how bad the windows and doors leak. It is unfair to raise my prices even more when I struggle to pay the prices now. I have two small children I have to take care for. Every raised prices not very long ago. Why are they trying to raise prices again? When power doesn't stay on? Outages happen and it takes 22+ hours for the power to come back? That doesn't deserve a price raise.

Narrative

06-24-2025 As a hardworking middle- and lower-income American, I can say that many of us are already struggling to keep our heads above water. Families are facing rising costs in every part of life, from groceries to housing, and the last thing we need is a nearly 9% increase in our utility bills. This added financial burden would make it even harder for people to provide for their basic needs. I urge you to reconsider this rate hike and prioritize affordability for the communities you serve.

Narrative

06-24-2025 People in Kansas are struggling enough to make ends meet. Everything is going up EXCEPT our wages. This is a multi-million dollar company. Why are raising the prices? 1.7million customers, per your website, take that times by we'll say roughly \$200 per month, that's \$380,000,000. PER MONTH. Also, investor-owned utilities never benefit society. They benefit the investor only because eventually our prices aren't high enough and they have to be raised in order to appease the investor. What we need to be doing is using that wind power from the wind turbines to benefit us. Sure, help send energy to places that really need it, that's perfectly fine. But if that means raising our prices, how about we use some of that here too.

Narrative

06-24-2025 I'm writing to express my strong opposition to Evergy's proposed rate increase. It's really concerning that Evergy is trying to raise rates on customers, especially when the company just reported \$878 million in profits. That's a huge profit, and it clearly shows they're in a strong financial spot and don't need more money from us, the hardworking ratepayers. Raising rates now isn't just unfair; it's also pretty tone-deaf considering how much financial pressure many households and small businesses are already under. Energy is a basic necessity, and utility companies should be providing it affordably and fairly, not putting shareholder profits ahead of customer well-being. I really hope you'll reject this rate increase proposal. Instead, Evergy should focus on smarter financial planning that doesn't involve sticking customers with unnecessary costs.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 To the Kansas Corporation Commission, I am writing to express my strong opposition to Evergy's proposed rate increase currently under consideration. As a customer, I am concerned about the impact this increase will have on working families, seniors, and others already facing rising costs for basic necessities. Evergy has previously raised rates, and it is unclear how this new proposal will directly benefit customers through improved service, infrastructure, or renewable energy investment. Before approving any increase, I believe the Commission must require greater transparency and justification from Evergy. Kansans deserve clear evidence that rate hikes are not being used to pad profits or cover executive compensation, but are truly necessary and in the public interest. I urge the KCC to stand with consumers and reject this proposed increase unless Evergy can clearly demonstrate that it is essential, fair, and will result in measurable benefits for ratepayers—not just shareholders. Thank you for your time and consideration.

Narrative

06-24-2025 I think if you made \$878m profit in 2024 & already have made over \$100m profit the first quarter of 2025, you have no business asking your customers for a \$196m rate hike! People are struggling to keep up with prices everywhere they look. You may think \$13 more a month is no big deal, but that's a lot for many people. Maybe you need to cut back on what you pay your CEO & some other people because they make way too much!!

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 My husband and I recently had to move back to Kansas from Pittsburgh, Pennsylvania due to high living costs. We were both born and raised here so having our families nearby is great and made moving back a lot easier. This rate increase, while being framed as a positive thing, would harm a lot of families such as my own. An infrastructure investment sounds wonderful, but it comes at a cost to thousands of people who are already struggling with bills, grocery prices, car payments, etc.. The hopelessness that comes with financial hardship is something no one, especially not hardworking Americans, should have to face. Money can be moved around and budgeted, but not when it's being taken right out of good people's pockets. I urge you to reconsider this increase and plan, and when you do, consider the Americans who just want to keep their lights on and their families fed.

Narrative

06-24-2025 I am deeply disheartened to hear that evergy is attempting to connect their investments in infrastructure to increasing their customer's rates when they have no choice in provider. I must choose evergy by design, but I reject any rate increase on the basis of the 878 million dollar profit this company made in 2024. Use your profits to invest in your business, instead of taking more of your customer's hard earned money. The services provided do not align with rate increases, let alone the current pricing of energy. Please refuse this contract and stop placing additional burdens on customers.

Narrative

06-24-2025 the President is saying that energy prices are going down, yet our rates keep getting higher! Most of that infrastructure is to support the battery plant in Johnson County. I remember reading about it already being planned before the last increase was approved. The CEO pulled in over \$7 million in compensation last year, just a small percentage of that would make a big difference for me and my family. They need to find the money themselves. Perhaps Evergy should use their profits to invest in their business!

Narrative

06-24-2025 Bills are already high. The 1B is not needed IMMEDIATELY, it's something they need to acquire over a period of time. If their CEO can take \$7MILLION in compensation in one year, they should revisit their budgeting priorities. We are currently in a heatwave, our AC is working extra hard to keep our home at a livable temperature, increasing that energy bill enough as it is. No, we are not happy about the idea of an increase in our bill. I'm sure they can figure something else out after earning \$874 Million in Profits in 2024.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 To the Kansas Corporation Commission: I am writing as a concerned Evergy Kansas customer, to strongly oppose the proposed \$196.4 million (8.62%) rate increase. Raising residential rates by an average of \$13.05 per month may seem minor on paper, but for working families already burdened by inflation and rising costs of living, it is one more hit we simply cannot afford. Evergy reported over \$800 million in profit last year, and its CEO was paid \$7 million alone. That kind of profitability makes it extremely difficult for the public to accept that further rate increases are necessary—especially when Evergy continues to reward its executives while asking Kansans to pay more for the same service. While infrastructure investments are important, ratepayers should not be the only ones expected to shoulder nearly \$1 billion in capital costs—especially when none of this increase even includes the upcoming costs for the Panasonic EV battery plant or new natural gas projects. If this increase is approved, what comes next? I respectfully urge the Commission to reject this rate hike or significantly reduce it. Require Evergy to: • Prioritize affordability for Kansas families • Reassess executive compensation and profit margins before passing costs to customers • Provide greater transparency and justification for these infrastructure investments We are not asking for special treatment. We are simply asking for fairness and accountability.

Narrative

06-24-2025 PLEASE DO NOT APPROVE! As a rural customer, our service isn't always the best and I highly doubt these infrastructure investments will be seen by those outside large metropolitan areas. Times are tough, money is tight all the way around, and I am OPPOSED to this rate increase. I would love to hear what EVERGY had in overall profit each of the last 5 fiscal years. Can that money be used for this capital investment or to offset operational costs? Why do they need to increase what is already an astronomical level of PROFIT (not revenue) annually.

Narrative

06-24-2025 For the past 10 years the economy has done nothing but gotten worse. The cost of living has gone higher and higher, while wages have not gone higher. My bills have gone higher while my pay has not. I have a four family household, and my bills add up and keep growing while my income sadly does not. My every bill keeps getting higher and higher while I have no relief on my bills and I can not afford for it to keep going higher and higher! I literally can not afford to live or go on vacation with my children because I have no extra after paying all my bills. I can't afford to have yet ANOTHER increase in my electric bill! This is outrageous as it is how expensive everything is now and how both parents in the household have to work while also paying for daycare because we can't afford anything else. But I have to pay for someone to watch my child, but the laughable part is I can't afford daycare! But you want to raise everyone's electric bills while the rest of the world just keeps getting more and more expensive and less and less unlivable. It is truly sad how we can't live in this world anymore. We are barely surviving as it is.

Consumer Opinion O
of Petitions Signatures

Narrative

06-24-2025 Share holders should not even be a thing for utility companies I wish you guys had ethics and competition. You guys have been raising rates like crazy the last few years and it's crushing us. We are not making enough money to be able to support your greedy mentality. If a single company came in as a competitor all the sudden you would have lower prices because it's not about having to do this, it's about greed. Housing prices are crazy my generation (30 years old) is paying more for mortgages on a basic two bedroom house than ever before it's not possible to find a decent house in Wichita for under \$150,000 that's in a safeish neighborhood. We have been looking to buy and the economy is making the decision very difficult. Raised utilities every two years will affect people's ability to afford home ownership. \$18 dose not sound like much but when you add that with all the other increases that Evergy has made, all the increases at the grocery store , and all the looming cuts to helpful resources it's adds up to an insurmountable cost of living. Don't be another villain in the capitalist hellscape. Ps from a PR standpoint the reason you "need" to raise prices makes no difference should have lied and told us the increase in big storms and moving back into tornado alley was a factor. Greedy and insulation with the low effort.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 The rates should not be raised. Everygy has had record profits since 2020 that has been increasing yearly - There is no reason for them to hike the rates up for their customers especially during times like these. If they are hurting for money maybe they should make salary cuts to the higher ups in the company instead. Why make it harder for the every day Kansan to afford their utilities? Gross greed.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 Our rates in Wichita are already a lot higher than nearby towns. This is just a money grab from a company raking in over three quarters of a billion dollars in profit each year. It is not our fault that Everygy cannot manage their finances. They need to get their priorities straight and come up with this money on their own, because their profits show they have the money. No more of this culture of corporate greed sucking every last penny they can out of consumers. We've had ENOUGH

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 I strongly oppose Evergy's proposed \$196.4 million rate increase for Evergy Kansas Central customers. At a time when many households are already struggling with rising costs for housing, food, healthcare, and other basic necessities, this 8.62% increase is not just unreasonable; it's deeply burdensome. An average increase of \$13.05 per month might not seem like much to a corporation, but for working families, seniors on fixed incomes, and low-income residents, it adds yet another financial strain. Evergy claims this increase is to cover nearly \$1 billion in infrastructure investment, yet it excludes costs for upcoming projects like the Panasonic battery plant and new natural gas facilities. That raises serious concerns about future rate hikes. How many more increases will we be asked to absorb? We need fair and sustainable energy pricing not ongoing hikes that pad corporate investments while placing the burden on everyday Kansans. I urge the Kansas Corporation Commission to reject this rate increase and insist that Evergy find more equitable and efficient ways to manage its expenses.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 Vehemently opposed to a price hike passed along to the customers from Evergy. They have chosen to ignore infrastructure updates needed in the past, choosing profit over investment, and as a customer I do not consent to correcting this with my own money. Based on their public earnings numbers, I believe they can correct their mistakes with the over 800 million annual profit over many years, it's not like if they had an extra billion this year they would even have the ability to finish the updates before several years.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 I am strongly opposed to Evergy's request for yet another rate increase. The cost of living is rising in nearly every area — groceries, rent, insurance, fuel, medical care — but wages have not kept up. Now Evergy wants to add even more financial strain on Kansans who are already struggling to make ends meet. This is not the first time Evergy has raised rates since 2020 — they received a 5.84% increase just in 2023. Asking for an additional 8.62% increase less than two years later is unacceptable. Utilities are essential services — not luxury items. Families cannot simply cut back on electricity when prices go up. Customers have no choice but to pay whatever rates are approved, while Evergy continues to generate healthy profits and pay dividends to shareholders. The burden of Evergy's infrastructure investments and operating costs should not be pushed entirely onto customers who have no voice in these decisions. At some point, there must be real accountability. Kansans are being squeezed from every direction — yet corporations continue to demand more while wages remain flat. Enough is enough. I urge the Commission to reject this rate increase and prioritize the financial well-being of everyday Kansans who are already stretched thin. Thank you.

Narrative

06-24-2025 This comes at a time where all Americans are struggling to make ends meet. There are possibilities of additional tariffs causing prices to go up. Wages have not kept up with the price of inflation and many of us need help at this time. I believe that there are other possibilities for them to find some of this money over the next several years.

Company ID Docket Number Consumer Opinion # of Petitions Signatures
EKCE **25-EKCE-294-RTS** **O**

Narrative

06-24-2025 Everygy's intention to increase rates to EKC customers will negatively impact their customers. Their customers already experienced a 5.8% rate in 2023. An additional 8.6% increase would bring additional hardship to many Kansas families that rely on their services. Everygy's earnings in 2024 was \$877 million. Their customers should not be burdened with the cost of these planned infrastructure updates. I strongly oppose this plan.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 Subject: Opposition to Evergy's Proposed \$196.4M Rate Increase – Docket 25-EKCE-294-RTS To the Kansas Corporation Commission: I am writing as a concerned Evergy Kansas Central customer to strongly oppose the proposed \$196.4 million (8.62%) rate increase. Raising residential rates by an average of \$13.05 per month may seem minor on paper, but for working families already burdened by inflation and rising costs of living, it is one more hit we simply cannot afford. Evergy reported over \$800 million in profit last year, and its CEO was paid \$7 million alone. That kind of profitability makes it extremely difficult for the public to accept that further rate increases are necessary—especially when Evergy continues to reward its executives while asking Kansans to pay more for the same service. While infrastructure investments are important, ratepayers should not be the only ones expected to shoulder nearly \$1 billion in capital costs—especially when none of this increase even includes the upcoming costs for the Panasonic EV battery plant or new natural gas projects. If this increase is approved, what comes next? I respectfully urge the Commission to reject this rate hike or significantly reduce it. Require Evergy to: • Prioritize affordability for Kansas families • Reassess executive compensation and profit margins before passing costs to customers • Provide greater transparency and justification for these infrastructure investments We are not asking for special treatment—we are asking for fairness and accountability.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 Despite the numerous reasons to opposed this rate hike, I'll try to summarize them to a few key points: Can't afford it - with the raises in cost of living there's not more room in the budget if I even wanted to pay your increase. Transparency - there's not nearly enough transparency in where these rate hikes are going. You mention "capital improvements" and "operating cost increases" but that means nothing without detail. We need a detailed breakdown of these investments and their direct benefits to customers. Not my problem - Everygy should explore cost-cutting measures and efficiency improvements instead of passing costs onto consumers. I urge the Commission to reject Everygy's proposed rate increase and prioritize the financial well-being of the people.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 As a whole local governments should be finding a way to LOWER costs for Kansans. \$13 a month on average is taking additional money from hardworking taxpayers who already had a 9% increase on property taxes AND a mandatory increase on auto insurance. Add in food costs, other utilities, the price of rent/a mortgage right now, and other monthly necessities? We have dealt with enough increases and price gouging in the past few years. Leave my electric bill alone.

Narrative

06-24-2025 The people of Wichita are already struggling to make ends meet in every corner of the city. Large corporations and businesses such as Evergy should look to make internal cuts before raising the price on customers. This new infrastructure will not affect me or my neighbors in our well established neighborhood that is over 100 years old. We haven't had any electrical updates in years and Evergy doesn't take care of our lines as is. Who will this benefit?

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 I am very much opposed to any proposed increase in Evergy rates. The new infrastructure being proposed is not something of importance to Kansans right now when the cost of living is already so incredibly high and is only going to continue increasing in light of everything being done by the current administration in D.C. All of my friends and neighbors are strongly opposed to this as well—in fact, I do not know one single Kansan who is in favor of the proposed Evergy rates increase.

Narrative

06-24-2025 I am writing to express my strong opposition to your proposed rate increase. As a customer who has no alternative provider for essential energy services, I find this proposal both exploitative and deeply unethical. We are already burdened by rising costs across every sector — from groceries to housing — and wages have not kept up. Your proposed increase comes at a time when many of us are stretched thinner than ever. It is difficult to understand how a multimillion-dollar company can justify demanding more from customers who are struggling just to get by. The recent “assistance” of a one-time \$100 payment was, frankly, a slap in the face. Energy is not a luxury — it is a necessity — and your actions reflect a lack of empathy, accountability, and corporate responsibility. You are profiting from a captive customer base, and your monopoly status means we have no real choice. We deserve better. We deserve transparency, fairness, and a utility provider that works for the community, not just its shareholders. I urge you to reconsider this rate hike and to take real steps toward making energy affordable and accessible for all — not just those who can afford to pay more.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 I am writing to express my strong opposition to Evergy's request for an 8.62% rate increase for Evergy Kansas Central customers. I believe this rate hike is unreasonable and places an unfair financial burden on households and families who are already struggling with the rising cost of living. A \$13.05 per month increase may not seem significant to a large utility company, but for many Kansas residents, every dollar counts — especially at a time when inflation continues to impact groceries, fuel, and basic necessities. Many people, including seniors and low-income families, are on fixed incomes and cannot easily absorb higher utility bills. While Evergy claims the increase will fund infrastructure and operating costs, I am concerned that more cost-effective solutions have not been fully explored, and that ratepayers are being asked to shoulder too much of the burden for corporate investments. Additionally, Evergy has previously promised to keep rates reasonable and stable, yet here we are facing another hike. I urge the Commission to protect consumers and reject this excessive rate increase. Evergy should prioritize affordability, find efficiencies within its existing budget, and ensure that future investments do not come at the expense of the customers who rely on their service every day. Thank you for considering my comment. Sincerely, Ally Sharp

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 In 2023, Evergy CEO David A. Campbell's total compensation was \$7.258 million. In 2022, Rate-payers spent \$8,652,707 in direct salaries and cash bonuses (over \$1,400,000 on average for each) for the top 6 executives and paid the 11 directors \$1,413,901 in total direct pay. This does not include stock incentives and other considerations, which would bring the total to over \$22.2 million. Top executives are not the only recipients of excessive salaries. Take a look at the non-employee Board of Directors' compensation, averaging over \$333,000 a year for a total Director compensation with incentives of \$3,863,559. Evergy has people serving on the Board of Directors who live outside of Kansas, which represents a direct conflict of interest as they do not live with the decisions they make. Why is Evergy allowed to promote these practices, while rewarding executives and directors to further their implementation, paying exorbitant salaries, bonuses, and benefits, while hiring and appointing individuals with perceived conflicts of interest who only perpetuate the problem of the rising cost of utilities? It should be clear that I vehemently oppose an increase in what the people of Kansas pay while the executives of Evergy continue to rob us of our hard earned money.

Docket Opinion

Company ID **EKCE**
Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 I strongly oppose Evergy's proposed \$196.4 million rate increase for Evergy Kansas Central customers. An 8.62% rate hike, amounting to an average increase of over \$13 per month for residential customers, is both excessive and poorly timed. Many households across Kansas are already struggling with inflation, stagnant wages, and increased costs of living. Asking customers to pay significantly more during such uncertain economic times is unreasonable, particularly for low-income, fixed-income, and elderly residents who cannot absorb yet another increase in essential utility costs. While Evergy cites a \$1 billion investment in infrastructure and rising operating costs as justification, the company has failed to provide clear, transparent evidence that these costs directly translate to improved service, grid resilience, or affordability for everyday Kansans. Moreover, ratepayers should not be made to shoulder unchecked capital expenditures that may not be prioritized around affordability, sustainability, or efficiency. Evergy's profits and executive compensation levels in recent years have also raised concerns. Customers should not be asked to subsidize growth strategies, investor returns, or speculative infrastructure at their own expense. As a monopoly utility, Evergy has a responsibility to operate in the public interest—not merely to meet its own financial goals. I urge the Kansas Corporation Commission to reject this proposed rate increase and demand a more equitable, transparent plan that centers ratepayer protection, especially during ongoing economic uncertainty.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-24-2025 Most people can not offered their bills already due to inflation, lack of pay increases, and uncertainty in the nation's economy. Increasing the price would only further that and leave more individuals struggling and can lead to higher amounts of unpaid bills. Every is already making more profit than ever, so why not focus on lowering their costs, and even salaries of the higher executives. They can focus on more functional smaller developments with their current budget and still accomplish their objectives. They should not increase prices because the consumer will be the one struggling.

Docket Number 25-EKCE-294-RTS

Consumer Opinion N
of Petitions Signatures

Narrative

06-25-2025 While I appreciate Evergy's commitment to maintaining and modernizing our electrical infrastructure, I urge the Commission to scrutinize this proposal closely to ensure it is both fair and justified for ratepayers. I acknowledge the importance of investing in grid infrastructure. If the nearly \$1 billion Evergy cites in infrastructure investment clearly benefits customers, the cost recovery may be warranted. However, this proposal raises several concerns that deserve careful examination: -
Affordability: An 8.62% increase is substantial, particularly for customers on fixed or low incomes. The burden of this rate hike must be balanced against the current economic pressures faced by many rural Kansans. - Operating Expenses: Evergy's claim of increased operating costs should be carefully audited. Ratepayers should not bear the burden of inefficiencies, inflated executive compensation, or unnecessary administrative costs. - Justification for Return on Capital: The Commission should ensure that any adjustments to Evergy's cost of capital or authorized return reflect current market conditions and are not excessive. - Recent Rate Increase Trends: Evergy has requested multiple increases over recent years. It is important to assess whether these cumulative hikes have translated into demonstrable service improvements for customers. - Transparency and Public Accountability: While it is appreciated that this rate increase does not include costs for the Panasonic EV battery plant or proposed natural gas facilities, I encourage the Commission to require Evergy to clearly outline how each dollar of this proposed increase will directly benefit customers. I respectfully urge the Commission to evaluate this proposal with a focus on fairness, transparency, and the financial well-being of Kansas residents. Any approved increase should be tied directly to measurable improvements in service reliability, customer benefit, and long-term cost efficiency.

Narrative

06-25-2025 To whom it may concern, My name is Alexa Boyd, and I have been a customer of Evergy in Douglas County since 2021. Docket No. 24-EKCE-294-RTS's potential to increase my monthly electricity bill by \$13.05/month is very alarming to me. As early as September 2025, my household cannot afford to pay an extra \$13.05/month on top of other bills. Living services such as my household's electricity, rent, renter's insurance, and water bill will be at jeopardy in this troubling economy. Other expenses such as auto insurance, registration, and auto loan payments will put my home at risk. Please consider the impact of this docket on your loyal customers, especially considering the rising cost of surviving in this economy. Douglas County is not a high tax bracket, and I have watched many people around me struggle as the cost of groceries, clothing, and other essentials rise and wages stay stagnant. Thank you for your time. Best, Alexa Boyd

Narrative

06-25-2025 Everygy is the only energy provider for the eastern third of the state of Kansas. Everygy is a monopoly of energy service providers; we do not have any other competition to choose from. Everygy's website dictates that the company is working to reduce the cost of electricity for all customers, but continual rate increases are a contradiction to their vision, mission, and/or goal. We have no say in what is considered fair, equitable prices because there is no other service provider. Everygy has merged (bought) every single one. Since when is the consumer solely responsible for funding repairs to infrastructure of a business? The practice is unjust to the consumer. IF we had choices of providers and IF we would choose to stay with Everygy, then I couldn't complain about price increases. I chose to stay with that company knowing they were raising their rates. I cannot afford the price increases, and refuse to support the increases that are made to increase shareholder profits. I implore the KCC to oppose the rate increases due to the nature that Everygy is a monopoly, as defined by the Federal Trade Commission, and that their predatory practices tiptoe the lines of violating antitrust laws.

Narrative

06-25-2025 Thank you for allowing the public to comment on this proposed rate increase by Evergy. I oppose this rate increase request by Evergy. Evergy recently announced its first quarter 2025 financials and it said it earned \$125 million in the first quarter of 2025. Additionally, the company is planning to declare a dividend to its shareholders of \$0.6675 per share. Looking back beyond this quarter, Evergy continues to do well financially. It makes sense for the company to invest in its own infrastructure and plans to build rather than relying on the customers of the utility to do so. The 2025 financial outlook for many consumers continues to be challenged by rising prices, including paying the added tariffs added by the Trump Administration. Now is not the time to expect the customer of Evergy to bear the costs of the utility's planned upgrades and infrastructure improvements. Let Evergy bear those costs.

Narrative

06-25-2025 As a Kansas resident and working parent, I strongly oppose Evergy's proposed \$196 million rate increase. My family, like many across the state, is already stretched thin trying to keep up with basic living costs—including electricity. A \$13 monthly increase may seem modest on paper, but for many households, that's the difference between making ends meet or falling behind. Affordable energy is not a luxury—it's a necessity. Rate hikes like this disproportionately impact lower- and middle-income families who are already doing everything they can to conserve and reduce usage. We need stable, reasonable pricing that ensures access to essential services for all Kansans, not just those who can absorb higher utility bills. I urge the Commission to prioritize the well-being of Kansas families and reject this increase.

Narrative

06-26-2025 Use the profit yall already have to build the infrastructure. Most Kansans can barely afford the electric bill as it stands. We are legitimately suffering and struggling to pay our every day bills. Please do not raise the rates. You will cause more Kansans to be forced out of their homes. It may not seem like much to you, and the obscene money you make, but go ask an hourly employee of yours in the call centers, or your technicians how they are faring in today's economy. You already have a monopoly on most of the areas. You are our only choice. Please do not raise the rates. You're competing with yourself and only yourself. If your shareholders and CEO want more money, tell them we are dead broke and can't fund their lake house and third boat. Sorry.

Narrative

06-26-2025 This company has a monopoly on the market! It should not be allowed to charge customers exorbitant rates for electricity! The increase in the rate should only be sufficient to cover cost of business. I understand the company is a for profit entity, however also being a monopoly, there is no alternative for customers! People cannot handle the increase in expenses from all sides, including rising tax rates and inflation. The state has a fiduciary duty to its citizens to ensure a potential for a quality life within its borders. Increasing the rate charged to customers will cause irreparable harm to Kansas citizens and have a lasting impact! If Evergy is worried about increasing the ROI for investors then maybe the executive team should take a cut in their multi- million dollar salaries. Citizen welfare should not be reduced in order to increase ROI for Evergy. Increases in ROI should come from within the company including increasing the efficiency of its operations, cutting costs, and pursuing alternative more economical sources for electricity. Citizens of Kansas are not an never-ending bank or source of funds for Evergy to continuously withdrawal from.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-26-2025 In the absence of a reduction in Evergy's C-suite executive pay this is unconscionable. Their proposal could be fully funded by modest salary reductions of just a few of their highest paid employees. For people living paycheck to paycheck (like me) every dollar counts and I don't want to bankroll a company shelling out absurd executive salaries. Strongly opposed.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-27-2025 In a state like Kansas with a power monopoly, the burden of surging costs created by the demands of data center, AI, and other industrial giants are charged to the residential customers. The KCC should not allow this. With the excessive profits being made by Evergy, the company and the industries causing these demands should be responsible for these soaring infrastructure costs. Consumer advocate Clark Howard has stated corruption is often the case between power monopolies and their regulators. I hope this isn't true in Kansas. Please do not allow the requested rate increase.

Consumer Opinion **O**
of Petitions Signatures

Narrative

06-27-2025 I oppose this raise wholeheartedly. Our summers and winters are hotter and colder than ever, and people are still suffering from the high costs of powering their homes. Evergy should not be raising prices for the sake of their adjustments for overall cost of capital. Where is the transparency? I would only support this cost raise if Evergy made their plans for this infrastructure investment public and reasonable. As an electrical engineer myself, our power grid is weakened now more than ever and is in dire need of an overhaul. As a customer of Evergy, I need to hear a tangible plan of action to address the issues that our power grid faces before I consider supporting a rate hike. And as it stands now, I do not see any tangible plan. All I see is corporate greed against the common people.

Consumer Opinion O
of Petitions Signatures

Narrative

06-27-2025 There's no reason to increase our bills while Evergy is making the kind of earnings they are (878 million last year and hundreds of millions every year) and paying their CEO between 1-7 million a year. Add to that, the board (mostly out of state members?) who are paid \$145,000 a year plus roughly the same amount in stock options. They operate from a position of greed at the expense of people who are just trying to stay afloat. At the same time, Evergy has reneged on previous promises to phase out coal plants and provide cleaner energy. Please deny their request. Thank you.

Narrative

06-28-2025 Everygy just announced shareholders are being paid a handsome dividend, due to rate hikes. Why would we, as working class citizens, be responsible for earning millionaires even more money as we suffer in an economy with ever looming price increases? If this rate hikes paid for an actual infrastructure, that would be different. We are being asked to put our money directly into shareholders pockets. Our power lines are being spot repaired and left to failure, there's huge companies building warehouses and we're paying for their infrastructure upgrades while our own transformers are past their useful date. Tree trimming is widely ignored and there's no sign of inspections from every to ensure our lines are even safe. We are forced to use everygy because there is no other choice, creating a cash grabbing monopoly. The previous CEO stole it money and we received nothing in return, but the brazen attitude from the new CEO to continue his grift. The working people deserve a break, not millionaires

Narrative

06-28-2025 Households have been hit with high inflation and skyrocketing property valuations and utility fees in the last five years. People's incomes have not increased at proportional rates. I am opposed to Evergy's proposed rate increase due to these already-existing constraints on Kansans' expenses as people do not have the flexibility to absorb these additional costs. I recommend that Evergy re-evaluate its expectations for profits instead of raising rates.

Narrative

06-30-2025 I feel that a 8.62% increase is too much for Kansas Evergy customers. Do we ever get nearly a 9% increase in wages. Most workers are lucky to get a 2-3% raise. Utilities should be a public service for the citizens and not a for profit corporation. Renewable energy is the smart investment in the future and Evergy should aggressively explore opportunities in cleaner energies which are more economical and avoid cost increases while making a healthier environment for Kansans.

Narrative

06-30-2025 Our area is surrounded by wind turbines and we were told renewable energy will be effective in reducing electrical increases. Now they want to cover our county with them, pay land owner subsidies for land use, probably from our tax dollars, and still want to raise our rates for infrastructure changes. When does it stop? As we retire how are we to continue to pay increases? Electrical companies need to get their management salaries in check.

Narrative

07-01-2025 I absolutely oppose Evergy's requested rate increase as I believe it is wholly excessive. This is nothing more than a blatant money grab by a monopolistic utility company trying to take advantage of their customers by abusing their position as the one and only energy provider in the marketplace. Evergy's CEO received \$7.25 million in compensation last year. There's no way they need to increase rates, and they certainly don't need to increase them this much. That kind of compensation package is ridiculous, and Kansans certainly shouldn't have to foot that bill. If they want to invest in infrastructure, I would suggest Evergy reduce their executive compensation packages and maybe put that money where it actually matters. Add to that, the excuse that Evergy wants to recoup already-spent funds speaks more to the company's apparent lack of fiscal planning than to a legitimate need for a rate increase. Not to mention how laughable it is that they claim to be improving infrastructure. We've had more non-storm related outages and brownouts in the past year than I can count. I'm not sure what Evergy has been spending money on outside of their CEO's ridiculous compensation package, but it surely isn't any of the infrastructure that supports our home.

COPY

Dear Board Members:

I am writing to ask that EVERGY receive the lowest possible rate increase of the \$196,400,000 that the company is proposing. Their "flyer" says \$196,4 million is an increase of 8.62 percent. I guess that means 8.62 percent more than customers are now charged. Most of us as residential customers feel our monthly utility rates are high as it is — an additional \$13.05 (presumed average monthly increase) amounts to \$156.60 a year. Some medical prescriptions cost \$156.60 or more annually. Monthly medical insurance costs twice \$156.00 or more annually.

I recommend no more than an additional \$5.00 average increase — \$60.00 a year. I am not sure how to determine the percentage of increase, but surely the \$5.00 more a month from the residential customer base is enough to keep EVERGY and its investors afloat. (I could be an unwitting investor, but haven't tried to ferret out all the various places TIAA has my retirement funds invested.)

EVERGY's monthly statement always thanks me for being their customer. I don't know that I have an option. Does the company have a competitor for residential use?

The company regularly asks for increases and I don't know how to determine what is fair for a monopoly. Maybe the residential customer base is decreasing or not expected to increase. Maybe the electrical service demands are greater than the company can provide without regularly increasing the rates. Certainly the linemen/women and people who work to install and repair service need to earn top wages and to be insured. I get that expense. I get equipment costs.

I have limited understanding of anything more than a household budget. I get confused trying to determine Energy's income and expenditures.

At best, I understand that energy demands increase with technology — maybe not so much with consumer use, but with the producers' use and needs. I am assuming that artificial intelligence computers will need loads of energy to operate but do not know the cost. Somehow the additional costs will be passed on to the consumer. Has EVERGY given the Kansas Corporation Commission and CURB an estimate of anticipated AI energy needs for Kansas? (Will AI

eliminate the need for KCC and CURB — compelling consumers to rely on whatever AI generates as answers to questions and plans to proceed?)

I do know that EVERGY and its predecessors have regularly requested rate increases. The procedure seems to be to ask for way more with expectation of receiving an ample portion of the requested amount. Ample is usually more than half of amount requested. Have there been emergency rate increases because the last increase received was not enough?

I appreciate the time you give to serving on CURB and working to advocate for residential consumers. Thank you!

Sincerely

A handwritten signature in black ink, appearing to read "Mary J. Dunlap", written in a cursive style.

TO WHOM IT MAY CONCERN.

I am a retired Person on S.S. and I pay my bill. When I get the bill in the mail.

my last bill run 11/2/13 now that might not sound like much to you but I have to run a oxygen Machine all the time, and sometime I cannot afford it. But I pay it anyway because I like my Credit report for paying my bills on time and some early. I don't know if I can afford Electric if it keep going up all the time. and I don't want to make payment on a bill. How many times are you going to ask for raises. I just wanted to voice my opinion, cause I always get notice that Evergy is wanting to raise the cost again. I can't go to the meeting but if I could I would vote NO this time.

To whom it may concern:

I'm a 79 year old widow now for 14 years. My Social Security is a little over \$1000.00 a month. My home is paid for but see no reason why almost every year it costs almost \$1600.00 in property taxes. To just be comfortable with thermostat set at 68° in the winter, I must prepay \$700.00 in propane each year. My vehicle is a 2009 Ford. To have homeowners Insurance on my 1920 built home and full coverage on my vehicle cost \$292.00 a month. I do not have air Conditioning. I have 2 ceiling fans. Food, electricity and my phone make my month pretty full. Gas for the lawn mower and my truck too. I'm lucky I'm only 4 miles from town.

Walmart had good prices until they ran two of our small town grocery stores out of business. Now they are sky high prices too. They are in control.

Makes it tough for younger generation trying to raise a family too.

To get roughly \$4.00 a month more for each customer is unheard of.

JAN 11 1971

COMMUNICATIONS SECTION

I was with Nestor many years. Nowhere near the problems. You never know when there will be an outage that is not storm related. Several times mid afternoon when I've been canning, off goes the power; in the shower all soapy, ready to rinse off, off goes the power. Unnecessary for that to happen. Your TV advertisements say bigger company, better service — "take with a grain of salt"!! I have 3 meters. House, shop, barn. Nestor use to put all bills in (one envelope)! I have called several times. You at Energy say it can't be done. The mail service is really bad, takes 4-9 days for me to receive all my bills so I can pay them. Some months only receive 2.

Before you go charging us more, get small things taken care of. I'm tired of sending out a new bill and charging more. If I'd want more money I can't just write a letter to Social Security and say I want a raise. Do not # 25-EKCE-294-RTS.

Big shots rule and little people get squashed. Probably give yourself a raise too!!

Re: Docket No. 25-EKCE-294-RTS

Dear Sirs,

I have received information about the proposal for Evergy to raise electric rates by 8.62%. I am writing to register my opposition to this proposal in the strongest way possible. My reasons are twofold:

First, the sheer cost of it will make it difficult for my wife and me to continue to live on our farm in rural Douglas County. So far this year, we have the following electric bills:

January 323.97
February 517.23
March 487.82
April 164.70
May 147.18
June 145.13

At this current rate, our yearly electric costs will be ... \$3,572.06. An 8.62% increase would amount to \$307.91! On the notice we received about the proposed rate increase, it said that the average residential customer would see a monthly increase of \$13.05. Our increase would be about double that amount (\$25.66) each month.

This may seem small and insignificant to some, but it's not to us. My wife and I are both retired, well into our 70's, and living on fixed income. I know it's not your responsibility, but our real estate taxes have increased to \$4,384.43 per year, and our insurance increased from @\$2,700 per year to \$4,300 per year.

So, with taxes, insurance, and electric bills, we are looking at \$12,256.49 per year, or 1,021.37 per month. This does not even include our house payment of \$1,058.34 per month.

The reason I bring all of this other information into this letter is that each entity (Douglas County, Travelers Insurance, and Evergy) asks "only moderate" increases. None of them care about the overall picture that is faced by homeowners. The only people who look out for this "big picture" is us ... the homeowners.

We do not own a big, luxurious home. Our house was built in 1971 and we recently remodeled it ourselves. It's simple, but it's home. Looking at the big picture, it's becoming increasingly difficult to be able to continue to live here with some of these basic costs at \$2,100 per month. An 8.62% increase is not welcome.

Another note about our home. We are frugal. We keep the temperature at a reasonable level and try to be careful and attentive. Our HVAC unit is less than 10 years old, serviced regularly, and in good working order. So, please don't write back and suggest we replace our unit, insulate better, etc.

(continued)

The **second** major reason I am opposed to a rate increase is that Evergy is not responsive to its customers. From May 15, 2022 to July 30, 2023, our power was out 17 times. Here are the actual outage dates:

May 15, 2022
May 18, 2022
June 30, 2022
July 25, 2022 2X
July 31, 2022
August 17, 2022 2X
September 19, 2022 2X
December 22, 2022
January 2, 2023
February 9, 2023
February 18, 2023
July 14, 2023
July 30, 2023
August 16, 2023

This is just a sampling. There have been numerous "brown outs," and numerous outages before and after these dates. All of this is extremely hard on electronic appliances, TV's, etc.

During 2022 outages, my wife had both knees replaced. On several occasions, we did not have power to run the machines used to circulate ice water around her knees as they were healing.

This would all be bad enough, but I called and e-mail Evergy repeatedly. To date, I have never received any reply (phone call, e-mail, text message, smoke signals, social media, etc.) from Evergy. They are not responsive to our concerns. I realize we are one individual farm in the rural area of the county and there are thousands more in the urban areas, but we still need electric service. We try to be as self-sufficient as possible and patient when outages occur. It would have been nice to talk to a real individual when we needed help instead of the endless phone "trees" and recorded messages.

Please do not grant Evergy any rate increase until they get better.

Sincerely,

A handwritten signature in cursive script that reads "Rick + Becky Lamb". The ink is dark and the signature is fluid.

RE: Docket No. 25-EKCE-294-RTS

To Whom it may concern:

We are very concerned about the request by Evergy to once again increase our utility rates. We are in our 70's and live on a minimum income and in the last 12 months, Evergy has increased our "flat rate" payments from \$153 to \$207 per month!

Before long, we won't be able to pay for our utilities as they will be as high as our personal property taxes. We personally do not know of anyone that likes the wind turbines! It destroys wild life as well as hearing for those who live around them. The life expectancy of the turbines is minimal compared to life of power lines.

We live in the older part of town where the homes were built anywhere from the 1800's to early 1960's and there are no buried electrical services and there are trees in vacated alleys and the main thoroughfares that breach the utilities. There have been no "upgrades" for us and we are supporting those in the newer subdivisions!!

This is not fair to us elderly tax payers and should not keep being allowed!

Sincerely,

s/Lawrence & Paula Leach

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

07-02-2025 There is absolutely no reason for we, the customers of Energy here, to pay for this particular rate requested increase, in light of Energy's known record profits of over \$800M. With this amount of rate increase, in just under \$200M, Everygy has more than enough profits, alone, to cover the rate without expecting customers to pay even more. This is a slam dunk decision to reject Energy's rate increase request.

Narrative

07-02-2025 I oppose the requested rate increase. 1. Evergy does not need to guarantee its shareholders - of a PUBLIC utility - a profit. We ratepayers deserve respect as shareholders. 2. Evergy's application may say the request is not to cover the cost of building 2 new natural gas plants (we'll be asked for that later), but it does not address the need to move away from fossil fuels.

Narrative

07-03-2025 This application for a rate increase should be rejected by the KCC. Evergy was given a rate increase a couple of years ago and Evergy's financials appear to be good. Evergy has said they are dealing with inflation, Evergy's customers are dealing with inflation as well. The customers have had to make adjustments for inflation, so Evergy should make adjustments as well instead of asking for a rate increase.

Consumer Opinion **O**
of Petitions Signatures

Narrative

07-04-2025 Please seek to make the infrastructure improvements without raising our rates. We are feeding children and trying to maintain our home under ever increasing property taxes already. Maintenance and repairs to insure our home is in good standing are also much more expensive than in the previous ten years . Homeowners need a break in order to remain homeowners. Continuing to raise utility prices simply pushes more people into apartments and multi family housing. This exchange removes personal accountability and raises crime rates in every neighborhood experiencing this type of change. Personal home ownership is the traditional American dream, and means communities and neighborhoods are stronger and experience less crime and government intervention.

Narrative

07-05-2025 This rate hike will hurt a lot of poor, middle income and elderly people, including myself. All of us are on a fixed income, even middle income folks because they have a set amount of net income that they can spend on kids, groceries, housing, insurance, vehicle upkeep, and utilities. Poor and elderly have it even worse, because they live on an even smaller amount of money. Before you start raising rates, reflect on the amount of money the CEO and other executives are pulling in, and ask yourself if maybe they could take a cut before you raise rates on the poor and elderly.

Narrative

07-05-2025 To the Commission: Understanding the request for rate increases is a difficult task, but I felt it was important to learn about the company history and plans. Customers can appreciate that Evergy wants to expand, diversify its fuel sources to provide electricity, and pay down debts from previous decades and companies. However, this should not be done simply on the backs of the customers. Average families and businesses can Not afford this increase, especially at a time when the economy is only beginning to show small signs of improvement. Wages have not risen for most workers and certainly not enough to offset the large inflation over the past 5 years. I humbly ask you to deny this rate increase or consider only a 1% increase, and require Evergy to submit their own plan to cut costs in order to pay down their debt and run their company more efficiently. We the customers need the commission's help to reject this increase as it is not a competitive market in which customers can look for and find a more affordable option. Thank you for your consideration and assistance in this very important matter.
Sincerely, Jennifer L. Abbott

Narrative

07-05-2025 To the Kansas Corporation Commission, I am writing to express strong opposition to Evergy's proposed rate increase. As a longtime Evergy customer, I currently pay \$134/month on the average payment plan—up from \$120. My household has no choice in providers, and this increase places a real burden on us. My husband, 73, is retired and lives solely on Social Security. I'm 56 and still working, covering all household utilities, which have all increased—Evergy, Kansas Gas, and the City of Topeka's water and trash services. While I receive an annual cost-of-living raise of about 3%, the 8.62% increase Evergy is requesting far outpaces that—effectively erasing any gain. At the same time, grocery prices are at record highs. I'm also managing student loans, a car payment, and medical debt that's burdened me for five years. Like many, I fall into the middle—earning too much for assistance but not enough to keep up. My husband worked as a weatherization director for a decade, and we take conservation seriously. We understand utilities need revenue to maintain infrastructure and pay staff, but Evergy is also accountable to shareholders. What's a reasonable return for them shouldn't come at the expense of working families. This is the first time I've spoken out against a rate hike, but the constant rate increases are unsustainable. I urge you to deny this proposal or significantly reduce it—ideally to no more than 3%. In this economy, Kansans simply cannot afford more strain. Thank you for your time and consideration. Respectfully, Keri L. Renner

Narrative

07-06-2025 Given the state of the economy I believe the monthly increase amount needs to be reduced at a minimum by half. The rise of inflation has caused economical hardship. Every spending on capital projects need to be re-adjusted/put on hold/or delayed until the economy can plateau and recover. Possible transmission line rebuilds should consider going back to wood poles as the cost of steel and the inflation prices on steel have been above 40%, The amount of contractor labor has sky rocketed; therefore, significant capital projects need to be delayed or cut back for a number of years, minimum 5 years or more, for the economy to stabilize and for people to recovery and adjust.

Docket Number **25-EKCE-294-RTS**

Consumer Opinion **O**
of Petitions Signatures

Narrative

07-06-2025 Evergy does very little to manage their costs. They continue to add capacity using green technologies that cost a lot to build and further have much higher \$/kilowatt costs to consumers. How about they take a public vote as to the types of energy, with the associated final costs to consumers publicly displayed prior, as to the types of production that they should add. Further, we all know Kansas is in a extreme weather area and we should expect wind, hail, ice, tornados, etc type storms annually. However, what I see out of Evergy is a complete disregard for being proactive regarding these costs. They will spend millions of dollars after they occur but the amount of non-maintained and neglected lines throughout central Kansas is disturbing. Further, this is leading to more frequent and longer duration outages. The current Evergy management has adopted a posture of reactive rather than proactive, other than rate increases, decision making. Another example of poor Evergy management is the installation of LED street lamps. About 80% of the lamps in my neighborhood have turned purple in color tone. When this started occuring Evergy said it was due to defective lamps and they would replace them. That was 4+ years ago. Despite repeated calls to notify them of which lamps have issues--none have been replaced. Further, there are 3 lamps that have been out entirely for over 18 months and despite being reported by me as well as the city of Manhattan, they have never been repaired. This is Evergy's legal responsibility to maintain these street lamps and they seem to feel no obligation to follow their statutory requirements. I do not support Evergy getting any rate increases. I do support them taking a thorough study at better controlling their costs--both production and maintenance, working harder for the consumer to provide better service, and proactive management.

Consumer Opinion **O**
of Petitions Signatures

Narrative

07-06-2025 I am not in favor of this proposed increase! When a company can return billions of dollars to shareholders during a time when many people are being taxed out of their homes and struggling to put food on the table, I think that company is making enough money. Maybe it would have been wise to return less to shareholders and put off asking for a rate increase? I'm also not in favor of more wind farms or solar farms encroaching on our Kansas farmland and natural habitats. The infrastructure for these green energy products does not biodegrade and leaves the land barren, or worse, contaminated. And while there is a place for limited wind and solar power to supplement other energy sources, wind and solar are not dependable during times of extreme climate. Another point I would like to make is that what may work another state does not make it in the best interest of Kansans. It would be wise for Every to plan and budget better for maintenance and updates and stop squeezing consumers while at the same time giving enormous returns to investors.

Narrative

07-07-2025 Because Evergy is a monopoly and I and its 735,000 customers are a captive audience, I see it improper—in fact, greedy—that: • The CEO makes between 1 and 7 million dollars each year! • The investors want to elevate than their current, passive, guaranteed, no-risk investment of 9.4% return on investment to 10.5%! “A report by S&P Global showed the average authorized return on equity for electric utilities was 9.68%...in 2024.” (KS Reflector 6-9-25) • Evergy’s customers—some of them low-income and/or fixed-income like me and most in my neighborhood—will be mandated to pay to support these ultra-wealthy folks every month from here to eternity! This 15% rate increase is unlikeable several other ways: • It includes clearly outdated air polluting and more costly coal plants! All that transportation from Wyoming and all that asthma-inducing air pollution! • It far exceeds recommendations by its other analyzers, KCC and CURB! • It follows Evergy’s making \$878 million in 2024 and \$816 million in 2023! How much profit-gouging is enough for this bold monopoly?

Subj: Docket No. 25-EKCE-294-RTS

KCC,

I would like to write to please STOP the rate increases. Evergy is out of control in fleecing Kansans. \$13 a month equals \$156 a year. For some Evergy customers that is substantial. As you can see from the charts below, I do my part in lowering my electric usage, but my bill continues to go up. Also, Evergy stock over the same time, has risen from approximately \$24 to \$68. Which means Evergy has taken money from its customers and given it to its stockholders. Why hasn't it taken that rise in stock price and put it toward infrastructure?

Electric Usage

According to multiple reports, Kansas ranks in the top 15 in taxes and fees on its residents. Please bring back sanity to the rise in inflation and the cost of living in Kansas.

Thank you,

David Marshall

Please do not allow this requested increase for the following reasons:

- \$196.4 million is excessive especially on the heels of the most recent increases
- There have been so many increases to utilities in just a few years
- Each month as I look over my bill I question how I can pay it on a fixed income (my AC is on 78 degrees this afternoon). If my frail husband was in better health I might put it on 80 degrees.
- I feel they can make their changes to infrastructure from their extremely high profits, not my bill
- My Social Security cost of living adjustment was totally eaten up by just my increase to my Medicare supplement monthly premium. I won't even tell you how we have had to cut back on medicines and food purchases. We have dined out once since 2025 began. I do not have \$13.05 a month to fund the desires (not needs) of Evergy
- I see new trucks everywhere for Evergy. I drive a 2009 vehicle. Could they delay these types of purchases and save some money for this whim?
- Property tax rates and utilities are driving people from this state. You wish to grow the population of Kansas I understand? Then give us a break! As for us, we are researching a move to MO!

Proposed Evergy Rate Increase

#132490

Kansas Corporation Commission
Office of Public Affairs and Consumer Protection
1500 SW Arrowhead Road
Topeka KS 66604-4027

Docket No. 25-EKCE-294-RTS

Dear members of the Kansas Corporation Commission,

I wish to respectfully ask Evergy and the Kansas Corporation Commission to reconsider Evergy's proposed rate increase of 8.62%.

My wife and I are retired and living on an income that is fixed except for Social Security. This across-the-board increase will have a disparate impact on people like us. Although our Social Security is incrementally increased with inflation, it will not increase at a rate comparable to the rate increase proposed by Evergy. A rate increase, like the one proposed by Evergy, will have a significant impact upon our ability to afford necessities such as food, healthcare and medication.

Individuals cannot look for alternative electrical services as there are no alternatives to Evergy. When a grocery store increases its prices, it is often possible to find another option to limit our food costs. No such option exists regarding Evergy. We are the definition of a "captive audience".

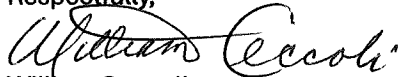

Even seemingly small increases for seniors can have a direct and detrimental impact on our quality of life. To absorb such an increase, retired seniors may be forced to cut back in ways that affect their well-being, such as reducing the temperature setting in our homes during winter or increasing it in summer to save on electricity. This can significantly impact our health and potentially make our living conditions unsafe, especially for those with health conditions sensitive to temperature extremes. Furthermore, the issue of increasing costs has taken on even more importance with the impending undefined tariff increases all of us are expecting.

Increases such as this have a disproportionate impact on the ability of the elderly to save and erode any savings we have. Many elderly people have no savings to deplete creating a situation where some may have no choice but to rely on the charity of others, including the state, to house and care for them. Surely the state does not want to contribute even more resources to those without the ability to provide for themselves.

We believe Evergy has provided quality service over the years we have used their utility. However, Evergy needs to consider ways to limit their increases so that those of us that are living with limited incomes can continue to survive without undo harm. Please consider our needs when you review increases in Evergy's rates.

We ask the Kansas Corporation Commission to assist in making this increase more reasonable for the many elderly residents of Kansas relying on Evergy.

Respectfully,

William Ceccoli

of Petitions Signatures

Narrative

07-07-2025 In general, I'm opposed to anything that will cost me more money. At the same time, I understand the need for infrastructure improvements and the fairest way to HELP pay for those is to spread the cost among EVERYONE. I hope that businesses are expected to pay an increase like residential customers will. I would like to see a simple, public report on how funds are spent now, what they are specifically spent on as well as a similar report outlining specific future projects and their costs. If any of this increase is to be used to continue to pad the accounts of administrators, those figures must also be revealed. The greed must stop somewhere.

Narrative

07-07-2025 Docket No. 25-EKCE-294-RTS Comments Rate Comparison Chart Including Texas for a rate comparison is pure nonsense. The majority of regulated utilities in Texas are within the ERCOT area and its fully deregulated market and is not indicative of the Evergy service area. The Texas data dramatically skews retail rates upward. Conspicuously absent from the states of comparison is our neighbor, Nebraska. Similarly, including Colorado, which has twice the population of Kansas and terrain issues that Evergy has never encountered, is not reasonable. Cherry picking data is in full display. Given the size of the full Southwest Power Pool Real-Time and Day Ahead market areas, those states would be a good choice for valid retail rate comparison. Rate Pilot Program All costs with an experimental program to test some sort of novel rate structure should be fully disallowed in base rates for all customers. If and only if there is a demonstrated benefit to EKC retail customers for the full implementation of such a novel rate plan, then such a retail rate plan could be approved by the Commission and implemented. Including such costs if the pilot program proves to be unworkable or simply refused by retail ratepayers is neither just nor reasonable.

Narrative

07-07-2025 Transmission Expenditures The Southwest Power Pool (SPP) Transmission Working Group (TWG) reliability study process is open and transparent. The SPP Quarterly Project Tracking Report identifies those projects for which a reliability need has been identified and a Notification To Construct (NTC) has been issued. Those projects are not at issue in this proceeding because they are automatically included in rate base through the FERC-approved Formula Rate. Of course, the Formula Rate is a double-edged sword: when SPP directs that a transmission facility must be improved then it increases the transmission capital rate base, but when there are very few mandated improvements required then the annual rate-base true up process, which includes depreciation, can reduce the transmission capital rate base and reduce rates automatically. To be fair, a reduction in the transmission rate base and its resulting reduction in revenue requirements is a central design of the Formula Rate to ensure the utilities do not overbuild in order to artificially maintain revenues.

Narrative

07-07-2025 If you review the Quarterly Project Tracking Report produced by SPP, then compare that to the various transmission lines being rebuilt there is a disconnect. One example was raised by the landowner at the public hearing in Topeka on 16 June 2025 when he talked about the 115 kV transmission line from Tecumseh to County Line. The old wood H-frame line was rerouted and rebuilt using very large single-pole steel structures. That appears to be an excessive capital expenditure in lieu of maintenance. It appears; however, that it is the Evergy business practice to rebuild transmission lines as an alternative to maintenance. I have watched this action play out in real-time as work progresses on the existing 115 kV transmission line from County Line to Goodyear that runs along Northeast 35th Street in Topeka. A very significant majority of the existing single-pole wood transmission structures are being replaced with new single-pole wood structures. That action would lead one to believe that the vast majority of the existing wood poles are no longer structurally sound. While most of the new poles are wood, there are also a number of steel poles being placed in the line. These are not angle or turning structures. New stand-off insulators replacing the existing "wishbone" construction are also being added. Is a new pole required to do that? No. In fact, there are a handful of existing wood single pole structures that are going to remain in service. Replacing only those structures that are, in fact, defective would be "just and reasonable". Is the added expense for steel structures actually justified?

Docket Opinion

Company ID EKCE
Docket Number 25-EKCE-294-RTS

Consumer Opinion O
of Petitions Signatures

Narrative

07-07-2025 As it turns out, the various compliance filings relating to KCC Docket No. 24-EKCE-254-CPL might be helpful for technical review except for the amount of redaction in the publicly available data. I would think that the Evergy practice of substantially rebuilding transmission lines as a substitute for on-going maintenance does not constitute a “just and reasonable” expenditure of capital resources. This action leads to adverse impacts on retail rates, raising them. Accordingly, a very careful and thorough analysis of the the capital expenditures is warranted. Absent that forensic review, the entirety of the “Transmission Expense” component should be denied for this rate proceeding. A subsequent rate proceeding could provide substantial clarity in the decision making process for how Evergy conducts transmission line maintenance. Return On Equity In full disclosure, I am an Evergy shareholder. The current return is quite substantial. There was, in fact, rather compelling testimony in the Docket No. 23-EKCE-775-RTS relating to the ROE of vertically integrated utilities. More importantly, there should be agreement between the regulators of Kansas and Missouri that a single ROE for the entirety of Evergy is maintained equal and reasonable. A comparative analysis of the ROE for all regulated utilities within the SPP RTO footprint would be good starting point for any comparative analysis. An increase in the Return On Equity (ROE) does not appear to be warranted. Respectfully Submitted, Donald D. Taylor, PE Emeritus Topeka, KS

Narrative

07-07-2025 I strongly oppose this rate increase in light of Evergy's recent decision to invest in two expensive (not to mention environmentally damaging) gas plants instead of building up its green energy infrastructure and in light of the law that would allow data centers to get tax abatements. Evergy should not be beefing up its profits on the backs of ratepayers while corporations don't pay their fair share.

Re: DOCKET NO. 25-EKCE-294-RTS

Kansas Corporation Commission

Office of Public Affairs and Consumer Protection

1500 SW Arrowhead Road

Topeka, KS 66604

June 5, 2025

Subject: Opposition to Evergy's Proposed 8.62% Rate Increase

Dear Commission,

I am writing to express my **deep concern about** Evergy's proposed 8.62% rate increase, which would raise the average household energy bill by \$13.05 per month. While this may not seem substantial to some, for Kansas residents on fixed Social Security incomes—such as elderly pensioners and minimum wage workers—this increase could result in serious and potentially harmful consequences.

Many Kansans live on modest, fixed monthly incomes that leave no room for unexpected expenses. I would like to outline six specific and deeply personal ways this increase could impact Kansans, particularly older adults whose budgets simply cannot stretch to accommodate it:

1. **Reduced Heating or Cooling Use:** To afford the increase, some may lower the thermostat in winter or reduce air conditioning use in extreme summer heat. This can be dangerous, especially for seniors who are more vulnerable to hypothermia or heatstroke.
2. **Food Insecurity:** For many strapped for cash, food is one of the few flexible parts of the budget. A higher energy bill may mean skipping meals or buying cheaper, less nutritious food, which can negatively affect their health and immune systems.
3. **Medication Rationing or Skipping:** With prescription medications already taking a large portion of monthly income, a utility rate increase might force some seniors to cut pills in half or skip doses, putting their well-being and independence at risk.
4. **Loss of Connection and Isolation:** Increased utility costs may require cutting back on other services such as phone or internet bills. This isolates seniors from family, telehealth appointments, and vital information, especially in rural areas where social connections may already be limited.

5. **No Emergency Savings or Safety Net:** A \$13 increase each month adds up to more than \$150 a year—enough to make the difference between being able to cover a car repair, medical copay, or home maintenance emergency and falling into debt or crisis.
6. **Emotional and Mental Stress:** The anxiety of deciding between food, medicine, and staying warm or cool can weigh heavily on seniors. Chronic financial stress can exacerbate depression, cognitive decline, and other health problems.

It is also important to note that concerns voiced during previous rate increase proposals appear to have been disregarded, leaving many Kansans feeling unheard and unsupported. While Evergy claims to offer programs to assist those in financial need, these programs are very difficult to access and do not meet the actual demand in our communities. Rather than providing meaningful assistance, Evergy has instead issued shut-off notices to seniors who simply cannot keep up with rising utility costs—threatening their health and safety.

I have personally witnessed the toll this has taken on my own aging parent, who was forced to go without adequate air conditioning during the summer months due to unaffordable energy bills. This created a dangerous situation where the risk of heat stroke or worse was very real. It is unacceptable that our elders should suffer under the weight of corporate decisions that fail to consider their dignity, safety, and basic human needs.

For these reasons, I respectfully urge the Kansas Corporation Commission to reconsider the approval of this rate increase. I ask that you require Evergy to propose more equitable alternatives, such as expanded relief programs, reduced rates for low-income seniors, or a phased-in increase with safeguards for vulnerable populations.

Thank you for your time, your service, and your attention to those Kansans who are least able to bear additional financial burdens.

Sincerely,

Baiba Z. Šedriks

Narrative

07-09-2025 Dear KCC, It is outrageous that Evergy is asking for yet another rate increase for those outside the Kansas City area before the previous one has even been approved/disapproved. There is no end to their exploitation of rural Kansas customers. By their estimate, this proposal will increase monthly bills for each customer by \$13.05. With our economy already unstable, the future uncertain, predictions for continued utility rate increases after the recent passage of the BBB reconciliation bill in Washington, and diminishing income for Kansans especially in rural areas, this proposed increase is absurd. As retirees, my husband's and my income is fixed, if not decreasing due to uncertainty in Social Security and Medicare. We can't afford utility increases. Please deny this request.

Narrative

07-09-2025 I am opposed to an 8.62% rate increase, since the current rate Kansans are paying for their electricity is higher than three other adjacent states. If Evergy had not installed so many wind turbines which require power plant backups, consumers would not be paying current high rates for electricity. In addition, I assume that Evergy is reaping the benefits of buying excess power from solar users across the state at greatly reduced rates to resell to end users at a profit margin. I understand Evergy's request after a 5 year moratorium, but the increase should be 5%, not nearly 9%. I hope the KCC will reconsider Evergy's request for such a large rate increase.

Narrative

07-09-2025 I am commenting on behalf of our family that has owned the farm southeast of Udall, KS at 5222 72nd Road for over 50 years and my brother currently resides on the farm and takes care of it. The rates have risen too much in the past and now Evergy wants to again raise our monthly rate. Farming is expensive and we are not getting younger to increase our income so this is asking too much of us and many others in our circumstances. It is important that we conserve our resources and this takes away some of what we need for farming the land. Evergy's request is outrageous and diminishes our ability to use our resources wisely. We sincerely and respectfully urge the KCC to vote against Evergy Kansas Central 25-EKCE-294-RTS request. Thank you.

Narrative

07-10-2025 I oppose the requested rate increase by Evergy. Evergy has revenue in the hundreds of millions every quarter, pays roughly .67 cents per share back to investors instead of returning those funds back to operation and maintenance of the core equipment that produces the product they sell or keeping rates low for customers. Shareholders don't make and transport electricity! Evergy customers pay those dividends with our bill every month and they keep asking for more! Evergy pays outrageous management salaries and perks and keep asking for more! Evergy unnecessarily spends rate payer money promoting the company through sponsorships of sports teams, charitable giving, social causes that are detrimental to our society such as DEI and ESG, TV ads and the like... Who are they competing against for their customers to justify those expenses? Evergy wants to include a program offering monthly credits to income eligible customers. How asinine and Socialist is that? Raise rates on customers that can pay their monthly bill only to turn around and give some of that money right back to customers they just outpriced by continually raising rates! Is there any other industry that spends rate payer money on Energy Saving Campaigns telling those customers how to use LESS of the product that is being sold to them? Very bad business model! What decisions would Evergy management make if they had to actually compete for their customers? Evergy needs to get back to their core business of providing the least expensive and reliable (BOTH Coal and Natural Gas) electricity for US, the customer/rate payer, and stop wasting money on their socialist programs that don't make them money... Customer/rate payer, Michael Thompson

Narrative

07-10-2025 Climate change is real, and perfectly normal. AGW is not real. It is a fabrication by people who have figured out how to profit from its acceptance as real. CO2 is a vital compound for life. The corruption and disinformation supporting a rush to solar and wind for generating electricity is criminal. As electrical demand grows, we need more baseline generating capacity. Coal is the most economical. Nuclear is a close second. Natural gas powered plants throttle very easily. Wind and solar are unreliable. If you want to force wind and solar generating upon us, then you should pay for it, not us.

Docket Number 25-EKCE-294-RTS

Consumer Opinion O
of Petitions Signatures

Narrative

07-10-2025 I have been an Evergy customer for 7 years, previously I was a KCP&L customer in the Kansas City area. I would like to first say that as a generality, I am not opposed to rate increase. I am aware that the costs of goods and services may rise over time. That being said, it is my opinion that the good or service should either stay the same (assuming it is adequate or better) or it should improve with the cost increase. I do not feel that is the case here. In the 7 years of being an Evergy customer in Tonganoxie I have lost power more times than in the nearly 3 decades in the Kansas City area. It does not make sense to me that a small town's grid is more vulnerable to power surges and outages than a major metropolitan area. Additionally, our monthly bill cost is consistently too high for the poor service that is received. An additional average monthly increase of \$13.05 would be appropriate if my power did not go out at least twice per month during the warm months and every other month during the cold months. Whatever infrastructure issues there are that are leading to such frequent outages in the North half of Tonganoxie need to be urgently addressed to justify such an increase of cost.

O

of Petitions Signatures

Narrative

07-10-2025 First, I am on a fixed income (Social Security retirement) and very simply, an additional (estimated) \$13 a month is a problem for me, especially with other costs rising significantly. After research I find that Evergy reported \$878 million in profits for 2024 and is seeking a \$196 million rate increase in Kansas. They are profit-making and investor owned. Evergy paid \$597 million in cash dividends to its stockholders in 2024, indicating that it generates profits that are distributed to its owners. There is a residual profit from 2024 of \$281 million. I consider it unreasonable for them to require almost \$200 million more. In financially uncertain times like these, I believe that profit-making companies have a responsibility not only to investors but to the people they serve. Evergy is in practice a monopoly and we have no reasonable alternative to go to if they become unaffordable. I ask you please to consider the impact on the many, many low and fixed income customers who will be impacted by this. The last time I checked their assistance program had an unreasonably low income threshold (I net \$1275 a month and make too much to qualify). And I dislike asking for help with something so essential - there are others who are even worse off than I am. Perhaps Evergy and their investors, who will not suffer noticeably from this rate increase, could consider reining in their expectation of profits on the backs of those who cannot afford it. Thank you.

Narrative

07-10-2025 We are a family-owned and operated agricultural business, and we sell our products up to two years in advance. Because our prices are locked in well ahead of time, a sudden or significant increases in utility costs have a direct and harmful impact on our ability to remain competitive and financially sustainable. While we understand the need for rate adjustments—especially given the rising costs of inputs—we strongly oppose the sizable increase currently proposed. Such a steep change would cause us and many others in the agricultural sector serious economic harm. That said, we are not opposed to a structured and gradual increase that allows businesses like ours time to adapt and plan accordingly. This kind of measured approach would strike a balance between the utility's financial needs and the economic realities faced by its customers. It's important to note that Kansas already has higher average electricity costs per kilowatt-hour than all of our surrounding states, with the exception of Colorado. While Ron Klote has argued that Kansas rate increases have been less than those in the region, that is a poor justification when our current rates are still significantly higher. The comparison should be based not only on the rate of increase but also on the absolute cost burden placed on consumers. We urge the KCC to consider the broader economic implications and the competitiveness of Kansas businesses as they evaluate this proposal. Thank you for your consideration Greg Nelson Nelson Poultry Farms Inc.

STATE
CORPORATION
COMMISSION

JUL 14 2025

PUBLIC AFFAIRS
AND
CONSUMER PROTECTION

July 10, 2025

To the Kansas Corporation Commission,

We are a family-owned and operated agricultural business, and we sell our products up to two years in advance. Because our prices are locked in well ahead of time, a sudden or significant increases in utility costs have a direct and harmful impact on our ability to remain competitive and financially sustainable.

While we understand the need for rate adjustments—especially given the rising costs of inputs—we strongly oppose the sizable increase currently proposed. Such a steep change would cause us and many others in the agricultural sector serious economic harm.

That said, we are not opposed to a **structured and gradual increase** that allows businesses like ours time to adapt and plan accordingly. This kind of measured approach would strike a balance between the utility's financial needs and the economic realities faced by its customers.

It's important to note that **Kansas already has higher average electricity costs per kilowatt-hour than all of our surrounding states, with the exception of Colorado.** While Ron Klote has argued that Kansas rate increases have been less than those in the region, that is a poor justification when our current rates are still significantly higher. The comparison should be based not only on the rate of increase but also on the absolute cost burden placed on consumers.

We urge the KCC to consider the broader economic implications and the competitiveness of Kansas businesses as they evaluate this proposal.

Thank you for your consideration

Greg Nelson

Narrative

07-10-2025 We here will be hit hard by KCC if this rate change is approved while certain residents east of here will experience no increase and maybe even a reduction. Tell EVERGY to use 3/4 or more of 2024 net income to build their plants. As is customers pay for the build and then get charged for new plant production. No one gets their cake and gets to eat it also. That's exactly what EVERGY wants. Stop it or severely reduce the increased to maybe 1/4 of what is being asked. Thank you for decreasing Evergy's rate increase request if approved. Additionally, require a blanket increase for all Evergy customers instead of targeting specific areas and giving a rate increase pass to other areas. Evergy's rate hikes didn't happen in a vacuum — they were shaped by Democrat-backed policies and quiet lobbying. In the name of clean energy and climate action, Democrats supported mandates and subsidies that let Evergy build more infrastructure, retire coal early, and raise rates — all while boosting shareholder profits. Evergy lobbied heavily, especially targeting Democratic leaders like Governor Laura Kelly, knowing they'd back "green" investments with little oversight. The irony? Kansas families are paying more than ever for electricity, while Evergy cashes in on subsidies, builds unneeded plants, and hides behind climate buzzwords. It's corporate greed, enabled by political cover.

Consumer Opinion O
of Petitions Signatures

Narrative

07-11-2025 In 2023 Evergy increased rates by 3.54% for an additional \$4.64 per month. In the grand scheme of things, that is not alot but when everyone is already struggling to pay their bills that adds up. 2 years later, Evergy is requesting yet another 15% increase adding an additional \$13.05 to our monthly bills which is quite a bit of money when customers are already faced with high prices & are having to make difficult decisions on what they can afford. This is to recoup costs already spent. However, here is what Evergy has earned through the last rate increase. Evergy reported full year 2024 earnings of \$873.5 million, up from \$731.3 million in 2023. Adjusted earnings for 2024 were \$877.9 million, up from \$815.6 million in 2023. I don't think that a 15% rate increase is justified to pay for the rate of return for their shareholders. One of the big movers on that, is they're asking for an increase in the rate of return for their shareholders," Zakoura said, adding that Evergy wants their shareholders to see a 10% to 10.5% rate of return. If the Kansas Corporation Commission approves several rate increases Evergy is requesting, Evergy Kansas Central customers will find their electric bills have increased by over 33% since 2022. In the meantime, the utilities are constantly asking for rate increases while wages go nowhere. Just because Evergy has a monopoly for electricity does not mean that we as rate paying customers should have to help pay for the shareholders equity or to recoup costs already spent. Evergy is already making millions of dollars that can be used for these upgrades, infrastructure & new plants. You have to invest in your business in order to keep moving forward. However, that doesn't mean earning millions & then passing that cost on to customers.

Narrative

07-11-2025 As a customer of Evergy I oppose this rate increase! Maybe you should stop wasting money on wind and solar and focus on energy production that works 24/7 & 365 days per year. Also, you should review the salaries of your top executives and bonus payouts before you saddle Evergy users with this egregious rate increase. I'm not happy at all with Evergy and these continual rate increase proposals. Customers have no options for other energy providers and there is no competition in this market to keep pricing reasonable and innovation & efficiency high. You could cut your budget by charging the Panasonic plant the full amount they owe the residents of De Soto and stop passing the cost of that plant onto your customers. Thank You, Jim Cameron

Narrative

07-11-2025 Kansas Corporation Commission: I am writing on behalf of the Abilene Public Library about the rate changes proposed by Evergy in Docket # 25-EKCE-294-RTS. I believe that the public is not as aware of the impact that the proposed rate changes will have on businesses as they are about the residential impact. I have used past bills to calculate the increase in my library's electricity expenses following the proposed rates under the Small General Services rate. Under Evergy's proposal my library can expect to see an increase of over \$4,000 to our yearly electricity bill. Under the plan proposed by the KCC Staff our bills would still increase over \$3,000.00 a year. Public libraries are often the only free places in the community where people can go to cool off in the summer or stay warm in the winter. Libraries are supported by local property taxes so increasing our costs also directly affects homeowners. By raising the rates of tax supported entities such as libraries, schools, and hospitals you are asking taxpayers to pay for that increase as well as the increase to their own residential accounts. I would urge you to not accept a rate increase at all at this time. If a rate increase is necessary to support infrastructure, I would support a proposal that does not increase Evergy's profits but only those necessary infrastructure changes. I would also urge you to propose that Evergy create a rate structure for non-profit or educational organizations like public libraries that would reduce the burden on homeowners. Sincerely,
Wendy Moulton, Director Abilene Public Library 209 NW 4th Street Abilene, KS 67410

Narrative

07-13-2025 I've submitted so many comments in opposition to these rate proposals that I'm exhausted. It is the day before the deadline, and with everything currently going on in America, I don't have the time or energy left to line by line all of the reasons that this is ridiculous, ludicrous, and insulting to the customers of Everygy. Everygy makes hundreds of millions of dollars in profits every single year. Asking for higher consumer price rates for the purpose of better investment returns for Everygy's shareholders is one of the most cynical and disgusting things that I've recently heard amongst the litany of abuses and capitalist captures going on in the United States currently. You don't need me to tell you how absurd it is to ask for higher investment returns when the Big Beautiful Bill just passed, allowing for an even larger wealth distribution to flow up to the super wealthy. You don't need me to tell you how absurd it is to ask for more money from us, when wages aren't increasing, and yet Everygy, and every other bill, is already increasing. You don't need me to tell you how absurd it is that as climate change forces our summers to be hotter, and our winters to get colder, we are spending more of our money on winterization IN ADDITION TO more money ALREADY TO EVERYGY to run our A.C. and heaters harder! I don't have to tell you all of these things because you knew before you even read this that this request is [REDACTED], and it's insulting that they even asked for it after JUST asking for us to pay for their brand new methane plants and solar facility. Ask your investors for the [REDACTED] money. I'm eating leftover pasta and peanut butter and jelly sandwiches every day in order to get by; what the [REDACTED] is Everygy doing to cut its fat?

Consumer Opinion
O

of Petitions Signatures

Narrative

07-13-2025 In 2023, Everygy proposed a 7.5% hike in our electric bills. Now they want an 8.62% raise in our rates. We have been informed that this would equal about a \$13 increase in our bill monthly. \$13 is approximately 13% of my grocery bill per week, that is if I spend \$100. That is too much of a loss for me, , and it means that I will probably have to cut back on what I buy at the grocery store. Or I will have to cut back on some other needed items. A 10% hike would mean I would need to cut back on \$10 of my grocery bill. That might be more manageable, although still difficult. I think it would be even much harder for a person with less disposable income than I to afford the groceries that they need. Please consider this when raising the price of our electric bill. Thank you.

Narrative

07-13-2025 Hello, it's discouraging to hear about this rate increase at a time when so many Kansans are struggling to make ends meet. Mr. David Campbell, (Evergy's Chairman, President & CEO) has a 2024 base salary listed as \$1,056,000 with a \$1,207,800 actual award paid in 2024. Can you understand why those of us who live paycheck to paycheck are strongly opposed to this rate hike, especially when seeing this level of corporate earnings information? Thanks for your consideration.

07-13-2025 I am opposed to this rate hike. In a time when everything, food, gas, taxes, insurance rates ... are rising and my paycheck gets smaller because of taxes, I am just wondering where the extra money to pay for the increase is going to come from. I am 62 years old and still working because I have bills that need to be paid. I guess I can get a second job. My husband is retired and on a fixed income. I am so tired of the corporate and governmental greed. This company makes billions of dollars and I live in fear of becoming homeless. Such a sad state this country is in. I fully oppose a rate hike. I truly don't think this corporation needs the money.

07-13-2025 Everygy always promises improved services, but with each new rate hike we still have the same problems. Outages on clear days. Days with no storms or bad weather, yet the power goes off and on, putting needless wear and tear on appliances. No explanations are given. A new rate increase is just another greedy money grab from Everygy. The economy is terrible. Food is more expensive.. why does Everygy further burden customers with a rate hike again. Unfair.

07-14-2025 I do not agree and I am opposed to Evergy's rate increase. We do not have an option in who we get to choose for our electric utilities. It seems quite unfair the amount of quarterly profits Evergy receives at the expense of their customers when their customers and senior citizens alike are having difficulties with the rising costs of basic necessities due to inflation. Please strongly consider how this rate increase will negatively impact all customers who do not have the means to afford another rate increase.

Narrative

07-14-2025 Sierra Club, Kansas Chapter public comment on Evergy's Rate Case: Docket 25-EKCE-294-RTS. Position: Opposed Submitted by Zack Pistora, Chapter Director, Sierra Club - Kansas Chapter Address: PO Box 27, Lawrence, KS, 66044. zack.pistora@sierraclub.org Here is our comment in full: On behalf of the thousands of Evergy Kansas Central (EKC) customers who are among the nearly 18,000 members, supporters, and action-takers of Sierra Club in Kansas, the Sierra Club asks the Kansas Corporation Commission to reject Evergy's request for a \$196.4 million (8.62%) rate increase for EKC customers, or any proposed settlements, unless significant regulatory reform is incorporated to align Evergy's rate recovery with more meaningful and accountable public benefits for Kansans. Before we get into the specifics regarding our arguments pertaining to Evergy's rate request, let us remind Commissioners of their awesome responsibility in promoting the public interest first and foremost. Clearly, the power sector and electric utility industry in the United States are undergoing significant transformation right now because of new and extraordinary circumstances related to increasingly electric-dependent lifestyles and society, the rise of power-hungry data centers and artificial intelligence, and increasing hardship presented by extreme weather and anthropogenic climate change. You as regulators must react to these dynamics and adapt your regulatory mechanisms accordingly to maintain the public interest in public utility matters. In our view, for your purposes as Commissioners, promoting the public interest in regulating electric utilities involves the assurance of safety and 'efficient and sufficient service' by public utilities.

25-EKCE-294-RTS

Consumer Opinion
O

of Petitions Signatures

Narrative

07-14-2025 In our view, Evergy's continued dependence on coal-fired power plants is a primary factor in driving increased expenses and therefore cost recovery year over year. Evergy's 2025 Integrated Resource Plan proposes even more expensive, fossil fuel-burning power plants to meet industry demand. This reliance on fossil fuels are not only costly dollar-to-dollar from a levelized cost of energy standpoint compared to other (clean) energy solutions, but it's due time that our regulators recognize and factor in the added social costs involved and absorbed by Kansans in using out-of-state, polluting and health-harming energy resources. Just the social cost of carbon emissions alone as analyzed by the University of Kansas' Institute of Policy and Social Research of U.S. EIA data amounts to an added ~\$51/megawatt-hour for coal and ~\$21/MWh for gas. It doesn't appear these costs, nor the socialized health impacts, value of water consumed, or other externalities get incorporated into the KCC's assessment in reasonable cost recovery or prudent investments. It's our understanding that Evergy spends about \$500 million of its customers' money annually purchasing coal from Wyoming to fuel its power plants. Soon they'll spend much more than that on Oklahoma and Texas gas. This is money that could be spent on peak-power reducing clean energy investments in Kansas without the externalized social costs that Kansans face with the loss of water supplies, absorbed public health costs from air pollutants, or ecological damages (including to our climate and atmosphere). Innovative demand side management, grid enhancing technologies, clean repowering (storage and solar co-sited with existing fossil fuel generation) and other clean energy solutions are not being fairly considered or integrated as first-priority resources given their economic and environmental advantages compared to traditional, "burn-and-boil" steam turbine power technologies.

Narrative

07-14-2025 The KCC should push Evergy to reduce costs by accelerating the transition away from fossil fuels and toward affordable, reliable clean energy to protect our communities from the worst impacts of pollution and climate change. Please act in the interests of Kansans by signaling disallowance of continued coal plant costs, and holding Evergy planners accountable to accurate clean energy reliability and cost assumptions. The next five years are make-or-break in the electric sector for stopping climate change and helping vulnerable low income families. Yet Evergy is raising rates, giving record profits to investors and not taking steps to opening possibilities for other energy generating operations to contribute to our local and regional electric grid. Evergy's regulators must move Evergy into the future by incenting affordable, reliable clean energy investments while lowering costs, especially for low-income customers. Traditional cost of service model forces regulators with small budgets to try to meet the public interest while sending utility incentives to (1) own the most expensive infrastructure possible, (2) increase KWh sales, (3) ignore fuel pass through costs, and (4) resist any solutions they don't own as competition. Incremental performance-based ratemaking allows regulators to pursue a more accurate and responsible least cost reliable solution. Additional ideas include:

Narrative

07-14-2025 #1 Measured Energy Efficiency as capacity, can expand from hundreds of homes and businesses to thousands. Move from 0.4% to 2.4% per year: utilities and private sector get return on investment based on accessible, transparent, accurate peak energy savings. Meet 80% of additional projected electricity capacity needs by 2030, according to RMI and DOE studies. These clean energy solutions are deployable in the next two to three years and save Evergy customers billions of dollars compared with large combustion cycle gas plants. #2 Demand Response and Virtual power plants: collections of small-scale energy resources like EVs, smart thermostats, and home batteries aggregated together can provide at least 60 GW of on-peak capacity by 2030, deploying much faster than traditional infrastructure (in as little as 6–12 months). #3 Clean repowering: Evergy renewables and storage sited at existing interconnection points, co-located with existing fossil generation, approval in a year or two vs. 4–7 new. #4 Reconductoring: ½ cost of new lines, reduces wholesale electricity costs by 3% to 4% nationally, producing \$85 billion in system cost savings and unlocking the possibility of 90% clean electricity by 2035, according to a Goldman School/GridLab.

Narrative

07-14-2025 In sum, this rate request is too simply high given the level of service provided to Kansans. There are certainly prudent costs associated with this rate increase - renewable energy investments, “stay connected” efforts to help low-income customers, and worthwhile transmission, electric circuit spending. However, the lion's share of their plans continue to sink customer dollars in high cost coal plants. The company shouldn't be rewarded by how much it spends, but rather by performance metrics, like keeping costs low, helping more Kansans save energy, reducing power outages or involuntary shutoffs, achieving resiliency through distributed, dynamic energy systems, and generating more energy without pollution that negatively affects Kansans' well-being. Thank you for your attention and service to Kansas. Evergy made over \$800 million in earnings last year; there is no need to make Kansas ratepayers have to endure more costs when the public utility can absorb those costs themselves. Please keep Evergy in check.

Re: Evergy's proposal for a rate hike increase

To Whom It May Concern:

As an El Dorado homeowner and customer of Evergy, I am opposed to their request for a rate increase that would amount to 15% for residential customers. Evergy has sought repeated rate increases during the entire 10 1/2 years that I have been their customer. They seem to take great pride in sharing about how much they have invested in renewable sources of energy such as wind and solar. Generating power from wind and solar sources is both very expensive and very unreliable. You basically have to have complete redundancy from a reliable energy source such as fossil fuels or nuclear to offset those times when the wind is not blowing or the sun is not shining. Additionally, the maintenance costs for wind generation are atrocious. I know something about this because I managed a very large operation where we generated all of our own power for many years. Before making that investment, we looked at both wind and solar carefully. Evergy needs to focus on providing its customers with the most economical, reliable power available and maintaining their distribution system to a high standard of reliability. I do not want to have to pay for their green energy fiasco. Our nation has spent hundreds of billions of dollars trying to force alternative energy systems, which are not economically viable on their own merit, down the throats of consumers who do not want them.

I urge the Commission to deny this rate increase and advise Evergy to focus on economical energy production for their customers and scrap their wasteful, unreliable green energy program.

Thank you for your consideration.

Sincerely,

Marc Roth

To: Kansas Corporation Commission

Reference: Docket No. 25-EKCE-294-RTS

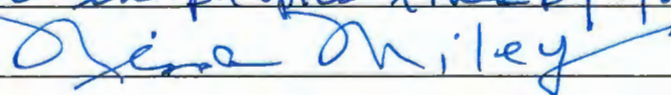

I have never made a comment about any proposed rate increase for utilities because have never see one denied. So, felt a waste of my time to comment.

However, after you allowed Kansas Gas to increase its basic service fee from 14 to 21, a 50% increase, I had to write!

I am an 83 year old woman living alone in my home on a fixed income. I cannot type nor send emails because I have an impaired hand. Here I am, taking pen to paper to ask you to consider fairness as you study Energy's request. I am thankful every day that I have reliable gas and electricity. I am frugal in the use of both to the point of discomfort.

A fair rate increase would reward customers like me by basing Energy's increase on the amount of electricity used. If Energy truly cares about helping people pay their bill, not for some charity gimmick, then help them save by rewarding them for the thrifty use of their electricity.

A rate increase on a service fee is the same for me, with my little money, as the man next door making \$200,000 a year. Ask you to recognize such inequality. You can make difference in people's lives by your decisions.

Sincerely,  Nina Miley

RE: Docket No. 25-EKCE-294-RTS

July 9, 2025

To Whom It Concerns:

In regards to this application requesting a \$196.4 million rate increase for Evergy Kansas Central customers I am again writing to say that such an increase is not in the interests of Kansas customers nor of Kansas itself.

This proposed rate increase is in addition to the increase requested less than a year ago to facilitate creation of new power plants and to support the Panasonic plant in De Soto. As I wrote regarding that increase, Kansas families are already struggling to make ends meet and such large increases can only make that worse. Especially increases which are not a requirement of maintaining infrastructure or to offset rising costs, but instead are focused on increasing future investments. Such investments should come out of the companies profits, not be added on to customer costs. Nor will it benefit Kansas to increase their energy generation for sale out of the state while residents of this state are unable to afford their own power needs.

In short, many residents are getting tired of struggling to pay for public utilities like Evergy which seem to be padding their own pockets more than actually providing a public service. Rate increases proposed solely as a means to increase Evergy Kansas Central's revenues are not welcome and not necessary. The Kansas Corporate Commission should consider how best to meet the needs of the residents of this state, not how to help large companies make more money elsewhere.

Thank you for your time.

Sincerely,

Rebecca Tolbert
