

**BEFORE THE STATE CORPORATION COMMISSION
OF THE STATE OF KANSAS**

In the Matter of Addressing the COVID-19)
Pandemic in the State of Kansas) Docket No. 20-GIMX-393-MIS

**INFORMATIONAL FILING OF EVERGY METRO, INC.,
EVERGY KANSAS CENTRAL, INC. AND EVERGY KANSAS SOUTH, INC.
REGARDING RESPONSES TO COVID-19**

COME NOW Evergy Metro, Inc. (“Evergy Kansas Metro”), Evergy Kansas Central, Inc. and Evergy Kansas South, Inc. (together as “Evergy Kansas Central”) (collectively referred to herein as “Evergy”), and provide the following Information Filing regarding Evergy’s response to the COVID-19 pandemic:

1. As this Commission is well aware and recognized in its Emergency Order Suspending Disconnects issued on March 16, 2020, in the above-captioned docket (“Emergency Order”), the current Coronavirus (“COVID-19”) pandemic is confronting the world and the United States with a variety of fundamental and even unprecedented health, economic and social challenges. A number of governmental and private sector measures aimed at restricting travel, crowd sizes, the operation of schools, businesses, and churches as well as sporting and other events have been implemented in an effort to mitigate the spread and impact of COVID-19. As a consequence of these measures, many of Evergy’s customers are being forced to stay at home for lengthy periods of time and avoid work, social gatherings and other interactive activities.

2. As these events unfold, Evergy is committed to avoiding any utility-related actions that would impair the ability of its customers to remain in their homes or obtain vital services and thereby help mitigate the spread of COVID-19. To that end and consistent with the Commission’s Emergency Order, Evergy is temporarily suspending payment related disconnection activities for all customers and will waive late payment charges that might accrue for service provided on and

after March 1, 2020 for residential and small general service customers and add payment agreement options. Evergy's press release announcing the details of these plans is attached hereto as Exhibit A.

3. Evergy is also taking a number of steps to optimize the number of customer service representatives ("CSR") available to take calls from customers. However, the availability of customer service employees is highly fluid and dependent on various government mandates and school closings. The steps Evergy is taking to optimize CSR availability and address the COVID-19 pandemic internally include:

- Personal care: The best defense for reducing infection risk is personal conduct. We expect our team to utilize these items to reduce the risk, such as handwashing and social distancing.
- Sanitation practices: Ensure that all surfaces are cleaned and disinfected routinely, in addition to what custodial staff are currently doing.
- Islanding and distancing: Beginning Monday, March 16, 2020, Contact Center Operations will make use of alternate work locations.
 - We plan to shift 10-20% of the workforce to alternate work sites to provide islanding and to avoid having all critical resources in one location (each center). Additionally, more distancing within the primary facilities will occur as a result of moving personnel to alternate sites.
 - Supervisory presence will still be a business requirement.
 - Once identified, the personnel will work at these office locations until further notice.
- Work from Home: Contact Center Operations has work from home personnel (AHA: At Home Agents). Approximately 10% of the current front line (Customer Service Representatives) workforce works from home today. Aligned with company communication, CCO leadership is making reasonable effort to increase the number of work from home positions.

- Beginning March 17, 2020, we will deploy a limited number of additional work from home CSRs.
 - CCO leadership will continue to monitor and adjust as necessary.
- Inter-office travel: All staff shall discontinue travel between offices. We need to work from home if possible, and when personnel are required to report to an office, they will remain at that office.
 - Technology utilization: In our business, there is a need for meetings and other communication. We will leverage technology whenever possible to promote collaboration and business need.
 - Team meetings with Meals: Effective immediately, there shall be NO buffet style meals served in Contact Center Ops. Boxed/Individual meals are provided when appropriate.
 - Reporting: Any and all personnel are required to report to through their management chain immediately with potential exposure or symptoms associated with the coronavirus COVID-19. The employee shall follow corporate direction for reporting through the HR department as well. It is required by leadership staff to report any known information concerning the illness all the while maintaining HIPAA requirements.
 - Future Considerations & Response:
 - Expanded local, state, and/or federal guidelines: These may have resulting impact on availability of resources. Example: Extended school closures could have larger impact on Contact Center workforce given the make-up of personnel.
 - Direct exposure response: Should personnel at a Contact Center location (either primary and/or alternate) have direct exposure, measures may include quarantine of larger group of available resources resulting in less personnel to serve.
 - Expanded company policy: As result of response to local, state, and/or federal guidelines the company may relax policies to support these decisions which could impact availability of resources.
 - Response: Contact Center leadership will continue to monitor, communicate, and adjust as needed in order to

continue to provide the best service possible however if workforce was severely impacted, we would look to identify the most critical customer needs (calls) to handle.

4. Evergy is not currently experiencing customer service issues with reliability or in its contact centers; however, there is a possibility that circumstances caused by the COVID-19 pandemic could lead to such issues. If Evergy sees a change in the status of its reliability or customer service statistics, it will let Commission Staff know of the change in a timely manner. Additionally, if such impacts were to occur, those impacts would likely qualify as an extraordinary event and would be excluded from the calculations done pursuant to the Service Quality and Reliability Performance Standards established in Merger Condition 36 of Attachment A of the Settlement Agreement approved by the Commission in Docket No. 18-KCPE-095-MER.¹

5. Evergy intends to keep the Commission apprised of the situation related to COVID-19 and any future changes in how Evergy is operating through informational filings in this docket.

WHEREFORE, Evergy requests that the Commission take notice of this informational filing and hold this docket open as a repository for possible future filings related to COVID-19 issues and information.

¹ See Order, Docket No. 18-KCPE-095-MER (May 24, 2018) (approving Non-Unanimous Settlement Agreement submitted on March 7, 2018). The Non-Unanimous Settlement Agreement, Proposed Quality of Service Commitment Reporting Definitions and Procedures, Attachment 4, p. 2 indicates that:

Extraordinary Events: Certain extraordinary events affecting the Company’s Kansas and/or Missouri electric operations may occur from time to time, which: (1) are beyond the control of the utility, such as an act of nature, and (2) may affect the utility’s ability to meet the service metrics proposed. Upon the occurrence of an extraordinary event as that term is further defined below, the affected utility, KCP&L and/or Westar, shall document the event and its impact on the utility’s customer operation or distribution operation performance, as applicable.

The term “extraordinary event” means an event beyond the control of the utility, which shall include acts of God . . . epidemics . . . acts, orders, laws or regulations of government authority . . .

Respectfully submitted,

Evergy extends payment options, waives late fees in response to coronavirus

KANSAS CITY, Mo., March 17, 2020 – In addition to the suspension of disconnections announced last week, Evergy will waive late fees and add payment agreement options for residential and small business customers as the coronavirus continues to affect local communities, causing financial hardship for some.

“These measures reflect Evergy’s commitment to our customers and communities as we face uncertainty in light of the coronavirus,” said Terry Bassham, Evergy president and chief executive officer. “We serve our communities and it is important to us that we are there for our customers during this crisis. The steps we are announcing today will hopefully provide some relief for customers worried about the near future.”

Evergy announced Friday its temporary suspension of nonpayment service disconnections for residential and small business customers. Today, the company took several additional steps to help its customers. Late fees will be waived, and residential and small business customers who had been disconnected prior to Friday’s announcement may re-establish service by paying one-twelfth of their account balance. These changes will be in place through at least May 1.

While service won’t be disconnected in the coming weeks, Evergy encourages customers to continue to make payments toward their energy use to avoid higher balances later. Evergy customer service representatives can assist customers with payment arrangements and budget billing options. In addition, by calling 2-1-1, customers may learn about community resources for financial assistance. Customers will continue to receive reminders, including collection notices, calls, and texts even though they will not be disconnected. These notifications are important to remind customers of past-due balances and, if eligible, customers need the notifications to receive energy assistance funds from community organizations.

“Our employees are committed to keeping the lights on for our communities and are working hard despite the challenging circumstances,” Bassham continued. “The health and safety of our employees, customers and communities continues to guide us as we work through this together.”

To protect the health of our employees and customers, Connect, which is Evergy’s walk-in customer service center in Kansas City, is closed through March 28. Customers may access their Evergy account online at evergy.com, receive assistance by calling Evergy customer service centers or make payments at an authorized [pay station](#).

Evergy call centers are open 7 a.m. to 7 p.m. Monday through Friday and may be experiencing high call volumes. Much like grocery stores, to minimize the number of people gathered in its contact centers, the

company isn't bringing in additional staff, so customers' patience is appreciated while customer service representatives work through the anticipated high volume of customer calls. Evergy Missouri and Kansas Metro customers can reach customer service at (816) 471-5275 or toll-free at 1-888-471-5275. Evergy Kansas Central customers can call 1-800-383-1183.

– 30 –

About Evergy, Inc.

Evergy, Inc. (NYSE: EVRG) serves approximately 1.6 million customers in Kansas and Missouri. We were formed in 2018 when long-term local energy providers KCP&L and Westar Energy merged. We generate nearly half the power we provide to homes and businesses with emission-free sources. We support our local communities where we live and work, and strive to meet the needs of customers through energy savings and innovative solutions.
