## **Weather Normalization Adjustment Filing**

The following bullets detail the actions taken in calculating Actual Degree Days (ADD).

- We have used the latest available NOAA weather data as of July 10, 2011.
- Substitutions were based on the nearest station with available data when NOAA Level 2 Station data was unavailable.
  1. Unavailable: suggests it wasn't published online or hard printed as July 10<sup>th</sup>, 2011.
- Substitution Process:
  1. The Normal Degree Days were subtracted from the Actual Degree Days of the nearest weather station with available data.
  2. That difference was then added or subtracted from the Normal Degree Days of the Level 2 station in question.
