Number of customers represents the number of accounts that have past due amounts in the specified traunch. For example, if an account has a past due amount that is 30 days late and a past due amount that is 60 days late, the customer is counted in both the 30 day and 60 day traunch. To arrive at the number of customers with only past due amounts of 30 days, subtract the 60 day customer count from the 30 day customer count. For residential customers in 2019 this would be 50,686 - 32,615 = 18,071.
