March 14, 2017

I request a hearing on KCC Invoice # H0005662 for the following reasons.

- 1 - 393,71110 pertains only to a tow bar operation which I did not have. Mine was not a tow bar but a factory Holman Wrecker. Also there were five (5) safety chairs and three chain binders on the wrecker unit which the cop took pictures of.
- 2 - I did not have a flat tire. - 393,75A
- 3 - The turn signals both directions worked on the second unit. The cop did not check the turn signals on the rear of the unit or I did not hear him say right or left turn. It was at night in the dark and a long distance back to the rear of the 2nd unit and I had my window rolled up because it was cold and very windy outside and I was recovering from the flu. I have two witnesses that were following me I can bring them to verify the turn signals were working. The cop was very arrogant as he always is and if he asked me to respond to his orders from app. 50 feet away and I didn't hear him he surely would have just put it up.

4- 395.8A - I was only 2 to miles from home
when the cop stopped me and had only
gone 38 miles to pickup the truck. I am not
a truck driver for a living I am a truck
dealer as you well know and only rarely
pick up a truck or delivers one when we
sell one. I own the company and do not
punch a time clock. I am 76 years old
and mostly retired. Also I am not a KCC
operator and have no need KCC authority
I am not in the trucking business. I also
request time at the hearing to discuss the
money that I have coming from your sale of
my 2 trucks
