Re: Docket No: 21-CONS-3018-CUIC

Dear Mr. Myers,

Following a recent test of both the Pfister #1-6 and #2-6, it was determined the rate of oil production from the #1-6 is too low to justify converting the #2-6 to a disposal. Even though the application to convert the #2-6 to a disposal would have been approved considering the outrageous argument made by Mr. Keenan, an owner in many disposal wells himself in Stafford County, EOC would not allocate funds toward this conversion at this time. If the circumstances change in the future, we look forward to refiling the application. However, at this time we formally withdraw our application.

Sincerely,

David Withrow
Managing Partner
