RE: Application for Injection Authority of R & D Oil, LLC
Docket 18-CONS-3324-CUIC

Dear Mr. Stucky:

We need a hearing for this docket. A 1920's map exists which indicates about 7 wells very close to, or in, the Roberson Lease in section 8. And, in section 7, just west of section 8, this map shows several wells for which the corresponding KGS interactive map shows no plugged wells. It's not at all clear that all these 1920's wells have been discovered and plugged. That is, there is no indication of a plugged well, on the KGS map, and if one were to use the 1920's map as a guide, there should be a plugged well. We could sort this out in a hearing, I believe.

Cordially,

Polly Shteamer
