I am a resident of Council Grove, KS. I am writing to request a formal hearing regarding an Application for Injection Authority, Docket D-32, 464, Quail Oil & Gas, LC, Sly #2-6 SWD, Sec 6-T17S-R6E, Morris County, KS.

It's my understanding most induced earthquakes in the United States are a result of the deep disposal of fluids (wastewater) related to oil and gas production. As a result the area could be destabilized and it is possible for the toxins in these fluids to leech into groundwater and drinking water sources. Seismicity can be induced at distances of 10 km or more away from the injection point and at significantly greater depths than injection. It concerns me greatly that the site mentioned in the application of the proposed injection well is within that proximity to several freshwater springs as well as several fault lines.

I would like to formally request a hearing in accordance with the Conservation Division regulations regarding hearings laid out in your letter to me of Feb. 10. I am notifying Quail Oil & Gas of my objection along with this letter..

Sincerely,
Karla Jo Grimmett
