David J. Heinemann Docket Room

Dear Mr. Heinemann:

In response to the Investigation by the KCC into the adequacy of future generation capacity under Docket No. 99-GIME-321-GIE, we offer the following information.

As a rural electric distribution cooperative, we do not have any generation capacity, but depend solely on our two G&T Cooperatives (KEPCo and Sunflower) to supply our capacity needs. These G&Ts also project future capacity requirements for distribution systems by preparing power requirement studies each year. For this reason, we respectfully request that data required for this document be supplied by G&Ts who readily have this information available. If other information is required or this is not acceptable please advise.

Sincerely,

Jack Colgin
