## THE STATE CORPORATION COMMISSION OF THE STATE OF KANSAS

Before Commissioners:

Shari Feist Albrecht, Chair Jay Scott Emler Pat Apple

In the Matter of a Petition for Commission ) Review of a NANPA or PA Decision to ) Withhold Growth Numbering Resources ) Do Following the Expedited Review Process for ) the Assignment of Numbering Resources in the ) Manhattan, Kansas Rate Center. )

Docket No. 15-TCAT-395-MIS

## ORDER OVERTURNING NANPA'S DECISION DENYING TELEPORT COMMUNICATIONS AMERICA, LLC AN ADDITIONAL NUMBER BLOCK

NOW, the above-captioned matter comes before the State Corporation Commission of the State of Kansas ("Commission") for consideration and decision. Having reviewed its files and record and being duly advised in the premises, the Commission makes the following findings:

1. On February 25, 2015, Teleport Communications America, LLC, d/b/a AT&T (TCA), on behalf of Kansas Secured Title, made application with the North American Numbering Plan Administrator (NANPA). TCA's Application requested the Thousands-Block Number Pooling Administrator (PA) to assign TCA one (1) block of 1,000 Direct Inward Dialing (DID) numbers in the Manhattan, Kansas rate center. Due to the PA's months-to-exhaust (MTE) and/or Utilization requirements, the PA denied TCA's Application. TCA is a Competitive Local Exchange Carrier (CLEC) providing services in Manhattan, Kansas, and selected locations throughout the state.

2. 47 C.F.R. 52.15 (g)(4) allows carriers to challenge the PA's decisions on numbering resources by petitioning the appropriate state regulatory commission for review of the

decision. 47 C.F.R 52.15 (g)(4) states that the state commission may "overturn the NANPA's [or PA's] decision to withhold numbering resources from the carrier based on its determination that the carrier has demonstrated a verifiable need for numbering resources and has exhausted all other available remedies". The Commission has established an expedited review process for overturning the PA's decisions in Docket No. 01-GIMT-552-GIT, Order No. 5, issued September 13, 2002.

3. On March 9, 2015, TCA filed a petition requesting this Commission to review and overturn the decision of the PA denying additional number resources. TCA states that they were approached by an established existing customer, Kansas Secured Title, with a request for 20 consecutive numbers from the 785-473-2XXX block range. TCA further stated that Kansas Secured Title is completing a statewide network and phone system that requires consecutive numbers in order to complete installation and interaction with its existing configuration and numbering scheme.<sup>1</sup>

4. On March 12, 2015, the Commission Staff ("Staff") submitted its Report and Recommendation of even date, which is attached hereto and made a part hereof by reference. Staff noted that TCA's utilization of existing numbers assigned to it in the Manhattan rate center is 46.5%, which does not satisfy the Federal Communications Commission (FCC) requirement for utilization of 75%. At the time of TCA's request, the company's months to exhaust was .292, which meets the FCC's requirement for a reserve of not more than 6 months. However, the PA denied the Application because the applicant must meet both the utilization and the months to exhaust requirement to qualify for additional number block assignments.<sup>2</sup> Concluding, Staff states that it is sensitive to and supportive of customers upgrading their equipment to provide

<sup>&</sup>lt;sup>1</sup> Application, page 2.

<sup>&</sup>lt;sup>2</sup> Report and Recommendation, page 2.

more efficient telecommunications services and a company's desire to meet those needs in an efficient and timely manner. Staff has reviewed TCA's Petition for Expedited Review and accompanying materials and recommends the Commission overturn the PA's decision and direct the PA to assign the requested numbers in the Manhattan, Kansas rate center, as originally requested by TCA.<sup>3</sup>

5. The Commission finds that TCA has demonstrated a verifiable need for additional numbering resources and further finds Staff's determinations and recommendation to be reasonable and that it should adopt the same.

## IT IS, THEREFORE, BY THE COMMISSION ORDERED THAT:

A. The February 25, 2015 decision of the PA is overturned, and the PA shall assign the numbering block in the Manhattan, Kansas rate center as originally requested by Teleport Communications America, LLC d/b/a AT&T.

B. The parties have fifteen (15) days, plus three (3) days if service of this Order is by mail, from the date this order was served in which to petition the Commission for reconsideration of any issue or issues decided herein. K.S.A. 66-118b; K.S.A. 2014 Supp. 77-529(a)(1).

C. The Commission retains jurisdiction over the subject matter and parties for the purpose of issuing such further order, or orders, as it may deem necessary.

## BY THE COMMISSION IT IS SO ORDERED.

Albrecht, Chair; Emler, Commissioner; Apple, Commissioner

# REPORT AND RECOMMENDATION UTILITIES DIVISION

- TO: Chair Shari Feist Albrecht Commissioner Jay Scott Emler Commissioner Pat Apple
- **FROM:** Paula Artzer, Senior Telecommunications Analyst Christine Aarnes, Chief of Telecommunications Jeff McClanahan, Director of Utilities
- **DATE:** March 12, 2015
- **SUBJECT:** 15-TCAT-395-MIS In the Matter of Teleport Communications America, LLC's Petition for Commission Review of NANPA or PA Decision to Withhold Growth Numbering Resources Following the Expedited Review Process for the Assignment of Numbering Resources in the Manhattan, Kansas Rate Center.

# **EXECUTIVE SUMMARY:**

On March 9, 2015, Teleport Communication America, LLC (Teleport) filed a Petition requesting the Commission review and reverse a decision of the Thousands-Block Number Pooling Administrator (PA) for the assignment of additional telephone numbers in the Manhattan rate center. Teleport requests expedited review and processing, as set forth in Docket No. 01-GIMT-552-GIT.<sup>1</sup>

## **BACKGROUND:**

The PA and the North American Number Plan Administrator (NANPA) are independent third parties responsible for the non-discriminatory administration and assignment of numbering resources. The NANPA is responsible for administering and assigning central offices codes (10,000 numbers) and area code matters. In those rate centers where Pooling has been implemented, the Pooling Administrator is responsible for the assignment and administration of numbering resources in blocks of one thousand (1,000) numbers; the Manhattan rate center is one such location.

<sup>&</sup>lt;sup>1</sup> Order No. 5. In the Matter of a General Investigation into Number Conservation Measures, Docket No. 01-GIMT-552-GIT, dated Sept. 13, 2002.

The FCC, in its Number Resource Optimization proceedings (FCC, CC Docket # 99-200), established two thresholds service providers must meet before the Administrator can assign additional (growth) numbers: (1) utilization of existing numbers must be at least 75%; and (2) there must be no more than six (6) months to exhaust of the provider's existing numbers. However, State Commissions have been given authority to review and, if appropriate, reverse denials by the PA and/or the NANPA (47CFR 52.15(g)(4)). This authority was addressed by this Commission in Order #5 in Docket 01-GIMT-552-GIT, establishing an Expedited Review Process in such matters.

The Petitioner is a Competitive Local Exchange Carrier providing telecommunications services in Manhattan, Kansas, and selected locations throughout the state.

## **ANALYSIS:**

Teleport states that it has been approached by an established existing customer, Kansas Secured Title, with a request for 20 consecutive numbers from the 785-473-2XXX block range. Kansas Secured Title is completing a statewide network and phone system that requires consecutive numbers to complete installation and interaction with its existing configuration and numbering scheme.

Teleport made Application for an additional number block to meet the customer's needs to the Pooling Administrator on January 12, 2015. According to the Application, utilization of existing numbers assigned to the Petitioner in the Manhattan rate center is 46.5%, which does not satisfy the FCC requirement for utilization of 75%. At the time of the request, Teleport's months to exhaust was .292 which meets the FCC's requirement for a reserve of not more than 6 months. However, the PA denied the Application as the Petitioner must meet both the utilization and the months to exhaust requirement to qualify for additional number block assignments.

Staff is sensitive to and supportive of customers upgrading their equipment to provide more efficient telecommunications services and the Petitioner's desire to meet those needs in an efficient and timely manner.

Staff believes the FCC's Number Pool donation rules will be effective in maintaining and improving number resource utilization on a going forward basis.

Staff further notes that the NANPA's current estimated exhaust date of the 785 area code is the third quarter of 2024.

## **RECOMMENDATION:**

Staff has reviewed this Petition and recommends the Commission overturn the PA's decision in this matter and direct them to assign the requested numbers in the Manhattan, Kansas, rate center as originally requested by the Petitioner.
