Dear Sir,

I am protesting the application for injection well being made by Redbud Oil & Gas Operating, LLC (API # 15-125-32074 , at GPS Location: Lat. 37.3708439 Long. -95.9366777 in Sec. 12 Twp.31 S.R. 13E)

We still hold and always have held the mineral rights to our property which is adjacent to the proposed well sight. We still hold these rights specifically because we will not allow an injection well. Placing this injection well at the proposed location will subject us to all of the hazards to our ground water and resources formations which are associated with an injection well while we are not being compensated for assuming the risks involved. Numerous wells have already been drilled extremely close to our property line with the intent to pull the resources from under our property. The Westfall lease is a large piece of property. The injection well can be placed somewhere else that will have less chance for impact on our property.

Arlyn Hare
