RE: Request For Hearing  
Penalty Assessment  
19-CONS-3276-CPEN

Dear Ms. Wright:

We are in receipt of a Notice of Penalty Assessment as regards our Monger #4 well in Gray County, Kansas.

Please find enclosed a check in the amount of \$100 for the assessed penalty.

We hereby request a hearing on this matter. The hearing concerns a determination on the allowable future operations for the subject well. Specifically, we would like an extension of time to bring the well back into compliance with KCC regulations and a determination if it would be permissible to cement a liner in the well to restore integrity.

If the well could then pass a Mechanical Integrity Test, could it be put back into service? If not, then we request the well be approved for plugging.

Please contact me regarding any additional information we need to submit prior to setting a hearing.

Sincerely,

Rod A. Phares  
President
